Due to various logistical reasons the Learn PIC programming in 4 hour course for Gauteng has been changed to 27 March 2010. The SARL has also entered into an arrangement with Microchip to make the course available to a wider audience. Within hours of the Microchip mail having been sent out, bookings and enquiries started coming in. If you are planning to attend the course, do not delay making a booking. Details on www.sarl.org.za, click on RTA. Only a limited number are accepted for each course.

HOW SEVERE CAN THE EFFECT OF RFI BE?

>From Newsline comes the story of a New Mexico resident who alleges he suffers from electromagnetic allergies who has filed a court action against his neighbour because she refuses to turn off her home electronic equipment. According to the news story, Arthur Firstenberg of Santa Fe, has been sleeping at friends' homes or in his car to avoid what he claims are the electromagnetic waves created by his neighbour's cell phone, wireless network, computer, compact fluorescent light bulbs and lamp dimmer switches.

Firstenberg claims that the low-level electromagnetic radiation emitted by cell phones and other modern gadgets makes him, and others sensitive to radio waves, suffer terribly. He believes that the side-effects of exposure, include nausea, vertigo, ringing in the ears, severe headaches and body aches. He also credits crippling joint pains, insomnia, impaired vision, impaired muscular control and other ailments to electromagnetic sources.

The suit claims that when Raphaela Monribot moved in next door, she refused to keep her phone, computer and wireless network turned off when not in use. When asked if she could use a landline instead of her iPhone, Firstenberg claims the neighbour flatly refused.

The Firstenberg suit demands that a judge stop his neighbour from using her iPhone, her wireless internet and her laptop charger, saying the radiation has forced him from his home. He also wants $530 000 in damages, including $100 000 for pain and suffering.

You may well ask "what next!"

LICENCE RENEWALS

If you have paid your amateur radio license using the license number you may still receive an invoice from ICASA. Amateur Radio license renewals were printed in the first week of January but due to a hick up

with the mailing company the invoices were not mailed until recently. Mailing of accounts has started but it may still be a week or two before you receive yours. If you have paid in the interim this will not be reflected on the invoice you receive.

If you have paid ignore the invoice. Please do not phone ICASA.

ICASA has also issued a statement to the SARL that no action will be taken for non payment until 30 days after all the invoices have been mailed.

REGISTER NOW FOR THE 2010 SA AMSAT SPACE SYMPOSIUM

Registration for the 2010 SA AMSAT Space Symposium is now open. The symposium will be held at the University of KwaZulu-Natal on 17 April 2010. There is a substantial discount for early bird bookings. Visit www.amsat.org.za for details and the registration form.

Bona fide students and learners are invited to apply for free registration made possible through a grant from the Department of Science and Technology through the FRD (Foundation for Research and Development) and UKZN.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at low levels. Currently sunspots 1 051, 1 052 and 1 053 are doing their bit for solar activity although they are fairly small sunspots. The effective sunspot number is expected to be less than 20 for the coming week.

20 and 15 m will provide the best opportunities for DX. Conditions to India will be good from the afternoons onwards. During the late afternoons and early evenings it will be fair towards Europe. In the afternoons there are good possibilities of contacts with the USA on 15 m. Contacts with Australia and New Zealand will be challenging. During the afternoons and evenings good 20 and 15 m contacts may also be possible with Brazil.

It seems that 6 m is also starting to show signs of life with reports of the Kenian beacon and other DX signals heard.

Local conditions are going to be good on 40 m during the day time. 80 m may perform well during the early mornings and late afternoons over the shorter distances. 30 m will perform well during the middle of the day. 20 m is very useful for contacts over the longer distances during the majority of the day.

80 m is the frequency of choice in the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

7 March - SARL HAMNET 40 Metre Simulated Emergency Contest from 12:00 to 14:00 UTC. 13/14 March - RSGB Commonwealth CW only Contest. 19/21 March - SARL VHF/UHF Digital Contest. 20/21 March - SARL VHF/UHF Analogue Contest. 27 March - Pretoria Amateur Radio Club Flea market at 08:00. 27 March - PIC programming in 4 hours course at the NARC. 31 March - SARL 80 m Club Contest with PSK and RTTY. 31 March - Closing date for stage 1 of the Construction Competition. 17 April - 2010 SA AMSAT Space Symposium. 23-25 April - SARL National Convention, Port Elizabeth. 7 May - Closing dat for stage 2 of the Construction Competition.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items, if possible, in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria-area, with relays on 7 082, 7 205 and 17 860 kHz. There is also a podcast by ZS6RO. For a webstream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 21:00 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League compiled and edited by George, ZS6NE.

Thank you for listening, 73.
/EX

154. NZART Headquarters Infoline Issue 202

NZART Headquarters Infoline Issue 202
07-MARCH-2010
NZART Website: http://www.nzart.org.nz/

Greetings
Welcome to Headquarters-Infoline a twice-monthly bulletin of news from NZART Headquarters e-mailed directly to Branches, the amateur radio packet Bulletin Board Service and to others that subscribe through the NZART Website at:
http://www.nzart.org.nz/lists/infolinelist.html

A special issue of Infoline was e-mailed on the 26-february-2010 with the news that the negotiations have broken down regarding the failure to get fully funded annual fees paid for Kordia accounts for repeater and beacon site leases. Full details can be obtained from:
http://www.nzart.org.nz/infoline/2010/infoline-22S.html

In This Issue
*From The Business Manager ZL2TDM
*Digital Conversion of Analogue Amateur TV Transmitters and Receivers
*NZART and Membership Numbers
*Web Items - The Home and The Search Pages
*NZ Amateurs Granted Access to 600 metre Band

>From The Business Manager ZL2TDM

Debby says...

There have been a few people who have been rather upset by comments made by the President on last weeks official broadcast...while it was not me that said it, I tend to agree with the sentiment. I urge all those who have yet to renew, join or rejoin the Association, that unless we can increase membership imminently, services and open hours at headquarters will require dramatic cost cutting to survive.

Please contact me if you are having difficulty finding the full annual subscription as payment options are available. Membership to the Association can be arranged on an annual basis for the nominal sum of $8 per month.

At Council's face to face meeting in February ...they resolved that all concessionary memberships are to be abolished as from 1 January 2011. This means that if you are one of these members who currently fall into this category, you will receive a letter from me inviting you to pay by the monthly payment option.

There are a number of you who just may find this a better way to continue to support the Association.

This month I will be sending out a branch circular. Included in this, is a form that needs to be completed by all branch committees requesting updated branch information. All branches please return this to me, even if your details have not changed.

Information on NZART members within a branch can and will only be provided to a Branch secretary. Please save me and yourselves the embarrassment if you do not hold this position, I am unable to provide this information in accordance with the Privacy Act.

If an individual of a branch require membership status of NZART, I can provide their details directly.

Finally in order to ensure proper process is followed, if your branch needs to update their examination supervisors, this must now be placed in writing on the Exam Supervisor application form, with a copy of the branch minutes nominating the person or persons to the position.

Until next time Debby ZL2TDM
****
Digital Conversion of Analogue Amateur TV Transmitters and Receivers

In Headquarters Infoline Issue 200, Branch 74, The Wellington VHF Group Incorporated, invited members to take advantage of a bulk purchase scheme of equipment for Digital Amateur Television (DATV).

As a result of this scheme, four sets of DATV transmitting equipment, three sets of DATV receiving equipment, and a variety of DATV test equipment, were ordered. The equipment will be despatched to purchasers in the next few days.

Branch 74 thanks all the members who participated in the scheme.

Branch 74 hopes to have several working DATV systems on display at the Lower Hutt-Wellington Expo 2010 on Saturday the 27th of March.

Contact details. Branch 74: zl2wa@clear.net.nz

Contact details. Expo 2010: zl2hv@nzart.org.nz

NZART and Membership Numbers

Yr: 1999 2000 2001 2002 2003 2004 2005 2006 2007 2008 2009
Tx: 2539 2128 2006 1867 1947 1926 2008 1716 1993 1911 1449
NT: 65 52 51 39 46 49 43 33 31 23 24
Os: 70 62 64 38 32 35 27 28 31 33 25
Cy: 106 103 101 91 94 60 96 95 93 92 91
Tl: 2780 2345 2222 2035 2119 2070 2174 1872 2148 2059 1589
Ls: 411 122 139 +80 21 +82 292 +277 82 462

Source: Gen-Sec Annual Report (B-I)(Original data is in public domain)

Abbreviations: Yr=Year, Tx=Transmitting member, NT=Non-Transmitting member,
Os=Overseas member, Cy=Complementary, Tl=Total membership for year and
Ls=Los of members (plus sign means a gain for that year)

NOTES:
1. ï¿½ Loss of Transmitting Members from 1999 to 2009 = 1090 members
2. ï¿½ A 10-year period = 109 members LOST PER YEAR
3. ï¿½ Greatest loss is for 2009 of 462 members
4. ï¿½ Previous worst loss = 411 in 2000, the Association never recovered
5. ï¿½ "New Rules" (post-WRC-03) commenced in 2004.
6. Effect of Morse Code removal on numbers = NIL!

7. ï¿½ Say 462 members are lost each year from now:
ï¿½ Membership at end of 2010=1127
ï¿½ Membership at end of 2011=665
ï¿½ Membership at end of 2012=203
ï¿½ Membership at end of 2013=0

8.ï¿½ Using the average figure of 109 members per year loss, the drop in
membership per year will be:
ï¿½ Membership at end of 2010=1480
ï¿½ Membership at end of 2015=826
ï¿½ Membership at end of 2020=281
ï¿½ Membership at end of 2022=63
ï¿½ Membership at end of 2023=0

It is not difficult to work out a conclusion if either of the events in item
6 or 7 occurs! Bye-Bye NZART. NZART will not exist after 2012 or 2022.

NZ Amateurs Granted Access to 600 metre Band

Following submissions from NZ Association of Radio Transmitters (NZART), the group that represents NZ amateur radio operators, the NZ Government has agreed to grant NZ Amateurs temporary access to a slice of the 600 metre spectrum.

>From 1 March 2010, NZ Amateurs will have access to some of the spectrum that was previously used for Morse code communications with ships.

The new band, 505 to 515 kHz has been granted on a temporary basis pending an international allocation to radio amateurs and includes some restrictions:

* These frequencies are, or may be, allocated for use by other services. Amateur operators must accept interference from, and must not cause interference to, such other services.

* Radiated power must not exceed 25 watts e.i.r.p.

* The bandwidth of emissions must not exceed 200 Hz

On the international scene, work continues to gain a world-wide allocation in this area through the International Amateur Radio Union (IARU), the group that represents Radio Amateurs internationally. Once this is approved, it is likely that the New Zealand Amateurs will be granted a permanent allocation in the 600 metre area.

The updated Amateur GURL which is effective from 1 March 2010, can be found at:
http://www.rsm.govt.nz/cms/licensing/types-of-licence/general-user-licences/amateur-radio-operators/
****
NZART Stolen Equipment Register

NZART council has decided to discontinue the Stolen Equipment Register, effective immediately.

All equipment that is stolen should be reported to your local Police Station.
****
VHF Records 2010

The ZL records for 2010 have been updated with a new 122 280 MHz (2.5 mm) record on the list set by ZL1TBG/p and ZL1TPH/p on 6-February-2010. On the NZART Web there are pictures of the equipment used for this record of using

near light type frequences.

The records for Moonbounce (EME) and World (Terrestrial) have been updated for 2009.

http://www.nzart.org.nz/vhf/index.html
****
Two New NZART Officers Appointed

Replacing John Powell ZL1BHQ for the position of Contest Manager is Frank Hunt ZL2BR. John Powell ZL1BHQ, has supplied the weekly contest reports for the NZART Web, the HF part of the contest section of HQ Infoline and some reflectors for some years now.

Likewise the position of VHF/UHF/SHF Records Coordinator is now Simon Lewis ZL4PLM, replacing John Wysocki ZL2TWS. John ZL2TWS, who has done the job of keeping the records straight for many years.

Thank you both Johns for your contribution to NZART and we all wish you success in using the spare time you have now not working for NZART.

Welcome aboard for Frank ZL2BR and Simon ZL4PLM.

Jamie Pye ZL2NN

HF Contests

NZART WARO THELMA SOUPER MEMORIAL CONTEST
****
When: - 10 and 11 April 2010
Times:- 0800Z until 1000Z both evenings
Modes :- CW and SSB

The Annual memorial contest activity to commemorate the memory of the Late Thelma Souper a former stalwart of the NZ Womens' Amateur Radio Organization and considered to be "The Grand Old Dame" of WARO.
Contest Rules and Other Operating information is now available from the WARO Website :- http://www.qsl.net/zl6yl/awards.html.

KIWI DX GROUP DIGITAL MODES CONTESTS
****
80M - 17 April 2010
40M - 24 April 2010
Times - 1000 UTC until 1100 UTC both evenings

Contest Rules and Other Operating Information available from the Group's Website http://www.qsl.net/zl2sky/new_page_1.htm

2010 NZART SANGSTER SHIELD QRP CW CONTEST
****
When :- Saturday, 15 May 2010 and Sunday, 16 May 2010
Times :- 2000 NZST until 2300 NZST each evening
Band :- 80m
Mode :- CW only.

The contest was established in 1927 at the time the late Mr. Ralph Sangster presented to the radio Amateurs of NZ the trophy, known as the Sangster Shield, for annual competition to be won by the most efficient station. It is pertinent to note not only did the efficiency of the station be taken into account, but also the efficiency of the operator concerned The terms of the gift of the trophy were that the competition was to be conducted on the 80 metre band using input power of not more than 5 watts and to be solely restricted to Morse operation.

Contest Rules and other Operating Information is available from the NZART website - http://www.nzart.org.nz/contests/

For the contests below please see the NZART Web at:
http://www.nzart.org.nz/contests/index.html
Click on GOTO Contest Manager's Reports
for the latest contest report.

Iceland's radio hams get access to 70 MHz and 500 KHz

On February 19, Radio Amateurs in Iceland were granted temporary experimental access to the 70 MHz and 500kHz bands.

Licensees holding "N" and "G" class licences can apply to the Icelandic Post and Telecom Administration for a special permit for 70 MHz which is valid until December 31, 2010 and gives access to 70.000-70.200 MHz. Access is secondary with a 100 watt power limit and a maximum bandwidth of 16 kHz.

Permits are also available for the 493-510 kHz band, only A1A is allowed with up to 100 watts.

NZ Amateurs Granted Access to 600 metre Band

Following submissions from NZ Association of Radio Transmitters (NZART), the group that represents NZ amateur radio operators, the NZ Government has agreed to grant NZ Amateurs temporary access to a slice of the 600 metre spectrum.

>From 1 March, NZ Amateurs will have access to a new band, 505 to 515 kHz on a temporary basis pending an international allocation to radio amateurs and includes some restrictions:

These frequencies are, or may be, allocated for use by other services. Amateur operators must accept interference from, and must not cause interference to, such other services. Radiated power must not exceed 25 watts e.i.r.p. The bandwidth of emissions must not exceed 200 Hz.

On the international scene, work continues to gain a world-wide allocation in this area through the International Amateur Radio Union (IARU), the group that represents Radio Amateurs internationally. Once this is approved, it is likely that the New Zealand Amateurs will be granted a permanent allocation in the 600 metre area.

St. Patrick's Day Special Event Station.

The Foyle and District ARC, situated 5 miles south of Derry, has been allocated the callsign GB5SPD to celebrate St. Patrick's Day. The callsign will be used over several days, from March 15th until March 17th.

While most of the contacts will be ssb, it is hoped to use digimode this year for the first time. A special QSL card has been printed for the occasion and reports from SWL's will also be most welcome. More details may be found on the qrz.com page, GB5SPD.

Dromineer Castle Activation

Members of the Galway VHF Group will be heading to Dromineer to activate Dromineer Castle on Wednesday the 17th of March. The designated number for this Castle will be EI-04-C. These numbers are obtained from Steve, EI5DD, and are essential for claiming the CASHOTA-Ireland and UK awards. Operation will be on 80, 40 and 20 metres from 10 AM until around 3 - 4 pm.

Dromineer Castle is situated next to the Harbour on the banks of the Shannon, a popular mooring spot for the boating fraternity and an excellent spot for a picnic. Galway VHF Group member, Declan EI2GE, ownes the Hostel next to the Castle and will be preparing a fine feast at the end of the day before the group heads back to Galway.

This is the first in a series of activations planned for this year.

Bere Isl EU-121 Activation

Olivier ON4EI will be activating BERE ISLAND EU-121 as EJ8GQB, his new Irish callsign (EI8GQB). This solo expedition is planned from 21st-29th March 2010.

Activity will be 160-10m SSB/RTTY. HB: Spiderbeam beam LB: 18m vertical mast top loaded + 30*radials Rig: K3 100W

He will also make part to the CQ WPX SSB CONTEST March 27th-28th 2010.

For more details about the trip, see http://www.qrz.com/db/ej8gqb

---

Rallies

Lagan Valley ARS Rally 20th March

The Lagan Valley ARS Rally will be held at 11.30am in The Village Centre, Hillsborough, Co Down.

Contact: Jim Henry, GI0DVU on 048 9266 2270

For further Rally info and contact details please check out the IRTS Website at

http://www.irts.ie/cgi/rallies.cgi

History this week

1876 Bell - Granted US Patent for his telephone.

1893 Edison opens first motion picture studio, West Orange, New Jersey.

1897 Marconi demos to UK Army etc achieving about 5kms.

1894 First steel sailing ship Dirigo, launched in Maine, USA. 1899 SS "R F Matthews" collided with the lightship, which alarmed the lighthouse ashore to get assistance. This was the first time ever a distress call was transmitted by radio from a ship at sea! Sent 'HELP' etc...

Items for inclusion in next weeks Radio News should be forwarded to Charlie EI8JB, preferably via e-mail to "charlie dot carolan at gmail dot com" Or by phone to 087-6265418 News can also be submitted via e-mail to "newsteam at irts dot ie" for automatic forwarding to both the radio and printed news services.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

158. [DXNL] DXNL 1666 (Mar 10, 2010)

DXNL 1666 - Mar 10, 2010
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

CN - MOROCCO
Alfredo,IK7JWX (5C2J), Leo,I8LWL (5C2L), Simon,IZ7ATN (5C2SG),
Ruggero,IK2PZC (5C2P), Antonello,IK2DUW (5C2W), and Michele,IK2GPQ
(5C2Q), are going to activate the cities of Essaouira (ARLHS MOR-019)
Agadir in CW/SSB/PSK31/RTTY on all HF bands and 6m from Mar 16-23.
QSL cards should be sent via their homecalls.

CT9 - MADEIRA, AF-014
Once again Madeira (AF-014) is the holiday destination of the two
DXpeditioners Rosel,CT9/DL3KWR, and Hardy,CT9/DL3KWF, for four weeks.
From Mar 11-25 they are staying in their first QTH and will then move
to a second QTH with worse possibilities for antennas. After every 10th
unreplied CQ call in RTTY or PSK31 they will QSY to CW. Activities will
take place every day until 1000 UTC and from 1600 UTC until midnight.
They prefer working on the WARC bands and in CW, RTTY or PSK31.
eQSL is ok 100%, requests for paper QSLs can be sent via dl3kwr@darc.de
or dl3kwf@darc.de or via homecalls.

FG - GUADELOUPE, NA-114 / FS - ST MARTIN, NA-105
Alain,F6BFH, and his XYL are spending their holidays in the Caribbean.
Alain is QRV as FG/F6BFH from Les Saintes Islands (Guadeloupe, NA-114,
DIFO FG-007) until Mar 12. Their next stop will be the island of
Saint Martin (FS, NA-105) where Alain will work as TO5SM in CW/SSB and
some RTTY on HF from Mar 13-23.
QSL cards will be confirmed via bureau or direct after his return home.
See also the online news at: http://alan-f6bfh.blogspot.com

HC - ECUADOR
Pablo,HC5NAI, has passed all exams for the highest licence class and is
now active as HC5AI. This was the former callsign of his father OM Alfo
who passed away. Pablo is a CW DXer and can also confirm older QSOs of
his father. Since Ecuador has only an incoming bureau you can request

QSLs only direct with return postage of 2 US $ or new IRCs.

I - ITALY (Seborga)
Is this another try to establish the Principality of Seborga as a new DXCC entity? Zoli,HA3HK, will be active as T03HK from Mar 12-14. Wikipedia writes about it: "Seborga is a small town in the region of Liguria in northwest Italy, near the French border. Administratively, it is a comune of the Italian province of Imperia, although some locals claim that it is an independent principality."

J3 - GRENADA, NA-024
Colin,G3VCQ, and Sharon,M3VCQ, will show up as J38CW and J38SW working in CW and SSB on all bands from Grenada (NA-024) from Mar 11-25. They are using a mini beam for 20/17/15/12/10m and verticals for 30m-160m. All QSLs direct or via bureau to G3VCQ.

V2 - ANTIGUA AND BARBUDA, NA-100
Babs,DL7AFS and Lot,DJ7ZG, are on tour again visiting Antigua (NA-100). Listen for V21ZG in RTTY/PSK/SSB on 80m-6m between Mar 16 and Apr 4. Emphasis will be put on working JA and QRP stations.
As usual QSLs direct or via bureau to DL7AFS.

V6 - FEDERATED STATES OF MICRONESIA, OC-260
Mike,V63MY, and Jan,V63TO, showed up from the Oroluk Atoll (OC-260) and will stay there until Mar 12. QSLs direct via OM2SA or via LoTW.

VP2M - MONTSERRAT, NA-103
VP2MCC is the callsign of Nick,G4FAL, who is staying on the island of Montserrat (NA-103) from Mar 10-17. He prefers working in CW on 10m-80m and maybe also on 160m. He will also join the RSGB Commonwealth Contest on Mar 13/14. QSLs direct or via bureau to G4FAL or via LoTW.

ZK3 - TOKELAU ISLANDS, OC-048
ZK3OU and ZK3YA are the calls of Bill,N7OU, and Bob,W7YAQ, for their planned activities from Tokelau (OC-048). This activity was postponed due to bad weather.

8Q - MALEDIVE ISLANDS, AS-013
Noel,F6BGC, is spending his holidays on Madoogali (North Male atoll, AS-013) from Mar 13-21. He is going to hit the airwaves as 8Q7NC on 6m-80m from time to time. QSLs direct or via bureau to his homecall.

TP2CE - COUNCIL OF EUROPE
The "Council of Europe Radio Amateur Club" will activate the callsign TP60CE in SSB, CW, RTTY, PSK and via satellite from Mar 12-14. TP60CE commemorates the 60th anniversary of the Convention of Human Rights of the Council of Europe. QSLs direct or via bureau to F5LGF.
More information can be found online at: http://ewwa.free.fr

SERBIA, SPECIAL EVENT STATIONS
The radio club "Matica-Zemun" (YU1AVQ) celebrates the 140th anniversary of the "Volunteer fire brigade Matica" by activating the special call-sign YU140Z until May 31. QSLs via YU1AVQ.

The "YU CW Club" is celebrating its 40th birthday with several YU40
and YT40 special callsigns.

SILENT KEYS: Following DXers passed away during the last weeks:
Zlatko Mihelcic (9A2CE), Alf Coupe (VK3CQE), Juan Carlos Oxoby (LU1CC),
Barry J. Phillimore (G4VXT), Miguel Andrade Marin (HC1AB),
Alfred L. Pedneau, Sr. (K5HKG), N. Ramachandra Rao (VU2NO) and
Darragh E. McCluer (WA6IKS/HS0ZAG).

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Mar 13: DIG QSO Party, SSB (20m-10m)
Mar 13: AGCW-DL QRP Contest, CW
Mar 14: YL Activity Party 2010, SSB
Mar 14: DIG QSO Party, SSB (80m/40m).

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:
NA-079, W4, FL State (Dry Tortugas) Group: Some members of the Amateur Radio
Outdoor Adventures Inc will be QRV as K4T from Garden Key (USI FL-013S)
from Mar 11-15. QSL via HA1AG (direct/bureau).

OC-203, ZL, South Island's Coastal Islands: Ray,ZL4TY (VK4DXA), Paul,ZL4PA,
and Paul,ZL4M (ZL4PW), will show up from Stewart Island from Mar 12-23.
ZL4TY via VK bureau to VK4DXA or ZL4M via ZL bureau to ZL4PW.

Lighthouse activities (WLOTA/ARLHS/ILLW)

FG/F6BFH LH 3998 Les Saintes Mar 5-12
FS/KT8X LH 0383 St. Martin Mar 5-12
J38CW LH 0718 Grenada Mar 11-25

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, and K4UEE for the following DX information.

PJ6, NETHERLANDS ANTILLES. Three members of the Southeastern DX Club (SEDXC) and the K5D team (Bob/K4UEE, Gregg/W6IZT and George/N4GRN) will be on the Island of Saba (NA-145, Grid Square is FK87) between March 11-15th. Operators will sign PJ6/homecall. The purpose of this operation is to finalize plans and begin building a station for the anticipated political realignment in the Netherlands Antilles later this year. QSL via their home callsigns.

For publication Wednesday March 10, 2010.
73, Bob-K4UEE

RAC Bulletin 2010-007E - Canadian Amateur Radio Access to 137 Khz.
2010-03-10

Industry Canada has approved access by Canadian radio amateurs to the Low Frequency (LF) band 135.7 ? 137.8 kHz, subject to certain conditions. The Revised Canadian Table of Frequency Allocations, promulgated in December 2009 to incorporate changes arising from decisions taken at World Radiocommunication Conference (WRC) 2007, permits amateur use on a Secondary basis subject to Footnote 5.67A.

The Footnote states: "Stations in the amateur service using frequencies in the band 135.7-137.8 kHz shall not exceed a maximum radiated power of 1 W (EIRP) and shall not cause harmful interference to stations of the radionavigation service operating in countries listed in No. 5.67. (WRC-07)". Industry Canada has advised that Canadian radio amateurs may now use the band and that Schedule I of RBR-4 Standards for the Operation of Stations in the Amateur Radio Service will be amended in due course.

Richard Ferch VE3IAY/VE3KI
Vice President Regulatory Affairs Radio Amateurs of Canada

==> LEGISLATIVE AFFAIRS: ARRL REQUESTS SUPPORT FOR S 1755

<http://www.arrl.org/news/stories/2010/03/10/11385/?nc=1> Senate Bill 1755 -- The Amateur Radio Emergency Communications Enhancement Act of 2009 introduced in October 2009 by Senators Joe Lieberman (ID-CT) and Susan Collins (R-ME) -- has unanimously passed the US Senate and has been sent to the US House of Representatives for consideration and now sits in the House Committee on Energy and Commerce. The ARRL is asking its membership to contact the leadership of the Energy and Commerce committee, requesting support and action on moving S 1755 through the committee. S 1755 accomplishes the same things as HR 2160; HR 2160 was introduced in April 2009 by Rep Sheila Jackson Lee (D-TX-18). Since S 1755 has already been approved by the Senate, moving it forward in the House will simplify the process. Click here <http://www.arrl.org/news/stories/2010/03/10/11385/?nc=1> for more information, including instructions on how to encourage the committee's leadership to support S 1755.

==> FCC NEWS: FCC SEEKS COMMENTS FOR BLANKET WAIVER TO ALLOW AMATEUR RADIO IN HOSPITAL EMERGENCY DRILLS

<http://www.arrl.org/news/stories/2010/03/04/11375/?nc=1> In February 2010, the American Hospital Association (AHA) filed a request with the FCC for a blanket waiver of Section 97.113(a)(3) of the Commission's Rules "to permit hospitals seeking accreditation to use Amateur Radio operators who are hospital employees to transmit communications on behalf of the hospital as part of emergency preparedness drills." On March 3, the FCC issued a Public Notice -- WP Docket 10-54 -- seeking comments if the Commission "should grant AHA's request for a blanket waiver of Section 97.113(a)(3) to permit amateur operators who are hospital employees to participate in emergency drills that are conducted by hospitals for accreditation purposes and that are not government-sponsored." Section 97.113(a)(3) specifically prohibits amateur stations from transmitting communications "in which the station licensee or control operator has a pecuniary interest, including communications on behalf of an employer." Instructions on how to paper file or file electronically are listed in the Public Notice. Read more here <http://www.arrl.org/news/stories/2010/03/04/11375/?nc=1>.

==> ARRL RECOGNIZES: BOB SCHROEDER, N2HX, AWARDED 2009 BILL ORR, W6SAI, TECHNICAL WRITING AWARD

<http://www.arrl.org/news/stories/2010/03/08/11383/?nc=1> H. Robert "Bob" Schroeder, N2HX, of Ewing, New Jersey, has been named the winner of the ARRL Foundation's 2009 Bill Orr, W6SAI, Technical Writing Award for his article "Electromagnetic Pulse and Its Implications for EmComm" that appeared in November 2009 issue of QST. The editorial staff commented on Schroeder's article, saying that "the topic of nuclear EMP is somewhat esoteric by itself, let alone discussing its impact on Amateur Radio, yet the author did an outstanding job of making the subject matter understandable even to the relatively non-technical ham. His writing is clear and to the point, offering practical advice not only for EMP mitigation as it applies to the unlikely event of a nuclear burst, but also extending the same principles to mitigation for lightning damage." Read more here <http://www.arrl.org/news/stories/2010/03/08/11383/?nc=1>.

==> ARRL SEEKS INPUT FOR NEW IARU REGION 2 BAND PLAN

The International Amateur Radio Region 2 conference -- held later this year in El Salvador -- brings together delegations from the national Amateur Radio Societies in the Western Hemisphere. One of the topics on the agenda will be the Region 2 HF band plan. This band plan is "harmonized with" -- spectrum management-speak for "very similar to" -- the IARU Region 1 and Region 3 band plans. At this year's conference, the IARU Member-Societies will consider possible changes to the Region 2 band plan. The ARRL is cooperating with this procedure by inviting input to be sent to the ARRL Board of Directors' Band Planning Committee. The committee will review the existing Region 2 band plan, consider input from the amateur community and make recommendations to the ARRL Board for submission to IARU Region 2. Read more here

<http://www.arrl.org/news/stories/2010/03/04/11374/?nc=1>.

==> COMING UP IN QST : LOOK FOR YOUR APRIL ISSUE TO ARRIVE SOON!

<http://www.arrl.org/news/stories/2010/03/10/11387/?nc=1> The April issue of QST is jam-packed with all sorts of things today's Amateur Radio operator needs. From product reviews to experiments to contesting -- including the official ARRL Rookie Roundup announcement and a report on how hams responded to the crisis in Haiti -- the upcoming issue of QST has something for just about everyone. You'll find an abundance of technical and general interest articles, as well as monthly columns such as Happenings, How's DX, Hamspeak, Vintage Radio and more. Click here <http://www.arrl.org/news/stories/2010/03/10/11387/?nc=1> to discover what's in store for you in the April issue of QST, the official journal of the ARRL.

==> FCC NEWS : ADMINISTRATIVE LAW JUDGE SAYS WASHINGTON STATE LICENSEE CAN KEEP HAM LICENSE

In January 2007, the FCC issued an Order to Show Cause <http://www.arrl.org/?artid=7170> to David L. Titus, KB7ILD, of Seattle, Washington, to justify why his General class Amateur Radio license should not be revoked and initiated a hearing process to determine whether Titus "is qualified to remain a Commission licensee" in light of a 1993 felony conviction at the age of 18 for "communicating with a minor for immoral purposes." According to the FCC order, Titus received a 25-month prison sentence for this act, and the Seattle Police Department has identified him as a registered sex offender. On March 9, Administrative Law Judge Richard L. Sippel issued his Initial Decision <http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-10D-01A1.pdf> -- saying that Titus " has been a law-abiding member of his community for many years" and ordered that Titus' license should not be revoked based on the evidence presented by the defendant and witnesses on his behalf, as well as the FCC's Enforcement Bureau failure to meet the burden of proof necessary for revocation. The FCC has said that The Communications Act of 1934, as amended <http://www.fcc.gov/Reports/1934new.pdf> provides that the Commission may revoke any license if conditions come to its attention that would warrant a denial of the licensee's original application. In the past, the Commission has said that felony convictions, "especially those involving sexual offenses involving children," raise questions regarding a licensee's character qualifications. Sippel's Initial Decision shall become effective "and this proceeding shall be terminated 50 days after its release if exceptions are not filed within 30 days thereafter, unless the Commission elects to review the case on its own motion."

==> FCC NEWS : FCC AMATEUR RADIO ENFORCEMENT CORRESPONDENCE POSTED

The FCC has posted new Amateur Radio enforcement correspondence on its "Amateur Radio Service Enforcement Actions

<http://www.fcc.gov/eb/AmateurActions/Welcome.html>" Web page. Laura Smith, Special Counsel in the FCC's Enforcement Bureau, sent a letters to the Sacramento (California) Municipal Utility District and to Northwestern Energy of Helena, Montana; Northwestern Energy also received letters voicing these same matters in March and September 2009. These letters concerned received complaints that equipment operated by these utilities may be causing harmful interference to Amateur Radio operators. Direct all questions about the Amateur Radio Service Enforcement Actions Web postings via e-mail <fccham@fcc.gov> only to the FCC Enforcement Bureau.

==> HINTS AND KINKS: PAINTING LETTERS

This idea comes to us from Dave Price, K4KDP <daveprice@nc.rr.com>, of Goldsboro, North Carolina.

As I get older, I find it is harder to read some of the smaller print on my radios. The ICOM 706 is a good example. The radio connectors are marked ANT 1, ANT 2, MIC and DC 13.8V, just to name a few. These are marked by either raised letters or letters that are indented into the radio housing. I found that if I paint these letters white, they show up much better on the black metal case. There is a fairly easy way to paint the letters white using cotton swabs with wooded sticks.

<http://www.arrl.org/news/files/Price_Paint.pdf> Break off the cotton tip on some of the swabs until you have about six of them with sharp points at the break area. Throw away the cotton tip and use only the wooden stick to paint with. Now spray a small puddle of white paint onto a piece of cardboard. The cardboard will absorb some of the moisture. Just as the paint starts to thicken dip the pointed end of the stick into the paint and then gently tap the paint into the indented area of the radio housing. On raised letters I use the blunt end of the stick, repeating the same process. It is best to use very little paint and repeat the process of dipping into the paint and tapping the paint onto the letters many times (see Figure 1).

You will find you have to replace the stick several times and spray a new puddle of paint when the old puddle gets too thick. You will also need to have some small paper towels and rubbing alcohol close by to quickly clean up any mistakes. I strongly recommend you practice this on some junk metal before attempting this on your expensive radios. I have also used this same trick on unpainted numbers for my Chevy truck 4 wheel drive shift mounted on the truck floor and for my watch bezel to make the unpainted numbers easier to read.

Do you have an idea or a simple project that has improved your operating? Maybe you've taken something commonly found around the home and developed a ham radio use for it? Why not share your hints with fellow hams in "Hints and Kinks," a monthly column in QST. If we publish your hint in QST, you will receive $20. Send your hints via e-mail <h&k@arrl.org> or to ARRL Headquarters, Attn: "Hints and Kinks," 225 Main Street, Newington, CT 06111. Please include your name, call

sign, complete mailing address, daytime telephone number and e-mail address.

==> SOLAR UPDATE

<http://sohowww.nascom.nasa.gov/data/realtime/realtime-update.html>
Tad "Here, as I point my sword, the Sun arises
<http://www.opensourceshakespeare.org/views/plays/play_view.php?WorkID=julius caesar&Act=2&Scene=1&Scope=scene&LineHighlight=723>"
Cook, K7RA, reports: We experienced a bit of a scare this week when four days went by with no sunspots. That's right -- for the first time in three months, we saw more than a single day with a sunspot number of zero. The previous period was back in 2009, November 23-December 8. Until March 6, there were just three days since then with no sunspots, each a bit less than two weeks apart, December 25, January 6 and January 19. On Wednesday, sunspot 1054 emerged in the northeastern quadrant of the visible solar disc, and just south of the center of the field another sunspot is emerging. Observation via the STEREO mission reveals possibly a third spot that may appear over the eastern limb on Friday or Saturday. Currently STEREO can view a little more than 88 percent of the Sun. Sunspot numbers for March 4-10 were 40, 35, 0, 0, 0, 0 and 12, with a mean of 12.4. The 10.7 cm flux was 81.3, 79.5, 78.3, 76.6, 76.3, 77.9 and 80.3, with a mean of 78.6. Look for more information on the ARRL Web site on Friday, March 12, including more information on emerging spots, as well as some reported unseasonable sporadic-E propagation. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/tis/info/propagation.html>. This week's "Tad Cookism" brought to you by William Shakespeare's Julius Caesar (Act II, Scene 1)
<http://www.opensourceshakespeare.org/views/plays/play_view.php?WorkID=julius caesar&Act=2&Scene=1&Scope=scene&LineHighlight=723>.

==> THIS WEEK ON THE RADIO

<http://www.youtube.com/watch?v=ef23lvpmWro> This week, the Feld Hell Sprint is March 13. The RSGB Commonwealth Contest, the Elecraft QSO Party and the Idaho QSO Party are March 13-14. The North American Sprint (RTTY) and the SKCC Weekend Sprint are March 14. The Wisconsin QSO Party is March 14-15 and the NAQCC Straight Key/Bug Sprint is March 18. Next week, the 10-10 International Mobile Contest is March 20. The Russian DX Contest, the Oklahoma QSO Party and the North Dakota QSO Party are March 20-21. The Virginia QSO Party and the BARTG HF RTTY Contest are March 20-22. The Run for the Bacon QRP Contest is March 22 and the SKCC Sprint is March 24. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests/>, the ARRL Contest Update <http://www.arrl.org/contests/update/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info.
Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page

<http://www.arrl.org/contests/spev.html>.

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

Registration remains open through Sunday, March 21, 2010, for these online course sessions <http://www.arrl.org/cep/student/> beginning on Friday, April 2, 2010: Amateur Radio Emergency Communications Level 1; Antenna Modeling; Radio Frequency Interference; Antenna Design and Construction; Ham Radio (Technician) License Course; Propagation; Analog Electronics, and Digital Electronics. To learn more, visit the CEP Course Listing page <http://www.arrl.org/cep/student> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/arrlletter/.

Amateur Radio Newsline(tm) Report 1700 - March 12, 2010

The following is a closed circuit advisory and not necessarily for air. With a financial update here is our Producer, Bill Pasternak, WA6ITF:

--
Its been almost two months since I last brought you an update on the financial picture for Amateur Radio Newsline. Well, while its not bleak, its not very rosy either.

But first I and our entire Board of Directors want to thank each and every one of you who has donated to keeping Amateur Radio Newsline going. Especially in this rather hard transition period since Andy's passing.

In our view you are as much a part of the team as those of us who research, write and report the news. And to each of you our heart felt gratitude for your support.

And that brings us to today where a peak at the bank account shows a balance of $482.62. The only problem is that we just paid our long distance service to bill to Verizon of $237.04. Doing the math that will leave us with only 245.58 in the bank and that simply will not be enough to cover the February bills that are due over the next two weeks.

So we once again must turn to you. We will do our part to keep the newscasts coming, but we do need your financial support to make it happen. And it looks as if we need that help rather quickly.

As you know, Amateur Radio Newsline is a 501(c)(3) not for profit corporation and your donations are tax deductible. The easiest way to donate is by Pay Pal. Just go to our website at www.arnewsline.org and click on the link to Pay Pal if you want to donate electronically. Otherwise you can send a check to us at the address you will hear at the end of this weeks newscast.

Whichever way you choose, the all volunteer staff here at Amateur Radio Newsline will be eternally grateful for your support

Now its time for this weeks Newscast. I'm Bill Pasternak, WA6ITF.

--

Thank you Bill. Now, Amateur Radio Newsline report number 1700 with a release date of Friday, March 12th, 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. The American Hospital Association asks for a blanket waiver covering all employee hams who want to take part in emergency training drills, New Zealand gives its hams spectrum at 500 kilohertz, an FCC Administrative Law Judge rules that the agency cannot revoke a ham radio license for a crime committed years ago and t ham in France hears and records the Mars Express fly-by of the moon Phobos. Hear the sound and find out the details on Amateur Radio Newsline(tm) report number
1700 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: AMERICAN HOSPITAL ASSN. FILES FOR BLANKET 97.113(a)(3) WAIVER

It's the waiver request to rival all other such requests to permit hams in the employ of hospitals to take part in disaster training drills. Amateur Radio Newsline's Norm Seeley, KI7UP, is here with the details:

--

The FCC has issued a Public Notice in WP Docket 10-54 that seeks comments on weather or not the Commission should grant a request American Hospital Association. This, for a blanket waiver of Section 97.113(a)(3) to permit amateur operators who are hospital employees to participate in emergency drills that are conducted by hospitals for accreditation purposes and that are not government-sponsored.

As most know, last year the FCC began taking a very strict interpretation of Section 97.113(a)(3) of the Amateur Service rules. This rule specifically prohibits amateur stations from transmitting communications in which the station licensee or control operator has a pecuniary interest, including communications on behalf of an employer. This has already lead to a pair of rules change requests. One filed by educator Gordon West WB6NOA and two other hams. The other from CQ Magazine. Both essentially request that 97.113(a)(3) be changed to permit hams to volunteer their services for any emergency drill conducted by an employer, whether or not the employee is on the clock. And at its January Board meeting the ARRL said it too plans to file its own proposal to modify Rule 97.113(a)(3) as well.

Late last year the FCC began granting waivers to various entities in need of using hams in their employ as a part of emergency preparedness drills. Now, the American Hospital Association says that it is time for a single across the board waiver so that individual hospitals can hold drills without having to file for specific exemptions to 97.113(a)(3).

Comments on WP Docket 10-54 are due by Friday, April 2nd with reply comments are due no later than Monday, April 19th. All filings should reference the docket number of this proceeding, WP Docket No 10-54.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

As we go to air a check of the FCC's electronic comment filing system shows those responding to be about 3 to 1 in favor of granting the American Hospital Association waiver request, but those numbers are subject to change as more comments are filed. (FCC)

**

RADIO LAW: ALJ SAYS FCC CANNOT REVOKE HAM LICENSE FOR PAST CRIME

An FCC Administrative Law Judge has sided with a ham who claimed that the revocation proceeding against his license for a crime committed years ago was unjust. In his March 9th decision, FCC Chief Administrative Law Judge Richard L. Sippel ordered that that the Amateur Radio Operator License of Amateur Radio Station KB7ILD held by David L. Titus should not be revoked and that the License Revocation Proceeding be dismissed. Bill Pasternak, WA6ITF, is in the newsroom with more on what the Administrative Law Judge decided:

--

First some background on this matter. Back in January of 2007 the FCC issued a Show Cause Order to determine whether David L. Titus, KB7ILD, was qualified to remain a Commission licensee. This, in light of a 1993 felony conviction involving a minor and whether his authorization should be revoked. The offense in question took place on April 16, 1993 and he was sentenced to serve 25 months in prison.

At that time the FCC noted that Titus' felony conviction for at least one sexual-related offense involving children raised material and substantial questions as to whether he possesses the requisite character qualifications to be and remain a Commission licensee. It also noted that while the felony conviction occurred more than 10 years earlier that the nature of his criminal misconduct and the fact the amateur radio service is particularly attractive to children called into serious question whether he should be permitted to retain his amateur radio authorization.

Titus decided to move forward with the hearing process and hired noted Washington D.C. attorney George L. Lyon, Jr. to represent him. At the hearing attorney Lyon produced numerous witnesses who testified on Titus behalf. These included a clergyman, a police officer, a corrections officer, a school counselor, a government contractor, a Red Cross worker, and a lab engineer. Each of them attested to Titus' successful integration into the community as a law-abiding citizen. Several of these witnesses are also active in Amateur Radio and approved of Titus' conduct in operating Amateur Radio. There was no rebuttal. Nor was any negative character testimony or other evidence bearing on character offered.

But Titus license was not without challenge from within the ham community. The President of the Lake Washington Amateur Radio Club appeared in person at the hearing. In his testimony he expressed concern that a convicted sex offender, who is licensed, could use his amateur radio station to contact children for immoral purposes. His concern was

heightened by the fact that Titus operates a repeater thereby
affording wider coverage.

But in his finding, A-L-J Sippel stated there is no evidence of Titus
mentoring a minor on ham radio procedures. Nor is there evidence of Titus
communicating with a minor through his amateur radio directly or on his
repeater frequency. Also, there is no credible or reliable evidence in the
record to support
a finding that he would use his FCC license to solicit minors.

Lastly, A-L-J Sippel stated that David L. Titus, KB7ILD has held an
Amateur Radio license for 20 years. He added that there is no credible or
reliable evidence even suggesting that he ever has used or ever would dare
to use ham radio communication as a means to contact minors for illicit
purposes.

Administrative Law Judge Richard L. Sippel's decision carries a tag that it
is issued "with prejudice." That's a legal term meaning that when a case
is dismissed for good reason that the plaintiff - in this case the FCC --
is barred from bringing an action on the same claim.

For the Amateur Radio Newsline, I'm Bill; Pasternak, WA6ITF, in the
Newsroom in Los Angeles.

--

The decision in this case runs thirteen pages. You can read the entire
text at: http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-10D-01A1.pdf
or

RADIO LAW: FCC REAFFIRMS ROS ONLY LEGAL ABOVE 222 MHZ

The FCC says that a new digital mode developed in Europe and being used
world-wide is not legal for United States hams to transmit below 222
MHz. This because it uses frequency hopping technology which the
regulatory which the agency considers to be spread spectrum and bans hams
from using below that frequency. Amateur Radio Newsline's Frank Haas,
KB4T, has more.

--

According to the ARRL, back in mid-February, European amateurs first used a new, experimental digital mode known as R-O S. On February 23, 2010 -- after FCC review of the original documents provided from the developer's website -- the FCC made the following statements on R-O-S. We quote:

"Section 97.305 is the rule that specifies where different emission types are allowed to be transmitted on different bands. 'R-O-S' is viewed as 'spread spectrum,' and the creator of the system describes it as that. We assume that he knows what he created.

Section 97.305 authorizes spread spectrum emission types defined in Section 97.3 to be transmitted by FCC licensed amateur stations at places we regulate communications only on 222-225 MHz and higher frequency amateur bands. European telecommunication regulatory authorities may authorize amateur stations in Europe to use spread spectrum on the High Frequency bands, but this is of no concern to us.

"The Commission does not determine if a particular mode 'truly' represents spread spectrum as it is defined in the rules. The licensee of the station transmitting the emission is responsible for determining that the operation of the station complies with the rules. This would include determining the type of emission the station is transmitting and that the frequencies being used are authorized for that type of emission." End quote

Since that initial FCC review, several Internet sites have reported a claim -- attributed to the FCC -- that the original statements made had been reconsidered and that the regulatory agency's view was now that -- quote: "R-O-S cannot be viewed as Spread Spectrum and it would be encompassed within Section 97.309 which covers RTTY and data emissions codes."

The ARRL says that when queried about this new statement, the FCC's Consumer Assistance Office stated that -- and again we quote: "The information contained on the R-O-S website was not provided by the FCC."

The agency then reaffirmed the original statements that came from the FCC's Wireless Bureau, which handles Amateur Radio rules for the United States. In other words, as far as the FCC is concerned, the R-O-S mode can only be used by the hams that it licenses on frequency bands above 222 MHz. And that's where it stands with the FCC as we go to air.

For the Amateur Radio Newsline. I'm Frank Haas, KB4T, in Holly Hill, Florida.

--

In its closing statement on the matter, the ARRL says that it supports the experimentation and advancing the technical skills of operators. But the League also reminds US licensees that according to Section 97.307, spread spectrum communications are only permissible in the US on frequencies above 222 MHz. (ARRL)

**

RADIO LAW: ROS CREATOR SAYS HES DEVELOPED A NEW NARROWBAND VERSION

As if this situation was not complicated enough, the creator of ROS, one Josï¿½ Alberto Nieto Ros, has announced the creation of a narrowband version of ROS that requires only 500 Hz. To operate.

He says that a technical description of this new version will be sent to FCC with the aim of gaining the agency's approval their approval for its use in the United States. Until then, the author says that he will not make public any technical explanation about this mode.

But here's where there may be a conflict. In his blog posting he claims that if you are a U.S. citizen, that you are in your perfect right to experiment with this new digital mode, until the FCC says otherwise. What he might not understand is that here in the United States hams must abide by the FCC Part 97 rules currently in place as well as any standing FCC declaration regarding the use of any mode. Also, that violating either could lead to anything ranging from a warning letter to a Notice of Violation or even a monetary fine. So while U-S hams can sit all day and receive and decode using any version of ROS, that they cannot transmit with it until they get a go ahead from the FCC. (Various sources)

RESTRUCTURING: NZ HAMS GRANTED TEMPORARY 600 METER ALLOCATION

Based on a request filed by New Zealand Association of Radio Transmitters that nations telecommunications regulator has agreed to grant New Zealand Amateurs temporary access to a slice of the 600 meter spectrum.

Beginning on March 1st, 505 to 515 kHz has been granted to them on a temporary basis pending an international allocation to radio amateurs and includes some restrictions. These involve a maximum radiated power not to exceed 25 watts effective radiated and a maximum bandwidth of 200 Hertz.

As in other parts of the world where hams have use of this band, these frequencies are, or may be, allocated for use by other services. As such, amateur operators must accept interference from, and must not cause interference to these other services.

On the international scene, work continues to gain a world-wide allocation in this area through the International Amateur Radio Union. If and when this is approved, it is likely that the New Zealand Amateurs will be granted a permanent allocation in the 600 meter area. (NZART)

**

RESCUE RADIO: TELECOMMUNICATIONS AND BROADCASTING RETURNING TO HAITI

Telecommunications and broadcasting are both slowly returning to earthquake ravaged Haiti. This according to Federal Communications Commission officials who went to Port-Au-Prince in January to assess communications damage and help that country's communications regulators with their restoration efforts.

--

As previously reported here on Newsline, the team was deployed in response to a request from Director General of Conatel, the communications agency in Haiti, in coordination with the U.S. Agency for International Development. In an update delivered to commissioners, FCC staffers Mindel Del La Torre, and Jamie Barnett, detailed the states of Haiti's communications and the ongoing efforts by the FCC to assist.

According to the two officials, hard-wired phones were heavily damaged. There were 108,000 telephone lines in the country in 2008. But the quake lead to a total loss of its wire-line infrastructure and those phones are still not working.

Wireless service fared better in the quake. De La Torre noted that Haiti had 2.5 million cell users before the quake. Now, with new equipment having replaced destroyed cell sites and cellular coverage is nearly back to 100%,

In the area of broadcasting some definite strides have been made. Before the earthquake Haiti had some 50 radio stations and 18 TV stations operating. Now, about 30 radio stations as well as six TV stations are back on the air.

For the Amateur Radio Newsline, I'm Jim, Meachen, ZL2BHF.

--

The FCC has said that it intends to help with the restoration of Haiti's telecommunications and broadcast infrastructure over the long term. Meantime a limited ham radio response is still at work aiding in quake relief efforts. (RW)

NAMES IN THE NEWS: TWO FORMER SPACEHAMS LEADING COMMERCIAL SPACEFLIGHT

Two former space shuttle and space station commanders are now competitors in the start up world of commercial human spaceflight. Ken Bowersox, KD5JDP, and Frank Culbertson, KD5OPQ, are now respectively vice presidents at Space Exploration Technologies Corp. and Orbital Sciences Corporation which are two United States based companies at the forefront of the private space industry.

Space Exploration's Dragon capsule and Orbital Science's Cygnus spacecraft have already been selected by NASA to ferry cargo to the International

Space Station starting in 2011. Both companies are now vying for a NASA contract to begin developing vehicles capable of carrying humans to the International Space Station. Commercial providers could take up the job of carrying astronauts to and from the complex if President Obama directs NASA to revamp its current exploration program. (Spaceflight Now)

**

NAMES IN THE NEWS: THREE HAMS ACHIEVE HIGH SPEED CW RECORD

And talk about high speed Morse code. The latest High Speed Telegraphy Honor Roll has been published with three amateurs, LZ4UU, DJ1YFK and EW8VK, achieving an amazing 1231 characters per minute. For full details check out www.rufzxp.net. (Southgate)

HAMVENTION 2010: WEAK SIGNAL DINNER MAY 14th

The 2010 VHF Weak Signal Group Banquet held during the Dayton Hamvention will be on Friday evening May 14th, at the Doubletree Dayton Downtown Hotel at 11 South Ludlow Street, in Dayton. Anyone with an interest in weak signal VHF, UHF and Microwave is invited to attend. Seating is limited to 125 and reservations are required. Cost per person is $35. Reservation requests with full payment and an SASE go to Tony Emanuele WA8RJF, 7156 Kory Court, Concord Township, Ohio 44077-2221. And please include the names and calls of all attendees as well as an e-mail address if you have one. (VHF Group)

**

HAMVENTION 2010: LAST CALL FOR HAMVENTION 2010 AWARD NOMINATIONS
And if you are hearing this before March 15th it means that you only have a few days left to nominate individuals and clubs for the Hamvention 2010 awards. While the Special Achievement Award, Technical Excellence Award, and Amateur of the Year Awards have been given for many years, Awards Chairman Frank Beafore, WS8B, said this a year a special award will be given for Club of the Year. That award is tied to this year's Hamvention theme of "Amateur Radio Clubs Worldwide: The Lifeline."
Judging will begin as soon as the nominating March 15th deadline passes. Winners will be notified in April and publicly honored at Hamvention 2010 in the weekend of May 14th, 15th and 16th.
Information on how to file nominations is on line at www.hamvention.org. Just scroll down and click on the word awards on the right side of the screen. (Hamvention¿½)

ON THE NET: NEW F1 MALWARE BUG DISCOVERED IN INTERNET EXPLORER

If you are a Windows XP user, listen up. Microsoft as well as the urban legends research service Snopes dot com both say that Windows XP users should not to press the F1 key when prompted by any website that they might visit. This due to an unpatched vulnerability that hackers could exploit to hijack PCs running certain versions of Internet Explorer. Amateur Radio Newsline's David Black, KB4KCH, has the details:

--

According to Microsoft, the vulnerability exists in the way that V B Script interacts with the Windows Help files when using Internet Explorer. If a malicious website displays a specially crafted dialog box, and if you press the F1 key, an arbitrary code could execute in the security context of the currently logged-on user.

Microsoft says the bug affects Windows 2000, Windows XP and Windows Server 2003. Plus, any supported versions of Internet Explorer on those operating systems could be leveraged by attackers. Users running IE6 on the XP operating platform plus IE7 and IE8 are said to be at risk.

Microsoft says--even if your windows system is up to date with all security patches--you should still avoid pressing F1 on dialog boxes presented from web pages or other Internet content.

The prompt can appear repeatedly when dismissed, nagging the user to press the F1 key. But Microsoft says not to pay attention to this demand and if it persists try closing and then re-opening Internet Explorer. The company says simply avoiding any website where a dialogue box tells you to press F1 is a good idea.

For the Amateur Radio Newsline, I'm David Black, KB4KCH, at the South-East Bureau in Birmingham, Alabama.

--

For those not aware, snopes.com is the Internet's best known urban legend debunking website. If it says that a story making the rounds of the World Wide Web is true, you can pretty much be certain that it is. And our thanks to Hap Holly, KC9RP, of RAIN for bringing this one to our attention. The full story with all reference material is at s.com/computer/virus/f1key.asp (RAIN)

**

RADIO RECORDS: GERMAN HAM CLAIMS 8.97 KILOHERTZ RECORD

An interesting record is being claimed by a German radio amateur. Markus Vester, DF6NM, of Nuremberg has been able to receive his test transmissions on 8.97kHz at a distance of 12.1 kilometers.

According to Vester, the transmitter was a 35 watt car radio audio amplifier offering up an Effective Radiated Power was about 1.3 microwatts using a relatively small antenna with 1.4 Henry loading coil. The receiving system consisted of a six meter long antenna feeding SpecLab software. (Various)

**

HAM RADIO IN SPACE: A CLOSE ENCOUNTER ON-ORBIT

The Amsat Oscar 51 ham radio satellite has survived a close encounter with the FORMOSAT-3 constellation of satellites. The close call took place on Monday, March 1st at 10:56 UTC. This as all of the satellites were over the Eastern United States.

According to AMSAT-NA Vice President of Operations, Drew Glasbrenner, KO4MA, the predicted miss distance was 953 meters, which is over 3000 feet. But the overall but the radial difference between the two orbits was only 39 meters. Given the orbital uncertainties of both satellites, an orbit separated by only 39 meters could mean that distance may become eaten up rather quickly.

As noted earlier, FORMOSAT-3 is a constellation of satellites launched on April 15, 2006. AO-51 is a bit older having been put into orbit on June 29, 2004. (ANS)

**

HAM RADIO IN SPACE: ARISS WINS BOSELLI PRIZE

The Italian radio listeners' society A-I-R has awarded the prestigious 2010 Boselli prize to ARISS, the Amateur Radio in the International Space Station project. In its announcement, A-I-R says that the award recognizes how ARISS has shown the importance of radio communications to hundreds of young students in Europe and beyond. A-I-R says that ARISS has spread the use of radio from the forefront of science in outer space to classrooms around the world. The Boselli prize will be presented at the A-I-R Annual General Meeting on May 8th in Faenza, Italy. (GB2RS)

**

ON THE AIR: UK HAM OPERATION TO HELP SAVE VULCAN BOMBER

Members of Newbury And District Amateur Radio Society in the United Kingdom will be activating GB0VUL during the month of March. This special event is to increase the awareness of the "Vulcan to the Sky Trust" and its efforts to save the only flying Vulcan XH558 bomber.

Operation is 80 through 10 meters using CW and SSB. While activity may take place all month, the main event of the month will be on the weekend of 20th and 21st. QSL via the RSGB Bureau, eQSL preferred or via G8JIP. More information on the Vulcan bomber is at www.nadars.org.uk/vulcan.asp (Southgate)

**

HAM HAPPENINGS: INTERNATIONAL MARCONI DAY AWARDS PROGRAM

The 23rd International Marconi Day will take place on April 24th. Although not a contest, awards can be obtained if you pre register for the event. Also, in order to qualify as an award station, operations should take place from a site that either used Marconi equipment prior to his death in 1937 or from which Marconi carried out experiments during the same period. Full details can be found at www.gb4imd.org.uk. (GB2RS, Southgate)

**

ON THE AIR: FRENCH HAMS CELEBRATE CONVENTION OF HUMAN RIGHTS

On the air, F6FQK reports that members of the "Council of Europe Radio Amateur Club will be active as
TP60CE between March 12th to the 14th. This to celebrate the 60th anniversary of the "Convention of Human Rights. Operations will be on CW, SSB, PSK and the Satellites. QSL via F5LGF. An online log search will be available at http://ewwa.free.fr (Southgate)

**

ON THE AIR: CELEBRATING ST. PATRICK'S DAY FROM ERIN'S ISLE

And Ireland's Foyle and District Amateur Radio Club, has been granted the special event callsign GB5SPD to celebrate St. Patrick's Day. The callsign will be used over several days, from March 15th until March 17th.

While most of the contacts will be SSB operators hope to also use digital modes as well. A special QSL card has been printed for the occasion and reports from SWL's are also welcome. More details can be found under GB5SPD on the qrz.com. (IRTS)

**

DX

In DX, word that WE9V will be active as from Jamaica as 6Y9V through March 14th. His activity will be on 160 through 10 with emphasis on 160, 30, 17 and 12 meters using CW, SSB and RTTY. QSL via WD9DZV.

G3RWF as 5X1NH will be on the air from Uganda until March 21st. QSL via his home callsign.

Also from Uganda, 5X7JD will be on the air until 25 May. QSL as directed on air.

HA5AO will be on the air from Lesotho as 7P8AO through March 28th using all modes and bands. QSL only via his home callsign.

DL7AFS and DL7ZG will sign V21ZG from Antigua for 18 days starting 16 March. They will concentrate on RTTY, PSK and SSB. This is another one to QSL as directed on the air.

And 5R8UI will be on the air from Madagascar until the end of the year. QSL to IK4ZUI.

DL7BC, will be active March 27th and 28th from Morocco as CN2BC during the CQ WW WPX SSB Contest. This, as a Single-Op/All-Band/Low-Power entry. QSL via DL7BC.

Lastly, NP3D will be active portable HR2 from Honduras between March 19th and the 29th. He will operate on all of the High Frequency bands using all modes, but will focus on 160 meters. QSL via W3HNK, RW6HS, or via Logbook of the World.

(Above from various DX news sources)

**

THAT FINAL ITEM HAM HEARS AND RECORDS MARS EXPRESS FLY-BY

And finally this week, talk about a true accomplishment for ham radio. This as the European Space Agency website reports that a radio amateur was able to receive and record the Mars Express mission on its recent flyby of the Martian moon Phobos. Bertrand Pinel, F5PL, from near Castelnaudary, France, used his 3.5 meter dish throughout the flyby to monitor the signal from Mars Express. Heres a sample of what he heard:

--

Actual fly-by audio.

--

The recording of the tone of Mars Express shifts from high to low because, at the time of the recording, Mars Express was traveling away from the Earth with a speed of 39 000 km/hr - accelerating as it went. This is the same Doppler effect as the sound of an ambulance siren changing as it passes you.

More on this story and F5PL's complete audio recording is on-line at http://webservices.esa.int/blog/post/7/1058 (Southgate)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

Before we go, a reminder that the nominating period for the 2010 Amateur Radio Newsline Young Ham of the Year Award is now open. Each year, we here at the Amateur Radio Newsline in association with Vertex Standard

Corporation -- the makers of Yaesu brand ham radio gear -- and CQ Magazine combine to honor a ham radio operator age 18 or younger for his or her contributions to ham radio or to society itself through ham radio.

All nominations and materials required by the official rules must be received by Amateur Radio Newsline no later than midnight on May 30th. Both "mail-in" and electronic submissions are being accepted this year. Full rules and a downloadable nominating form are now on our website at www.arnewsline.org. Just scroll down until you see "2010 Young Ham of the Year Awards Now Being Accepted" and click on the word "here" to download the directions and the form. You can also leave questions and comments on the official Young Ham of the Year Award page on Facebook dot com.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Don Wilbanks, AE5DW, saying 73 and we thank you for listening.

*** XX? / XX? ***

Gentlemen, after a long time of busy and extremely difficult preparation (we started just after the MI-activation) we finally got the permission for another portable moonbounce operation last week. The event will take place from Thursday, 13.05.2010 until Sunday, 23.05.2010 (ending with the 23cm DUBUS contest). Actually, Monica & myself were persueing official licenses at 4 different destinations. As we now have license documents in our hands for two of these "most wanted" locations, we have decided to give preference to one destination and leave the second one for a later point in time The callsign used will be of the pattern XX/DL1YMK and like we did for the OH0-activation, we will run the full risk of a truely random operation ï¿½ we will not disclose the destination in beforehand nor run schedules. It will be a kind of, lets say, "unusual" callsign type, so listen thoroughly and trust your ears.... (when we got the callsign we checked it first with an official IARU DXCC -list....)

WIANEWS FOR WEEK COMMENCING MAR 14 2010.

This week presented by a group of VK6 Amateurs working out of their
NewsWest studios, home of the local VK6 broadcast under VK6KAD

ALL UP AND COMING IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE OF
AUSTRALIA FOR WEEK COMMENCING MAR 14 2010

WIA
President Michael Owen VK3KI president@wia.org.au
Vice President Ewan McLeod VK4ERM vk4erm@wia.org.au
Secretary Geoff Atkinson VK3AFA secretary@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

"Now for a review of the March edition of WIA's Amateur Radio magazine

It has a fresh look cover-to-cover. Some of the feature articles include
promoting amateur radio via a school radio club by Tim Roberts VK4YEH, The
Wayatinah fire and WICEN Tasmania a report by Roger Nichols VK7ARN.

Full details are provided of the WIA Centenary Convention program being
held in Canberra the 28th to the 30th of May, including a booking form for
intending participants.

The WIA annual report and Part 2 in the serial history - the time when organised amateur radio was taking shape in Australia.

Technical articles this month include:

A quality audio test oscillator

How to get more power from hand-held radio by paying attending to their antennas

A 40m ground-less & tuner-less dipole

Complete 8MHz IF system

And in Foundation Corner Ross Pittard VK3CE provides Details on how to build a simple field strength meter.

Plus regular columns on HF DX, the VHF/UHF Microwave bands, Shortwave Listening and more.

The WIA journal Amateur Radio magazine is sent to WIA members and copies are also available at selected newsagents."

ANZAC DAY EQUALS AM

Before heading off around Australia with news from the various clubs, this in from VK4MIK Mike Patterson.

Mike is part of a group in North Queensland working to get as many Australian and New Zealand amateurs on the AM mode on ANZAC Day afternoon as an amateur radio salute to the servicemen and women in the many conflicts.

AM was used with CW as a means of communication during WW2,Korea,Malaysian and even early Vietnam.

They have made contact with museum ships with a view to activating them and also have contacted the NZART.

Already the Townsville Amateur Radio Club intends running its Sunday night net the 25th on AM and a North Queensland afternoon net, 7.093 will be AM, that at 4pm Australian Eastern Standard Time.

Radio, Electronics & Astronomy Expo.

Easter Weekend - Saturday, Sunday & Monday, 9 am - 4 pm.

Old Fire Station, View Street Bendigo.

View Street will come alive with radio waves and galaxies during the Easter weekend, as we celebrate 100 years of amateur radio in Australia, at the 'Radio, Electronics & Astronomy Expo'.

See how grandpa listened to the radio in the 1920's, 30's and 40's, with an historical display of vintage radios and equipment.

Try your hand at Morse Code and learn more about the history of communications.

The oldest to the newest forms of technology will be demonstrated.

Did you know that amateur radio operators can broadcast television pictures, communicate via satellites and even talk to astronauts? Find out how you can obtain your own radio licence!

Amazing images of the night sky above Bendigo will be on display, taken with the City of Greater Bendigo Telescope. See the Sun during the day with a special solar telescope. And what do radio astronomers do besides searching for ET?

The Expo is a joint project between the Midland Amateur Radio Club and Bendigo District Astronomical Society, with sponsorship from Bendigo Community Telco.

The Radio, Electronics & Astronomy Expo, Easter Saturday, Sunday and Monday, 9 am to 4 pm at the Old Fire Station, View Street Bendigo.

A $2.00 donation would be appreciated, under 15 free.

For more information, contact Ray Tampion on 5439 3506.

GippsTech2010 call for papers

Australia's premier event for VHF/UHF, Microwave and weak signal activity will be held by the Eastern Zone Amateur Radio Club VK3BEZ on the 10th and 11th of July at Churchill in Victoria's Latrobe Valley.

Potential presenters who have a topic that could be as brief at 5 to 10 minutes or up to an hour in length are now invited to submit the presentation title and content outline.

Contact the Chair of the Organising Committee, Peter Freeman VK3PF email vk3pf@wia.org.au

For more details about GippsTech2010 visit the website www.vk3bez.org

VKR Roundup
http://www.police.qld.gov.au/News+and+Alerts/Media+Releases/

You are listening to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP and I've been thinking -

Over the past few weeks it has been great to hear the continuing input from a greater number of clubs to the "Q". This is a great way to publicise events and activities and let our listeners who aren't amateurs or radio club members know what is happening.

Getting to know what people are thinking can be difficult in preparing a segment such as this. It is great to receive feedback, however indirect. I have been reminded that the real world is not so kind as the image which I present of our hobby. True - but experience has taught me to applaud the good behaviours and ignore the bad. (A bit like training a pet.) I was impressed by the Amateurs Code the first time that I read it, in a loaned ARRL handbook. The amateurs whom I met and the behaviour that I heard on air all seemed to confirm the validity of these aspirations.

Some 50 years along the road, my own experience suggests that the Amateurs Code is still a great guide for our personal involvement in the hobby.

Another suggestion has been floated to me that my comments could relate to a particular club or specific group of people. I'm sorry if anything has been taken that way but in keeping with the WIA broadcast guidelines, the comments are as non-specific and generic as language will permit in a 90 second segment. A couple of generations of experience backed with resources of the www are what I use to try and give a mildly thought provoking opening to QNews. If I have hit the nail on the head, for you, then that is what was intended.

I'm Geoff Emery, VK4ZPP and that's what I think.....how about you?

ROCKHAMPTON
IRLP NODE 6973 ;
e-mail vk4acc@wia.org.au
Secretary Clive 4928 1173
http://www.radarc.cjb.net/

This is Doug VK4DUG from the Rockhampton and District Amateur Radio Club, better known to most as the RADAR Club with a timely reminder that the next monthly meeting of the RADAR Club (and that's this Wednesday) will be the Annual Meeting for 2010, so keep in mind Wednesday 17. If you haven't already nominated yourself or somebody else for an executive position then it's too late. Nominations had to be lodged 14 days prior to the event. But it's not

too late for you to attend the meeting and show your support for the club.

An added incentive for you to attend is the expected attendance of Brian who is going to share his extensive knowledge of radio from the perspective of an ex radio inspector based in this area, and in addition to this, the usual supper, as supplied by Mary VK4PZ and husband Gordon VK4GM (those delicious ham sandwiches) will round off the evening.

See you there.

73 Doug

GREETINGS AND SALUTATIONS!

THIS IS DON VK4FNQA, WITH NEWS AND HAPPENINGS IN NORTH QUEENSLAND.

I START THIS SEGMENT WITH SOME SADDENING NEWS NEXT WEEKEND THE JOHN MOYLE FIELD DAY WILL BE HAPPENING ACROSS AUSTRALIA, NEW ZEALAND AND PAPUA NEW GUINEA AND SO FAR ONLY THREE OPERATORS HAVE PUT UP THEIR HANDS TO OPERATE CLUB STATION VK4WIT FROM BLUEWATER SCOUT DEN. TARC CONTEST CO-ORDINATOR RICHARD VK4FRJG HAS ADVISED THAT IF THERE ARE NO MORE TAKERS FOR NEXT WEEKENDS EVENT HE WILL CANCEL OPERATIONS FROM BLUEWATER AND, IF TIME PERMITS, RUN PARTIAL OPERATIONS FROM HIS HOME STATION ONLY.

SO, ALL THOSE TARCADIANS RUSTICATING AND GATHERING GIRTH OUT THERE - IT IS TIME TO ACT AND GET IN TOUCH WITH RICHARD RIGHT NOW - CALL HIM ON TELEPHONE 47752923 OR ON MOBILE 0400339543, FOR FURTHER DETAILS OR TO LET HIM KNOW YOU ARE GOING ALONG FOR AN OVERNIGHTER OR DAY SESSION.

NEXT IS AN ITEM WHERE YOU CAN HELP MIKE GET ON HIS BIKE.

THAT'S RIGHT, DASHING AERO-PARAMEDIC, AVID DX-ER AND ALL ROUND GOOD GUY MIKE VK4MSA IS CURRENTLY TRAINING FOR THE BIG W TOWNSVILLE TO CAIRNS CHARITY BIKE RIDE WHICH RAISES FUNDS FOR THE CHILDREN'S CANCER INSTITUTE OF AUSTRALIA. ONE OF THE RULES OF ENTRY IS THAT MIKE NEEDS TO RAISE AT LEAST FIVE HUNDRED DOLLARS IN DONATIONS BEFORE HE CAN PARTICIPATE.

SO, CAN YOU HELP OUT A FELLOW HAM WHO IS DOING SOMETHING GOOD?

CONTACT MIKE VK4MSA NEXT TIME YOU HEAR HIM ON AIR OR WHEN HE IS NEXT SAVING YOUR LIFE IN A CAR WRECK AND LET HIM KNOW THAT YOU CAN SUPPORT HIM.

CALLING ALL RADIO AMATEURS! DO SOMETHING SPECIAL ON ANZAC DAY TO COMMEMORATE THE FALLEN AND THOSE WHO HAVE LAID THEIR LIFE ON THE LINE FOR OUR COUNTRY, OUR FREEDOM.

MIKE VK4MIK HAS SEEDED AN IDEA TO OPERATE ON AM OR CW THIS ANZAC DAY, USING THE VERY MODES OF MODULATION USED BY ANZACS DURING WORLD WAR TWO, THE KOREAN WAR, THE MALAYSIAN CONFLICT AND INSURRECTION AND THE EARLY PART OF THE

VIETNAM WAR.

SOME PARTICIPANTS OF REGULAR RADIO NETS INCLUDING THE 7093KHZ 0600UTC AFTERNOON NET AND THE NORTH QUEENSLAND NET WILL BE USING AMPLITUDE MODULATION ON ANZAC DAY AND THERE ARE MORE MILITARY MUSEUM AND NET STATIONS JOINING THE PARTICIPATION LIST.

IF YOU WANT TO JOIN IN OR FIND OUT MORE ABOUT THIS FINE ANZAC DAY EVENT THEN PLEASE CONTACT MIKE PATTERSON VK4MIK ON EMAIL VK4MIKE@YAHOO.COM.AU

FINALLY, THE TARC SOCIAL EVENING IS HAPPENING THIS TUESDAY EVENING MARCH 16TH FROM 7-30PM AT THE CLUB ROOMS ATOP SES HEADQUARTERS IN GREEN STREET WEST END. COME ALONG AND LEND A HAND TO PUT THE MAGAZINE OF RENOWN, BACK-SCATTER TOGETHER AND SOCIALISE WITH FELLOW HAMS. EVERYONE WELCOME !

WELL, THAT'S ALL THE QNEWS FOR THIS SUNDAY 14TH MARCH.THIS HAS BEEN DON VK4FNQA IN TROPICAL PARADISE FOR THE TOWNSVILLE AMATEUR RADIO CLUB INC, AND YOU HAVE BEEN LISTENING TO; AND ENJOYING QNEWS FROM VK4WIA.

The Bottle Shop Net

The Bottle Shop Net was formed in recognition of the large number of older valve radios still in use around Australia.

The Bottle Shop Net is usually hosted by Gavin VK7VTX on Flinders Island and Barry VK3MBW in Lara, Victoria.

It happens at 8.00 pm most week nights, on 3.59 MHz LSB

Most amateurs know that a "bottle" in radio terms is a reference to the

glass thermionic vacuum tubes that formed the basis of radios before the development of solid state devices. Valves are still in relatively common use today in high power amplifiers both HF and VHF.

Older solid state radios are also welcome on the net and in order to be

better fit in they are referred to as "stubbies"

Everyone interested in firing up an older radio is more than welcome to join in the fun and chat and swap tales of the radios being used. There is a buy-swap-or-sell session before the 9.00pm close of the net.

Italian radio listeners' society AIR has awarded the prestigious 2010 Boselli prize to ARISS, the Amateur Radio in the International Space Station project. The award recognises how ARISS has shown the importance of radio communications to hundreds of young students in Europe and beyond.

ARISS has spread the use of radio from the forefront of science in outer space to classrooms around the world. The prize will be delivered at the AIR AGM on 8 May in Faenza, Italy.

(rsgb)

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

ARRL SEEKS INPUT FOR NEW IARU REGION 2 BAND PLAN

The International Amateur Radio Region 2 conference -- held later this year in El Salvador -- brings together delegations from the national Amateur Radio Societies in the Western Hemisphere. One of the topics on the agenda will be the Region 2 HF band plan. This band plan is "harmonized with" -- spectrum management-speak for "very similar to" -- the IARU Region 1 and Region 3 band plans. At this year's conference, the IARU Member-Societies will consider possible changes to the Region 2 band plan. The ARRL is cooperating with this procedure by inviting input to be sent to the ARRL Board of Directors' Band Planning Committee. The committee will review the existing Region 2 band plan, consider input from the amateur community and make recommendations to the ARRL Board for submission to IARU Region 2.

FLORIDA MAN ELECTRICUTED INSTALLING ABNTENNA TO TALK TO HAITI

A Lauderdale Lakes, Florida, man who was electrocuted on February 28th. This, while trying to install an antenna that authorities said would have been used to communicate with Haiti.

Police spokesman Sgt. Frank Sousa said Mackenson Mareus died when he touched a live power line at a home in the 1100 block of Northwest 18th

Court. Police said the antenna Mareus was helping install was intended to set up communication with Haiti.

According to experts in South Florida that is something ham radio operators would be able to do with relative ease. But Mareus was not a radio amateur and according to his cousin Louikenson Arne he did not know what the antenna was for.

Arne said that the 27 year old Mareus, was from Haiti and had lived in South Florida for less than three years. He ran an Internet-based radio

station called Radio Tendresse, and the Web site boasted the frequency of 97.7 FM but was not on the air anywhere in the United States.

According to the police report on the accident ham radio operators are supposed to be licensed with the Federal Communications Commission. However it was unclear who, if anyone, held a license to use the antenna and any radio gear connected to it at the time of the accident that took Mackenson Mareus life.

(ARNewsLine)

SONY TO CLOSE ALABAMA MAGNETIC TAPE PLANT

Call it a true sign of the times. This with word that Sony Corporation

plans to close its tape-manufacturing plant in Dothan, Alabama. This as the need for magnetic tape products dwindles to a trickle world-wide.

As recently as five years ago most recording of video and audio was done to tape. But as magnetic disc drives, flash memory and electro-optical recording technology made rapid advances, the need for magnetic tape products quickly declined.

Now it has finally reached a low where the demand for magnetic tape products like those produced at the Sony Dolthan, Alabama, plant has reached the point where keeping it open is no longer economical. According to Sony, operations at the plant will be phased out starting in April with the closure planned to be completed by September.

The facility was opened in 1977. Termination of its operation will lead to the loss of 300 jobs.

(ARNewsLine)

'Windermere Triangle' mystery solved

A mystery dubbed the Windermere Triangle has finally been solved, according to a Daily Mirror story reported by Southgate Club.

For more than a year, drivers in the UK Lake District town found their electric key fobs would not work.

Locals thought there might be a paranormal cause.

But an engineer sent to probe the "ghostly" goings-on discovered fob signals were being jammed by a cafï¿½ till using the same frequency.

HAM HERO VU2RBI TO MEET WITH UK ROYAL FAMILY

One of the worlds most decorated hams has been invited to meet with the

British Royal Family. Steve Herman, W7VOA, of Amateur Radio Newsline says VU2RBI, Bharathi Prasad, was invited to speak at the Commonwealth Day Observance in London in March 8th in the presence of HM The Queen, HRH Duke of Edinburgh, the Prince of Wales, the Duchess of Cornwall and all Commonwealth High Commissioners.

Bharathi was part of the 2004 Andaman DXpedition team that won the ARRL's 2005 International Humanitarian Award. The December 2004 earthquake and resulting tsunami swiftly shifted the role of the DX operation into an emergency communication link with India's mainland.

You may recall VU2RBI visited Brisbane last October and was keen to speak with clubs yet, despite asking several weeks on the news not one club ever did contact us to avail themselves of the opportunity or let the newsroom they were interested, so from vk4 it's to "Buck Palace" instead!

BATTERIES MAY BE BANNED FROM CHECKED AIRLINE BAGGAGE

Travelling by air with spare Lithium Ion batteries for your H-T could soon become impossible. This as Computer World reports that the United States Department of Transportation may prohibit the transport of all spare batteries in checked luggage, regardless of their physical size or capacity.

==========

WEIRD AND WONDERFUL

CHILE QUAKE MAY HAVE SHORTENED THE DAYS

Scientists at NASA say that the 8.8 magnitude earthquake that struck Chile on Saturday, February 27th may have shifted Earth's axis and created shorter days. If their preliminary calculations are correct each day should be 1.26 microseconds shorter/

According to Science On-Line, large earthquakes cause massive amounts of rock to shift and alters the distribution of mass on the planet. That distribution change causes the rate at which the planet rotates to alter and it is the rate of rotation rate determines the length of a day.

Richard Gross is a geophysicist at NASA's Jet Propulsion Laboratory in Pasadena, California. He used computer modelling to determine how the magnitude 8.8 quake that struck Chile may have affected Earth. He found that the quake should have moved Earth's figure axis about 8 centimetres. That shift in axis is what may have lead to the minutely shortened days.

EI2GBW, Ireland to Great Britain Ferry Celebrations ends March 31 2010

GB2EI, Great Britain to Ireland Ferry Celebrations ends March 31 2010

In DX, we start with word from ARRL Awards Branch Manager Bill Moore, NC1L,
, that the 3V3S operation from Tunisia and the D2CQ operation in Angola

have been approved for DXCC credit. The 3V3S operation took place in 2009
while D2CQ is ongoing.

On the air now is G3LZQ active as 3B9WR from Rodrigues Island through April
2nd. His operation is on all bands 160 to 10 meters, mainly CW, but with a
focus on the 160 through 40. Also look for him to be in the RSGB's 73rd
Commonwealth Contest (This weekend March 13-14th).
QSL via his home callsign.

HF beacon back on air

The Radio Society of Sri Lanka (RSSL) has reinstalled its propagation
beacon Four-Sierra_Seven_Bravo (4S7B).

It is part of the network of 18 HF beacons that were begun by the Northern
California DX Foundation and supported by International Amateur Radio
Union.

The frequencies used are 14.100, 18.110, 21.150, 24.930, and 28.200 MHz.

Each beacon operates on the same frequency on a time-shared basis,
transmitting every three minutes 24 hours a day.

Their callsign is sent in Morse code at 22 words per minute followed by
four one-second dashes. The callsign and the fist dash are at 100 watts,
the remaining dashes are sent at 10 watts, 1 watt and 100 milliwatts.

(Jim Linton VK3PC)

St. Patrick's Day Special Event Station.

The Foyle and District ARC, situated 5 miles south of Derry, has been
allocated the callsign GB5SPD to celebrate St. Patrick's Day. The callsign
will be used over several days, from March 15th until March 17th.
A special QSL card has been printed for the occasion and reports from SWL's
will also be most welcome.

(irts)

And lastly, DF7ZS, will be on the air from Madeira Island signing portable CT9. This. between March 24th and the 31st. Activity will be holiday style and will focus on the WARC bands. QSL via DF7ZS. To which we can only add the line: "Have some Madiera my dear." OK. Bad joke unless you know the music of the Limelighters'.

NEW DRM DISCO STATION ON SHORTWAVE

If you think that shortwave is a dead medium for entertainment then you may be surprised to learn about a Miami-based disco music station can now be heard across North America and Europe. The Disco Palace is using Digital Radio Mondiale or D-R-M technology to broadcast high-quality music programs on shortwave.

17.755 MHz from French Guiana.

6.015 MHz from France.

(ARNewsLine)

450 MHZ INTERFERENCE NAILS METRO TRAFFIC IN SAN DIEGO

ARNewsLine's Bill Pasternak, WA6ITF, says Metro Traffic's voice repeater in San Diego was jammed recently by a large number of simplex hand-held radios that were pressed into service by the near-by La Mesa-Spring Valley School District.

The radios were reportedly programmed to transmit on 455.500 MHz and sold to the School District by an equipment dealer that told the district not to worry about licensing.

455.500 MHz is Metro's licensed repeater input frequency and the resulting interference that jammed Metro's helicopter communications.

N6OEI used his direction finding skills garnered from his amateur radio

training to track down the source of the interference:

NZ Intruder Watch

The Monitoring Service Coordinator has recently sought the approval of the NZART Council and the National System Trustees to use the National System e.g. 439.875 MHz periodically to encourage more participation in monitoring the HF bands to report intruders throughout New Zealand.

Voluntary observers may briefly be requesting confirmation of an intruding signal to verify the strength and direction for confirmation or to alert others to a potential intruder, which is being verified.

(73 John ZL1GWE MS Coordinator)

Poor operating a cause of concern

Participants in the SARL President's Net a few Sunday's ago voiced their concern over poor operating procedures and the use of inappropriate language on the South African airwaves.

While these unacceptable practices are carried out by a small number of radio amateurs, it tarnishes the image of the hobby.

The use of inappropriate language on the air is a serious offence and can lead to cancellation of the culprit's license.

These and several other operational issues will be discussed when the South African Radio League (SARL) Council meets in early this March.

20m ROS frequencies are moved

Josï¿½ Ros, the originator of the new amateur radio data mode ROS, has agreed to move the suggested 20m frequencies for ROS to 14.0972MHz and 14.102MHz taking them further away from the 14.100MHz international beacon chain frequency as the originals had been 14.098MHz and 14.1011MHz.

You can find out more about ROS at
http://rosmodem.wordpress.com

and more about the International Beacon Project at
http://www.ncdxf.org/beacons.html

Ham radio movie - 'Interference'

Interference is a short movie about a ham radio operator who picks up an anomalous radio transmission and stumbles upon an international drug ring.

The YouTube description says:

Interference is about John Upton, a ham radio operator, who picks up anomalous radio transmission. He sets out to discover the source of the transmission through triangulation of the signal, and inadvertently stumbles upon an international drug ring.

Watch the rest of Interference to see how Mr. Upton extricates himself from the thugs and finds love in the process.

AMATEUR RADIO IN SPACE: A CLOSE ENCOUNTER FOR AMSAT-OSCAR 51

March 1, the AMSAT-OSCAR 51 (AO-51) satellite had a potentially dangerous encounter with another spacecraft known as Formosat 3D.

OSCAR 51 is a popular Amateur Radio satellite that often functions as a crossband FM repeater, relaying brief conversations over hundreds of miles. Formosat 3D is part of a constellation of six remote sensing microsatellites that collect atmospheric data for weather prediction and for ionosphere, climate and gravity research. Both orbit at an altitude of approximately 500 miles.

SCOTLAND ON ALL THE HAMSATS

Scotland is going to the birds, at least figuratively speaking.

This as 2E1EUB will once again be active as 2M1EUB from March 20th to the 27th operating every ham radio satellite that he can reach from the Cairngorms National Park. Also, look for him on 160 and 80 meters.

Checkout QRZ.com under 2M1EUB for more information on this high in the sky operating event.

INDIA

A radar experiment aboard India's Chandrayaan-1 lunar spacecraft has identified large deposits of water ice near the Moon's north pole in more than 40 small craters containing water ice.

These findings have just been presented at a US planetary science conference.

The craters with ice range from 15km down to 2km in diameter.

A Dr. Spudis, from the Lunar and Planetary Institute in Houston, estimated there was at least 600 million metric tonnes of water ice held within them, The equivalent amount, expressed as rocket fuel, would be enough to launch one space shuttle per day for 2,200 years!

WW SPECIAL INTEREST GROUP --- MILITARY

RSGB say that the Royal Signals Amateur Radio Society has made a number of its technical documents available for download.
Included in the collection are a number of very interesting HF antenna designs and related projects.

Handiham World reports that Matthew Arthur, KA0PQW, of Minnesota, has been selected to receive a President's Volunteer Service Award. Arthur is being recognized for his work with the Community Emergency Response Team in Steele County, Minnesota. That's where he volunteered and handled communications during a flood in 2007.

According to Handiham World, this was a nine hour non-stop stint that lasted until the National Guard could relieve him. During that time he

handled traffic into and out of the flood zone, passing messages to authorities in the city of Winona.

NZ Amateurs Granted Access to 600 metre Band

Following submissions from NZ Association of Radio Transmitters (NZART), the group that represents NZ amateur radio operators, the NZ Government has

agreed to grant NZ Amateurs temporary access to a slice of the 600 metre spectrum.

>From 1 March, NZ Amateurs now have access to a new band, 505 to 515 kHz on a temporary basis pending an international allocation to radio amateurs.

Requirements of the licence include a maximum radiated power of 25 watts eirp maximum bandwidth of 200 Hz, and the requirement not to interfere with other services licensed to use that band.

Historically, this part of the radio spectrum was used for maritime communications in Morse Code until satellite communications recently made the technology obsolete. Morse Code was a capability required by radio officers on ships travelling internationally up until the late 20th century.

The licence amendment will make it possible for amateur radio operators

involved in restoration of historical radio equipment, for example at the Coast Station at Musick Point in Auckland, to test un-modulated transmission (carrier wave) signals from the equipment and demonstrate their Morse Code skills.

(irts/southgate)

REWIND - A LOOK BACK IN HISTORY

"Rewind a look back at our history through the serialised written history by WIA Centenary Committee member Peter Wolfenden VK3RV with assistance of others that is being published in the WIA journal Amateur Radio magazine.

Experimenters get organised

On 11 March, 1910 a meeting of like-minded people in the Hotel Australia, Martin Place, Sydney, formed the Institute of Wireless Telegraphy of Australia, and soon after dropped the word 'telegraphy' from its name.

Chairman of the founding meeting, George Taylor, proposed "the formation of an institution amongst experimenters and enthusiasts in wireless for their mutual benefit."

It was also to create a voice with the authorities over the level of licence fee charged and to seek better treatment of experimenters in terms of alleged interference complaints from other spectrum users.

A similar organisation was formed in Melbourne - the Amateur Wireless Society of Victoria, on 30 November 1911 at a meeting attended by 50 enthusiasts to form a Society so as to bring together all gentlemen who are interested in Wireless Telegraphy and by the exchange of views to encourage and assist experiment in this extremely interesting branch of science..

In 1913 it changed its name to the Wireless Institute of Victoria, and then became the Wireless Institute of Australia, Victorian Division with evidence of collaboration between New South Wales and Victoria, and around the nation.

Then followed The Wireless Institute of Queensland 1912, the West Australian Radio Club 1913 that ultimately in 1919 became the Wireless Institute of Australia, Western Australia Section.

Experimenters in South Australia formed a branch of the WIA in November 1919, and although there was experimental activity in Hobart prior to 1901, the Tasmanian Division of the WIA was not formed until June 1923.

Clubs generally came later and there were many of them! Most were made up of young men and teenagers, and were built around the new interest of broadcast listening."

MARCH 14

You are listening to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP and I've
been thinking -

Over the past few weeks it has been great to hear the continuing input from
a greater number of clubs to the "Q". This is a great way to publicise events
and activities and let our listeners who aren't amateurs or radio club
members know what is happening.

Getting to know what people are thinking can be difficult in preparing a
segment such as this. It is great to receive feedback, however indirect. I

have been reminded that the real world is not so kind as the image which I present of our hobby. True - but experience has taught me to applaud the good behaviours and ignore the bad. (A bit like training a pet.) I was impressed by the Amateurs Code the first time that I read it, in a loaned ARRL handbook. The amateurs whom I met and the behaviour that I heard on air all seemed to confirm the validity of these aspirations.

Some 50 years along the road, my own experience suggests that the Amateurs Code is still a great guide for our personal involvement in the hobby.

Another suggestion has been floated to me that my comments could relate to a particular club or specific group of people. I'm sorry if anything has been taken that way but in keeping with the WIA broadcast guidelines, the comments are as non-specific and generic as language will permit in a 90 second segment. A couple of generations of experience backed with resources of the www are what I use to try and give a mildly thought provoking opening to QNews. If I have hit the nail on the head, for you, then that is what was intended.

I'm Geoff Emery, VK4ZPP and that's what I think.....how about you?

RADAR / ROCKHAMPTON
IRLP NODE 6973 ;
e-mail vk4acc@wia.org.au
Secretary Clive 4928 1173
http://www.radarc.cjb.net/

This is Doug VK4DUG from the Rockhampton and District Amateur Radio Club, better known to most as the RADAR Club with a timely reminder that the next monthly meeting of the RADAR Club (and that's this Wednesday) will be the Annual Meeting for 2010, so keep in mind Wednesday 17. If you haven't already nominated yourself or somebody else for an executive position then it's too late. Nominations had to be lodged 14 days prior to the event. But it's not too late for you to attend the meeting and show your support for the club.

An added incentive for you to attend is the expected attendance of Brian who is going to share his extensive knowledge of radio from the perspective of an ex radio inspector based in this area, and in addition to this, the usual supper, as supplied by Mary VK4PZ and husband Gordon VK4GM (those delicious ham sandwiches) will round off the evening.

See you there.

73 Doug

Redcliffe and District Radio Club
www.redclifferadioclub.org.au/

I'm Ray VK4CF back with news from the Redcliffe AR Club".

At last Monday night's meeting, Ewin, VK4ERN, accompanied by his good lady, presented the club president David, VK4DC,with the 2009 WIA Grant being a cheque for $500. David thanked the WIA for their support & joked that the club will be applying again this year.

The money received from grants has seen the placing of orders for 2 new repeaters, cavities, and feed lines. Most of the ordered equipment is expected in the coming weeks. The club has already purchased a new generator, solar panels, regulators & computers. With the cost reductions of solar panels, the club has purchased 4 80 amp panels instead of the 2 initially planned.

The caravan working bees have continued over the last few weeks with Charles, VK4BTC, leading a small group of dedicated workers to renovate the caravan. The old interior walls have been replaced to date but there is still a lot of work still to go.

A reminder to all that the John Moyle competition is on Saturday: 20/03/10 & Sunday: 21/03/10. The club will deployed at camp site no 6. at Murrongbong scout camp site off Scout Rd Petrie. Members will be onsite from around 12 noon setting up the camp, radio tents. So if you have time to help on the Friday this will be greatly appreciated.

Costs are: Over night - $7 per night plus fuel & incidentals $6.00.and only $20 for the weekend. For Day trippers the cost will be $5.00 plus an extra $5 for fuel / incidentals or a neat $10 for 1 day or $15 for 2 days. There is no cost for workers who just come along to help setup / pack-up.
Please note there will not be any pit Saturday night roast due to work loads. So BYO Chairs, Food, water, drinks, lights, tents, sleeping gear etc as required. There is heaps of room for camping, so come out & enjoy the event.

The Club BBQ will be on site for your use in preparing meals along with gas cooker for coffee. The club will be trying to run as much as possible with 12v batteries but will use a 12.5 kva generator to power the valve based linear amps.

Mark VK4DGG will be collecting the money for this year's Moyle over the coming Monday nights & on the weekend. If you are behind in your membership perhaps you can pass that on to Mark at the same time as paying for the weekend.

So until next week, for Redcliffe club I'm Ray VK4CF.

GREETINGS AND SALUTATIONS!

THIS IS DON VK4FNQA, WITH NEWS AND HAPPENINGS IN NORTH QUEENSLAND.

I START THIS SEGMENT WITH SOME SADDENING NEWS NEXT WEEKEND THE JOHN MOYLE FIELD DAY WILL BE HAPPENING ACROSS AUSTRALIA, NEW ZEALAND AND PAPUA NEW GUINEA AND SO FAR ONLY THREE OPERATORS HAVE PUT UP THEIR HANDS TO OPERATE CLUB STATION VK4WIT FROM BLUEWATER SCOUT DEN. TARC CONTEST CO-ORDINATOR RICHARD VK4FRJG HAS ADVISED THAT IF THERE ARE NO MORE TAKERS FOR NEXT WEEKENDS EVENT HE WILL CANCEL OPERATIONS FROM BLUEWATER AND, IF TIME PERMITS, RUN PARTIAL

OPERATIONS FROM HIS HOME STATION ONLY.

SO, ALL THOSE TARCADIANS RUSTICATING AND GATHERING GIRTH OUT THERE - IT IS TIME TO ACT AND GET IN TOUCH WITH RICHARD RIGHT NOW - CALL HIM ON TELEPHONE 47752923 OR ON MOBILE 0400339543, FOR FURTHER DETAILS OR TO LET HIM KNOW YOU ARE GOING ALONG FOR AN OVERNIGHTER OR DAY SESSION.

NEXT IS AN ITEM WHERE YOU CAN HELP MIKE GET ON HIS BIKE.

THAT'S RIGHT, DASHING AERO-PARAMEDIC, AVID DX-ER AND ALL ROUND GOOD GUY MIKE VK4MSA IS CURRENTLY TRAINING FOR THE BIG W TOWNSVILLE TO CAIRNS CHARITY BIKE RIDE WHICH RAISES FUNDS FOR THE CHILDREN'S CANCER INSTITUTE OF AUSTRALIA. ONE OF THE RULES OF ENTRY IS THAT MIKE NEEDS TO RAISE AT LEAST FIVE HUNDRED DOLLARS IN DONATIONS BEFORE HE CAN PARTICIPATE.

SO, CAN YOU HELP OUT A FELLOW HAM WHO IS DOING SOMETHING GOOD?

CONTACT MIKE VK4MSA NEXT TIME YOU HEAR HIM ON AIR OR WHEN HE IS NEXT SAVING YOUR LIFE IN A CAR WRECK AND LET HIM KNOW THAT YOU CAN SUPPORT HIM.

CALLING ALL RADIO AMATEURS! DO SOMETHING SPECIAL ON ANZAC DAY TO COMMEMORATE THE FALLEN AND THOSE WHO HAVE LAID THEIR LIFE ON THE LINE FOR OUR COUNTRY, OUR FREEDOM.

MIKE VK4MIK HAS SEEDED AN IDEA TO OPERATE ON AM OR CW THIS ANZAC DAY, USING THE VERY MODES OF MODULATION USED BY ANZACS DURING WORLD WAR TWO, THE KOREAN WAR, THE MALAYSIAN CONFLICT AND INSURRECTION AND THE EARLY PART OF THE VIETNAM WAR.

SOME PARTICIPANTS OF REGULAR RADIO NETS INCLUDING THE 7093KHZ 0600UTC AFTERNOON NET AND THE NORTH QUEENSLAND NET WILL BE USING AMPLITUDE MODULATION ON ANZAC DAY AND THERE ARE MORE MILITARY MUSEUM AND NET STATIONS JOINING THE PARTICIPATION LIST.

IF YOU WANT TO JOIN IN OR FIND OUT MORE ABOUT THIS FINE ANZAC DAY EVENT THEN PLEASE CONTACT MIKE PATTERSON VK4MIK ON EMAIL VK4MIKE@YAHOO.COM.AU

FINALLY, THE TARC SOCIAL EVENING IS HAPPENING THIS TUESDAY EVENING MARCH 16TH FROM 7-30PM AT THE CLUB ROOMS ATOP SES HEADQUARTERS IN GREEN STREET WEST END. COME ALONG AND LEND A HAND TO PUT THE MAGAZINE OF RENOWN, BACK-SCATTER TOGETHER AND SOCIALISE WITH FELLOW HAMS. EVERYONE WELCOME !

WELL, THAT'S ALL THE QNEWS FOR THIS SUNDAY 14TH MARCH.THIS HAS BEEN DON VK4FNQA IN TROPICAL PARADISE FOR THE TOWNSVILLE AMATEUR RADIO CLUB INC, AND YOU HAVE BEEN LISTENING TO; AND ENJOYING QNEWS FROM VK4WIA.

GB2RS NEWS

Sunday 14th March 2010

The news headlines

* New Zealand amateurs gain access to 600m band

* Sheffield ARC put Tapton School on the air

* New DRM for Northern Ireland

The New Zealand government has granted New Zealand amateurs temporary access to a slice of the 600m spectrum. The new allocation, 505 to 515kHz, was previously used for Morse code communications with ships. There are a few restrictions to the use of these frequencies. If these frequencies are allocated to other services, amateurs must not cause interference to these services but must accept any interference from them. Radiated power must not exceed 25 watts EIRP and the bandwidth of transmissions must not exceed 200Hz. It is hoped that this allocation will, eventually, be made permanent.

Sheffield Amateur Radio Club will be at Tapton School on Wednesday 17 March using the callsigns G2AS and G3RCM. At the school, there will be a team of club members giving presentations and demonstrating amateur radio at HF, VHF and UHF. Where possible students will be actively involved as much as possible. For further information please contact the SARC Chairman, Peter Day, G3PHO by e-mail to scienceweek@g3pho.org.uk.

A new Deputy Regional Manager for County Antrim and North Belfast has been appointed. Gerry Lynch, GI0RTN has taken up the position and replaces Charlie, GI4FUE.

Two new volunteer GB2CW Morse tutors have been welcomed to the Morse Proficiency scheme. They are John Dalgliesh, M0JCD in Cheshire and Anthony Freeman, M0HAZ in Skegness. Both these stations will be using 145.250MHz FM. John, M0JCD, will be transmitting on Tuesdays and Fridays from 1930 local time and Ant, M0HAZ, will be transmitting on Tuesdays and Thursdays from 1900 local time. Volunteers for the GB2CW scheme to encourage newcomers to CW are always welcome. If you feel you can donate some time to this worthwhile cause, please contact the GB2CW Co-ordinator Roger, G3LDI by e-mail to roger@g3ldi.co.uk for full details.

BATC members from the Bournemouth Radio Society will be providing streaming from the Flight refuelling ARS Science and Engineering Week open day on Saturday 20 March. Activities will start from 11am and a programme of event times will be displayed on the streamer feed from earlier. The event will be viewable worldwide to anyone with access to a computer with a broadband connection. Viewers should enter www.batc.tv on their browser, then select Live Events where the feed can be found. For more details look at FRARS.org.uk website or contact jfell@tesco.net.

The 61st Annual International DX Convention sponsored by the Southern California DX Club will be held at The Holiday Inn Hotel & Conference Center in Visalia from 16 to 18 April. Details at www.dxconvention.org. And now for the details of rallies and events for the coming week

On 20 March the Lagan Valley ARS Rally will take place at the Village Centre, 7 Ballynahinch Road, Hillsborough. Doors open at 11.30am and there will be plenty of interesting trade stands. Contact Jim, GI0DVU on 02892 662270.

On 21 March the 25th Wythall Radio Club Radio and Computer Rally takes place at Woodrush Sports Centre, Shawhurst lane, Hollywood near Birmingham B47 5JW. The location is 2 miles from junction 3 of the M42. Doors open from 10am to 3pm and entry is £1.50. There will be trade stands and a Bring & Buy. Talk in is on S22. Details from Chris, G0EYO on 07710 412 819.

The Callington Amateur Radio Society Rally takes place on 21 March at the Callington Community College, Launceston Road, Callington, Cornwall PL17 7DR. Doors open at 10am and entry is £2. There will be trade stands and a Bring & Buy. Contact Chris on 07973 418 371.

Now for the news of special events

There are several special event stations on the air this week for St Patrick's Day on 17 March. GB2SPD will be one the air from Moneymore. GB5SPD will be activated by Foyle and District ARC between 15 and 17 March. Also listen out for GB4SPD which will also be using the D-Star network.

Brickfields ARS will be on air throughout this weekend and until the end of the month operating from their club headquarters under the callsign GB4BAR. This special event callsign has been issued to mark the 25th anniversary of the Society's callsign G0BAR. A special edition QSL card has been designed and will be sent to all stations worked. Operations will mainly be confined to 80 and 40m SSB with occasional use of CW. A 2m FM station will also be on air.

Newbury & District Amateur Radio Society will be activating GB0VUL throughout March to promote awareness and publicity of the Vulcan Bomber. The main operation will be 20 and 21 March when a station will be run by Norman, M0JEC from the ATC Hut in St Michael's Road Newbury. Visitors most welcome. Full details at QRZ.com.

The Mesilla Valley Radio Club is going to be operating a special event station, K5B, on 21 March for the Bataan Memorial Death March Marathon.

And now the HF DX news compiled from 425 DX News and other sources.

Andrew, G7COD, will be operational every day from Playa Del Cura on the Island of Gran Canaria, IOTA AF- 004, using the call EA8/G7COD from 20 to 28 March, using SSB and CW on the 20 to 10 metre bands including WARC frequencies. For comprehensive details of operating times, suggested frequencies and QSL information, please check his website www.8q7ak.freewebspace.com.

DL7AFS and DL7ZG will sign V21ZG from Antigua for 18 days starting 16 March. They will concentrate on RTTY, PSK31/63 and SSB. John, G3LZQ will be active as 3B9WR from Rodrigues Island, IOTA Reference AF-017, between 3 March and 2 April. Activity will be on the 160 to 10 metre bands, with a focus on the low bands. John plans to be on the air daily during his sunrise and sunsets, which is 0145UTC and 1345UTC and occasionally during his daytime. QSL via home call.

Now the contest news

On 16 March the UHF UK Activity Contest takes place between 2000 and 2230. Using all modes on the 1.3 and 2.3GHz bands, the exchange is signal report, serial number and locator.

The SSB session of 80m Club Championships will take place on 18 March between 2000 and 2130UTC. The exchange is the usual signal report and serial number.

The British Amateur Radio Teledata Group's HF RTTY Contest takes place on 20 to 22 March. It has an unusual start and finish time of 0200 to 0200UTC. Exchange a signal report, a serial number and the time in GMT. The multipliers are countries plus call areas for W, VE and JA and VK and continents. For single- operator stations there are time-limited 6-hour all-band and 30-hour all-band / single-band categories. The only stations that can operate for the full 48 hours are multi-operator stations, which may be either single- or multi-transmitter entries.

The Russian DX Contest is on 20 and 21 March on the 1.8 to 28MHz bands from 1200 to 1200UTC. There are numerous entry categories, for single- and multi-band, single- and multi-mode, multi-op, various power levels, clubs, etc. An interesting aspect of this event is the possibility of submitting two single-band entries, for example 10m and 80m. Work everyone and send a signal report and serial number, but expect Russian stations to send you a signal report and a 2-letter Oblast code.

Now the solar factual data for the period from the 1st to the 8th of March, compiled by Neil Clarke, G0CAS on the 8th of March.

The latest smoothed monthly sunspot numbers are available for June, July and August 2009 and are 2.7, 3.6 and 4.8 respectively.

Sunspots were visible every day except for the 6th and the 7th. These are the first spotless days since the 19th of January and only the

fourth day so far this year. Only one C class solar flare occurred, this was on the 4th. The remaining day's solar activity was very low. Solar flux levels varied little and averaged 79 units. The 90 day solar flux average on the 7th was 81 units, that's the same level as last week. X-ray flux levels increased slightly from A2.2 units on the 1st and the 2nd to A6.6 by the 4th. The average was A3.7 units. Geomagnetic activity was quiet with the Ap index in single figures everyday. The average was Ap 4 units. Solar wind data from the ACE spacecraft saw solar wind speeds vary between 320 and 470 kilometres per second. Particle densities were low throughout and were never more than 10 particles per cubic centimetre. Bz never varied more than minus 9 and plus 10 nanoTeslas during the period.

All this added up to stable radio weather, in which the HF bands were in good shape. North-south paths to Africa and South America were improved as their seasonal peak approached, while there were also openings on 24MHz to Hawaii and the US West Coast in the early evening. Incidentally, even during this geomagnetically quiet period, both visual and radio aurora were reported on several days &#65533; but apparently much too far north to be accessible to UK operators.

And finally the solar forecast. This week the quiet side of the Sun is expected to be looking our way. Saying that, while the Sun is in its present state sunspot groups can appear at any time. Solar activity is expected to be very low to low. Solar flux levels should be in the 80's for most of the week but could decline into the 70's towards next weekend. Geomagnetic activity could be unsettled today and tomorrow due to a recurring coronal hole after which activity should be quiet for the rest of the period. MUFs during daylight hours at equal latitudes should be about 23MHz for the south and 20MHz for the north. Darkness hour lows should be around 8MHz. Paths this week to India should have a maximum usable frequency with a 50 per cent success rate of around 24MHz. The optimum working frequency with a 90 per cent success rate will be about 19MHz. The best time to try this path will be between 1000 and 1400 UTC.

And that's all for this week from the propagation team.

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including e-mail addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your

transmission.]

NEWS FOR THE MIDLANDS On Monday 15 March Gloucester Amateur Radio & Electronics Society invites members to bring and show their station.

Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 15 March South Birmingham Radio Society is getting ready for the Wythall rally. Contact Don, on 0121 458 1603.

On Monday 15 March Welland Valley Amateur Radio Society is having a 10GHz demo and experiment night. For more information contact Peter D Rivers, G4XEX, on 01858 432105.

On Tuesday 16 March Derby & District Amateur Radio Society is having a quiz night. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 16 March Loughborough & District Amateur Radio Club is looking at its future DF activities and equipment. More information from Chris, G1ETZ, on 01509 504 319.

On Wednesday 17 March Bolsover Amateur Radio Society is discussing the art of DF. For details, send an email to postmaster@g4rsb.org.uk.

On Wednesday 17 March Hinkley Amateur Radio Society is having a personal view of antennas by Steve Boden, G4XCK. Details from John, M0JAV, on 07836 731544.

On Wednesday 17 March Lincoln Short-Wave Club is having a shack activity and natter night. For more information contact Pam Rose, G4STO, on 01427 788356.

On Wednesday 17 March Midland Amateur Radio Society is having another of Ron's film shows and training classes. Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 17 March South Notts Amateur Radio Club is on the air and practicing Morse. Details from Terry, M0RIA, via the web at www.radioclubs.net/snarc.

On Wednesday 17 March Telford & District Amateur Radio Society is having a Marconi event with G3UKV in the chair. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 18 March Brigg & District Amateur Radio Club will be having a talk on 80m DX with limited space antennas by Fred, G0AOJ. Contact John, M6BBB, on 01652 632038.

On Thursday 18 March Cheltenham Amateur Radio Association is having a contest seminar at the Brizen Centre. Contact Derek Thom, G3NKS, on 01242 241099.

On Thursday 18 March RAF Waddington Amateur Radio Club Shack and chat night with radio and antenna play. We always welcome new faces. For more information contact Bob, G3VCA, by email to g3vca@pyewipe.co.uk.

On Thursday 18 March Salop Amateur Radio Society is having a natter night and commences Morse classes with G0EML. Their website is www.salop-ars.org.uk. On Thursday 18 March Stafford & District Amateur Radio Society is holding its AGM. Potential new members would be

welcome. Details on 01785 363025.

On Friday 19 March Coventry Amateur Radio Society is having a Project 2010 construction night. Contact John, G8SEQ, on 07958 777363.

On Friday 19 March Melton Mowbray Amateur Radio Society is looking at three seriously useful pieces of home-constructed test gear. For more information contact Geoff, G3STG, on 01664 480 733.

On Friday 19 March South Birmingham Radio Society is holding a construction evening. Contact Don, on 0121 458 1603.

On Friday 19 March Spalding & District Amateur Radio Society is having a DVD night. For more information get in touch with Graham Boor, G8NWC, on 07947 76448.

On Sunday 21 March Midland Amateur Radio Society is attending Wythall radio rally. Details from Norman, G8BHE, on 01214 229 787.

On Sunday 21 March South Birmingham Radio Society is having a club stand at the Wythall radio rally. Contact Don, on 0121 458 1603.

On Sunday 21 March South Notts Amateur Radio Club commences its weekend event, operating GB2GG for Science and Engineering Week. Details from Terry, M0RIA, via the web at www.radioclubs.net/snarc.

NEWS FOR THE NORTH OF ENGLAND

On Monday 15 March Sheffield Amateur Radio Club is having an open night for National Science Week. For more information contact Trevor Wood, M0TWS, by email to trevorwood6@yahoo.co.uk.

On Monday 15 March Thornton Cleveleys Amateur Radio Society is talking about the Brains Trust with Mick, G4EZM. Details from John Foster, 2E0EZY, on 01253 399377.

On Tuesday 16 March Chester & District Amateur Radio Society is having a talk by Dave Ollerhead, G4JMF, on The Racal Story . Details from Barbara Green on 07957 870770.

On Tuesday 16 March Halifax & District Amateur Radio Society is having part 2 of the talk on Waterways by Geoff, G0PFH. Contact Anthony Vinters, on 01422 822636.

On Wednesday 17 March Denby Dale Radio Club is having a talk on portable operation and equipment by Richard, M0RBG. Contact Gerald, G3SDY, on 01484 602905.

On Wednesday 17 March Hornsea Amateur Radio Club is having a talk by Tony, G0AZQ. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Wednesday 17 March Otley Amateur Radio Society Foundation Exam. Contact Paul, 2E0PAK, on 07768 996370.

On Thursday 18 March Brigg & District Amateur Radio Club will be having a talk on 80m DX with limited space antennas by Fred, G0AOJ. Contact John, M6BBB, on 01652 632038.

On Thursday 18 March Preston Amateur Radio Society is having a talk by Central Lancs RAYNET. Contact Richard, M0RDZ, on 0785 5873566.

On Thursday 18 March South Cheshire Amateur Radio Society is having a club net on 145.350 instead of a meeting. Contact Chris Wiseman, G0RDK, on 01782 773185. On Thursday 18 March South Manchester Radio and Computer Club is having a PC clinic with Dave, G4UGM. Details from Ron, G3SVW, on 0161 969 3999.

On Thursday 18 March York Radio Club is on the air. Details from Tony Skaife, G4XIV, on 01904 330502.

On Friday 19 March East Cleveland Amateur Radio Club invites members to bring in something interesting. For more information contact Alistair, G4OLK, on 01642 475 671.

NEWS FOR SCOTLAND

On Tuesday 16 March Livingston & District Amateur Radio Society is having a club evening. For more information contact Norman, on 07740 946192.

On Wednesday 17 March Ayr Amateur Radio Group is operating on HF. Contact Charlie, MM0GNS, on 01563 551704.

On Thursday 18 March Aberdeen Amateur Radio Society is having a video night. More information from Lewis, GM4AJR, on 01224 575 663.

On Friday 19 March Cockenzie & Port Seton Amateur Radio Club is having a talk on forensic science by Paul Henderson, 2M0BUY. More information from Bob, GM4UYZ, on 01875 811 723.

On Sunday 21 March Falkirk & District Amateur Radio Society is holding its junk and surplus equipment sale at Lodge Zetland Masonic Hall, Grangemouth FK3 8AN. More details from Peter, GM8GAX, on 01259 761012.

NEWS FOR THE SOUTH-EAST

and EAST ANGLIA

On Sunday 14 March Waterlooville Amateur Radio Club is holding its exam course. Details from Rich, G4IBW, on 02392 680852.

On Monday 15 March Basingstoke Amateur Radio Club is having a talk entitled "kilohertz to terahertz - you can do it with CW". Details from Clive, G4ODM, on 01256 326050.

On Monday 15 March Braintree & District Amateur Radio Society is having a talk on bats by Mr & Mrs Jiggens. For more information contact John, M5AJB, on 01787 460 947.

On Monday 15 March Burnham Beeches Radio Club is having a talk about Pamphonics by Jeremy. Contact Dave, G4XDU, on 01628 625 720.

On Monday 15 March Milton Keynes Amateur Radio Society is having a shack open night. For more information go to www.mkars.org.uk.

On Monday 15 March Surrey Radio Contact Club is having a fix-it and natter night. More information from Ray, G4FFY, on 01732 357474.

On Tuesday 16 March Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720815.

On Tuesday 16 March Chelmsford Amateur Radio Society is having a club net night. Contact Martyn, G1EFL, on 01245 469 008. On Tuesday 16 March Verulam Amateur Radio Club is having a hands-on equipment test evening. Details from Ralph, on 01923 265572.

On Wednesday 17 March Bury St Edmonds Amateur Radio Society is having a talk by Derek, G3MWO on the PSK31 data mode. Details from George Woods, G3LPT on 01359 259518.

On Wednesday 17 March Chesham & District Amateur Radio Society is discussing HF mobile whips with Terry G0VFW. Contact Terry, G0VFW, on 01442 831 491.

On Wednesday 17 March Dover Radio Club is having a natter and operating evening. For more information contact Brian, G4SAU, by email to g4sau@darc.org.uk.

On Wednesday 17 March Norfolk Amateur Radio Club is having a talk on 2m and microwaves by Sam Jewell, G4DDK. Details from Chris Danby, G0DWV, on 01603 419204.

On Wednesday 17 March Worthing & District Amateur Radio Club is having a talk on loops and how antennas really work by Mike Underhill. For more information contact Roy, G4GPX, on 01903 753 893.

On Thursday 18 March Cray Valley Radio Society is taking part in the RSGB 80m club championship and having a natter night. Details from Bob, 2E0RCV, on 020 8265 7735 after 8pm.

On Thursday 18 March King's Lynn Amateur Radio Club is having a club night and 2m club net. Contact Ray, G3RSV, by email to ral-g3rsv@supanet.com.

On Thursday 18 March Lowestoft & District PYE Amateur Radio Club is having a club night at shack. Details from Phil, G0JSG, on 01502 585448.

On Thursday 18 March Shefford & District Amateur Radio Society is having mini talks by members. Details from David, G8UOD, on 01234 742 757.

On Thursday 18 March Sutton & Cheam Radio Society is having a talk on operating digital modes on HF by Evan Duffield, M0TJU. More information from John, G0BWV, on 020 8644 9945.

On Friday 19 March Cambridge & District Amateur Radio Club is having a talk on understanding radio specifications by Ludovic, M0GDO. Details from Lawrence Micallef, M0LCM, on 07941 972724.

On Friday 19 March Mid-Sussex Amateur Radio Society is having a talk on the Volks Electric Railway by Ian Gledhill. Contact Peter, G4AKG, on 01444 239371.

On Friday 19 March Reading & District Amateur Radio Club commences its Foundation Licence course. Details from Eric Curling, by email to m0luv@radarc.org.

On Friday 19 March Waterlooville Amateur Radio Club is holding its Exam course. Details from Rich, G4IBW, on 02392 680852.

On Friday 19 March Wey Valley Amateur Radio Group is having a club night. Details on the web at www.weyvalleyarg.org.uk.

On Saturday 20 March Bittern DX Group is having its annual dinner and prizegiving at the Feathers Hotel, Holt. Details from Linda, G0AJJ, on 01692 404154.

NEWS FOR THE SOUTH WEST

On Monday 15 March Appledore & District Amateur Radio Club is holding its AGM. Contact Brian Jewell, M0BRB, on 01237 473251 for more information.

On Tuesday 16 March Blackmoor Vale Amateur Radio Society is having an HF evening in the club shack. Contact Tony, G0GFL, on 01258 860741.

On Tuesday 16 March West Devon Radio Club is having a radio repair and valve testing night with Tony Helm. Further information from Jules Cuddy, M1AGY, on 01752 291588.

On Wednesday 17 March Thornbury & South Gloucestershire Amateur Radio Club is having a video night. Contact Tony, G0WMB, on 01454 417048.

On Wednesday 17 March Trowbridge & District Amateur Radio Club is having a natter night. Details from Ian, G0GRI, on 01225 864 698, evenings and weekends.

On Thursday 18 March South Bristol Amateur Radio Club is having a quiz night. Contact Len, G4RZY, on 01275 834 282.

On Thursday 18 March Swindon & District Amateur Radio Club is having a talk by Bob, G0VTA on Britain's best kept secret, code breaking at Bletchley Park. Contact Den, M0ACM, on 07810 317750.

On Thursday 18 March Yeovil Amateur Radio Club is having a talk by G3MYM on coils and inductive coupling. Contact Steve Crask, G7AHP, by email to steve@g7ahp.co.uk.

On Friday 19 March North Bristol Amateur Radio Club is having a committee meeting. More information from Dick on 01454 218362.

On Friday 19 March Torbay Amateur Radio Society is having a natter night. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES

On Monday 15 March Dragon Amateur Radio Club is having a discussion evening. More information from Stewart Rolfe, GW0ETF, on 01248 362229.

On Tuesday 16 March Wrexham Amateur Radio Society is having a quiz. For more information contact Glyn, MW0BNB, via the web at www.qsl.net/wars.

On Friday 19 March Newport Amateur Radio Society GB4RC Ryder cup meeting. Details from Ross Clare, GW3NWS, on 01633 880146.

NEWS FOR NORTHERN IRELAND

As mentioned in the Main News, a new RSGB Deputy Regional Manager has been appointed for County Antrim and North Belfast. Gerry Lynch, GI0RTN has taken up the position and replaces Charlie, GI4FUE.

168. [RAC-Bulletin] RAC Bulletin 2010-008E - RAC Section Manager Election Results.

RAC Bulletin 2010-008E - RAC Section Manager Election Results.
2010-03-12

Congratulations are extended to Charlie Marsh VO1VZ who was
recently re-elected Section Manager for Newfoundland and Labrador
for a two year term starting July 1, 2010. He ran unopposed,
eliminating the need for a balloted election.

Doug Mercer VO1DTM

SARL News - SUNDAY 14 MARCH 2010

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a webstream, visit www.sarl.org.za, click on ARMI and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and subscribe to receive future bulletins by email.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 10,130, 7,066 and 3,695 MHz SSB.

In the news today:

CHANGES TO RADIO REGULATIONS

SARL NATIONAL CONVENTION

2010 SA AMSAT SPACE SYMPOSIUM

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

CHANGES TO RADIO REGULATIONS

It appears that ICASA is ready to publish the draft radio regulations in the Government Gazette, it could even be early next week.

As soon as the SARL receives a copy of the draft regulations, it will be posted on the SARL website at www.sarl.org.za. Public comment will be invited which will be considered by ICASA before the regulations will be finalised.

The SARL Council will study the draft regulations and, if necessary, will make comment and will seek an opportunity to present its views at a public hearing. A president's net will be convened to get as much input as possible to the position that the SARL will put forward to ICASA.

Although the SARL requested that the organisation make input into the draft, the ICASA Councillor charged with rewriting the outdated regulations decided that once the draft is published for comment, it is the appropriate time for the SARL to make input.

SARL NATIONAL CONVENTION - IT IS NOW TIME FOR ACTION

The SARL National Convention will be hosted in Port Elizabeth by the Port Elizabeth Amateur Radio Society (PEARS) from 23 - 25 April. The Annual General Meeting will be held as part of the National Convention on Saturday 24 April. The full National Convention programme is available on www.sarl.org.za, Book now!

Details of the AGM, agenda, minutes and financial documents are now available on the SARL website for download. One of the important items on the agenda is the revised and updated constitution. Members are urged to study it carefully as it will have to be voted on at the AGM. The constitution has not changed in scope but has been merely updated to reflect modern day practices like email for instance.

If you cannot attend the AGM and National Convention (it would be a great pity) please appoint a proxy to vote on your behalf. It is important to brief the person representing you. You should however put your full trust in the person you are appointing and brief the person to vote in the best interest of the organisation and the SARL.

NZ AMATEURS GRANTED TEMPORARY 600 METRE ALLOCATION

Based on a request filed by New Zealand Association of Radio Transmitters, that nation's telecommunications regulator has agreed to grant New Zealand Amateurs temporary access to a slice of the 600 metre spectrum.

Beginning on March 1st, 505 to 515 kHz has been granted to them on a temporary basis pending an international allocation to radio amateurs and includes some restrictions. These involve a maximum radiated power not to exceed 25 watt effective radiated power and a maximum bandwidth of 200 Hertz.

As in other parts of the world where radio amateurs have use of this band, these frequencies are, or may be, allocated for use by other services. As such, amateur operators must accept interference from, and must not cause interference to these other services.

On the international scene, work continues to gain a world-wide allocation in this area through the International Amateur Radio Union. If and when this is approved, it is likely that the New Zealand Amateurs will be granted a permanent allocation in the 600 metre area.

REGISTER NOW FOR THE 2010 SA AMSAT SPACE SYMPOSIUM

Registration for the 2010 SA AMSAT Space Symposium is now open. The symposium will be held at the University of KwaZulu-Natal on 17 April 2010. There is a substantial discount for early bird bookings. Visit www.amsat.org.za for details and the registration form. The symposium will be opened by Dr Phil Mjwara, Director General of the Department of Science and technology followed by an array of interesting speakers and subjects. The type of conference you cannot afford to miss.

Bona fide students and learners are invited to apply for free registration made possible through a grant from the Department of Science and Technology through the FRD and UKZN.

SARL DISCUSSION FORUM

The SARL Discussion Forum will in future only be available to registered Forum Members. Ensure that you enable cookies on your computer and the Forum will remember your computer. Anybody can register to be a member of the SARL Forum. Contact Gerhard, ZS3TG, at 082 576 6296 in case of any questions.

RULE CHANGE TO THE WAZS PROGRAM

The sequential numbering of certificates serves an important function as it denotes who was first, second etc. to reach a certain level of achievement but at present, it no longer serves this purpose as a flood of requests for meaningless endorsements keeps on streaming in.

A change to the rules has been made and the sentence "Specific mode and/or band endorsements can be requested" has been changed to "Specific mode or band endorsements can be requested".

In effect this means that requests for WAZS SSB, WAZS CW, WAZS Mixed or WAZS 7 MHz etc. at the various levels will be entertained but endorsements such as 7 MHz CW or 7 MHz SSB will no longer be issued.

Tjerk ZS6P, the SARL awards manager, wishes to thank you all for the magnificent support you have given to the WAZS program.

HAMNET WESTERN CAPE

Hamnet Western Cape announces the appointment of Paul van Spronson, ZS1PVS, as the new Provincial Director for the Western Cape.

Paul takes over from Bruce Robinson, ZS1FX, who has done a sterling job of building up and expanding Hamnet activities in the Western Cape. Bruce will stay on as the Hamnet representative for the Maritime Rescue Coordination Centre as well as for the soccer world cup later this year.

Bruce has a heavy work commitment and felt that it be a good idea to get some new ideas into the running of Hamnet and we welcome Paul who has already indicated that he plans to introduce some changes.

Thank you Bruce for all you did, it is highly appreciated.

Listeners country wide are reminded that the Hamnet Western Cape's bulletin is transmitted every Wednesday evening at 20:30 CAT on 145,700 MHz in Cape Town and relayed on 3 760 kHz. The bulletin consists mainly of matters relating to emergency communications, and particularly relevant to the Western Cape, but there may be items of interest to you. The editorial welcomes contributions which may be of use to all, so please email Dave to zs1dfr@telkomsa.net with any information you might have. Call-in on 3 760 kHz starts at about 20:20 CAT, and is

handled by David, ZS1DDK, who manages the relay. He welcomes signal reports, even if you are unable to call in or be heard.

CONTEST NEWS

SARL VHF/UHF Contests.

The first leg of the SARL VHF/UHF Contests is scheduled for the weekend of 19 to 21 February 2010. There are two contests running during the weekend.

The VHF/UHF Digital contest is made up of two sessions, the first session runs from 16:00 UTC on Friday 19 March to 12:59 UTC on Saturday 20 March and the second session runs from 13:00 UTC on Saturday 20 March to 12:00 UTC on Sunday 21 March.

The VHF/UHF Analogue contest takes place from 10:00 UTC on Saturday 20 March to 10:00 UTC Sunday 21 March.

The following frequency bands may be used - 50 to 51,5 MHz; 70 to 70,300 MHz; 144 to 145,55 MHz; 432 to 433,6 MHz; 1 296 to 1 296,5 MHz and higher frequencies as per band plan. Read the complete rules for both contests in the 2010 SARL Contest Manual.

PEARS VHF/UHF Contest.

The results of the 2010 PEARS National VHF/UHF Contest held in January 2010 have been released. As usual, there was a hive of activity in the Southern and Eastern Cape and it was good to see an increase in activity in the other provinces.

Winners of the analogue category:

Single Operator Base Station. 6 m Eric Hosten, ZS2ECH 4 m Ken Victor, ZS2OC 2 m Johan van Aarde, ZS2I 70 cm Andre Botes, ZS2ACP.

Single Operator Field Station. 6 m Terence van der Linden, ZS2VDL 4 m Al Akers, ZS2U 2 m Terence van der Linden, ZS2VDL 70 cm Terence van der Linden, ZS2VDL, and Allan Bowles, ZS2BO.

Multi Operator Field Station. 6, 4 and 2 metre and 70 cm classes won by Andrew Prideaux, ZS2PA.

Limited Category 6 and 2 metre and 70 cm classes won by Alexandros Gogos, ZR2T.

Winners of digital category:

Single Operator Base Station. 6 m Andre Botes, ZS2ACP 4 m Andre Botes, ZS2ACP, and Willem Badenhorst, ZS6WAB 2 m Derek Gravett, ZS5Y 70 cm Derek Gravett, ZS5Y, and Glenn Kraut, ZS2GK.

Congratulations to all the winners, the full results are available on the PEARS website.

HABEX 2010

The High Altitude Balloon Experiment 2010, also called HABEX ,is being hosted by the Sci Bono Discovery Centre.

This project aims at launching a series of balloons to high altitudes carrying payloads constructed by school learners.

10 Schools from Gauteng are participating and radio amateur operators who have a passion for education and developing the hobby are needed to assist the teams in getting ready.

Radio amateurs who wish to participate will be paired up with a school team and will assist the school team during preparation as well as during the launch. Radio clubs are also invited to pair up with schools.

An information sharing meeting is scheduled for 20 March 2010 at Sci Bono Centre at 09:00. Please sms your vehicle registration number and callsign to 083 543 5668 to arrange for secure parking in the basement.

Sci Bono is situated in Mirriam Makeba Street opposite the Market Theatre, Johannesburg.

CLUB NEWS

The Garden Route Radio Club's 40 metre beacon ZS1AGI/B near George is back on the air on 7,025 MHz with 200 mW maxm. output. The beacon is very useful to determine whether the band is open to the Southern Cape.

Reception reports will be appreciated; use the e-mail address for ZS1GRC as listed in the SARL Call Book.

The Amateur Radio section of the Oakdale Club recently held their Annual General meeting and the following members were elected for the club's 2010 committee: Fred Scheepers, ZS1FCS, - Chairman Graham Butler, ZS1GVB, - Vice Chairman and Manager Social Events Dirk du Plessis, ZS1DDP, - Treasurer David Perry, ZS1SG, - Radio Shack Manager & Technical matters Gerald Menesis, ZS1GRM, - Organizer Lighthouse events Dirk v d Berg, ZS1VDB, - QSL Manager & DX, PIO Sean White, ZS1BSD, - Secretary & Youth activities Herby Evans, ZR1ABV, - Catering. Appointee: Deon Coetzee - ZR1DE - Editor Acorn Times.

HF HAPPENINGS NEWSLETTER.

HF Happenings is a free weekly newsletter containing contest news, African DX News and other matters of HF interest. The newsletter is available via e-mail in PDF format. To receive a copy of HF Happenings or to be placed on the mailing list, send an e-mail request to zs4bs@netactive.co.za.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at low levels. A pair of sunspots are currently visible on the earth facing side of the sun. The effective sunspot number is expected to be less than twenty for the coming week.

20 and 15 m will provide the best opportunities for DX. Conditions to India will be good from the afternoons onwards. During the late afternoons and early evenings it will be fair towards Europa. In the afternoons there are good possibilities of contacts with the USA on 15 m. Contacts with Australia and New Zealand will be challenging. During the afternoons and evenings good 20 and 15 m contacts may also be possible with Brazil.

Local conditions are going to be good on 40 m during the day time. 80 m may perform well during the early mornings and late afternoons over the shorter distances. 30 m will perform well during the middle of the day. 20 m is very useful for contacts over the longer distances during the majority of the day.

80 m is the frequency of choice in the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

13/14 March - RSGB Commonwealth CW only Contest. 19/21 March - SARL VHF/UHF Digital Contest. 20/21 March - SARL VHF/UHF Analogue Contest. 20 March - HABEX information meeting at 09:00 at the Sci Bono centre. 27 March - Pretoria Amateur Radio Club Flea market at 08:00. 27 March - PIC programming in 4 hours course at the NARC. 31 March - SARL 80 m Club Contest with PSK and RTTY. 31 March - Closing date for stage 1 of the Construction Competition. 17 April - 2010 SA AMSAT Space Symposium. 23-25 April - SARL National Convention, Port Elizabeth. 7 May - Closing dat for stage 2 of the Construction Competition.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items, if possible, in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria-area, with relays on 7 082, 7 205 and 17 860 kHz. There is also a podcast by ZS6RO. For a webstream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 21:00 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League compiled and edited by George, ZS6NE.

Thank you for listening, 73.
/EX

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 7th-March, through Sunday, 14th-March there were 232 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5U, 5V, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9Q, 9V, 9Y, A4, A6, A7, A9, AP, BV, BY, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, F, FG, FJ, FK, FM, FO, FP, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HC, HH, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, R1FJ, S5, S9, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, TA, TF, TG, TI, TK, TL, TN, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9C, VK9W, VP2M, VP5, VP6, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZK2, ZK3, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

2010 VISALIA DX CONVENTION CONTEST DINNER. The Mother Lode DX and Contest Club is pleased to host the 11th Annual Contest Dinner on Friday, April 16th, at the International DX Convention <http://www.dxconvention.org> in Visalia, CA. Contest Dinner tickets are on sale now at:

http://www.mldxcc.org
There will be no Contest Dinner tickets sold at the door. Order your tickets early! The dinner will be held in the Oak room at the Holiday Inn, Visalia. Dinner Speaker: The Return of Dr. Beldar. Cost and ticket sales: * Dinner reservations are by pre-payment ONLY - no tickets will be sold at the door!
* 38.00 USDs per person with random seating; or, 370.00 USDs for a full table for 10 people All 10 tickets must be purchased by ONE person. One table will then be reserved for that person. Location of the reserved table will be random.
Seating is limited to 150, no tickets will be sold at the door. Ticket orders MUST be placed by April 12th, 2010. Please direct any questions to: dinner@sonic.net

3C0, ANNOBON ISLAND (Update/Delay). The following was announced on March 12th, about a delay for the April 3C0C DXpedition (edited): "Today we received a statement from Equatorial Guinea where we are told that in the coming days they will start some repairs on the runway on Annobon, and therefore; np one can not enter or leave on any flights from the island. It seems that there is hope that the work will last two to three months. Although we are prepared to leave for Africa at any time, we are forced to delay our stay at Annobon until work on the runway is completed. Access to the island of Annobon is by air since the sea is of great difficulty, slow and without regularity. All news and information will be posted on our site; we hope you all understand these problems are beyond our control. We want Annobon 3C0C to be activated as soon as possible. Thank you on behalf of the entire 2010 3C0C Annobon Island Team." For more details and updates, visit the 3C0C Web page at: http://www.3c0c-annobon.com

4J0, AZERBAIJAN (WFF Op). Look for 4J0WFF to be active from the National Reserve "Yanar Dagh" (4JFF-016, New One), Burning Hill, starting March 20th, and be on the air no less than 3 days depending of local conditions. Activity will be on 40-10 meters (including 30/17/12m) using CW, SSB and PSK-31. Equipment will be a home-made transceiver by UW3DI (w/PA-3xGU-50) into Inverted "V's" and a multi-band Loop with PCm. QSL via: Box 86, Baku, Az-1000, Azerbaijan.

4S7, SRI LANKA (AS-003). Alexander, UX4UL, is now active as 4S7ULG from Colombo on the main island (AS-003) until April 7th. Activity has been mainly on 20 and 17 meters PSK. QSL via UY5ZZ.

5C, MOROCCO (Reminder). Alfredo, IK7JWX, and a team of operators will activate the city of Essaouira (Cap Sim Lighthouse ARLHS MOR-019, Grid Square IM51), Agadir (Grande Jetee/Jetee Ouest Lighthouse ARLHS MOR-040, Grid Square IM50) and Marrakech between March 16-23rd. Operators mentioned (with callsigns) to be active are: Alfredo/IK7JWX (5C2J), Leo/I8LWL (5C2L), Simon/IZ7ATN (5C2SG), Ruggero/IK2PZC (5C2P), AntoNello/IK2DUW (5C2W) and Michele/IK2GPQ (5C2Q). Activity will be on all HF bands and 6 meters, using CW, SSB, PSK31 and RTTY. QSL via their home callsign.

8P55, BARBADOS. Members of the Amateur Radio Society of Barbados (ARSB) will be active as 8P55AW to celebrate their 55th anniversary in 2010.

Activity this past week has been on 40/17/10 meters using CW and SSB.
QSL via: Amateur Radio Society of Barbados, PO Box 814E, Bridgetown,
Barbados.

9Q, DEMOCRATIC REPUBLIC OF CONGO. Operators Anton/ON6NL and Henk/ON4AHF
have been on the air as 9Q0AR/6 and 9Q0HQ/6, respectively, using the club
station's callsigns in South Kivu regoin. They plan to be there for about
another 10 days. Both are are currently working in the Democratic Republic
of Congo (DRC) with the organization "Doctors Without Borders" (Medecins
Sans Frontieres - <http://www.msf.org>) for about the past two weeks.
Activity has been mainly on 40 and 20 meters SSB using a FT-897 and wire
antennas. There is a possibility of some CW. It has been reported that
their workload includes setting up repeaters within the DRC. Over the
past weekend, they conducted classes for the locals who are interested
in Ham Radio, and the classrooms had about 20-25 individuals. QSL 9Q0AR/6
via ON6NL and 9Q0HQ/6 via ON4AHF.

A3, TONGA (Update/Pacific Tout Continues). Hugh, K6HFA, is on his second
leg of his South Pacific tour (see OPDX.948/950) and is now active as
A33A until April 2nd. Remember he plans to activate IOTAs OC-049, OC-064
and OC-123. He is now on OC-049. Activity will be on CW, SSB and possibly
RTTY using 100 watts into a multi-band vertical antenna (for 80-15m).
Look for him on the IOTA frequencies or possibly other frequencies. Hugh
plans to call by areas (EU, NA, SA, ASIA... etc..) per propagation. QSL
via K6HFA. His next stops will be:
Wallis (FW)- April 6ï¿½12th; IOTA OC-054
Tuvalu (T2)- April 13ï¿½21st; IOTA OC-015
Fiji (3D2) - April 23ï¿½26th; IOTA OC-016 or OC-156

CE0Z, JUAN FERNANDEZ (Aid ï¿½ Special Website Launched). Stan, SQ8X, has
circulated the following important information (*Please forward to all
DX bulletins and circulate as widely as possible.*): "I'd like to inform
the ham radio community about a *special website* dedicated to help
islanders of Archipelago Juan Fernandez, CE0Z. The site is intended to
inform people about what happened at the island and how to help collect
funds to restore the island's infrastructure and islanders' lives. We
really hope this will help them as they have helped so many times to
numerous hams visiting the island. In our opinion it's ham's turn to
help now. The website is available at: http://help-juan-fernandez.org
IMPORTANT: Spanish version of the site will be added in a few days.
The idea was formed in my head right after the earthquake and has been
introduced and widely discussed with the president of Radio Club de Chile,
Dr. Galdino Besomi, CE3PG, who agreed to declare patronage over this aid
action. RCCh will be 100% responsible for collecting and transferring
funds to islanders. A monthly report will be published at the site +
RCChï¿½s website at: http://ce3aa.cl
Please read the website to learn more about the idea and how to help.
We will be very helpful for sharing this info across ham bulletins,
club websites, radio leagues and other sources of information. If you
have any further questions different than websiteï¿½s maintenance and
technical stuff, please feel free to contact Radio Club de Chile for

further news and details..... On behalf of Radio Club de Chile,
Stan Strzyzewski, Poland SQ8X"

CR1, AZORES. Polish operators Marcin/SP5ES and Tom/SP5UAF will be active as CR1M and CR1Z, respectively, from Sao Miguel (EU-003) during the CQWW WPX SSB Contest (March 27-28th) as Single-Op (?) entries. QSL CR1M via SP5ES. QSL CR1Z via SP5UAF.

CT9, MADEIRA ISLAND (AF-014). Operators Hardy/DL3KWF and Rosel/DL3KWR (XYL) will once again be active as CT9/homecall from the Hotel Royal Orchid between now and March 25th. Activity will be mainly CW on 30/17/12 meters. Hardy is expected to try some RTTY and PSK-31. QSL via their home callsigns. E-mail requests for Bureau QSL cards can be sent to: dl3kwr@darc.de --or-- dl3kwf@darc.de
Visit their Web site at: http://www.mydarc.de/dl3kwr

DAYTON HAMVENTION EVENTS.....
* Tim, K3LR, announced that the North Coast Contesters are pleased to announce that Joel Harrison, W5ZN, will be the main speaker at the 2010 Dayton Contest Dinner. An active contest operator, Joel just finished a four year term as President of the ARRL in January of this year. For more information on the 18th Annual Dayton Contest Dinner, visit: http://contestdinner.com

* The SouthWest Ohio DX Association (SWODXA) has started to announced their line-up for their DX Forum at this year's HamVention. Don, N6JRL, will be this year's DX Forum Moderator, and so far, the forum's speaker/presenter for May 15th are:
Tom Harrell, N4XP - The K4M Midway Island 2009 DXpedition
George Wallner, AA7JV - The TX3A Chesterfield Reef DXpedition
Paul Ewing, N6PSE - The YI9PSE Iraq DXpedition
ADDED NOTE: At the end of DX Forum, SWODXA will be raffling off a Yaesu FT-2000!! Tickets will be sold during the Friday night DX Dinner and during the DX Forum. Tickets are 5.00 USDs or 5 for 20.00 USDs.

* The SouthWest Ohio DX Association (SWODXA) has announced that their speaker for the DX Dinner on May 14th, will be Dave Anderson, K4SV. Look for his bio to be posted soon on the SWODXA Web or BLOG page at: http://www.swodxa.org
http://swodxa.blogspot.com

DX0, SPRATLY ISLANDS (Update). In early February we reported that Chris, VK3FY, was in the planning stages of a DXpedition to Spratly Islands to take place sometime in January 2011. It was reported this past week that permission from the Philippines has been granted to operate from Pagasa Island (AS-051) for three weeks in January of 2011. The callsign of DX0DX is pending. Chris states he is looking for good CW and or CW/Phone operators who would like to participate in this operation. They can contact Chris via his E-mail address at: vk3fy@iprimus.com.au
More details should be forthcoming.

E20, THAILAND. Members of the HSDXA (Thailand DX Association) will be active as E20AS in the CQWW WPX SSB Contest (March 27-28th) from club's HS0AC station as a Multi/Single entry. Operators mentioned are: John/ HS0ZDJ, Swen/HS0ZFZ, Nathan/HS0ZHG, Cy/HS0GBI, Winit/HS1CKC and Champ/ E21EIC. QSL via HS1CKC.

EE2, SPAIN. Members of the Ondarroa Group will be active as EE2W from Ondarroa City (WW Loc. IN83SH, DME: 48073, Province of Biscay) during the CQWW WPX SSB Contest (March 27-28th) as a Multi-Single entry. QSL via EB2BXL.

FP, ST. PIERRE & MIQUELON. Operators Paul/K9OT and Peg/KB9LIE will once again activate Miquelon Island (NA-032) between July 5-14th. Callsigns will be FP/homecall. Activity will include the IARU HF Championship Contest (July 10-11th) as two Single-Operator entries. They will operate CW and SSB on 80-10 meters with a possibility of 160m and 6m, if conditions are good. They hope to have internet access from the Motel de Miquelon. Visit their Web site at: http://www.hamradio.pnpfarms.com
QSL via their home callsigns, direct (w/return postage), by the Bureau or LoTW.

HH, HAITI. Operators Jan/K4QD and Don/AF4Z will once again be active as HH4/homecall from the Northwest Haiti Christian Mission <www.nwhcm.org> between March 22nd and April 2nd. They will operate 160-10 meters on CW, SSB and RTTY as time permits. Usually nighttime low band operations will be limited to the availability of AC power. They will also participate in the CQWW WPX SSB Contest (March 27-28th), along with Jean-Robert, HH2JR, and the Radio Club of Haiti in an attempt to again obtain the special prefix and callsign 4V4JR for the contest (like last year). QSL via their home callsigns. Operators prefer direct or LoTW, but the Bureau is "OK".

HQ2, HONDURAS. Operator Dan/HR2DMR and his son Daniel(JR.)/HQ2DMR, will be active as HQ2W during the CQWW WPX SSB Contest (March 27-28th) as a Multi-Op/All-Band/Low-Power entry. They will use monobander antennas on 20/15/10m and sloper antennas on 160/80/40m. QSL via HR2DMR. QSL via address on QRZ.com.

IOTA NEWS.....
EU-127. (IOTA/WFF Op) A German team will be activating Neuwerk Island and the National Park Hamburg Wadden Sea (WFF DLFF-005) between March 19-21st using the callsigns DA0GLH and DF0WFF. Their QTH will be from a building by the lighthouse on Neuwerk. This building is 700 years old (the oldest building of Hamburg City) ï¿½ therefore the callsign DA0GLH will be used and a special DOK "700NWK" number will be provided. Access to the island is only possible during low tide. In case of bad weather, the German team will not be able to go to Neuwerk. Operations are expected to start very late on the 19th, and they will stay for about 48 hours. Operators mentioned are: Matthias/DK7LV, Peter/DJ4RU, Friedrich/DL4BBH, Henning/DB5BZ, Helmut/DL1BGC, Ric/DL2VFR, Frank/DL2SWW and Gabi/DF9TM. Activity will be on all HF bands using CW, SSB and PSK, as well as 2m and 70cm on FM. QSL via the DARC Bureau for both callsigns. If necessary, direct via

DL2VFR. They will upload the logs to the WFF log search Web
page at: http://www.wff-dl.de

EU-118. RARE IOTA (Update)! Operators Oscar/EA1DR, George/EA2TA,
Christian/EA3NT, Col/MM0NDX, Vincent/F4BKV and Bjorn/SM0MDG
are planning a DXpedition to Flannan Isles (an extremely
difficult island to land on) between June 18-21st. Last
activation was in 2002 (also in 1989 and 1995). Callsign
will be MS0INT. Their main target will be working as many JA
stations as possible and giving everyone a fair chance of
working the EU-118 IOTA reference. Therefore, they aim to be
active on 80-10 meters trying to get advantage on the best
bands, with 2 simultaneous stations on the air (possibly 3
stations in daylight), one on CW and another on SSB. They
state, "Since our stay on the island is limited, please
remember that 1 QSO will be enough, no matter the band."
QSL Manager will be M0URX. The team is still looking for
sponsors. For updates, visit their Web page at:
http://www.ms0int.com

NA-182. (Update) John, VE8EV, is planning to activate Greens Island
in the Northwest Territories (NWT) in the Inuvik Region East
Group between April 15-20th. As a SSB only operator, John
would like to bring along a good CW operator too. He would
also like to have the 2nd operator to be able to coordinate
a fundraising campaign and not be afraid of a little winter
Arctic camping. If interested in participating in this IOTA
operation, please contact John at: ve8ev@arrl.net
Visit John's Blog page at: http://ve8ev.blogspot.com
Online logs will be uploaded as soon as possible after the
operation.

JD1, OGASAWARA. Hiroyuki "Harry", JG7PSJ, will once again be active
as JD1BMH from Chichijima Island (AS-031) between May 2-14th. Activity
will be on 40-10 meters (possibly 80m) using CW, SSB and the Digital
modes. QSL via his home callsign. Visit his Web page for more details
at: http://sapphire.es.tohoku.ac.jp/jd1bmh/index.html

KH6BZF PROPAGATION FORECAST/REPORT (For March 15-21st)....
Mar 15 HN-LN SOLAR REFERENCE KEYS
Mar 16 LN-HN --------------------
Mar 17 AN BN - Below Normal
Mar 18 AN AN - Above Normal/Geomagnetic Level is QUIET
Mar 19 AN LN - Low Normal
Mar 20 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Mar 21 AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less

UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

OA, PERU. Daniel, DL5YWM, will once again be active as OA4/DL5YWM from Lima between March 20th and May 15th. Activity will be limited to his free time. Daniel may possibly travel to a different part of Peru and be active as OA*/homecall. He may also activate a Peruvian island, but this depends on the local conditions. This will be a last minute decision. QSL via his home callsign.

OX, GREENLAND (Update). Reid, N0RC, will be active as OX3/K0KU from Thule, Greenland (NA-018), between March 23rd and April 24th. Activity will be limited as work permits, but Reid plans to be on every other day and try to get on the air for contest weekends, but he cannot guarantee this. Reid informed OPDX this past week that there is a possibility his trip will be extended for another 2 to 4 weeks after the stop date, so operations past that date may be possible. He also informed that he will make an effort to be on during the contest weekends including the CQ WPX SSB Contest (March 27-28th). He will be using the callsign OX3RC if his license arrives in time (he has been told it's in the mail), or OX/N0RC. Reid plans on using 60 meters if his permit arrives with his license. He will also be operating on the other HF bands, including 10m if it is open. If 10m is open, Reid will be giving out his 10-10 number upon request. Also, Reid plans to operate on the satellites, activating grid FQ56 during his time on Thule. He will be limited to FM birds with a VHF uplink. Satellite operation is also dependent on the BMEWS radar system not interfering with the UHF downlink. Michael, OX3MC, gave a listen to the downlinks and thinks it won't be a problem, but he won't know for sure until he gets up there. The second factor would be the weather. While Reid wants to give QSOs, he states, "I'm not going to get frost-bitten to do it!" Reid will upload his log to ClubLog.org, LoTW and Eqsl. QSL direct or by the Bureau via N0RC. ADDED NOTE BY REID: "Since I will be operating in my spare time, I cannot give a predictable schedule. I plan on sending out an announcement before I go on the air through a google group page with planned times, bands and modes of operation for that day. People can sign up by going to:
http://groups.google.com/group/ox-thule-2010

P3, CYPRUS. Operators Alex/5B8AD, Tony/RX9TL, Mike/RK3QS, Max/RV3BA, Vadim/UA9SCX and Jack/RW3QC will be active as P3N during the CQWW WPX SSB Contest (March 27-28th) as a Multi-Single entry. QSL via RW3RN.

PACIFIC ODYSSEY 2010 TOUR. Members of the Ukrainian DXpeditioners Team (UDXT) have announced their new project "PACIFIC ODYSSEY 2010" to take place between mid-May and early June. The UDXT members include the following: Sergey/UX0HX (Team Leader), Oleg/RK3FA, Alex/UT5UY, Yuriy/ UT1HF, Oleg/US7UX, Leo/UR3HR and Yuriy Grushevskiy/SWL. Activity will take place from the following islands on all bands and modes as:

Samoa (5W) - Between May 18-19th; callsign 5W0OX; Reference numbers are: CQï¿½32, ITUï¿½62 and IOTA OCï¿½097.

Central Kiribati (T31) - Between May 22nd and June 1st; callsign T31X; Reference numbers are: CQï¿½31, ITUï¿½62 and IOTA OCï¿½043
.

Tokelau (ZK3) - Between June 2-6th; callsign ZK3X; Reference numbers are: CQï¿½31, ITUï¿½62 and IOTA OCï¿½048.

Alex, UT5UY, co-leader, states (edited), "The main mission of this DXpedition is activating Central Kiribati (T31), Kanton Island, in the Phoenix Islands Group. This DXCC entity is ranked #7 in EU and #19 in the 'Worlds Most Wanted List'. The next goal is activating Tokelau Islands (ZK3), which is ranked #29 in EU and #35 in the 'Worldï¿½s Most Wanted List'.
The running of the DXpedition to remote Pacific Islands is always very expensive. We invite organizations and individuals to make the donation towards the cost of this unique operation." For more information, please visit their "Pacific Odyssey 2010" DXpedition Web site at: http://www.uz1hz.com/pacificodyssey.html

PACIFIC (T31) TOUR CANCELLED. Dragan, YT3W, sent out the following press release about the Sept./Oct. T31 DXpedition (edited): "It is with great regret that David/K3LP (Co-Leader) and I (Hrane/YT1AD Leader) must inform the DX Community that after 16 months of planning our DXpedition trip to Canton Island (T31) <http://www.yt1ad.info/t31>, slated for 11 days in October 2010, will be cancelled. We planned 6 stations fully equipped for HF plus two additional stations for UHF/VHF/Satellite plus 13-14 operators. Our goal was to make 100,000 plus QSOs much like our N8S - Swains Island DX-pedition in 2006.
This decision is based on the March 7, 2010, announcement by the T31X team planned for June 2010 <http://www.uz1hz.com/pacificodyssey.html>. Unfortunately, it is cheaper to send a smaller crew with three radios and two amplifiers.
In light of this recent announcement, the total cost of the trip versus the uniqueness will evaporate prior to our arrival. For this reason, we will pick another location for a future date. Minus some team member partial cash contributions and planned equipment sponsors, there were no cash donations made that need to be refunded. We will forfeit our $40K cash deposit on the boat and seek other places in 2011..... Sincerely, T31F team 2010"

PJ6, NETHERLANDS ANTILLES. By the time you read this, three members of the Southeastern DX Club (SEDXC) and the K5D team (Bob/K4UEE, Gregg/W6IZT and George/N4GRN) should be finishing up their operation on the Island of Saba (NA-145, Grid Square is FK87). Their last day was expected on March 15th. Operators signed PJ6/homecall. The purpose of this operation was to finalize plans and begin building a station for the anticipated political realignment in the Netherlands Antilles later this year. QSL via their home callsigns.
ADDED INFORMATION: The dissolution of the Netherlands Antilles was originally planned to occur in December 2008, but has been rescheduled to happen October 10th, 2010. As of March 8th, the break-up of the Nether-lands Antilles will happen as follows:

* Curacao (PJ2) and Sint Maarten (PJ7) will become two new constituent states within the Kingdom of the Netherlands (something like what happen to Aruba). (ed. For DXCC purposes, probably two deletions and two new entities.)

* Bonaire (PJ4), Saba (PJ6) and Sint Eustatius (PJ5) are expected to become a direct part of the Netherlands as special Dutch municipalities. (ed. For DXCC purposes.... not sure, but possibly three new entities.)

For more information on the break-up, see "Dissolution of the Netherlands Antilles" on Wikipedia at:
http://en.wikipedia.org/wiki/Dissolution_of_the_Netherlands_Antilles

QSL INFO AND NEWS.....
NOT A QSL MANAGER. Khos, JT1CD, informs OPDX that he has been receiving QSLs for JT1BH. He wants everyone to know that he is NOT his QSL Manager and "IS NOT" a QSL Manager for any individual Mongolian (JT) amateur radio operator.

NAVASSA QSLS STILL AVAILABLE! QSLs for the 1988 N2EDF/NP1 and K2SG/NP1 DXpedition to Navassa are still available via the operator's home callsign.

MM0DGR/p WRAP-UP. Photos and a video report about trip to Whitlaw Mosses GMFF-067 is now available at: http://www.gmff.org

MM0DGR/p via MM0DFV. urij, MM0DFV, was active this past Saturday, March 13th, from Kirkconnell Flow National Nature Reserve (GMFF-040). The station was located at the northwest side of the nature reserve (NX961701). WAB Square: NX97. QRA Locator: IO85EA. EU Area: SC06 (Dumfries and Galloway). IOTA: EU-005. WLOTA: LH-1234. More information is available at: http://www.gmff.org

NEW QSL MANAGER. Phil, G3SWH, announced that he was appointed the QSL Manager for G4FOC - the HQ callsign of the "First Class CW Operatorsï¿½ Club".

QSLS VIA LoTW: 4O3A, 9M6XRO, A31A, BX5AA, C6AKQ, C6ANM, CE2WZ, CN3A, DP1POL, E51WWB, EA1AKS, EA9IE, EF8N, FM5CD, GI0KOW, HA7TM, HB9LCW, HQ9R, I2XIP, I4AVG, LN9Z, LX7I, LY8O, LY9Y, MD0CCE, OK1CF, OK1DO, OK3C, OM4EX, OP1A, OX3XR, OY3AA, OZ5NJ, PA5KT, RX3APM, S50R, SJ2W, SO4M, SO9Q, SV5/IK1PMR, SV5/K2LEO, T94CT, TF/PA3LEO, TO5A, TX3D, TX4T, TX5SPA, TX5SPM, TY5LEO, TY5MR, UT7QF, UW0K, UW7LL, VP2MUM, VP5T, VP5W, VP8DMN, XR0Y, YB1ALL, YT3M, YY5LI, ZF2AM, ZP6/IZ1GLO and ZP6CW

QSLS RECEIVED VIA MAIL: 5H3EE, 5W0CF, 7X2GX, A31A, C6AKQ, E51NAA, FK8CP, FT5WO, JR6EA, K2V, TF3PPN, TX5SPA, TX5SPM, UK8FF, XR0ZA and Z21BB

QSLS RECEIVED VIA THE BUREAU: CQ2I, CY0X, JD1BMM, RI1OP, S56DX, S57DX, UA2FW and UE1OLH

S7, SEYCHELLES. Operators Gav/GM0GAV and Rob/GM3YTS will be active as S79GM between March 21st and April 1st. Activity will be on all bands

with an emphasis on the lower bands. Operations will be mainly CW with a possibility of some RTTY. They have tried to gain access to 7000-7050 kHz without any success, so look for them on 7050 or above and listening around 7025 kHz. They do have full access to 80m. There is a S79GM blog and the operators plan to update their QSX frequencies on that page. The blog page is: http://s79gm.blogspot.com
All QSOs will be uploaded to LoTW immediately upon their return home and they hope to be able to upload their logs during the DXpedition to: http://www.clublog.org/charts/?c=S79GM

T03, PRINCIPALITY OF SEBORGA (DXCC Status). Last week we mentioned that Zoli, HA3HK, will be active as T03HK (Tango Zero Three Hotel Kilo) from the Principality of Seborga between March 12ï¿½14th. Since then, OPDX has contacted the DXCC and we were told that "T03HK" - "does not count for anything" since the callsign they use was a T0. However, if they were to use an Italian callsign it may be "OK" for Italy.

T32, EASTERN KIRIBATI (Update/Delay). Operators for the major DXpedition to activate 4 uninhabited IOTAs in the Southern Line Islands group, expected between March 17th and April 18th, have announced this past week that their boat "S/V Kwai" will be diverting to Fanning Island to pick up some passengers for Christmas Island. They expect a delay of 2 or 3 days. This will probably reduce the time on some islands. They also announced this past week that Nils, SM6CAS, has withdrawn from the DX-pedition due to his wife's health (severe lung problem which has still not been diagnosed). Nils will still be the QSL Manager for all 4 islands. The team requests, "Please be generous with your green stamps etc to help him recover some of this major financial outlay." For more details, visit the T32 Southern Line Islands DXpedition's Web page at: http://t32line.webnode.com

TC18, TURKEY (Special Event). Members of the Turkish group called TCSWAT (Special Wireless Activity Team) are proud to announce that special event station TC18M will be active on the air between March 16-18th, to com-memorate the Naval Victory of March 18, 1915. Operator Ahemt, TA3AX, will be active from Canakkale - the Dardanelles to commemorate the Naval Victory. He will be on the HF bands, mainly on CW. This is the third year in a row that TCSWAT has been on the air to commemorate this historical day. This year's QSL Manager is TA1HZ, and he may also be on the air using BPSK31 and SSB. Detailed information is available at: http://www.qrz.com --or-- http://www.tcswat.org

TG, GUATEMALA. Roberto, IV3IYH, will be active as TG9IRP between March 20th and April 1st. Activity will be on 80-10 meters using CW, SSB, and RTTY. He will also be in the CQWW WPX SSB Contest (March 27-28th). QSL via IK2ILH, by the Bureau or direct.

TO7, MARTINIQUE (NA-107). Dim, UT5UGR, will be active as FM/KL7WA between March 19-29th. Activity will be on all bands except 30/17/12m and the Digital modes. His activity will also include Russian DX Contest (March 20-21st) and the CQWW WPX SSB Contest March 27-28th) as a Single-Op/All-Band/High-Power entry. During the CQWW WPX SSB Contest he will sign TO7A.

QSL FM/KL7WA and TO7A via UT5UGR.

XR1, CHILE. Members of the Radio Club La Portada and the Atacama Desert DX Group will be active as XR1A during the CQWW WPX SSB Contest (March 27-28th) as a Multi-? entry. QSL via XQ1IDM.

YI, IRAQ (Update). A group of multi-national operators are planning to operate from Northern Iraq (Kurdistan) and will be active between April 2-12th. The team has received a ten day visa issued by the Government of Kurdistan. A band/mode survey is available on their Web site at: http://www.yi9pse.com/survey.html
Suggested frequencies are also published on their Web page and OPDX.937. The current updated YI9PSE Team consists of the following operators: Paul/N6PSE (Team Leader), Bob/N6OX, David/AH6HY, Krassy/K1LZ, Bill/N2WB, Dave/K3LP, Al/K3VN, Wayne/W5KDJ, Jack/W0UCE, Michel/FM5CD, Jun/JH4RHF, Heathem/YI1UNH and Hrane/YT1AD. Pilot stations are: Don/N1DG (East Coast), Chuck/AA6G (West Coast), Toshikazu/JA1ELY (JA) and Col/MM0NDX (EU). The group is still looking for donations to help fund their DXpedition. Donations can be made via PayPal or mail a check to: Kurdistan 2010 DXpedition, 3052 Wetmore Dr., San Jose, CA 95148, USA. Online logs will be available during and after the DXpedition. QSL via N6NKT. For more details and updates, visit: http://www.yi9pse.com
Also, you can now follow their activities (as well as regular updates) via Twitter at: http://www.twitter.com/yi9pse
ADDED UPDATE: Bill, N2WB, YI9PSE Team Coordinator, reports the following: "Preparations continue for the multi-national YI9PSE, Kurdistan expedition, with departure for Erbil on March 31st. Last operators have been added to the team and the final pieces of equipment are being staged at their West Coast and East Coast staging sites. Organizers say all the pieces are falling into place very well and the schedule remains intact.
The last shipment of gear being sent on ahead goes out early this month, March. The team expects to be on the air April 2-12 with five stations on '24/7', emphasizing the low bands and targeting North America and Europe. Special attention will be done to beam to the US West Coast and beyond to ZL and VK. The YI9PSE Website can be found at www.yi9pse.com
Lastly, YI9PSE will send twitter "tweets" to announce activity on the General Class portions of the bands - so watch for YI9PSE on twitter.com
All plans are moving ahead. Team is looking for additional Club and Individual Sponsors. Thank you for your help and SUPPORT....."

ZK3, TOKELAU. Operators Bill/N7OU and Bob/W7YAQ are now active from Nukunono, Tokelau Islands (OC-048), ZK3OU and ZK3YA. Their length of stay is not sure (activity was to end March 17th), but we will try to keep you updated.

ZS8M, MARION ISLAND (Update). Pierre, ZS1HF, will activate Marion Island (AF-021) as ZS8M at the end of April. Activity will be mainly SSB and Digital (He states, "Sorry, no CW".). He will be working on the island for one year as a radio/electronics technician once the supply ship "SA Agulha" returns to Cape Town. Pierre informs OPDX that he is currently still very busy with some technical and team training. Training includes

maintenance on the Wx equipment and hydrogen generator, with team training including fire fighting, cooking and first aid. The ship leaves Cape Town on April 8th, and he will arrive on Marion Island some 6 days later. The ship that take him there will unload food and cargo, and then leave 4 weeks later once the scientists have completed their work. Once the ship and scientists leave, he will be on the air. Pierre tells OPDX that this is his first long voyage. He has sailed before, but on some of the SA Navy ships and usually on much shorter trips. On Marion Island, Pierre's job will be the resident radio and electronics technician for; HF, VHF, Wx station, Hydrogen generator, IT LAN, satellite system and all the other smaller systems that use 12 or 220V. He will be assisting the engineers with technical support. Pierre states, "One of the engineers will be writing her exam on the island, which will be a first for the island."

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 14th March 2010

Theory Examination

The next theory examination for the Amateur Station Licence will be held on Wednesday, 7th July at 2pm in the ComReg Offices in Dublin and at other centres if warranted by the numbers.

Information on examination fees and other details please see 'Theory Examination' in the 'Information' section of the IRTS website at www.irts.ie

Intending candidates are also referred to 'Studying for the Amateur Radio Examination' in the 'Downloads' section of the website.

The latest date for receipt of applications to sit the examination is Wednesday, 23 June next but it is important to note that places at the exam are allocated on a first come first served basis.

IRTS 78th AGM

Dundalk Amateur Radio Society shall be hosting the 78th
Irish Radio Transmitters Society A.G.M over the weekend
of Saturday 24th and Sunday 25th April 2010.

Further details for booking trader's tables or any
other info please e-mail the following Thos EI2JD at
email address chairman /at/ ei7dar.com or Peter EI4HX at email address
secretary /at/ ei7dar.com

Brendan Trophy Attempt 2010

Fred, DM8MM, plans another activity from VO1 (grid GN37) in June / July 2010. He will be well equipped on 2m and looks for possible sked partners from Ireland.

He would be happy if someone could consider a portable operation from the EI west coast.Please contact Fred via email if you are interested flichtenthaeler /at/ gmx.de

---

St. Patrick's Day Special Event Station.

The Foyle and District ARC, situated 5 miles south of Derry, have been allocated the callsign GB5SPD to celebrate St. Patrick's Day. The callsign will be used over several days, from March 15th until March 17th.

While most of the contacts will be ssb, it is hoped to use digimode this year for the first time. A special QSL card has been printed for the occasion and reports from SWL's will also be most welcome. More details may be found on the qrz.com page, GB5SPD.

Dromineer Castle Activation

Members of the Galway VHF Group will be heading to Dromineer to activate Dromineer Castle on Wednesday the 17th of March. The designated number for this Castle will be EI-04-C. The Callsign for this operation will be EI4ALE/P.

These numbers are obtained from Steve, EI5DD, and are essential for claiming the CASHOTA-Ireland and UK awards. Operation will be on 80, 40 and 20 metres from 10 AM until around 3 - 4 pm.

Dromineer Castle is situated next to the Harbour on the banks of the Shannon, a popular mooring spot for the boating fraternity and an excellent spot for a picnic. Galway VHF Group member, Declan EI2GE, owns the Hostel next to the Castle and will be preparing a fine feast at the end of the day before the group heads back to Galway.

This is the first in a series of activations planned for this year.

Bere Isl EU-121 Activation

Olivier ON4EI will be activating BERE ISLAND EU-121 as EJ8GQB, his new Irish callsign (EI8GQB). This solo expedition is planned from 21st-29th March 2010.

Activity will be 160-10m SSB/RTTY. HB: Spiderbeam beam LB: 18m vertical mast top loaded + 30*radials Rig: K3 100W

He will also make part to the CQ WPX SSB CONTEST March 27th-28th 2010.

For more details about the trip, see http://www.qrz.com/db/ej8gqb

---

Holiday Dxpedition

Once again, Madeira (AF-014) is the holiday destination of the two DXpeditioners Rosel, CT9/DL3KWR, and Hardy, CT9/DL3KWF, for four weeks.

>From March 11-25 they are staying in their first QTH and will then move to a second QTH with worse possibilities for antennas.

After every 10th unreplied CQ call in RTTY or PSK31 they will QSY to CW. Activities will take place every day until 1000 UTC and from 1600 UTC until midnight.

They prefer working on the WARC bands and in CW, RTTY or PSK31.Requests for paper QSLs can be sent via dl3kwr /at/ darc.de or dl3kwf /at/ darc.de or via homecalls.

Wicklow Radio Club

The Club would like to thank Paul EI5DI for the Demo on his logging software at last Week's meeting and it has been decided to enter the CW field day contest on June 5/6 so those of you interested please come forward.

Even if you don't know or operate cw it will be great to get involved in other activities, logging, antenna erection etc. The Next meeting is confirmed for wed 14th of April at 19:30 All are welcome to attend.

ECHOLINK AT LOUGH ERNE RALLY

Echolink allows licenses radio amateurs to communicate with one and other over the Internet using a mobile or static FM transceiver. Ian Morrow Mi1CCU will have his interesting stand at the Lough Erne Rally, on Sunday 11 April in the arena at the SHARE centre near Lisnaskea, County Fermanagh, which is WiFi enabled.

Ian's Echolink station, with a home brew VOIP interface, is near Sixmilecross in County Tyrone. Via MB7ICC, local amateurs with ordinary two meter rigs can make worldwide contacts. For more details see Ian's website www.mi1ccu.co.uk.

There have been enquiries about accommodation near the Rally. SHARE is the largest residential activity centre in Ireland and has a guesthouse on site. B&B costs €22.50. For details and bookings contact celia /at/ sharevillage.org or phone 048-6772-2122.

Rallies

Lagan Valley ARS Rally 20th March

The Lagan Valley ARS Rally will be held at 11.30am in The Village Centre, Hillsborough, Co Down.

Contact: Jim Henry, GI0DVU on 048 9266 2270

For further Rally info and contact details please check out the IRTS Website at

http://www.irts.ie/cgi/rallies.cgi

History this week

1899 "Aspirin" patented by Felix Hoffmann

1910 Wireless Institute of Australia founded, world's first Amateur Radio society.

1917 Members of 1st Anzac Wireless Signal Squadron occupy Baghdad.

Items for inclusion in next weeks Radio News should be forwarded to Charlie EI8JB, preferably via e-mail to "charlie dot carolan at gmail dot com" Or by phone to 087-6265418 News can also be submitted via e-mail to "newsteam at irts dot ie" for automatic forwarding to both the radio and printed news services.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

173. ARRL Teachers Institute on Wireless Technology

Newsgroup: rec.radio.amateur.misc
Date: 2010-03-15 15:00:40 UTC
From: ARRL NE Section <memberlist@www.arrl.org>
Message-ID: <20100315141218.B200420DE3@bmail.arrl.org>

If you are an educator or if you know of one who might be interested in learning more about wireless technology, here is an announcement from ARRL HQ.

73, Art K&#65533;AIZ

****

We are currently accepting enrollments for the 2010 sessions of the Teachers Institute on Wireless Technology. Word of mouth has often been our best recruiting method so we invite the ham radio community to recruit teachers in their local schools who would find this opportunity interesting and rewarding.

The Teachers Institute is an exceptional professional development opportunity for teachers who want to explore the fundamentals of wireless technology, basic electronics, robotics and use amateur radio as a tool for learning in the classroom. The four day expenses paid seminar is funded by ARRL Education & Technology Fund donors. Teachers can also apply for graduate credit for the seminar.

The schedule of dates and locations for this year's sessions, as well as an agenda of topics, a downloadable brochure and applications are available on our website at www.arrl.org/ti. If you would like to request copies of the printed brochure, please contact the Education Services Dept. at ead@arrl.org.

I have one in real good condition. Asking $300 and located in Griffin, Georgia. E-mail back if interested.

175. Any reasons to connect a computer to a personal computer?

Newsgroup: rec.radio.amateur.misc
Date: 2010-03-16 05:43:17 UTC
From: Mark Conrad <aeiou@mostly.invalid>
Message-ID: <15032010214317355O%aeiou@mostly.invalid>
Source record: 5894

Please excuse my title of this thread, as I have been "out of"
ham radio for 55 years! (am 80 now)

Was W6TAM (extra class)

Was a high-speed radio op' in the military,
CW and RTTY, during the unpopular Korean
"police action".

Just barely re-starting the hobby from scratch again,
will re-apply for a general class license, then quickly
upgrade again to extra-class status.

Anything exciting happen in the past 55 years? ;-)

Perhaps bouncing a pulse off the planet Mars?

(heck, it is only about 38 million miles
at its closest, guys; we should be able to
bounce a pulse off it with surplus military
magnetrons and parabolic dish antennas)

I run a bunch of personal computers, Macs and PCs,
curious if there are any compelling reasons for
connecting the computers to a ham rig?

My ancient interests in ham radio were QRP CW,
enjoyed very low-power DX contacts, mainly on the
20 meter CW band, 2 watts or less RF output.

Did a bit of medium power DX CW work, mainly on 40 meters,
multi-hop stuff to the other side of the world, during good
propagation periods, multi-antenna feeds to minimize fading.

Also enjoyed shoving 160 meter ground wave as far as possible,
which in my case was only about 800 miles, mainly because
I could not figure out any way to construct a 260 foot vertical
half-wave antenna. ;-)

Unfortunately, have minimum SSB experience, but that is
liable to change, if there are any compelling reasons to hook up
a ham rig to a computer.

Thanks ahead of time for any advice,

Mark

The thing that might attract you, with that combination of interests,
is some of the new computer / sound-card digital mode work being done.

Modern PCs are fast enough to serve as effective digital signal
processors - in effect, like sophisticated TNC modems - with the
modulation and demodulation being done in software. Hook up a PC's
sound-card port to a ham rig, add a serial-port control circuit for
PTT, install some software, select an SSB mode (most commonly), and
you're on the air.

It's easy to do classic RTTY with a sound-card "soft modem". A newer
(and very popular) alternative is PSK31, which uses a simple
phase-shift-keying modulation with variable-length character coding.
It's possible to do PSK31 QSOs and maintain a usable contact when the
signal is buried down so deep in the band noise you can barely hear
it. PSK31 is often QRP - when the bands are in a good mood, 2-3 watts
will go a very long way.

There are numerous more-sophisticated digital sound-card modulation
schemes, such as MFSK and Olivia and Throb. Digital modes are also
being used up on VHF, for meteor- and tropo-scatter communication and
for EME (moonbounce). Some people do AX.25 packet radio on 2 meters
(and other VHF/UHF bands) using sound-card modems - no separate TNC is
required. The same computer and sound-card interface can usually be
used for all of them.

A simple sound-card interface (transformer isolation for bidirectional
audio, and an optoisolator or transistor circuit for PTT) can often be
built in an evening out of junk-box or Radio Shack parts. Buxcomm
makes some nice kit versions. Solid commercial versions run in the
$50-$100 range, and upwards from there if you want lots of bells and
whistles.

On another level entirely, computers are often used to do DX and
contest logging these days... with some software/rig hookups, the

software can query the rig for the frequency/mode information and fill
in the log data for you.

Here's a few:

http://www.dxatlas.com/

I use BandMaster when I'm on the air.

At other times, I have Faros monitoring the NCDXF beacons watching for
band openings.

Wow, did not realize there was so much computer automation
available for DX contesting, even "Morse Midi 1.1" to
automatically generate CW from text.

Heck, I could even "generate" the text myself by using
"Dragon NaturallySpeaking" to convert my voice to text.

Amazing! - Voice to CW in one fell swoop.

Practical application of that might be to "force" a CW contact
with critical medical information when band conditions are not
suitable for additional SSB contacts. (overcrowded)

I can visualize it now, I dictate by voice such medical terminology
as "perioperative transesophageal echocardiography"
and it gets automagically converted to Morse code, forcing its
way through a crowded band where everyone is jabbering in SSB.

Hopefully the website you suggested can work with the newer
Vista OS and "System-7" OS ?

If not, no big deal, I can hop from XP to Vista fairly easily.

Thanks for the info'.

Mark

Great! - of course I have a lot of catching up to do after being
inactive for 55 years. I just ordered the year 2010 version
of the ARRL Handbook, that should fill in a lot of the gaps.

I am lucky, as most of my cognition is still intact.
(knock-on-wood) Wish I could say the same about
some of my older friends.

> It's easy to do classic RTTY with a sound-card "soft modem". A newer

> will go a very long way.

Thanks for that info', as RTTY is a lot faster than CW, when band
conditions can support the higher bandwith required by RTTY.

Considering bandwidth for an instant, in the olden days bandwidths
as narrow as possibly 20 cycles could be implemented by "active"
notch filters, I think.

The idea was that a ham could "squeeze out" a lot of band noise by
limiting the noise that would make its way through the notch filter.

Many drawbacks to that system, such as "ringing" of the stuff
that _DID_ make its way though the tight filter, plus the need to
use extremely slow CW, because of the narrow bandwidth.

But some guys actually got that narrow bandwidth working.

They claimed the system was extremely effective on crowded SSB
bands, they could CW their way through all the clutter,
if the SSB guys strayed outside their alloted band. <g>

Cross-posted to: rec.radio.amateur.moderated,rec.radio.amateur.misc,rec.radio.info

I received the following email from Jim Cross, WI3N, Section Manager for
Maryland-DC.

The deadline is pretty close. Please consider nominating one of the
young hams in your area.

73,
Art K&#65533;AIZ
****

Hello SMs,

I know a number of sections have recipients of these scholarships.

Sorry about the timing, but perhaps you could alert your constituents.

The deadline of March 31 for The Foundation for Amateur
Radio scholarship applications is fast approaching.

Scholarships are open to all licensed amateurs who are
pursuing a full-time course of studies beyond high
school and are enrolled in or have been accepted for
enrollment at an accredited university, college or
technical school.

If you or someone you know fits the above description,
please go to the F.A.R. website,
http://www.farweb.org/scholarships/index.php, download
the application and directions, get signatures from
organizations where applicable, and mail it in time to
meet the March 31 cut-off date.

The Foundation for Amateur Radio administers scholarships
on behalf of Amateur Radio Clubs, organizations, and
private individuals. The Foundation administers these
scholarships without cost to the applicants or sponsors.

73, Jim Cross WI3N
SM MDC

ARRL Nebraska Section
Section Manager: Arthur I. Zygielbaum, K0AIZ

181. [DXNL] DXNL 1667 (Mar 17, 2010)

Newsgroup: rec.radio.amateur.misc
Date: 2010-03-16 20:14:17 UTC
From: Robert Busch - DL7VOA <dxnl@dxhf.darc.de>
Message-ID: <57381433832.20100316065702@dxhf.darc.de>
Source record: 5900
Cross-posted to: rec.radio.amateur.dx,rec.radio.amateur.misc,rec.radio.info

DXNL 1667 - Mar 17, 2010
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

CT8 - AZORES ISLANDS, EU-003
Tom,CT8/SP5UAF, and Marcin,CT8/SP5ES, are working in CW, SSB and
digital modes on all bands from Sao Miguel (EU-003) from Mar 17-29.
They will join the upcoming Russian DX Contest and WPX Contest with
100 watts, verticals and a Spiderbeam.
QSLs direct or via bureau to their homecalls.

E51 - SOUTH COOK ISLANDS, OC-013
After activating Cocos-Keeling as VK9CF the next stop of Tim,NL8F,
will be Rarotonga (OC-013) from where he will show up as E51COF from
Mar 20-30. He also plans to take part in the WPX SSB Contest.
Tim works with a vertical on the usual IOTA frequencies on 80m-10m.
The QSL cards for both calls are managed by K8NA.

EA8 - CANARY ISLANDS, AF-004
Andrew,G7COD, will be in Playa del Cura on Gran Canaria (AF-004) from
Mar 20-28. He will sign EA8/G7COD in SSB and CW on 20m-10m every day
from 1200-1400 UTC, 1800-2000 UTC and 2300-2330 UTC. His preferred
frequencies are:
SSB: 14177, 18133, 21253, 24953, 28500 MHz (+/- 10 kHz when QRM),
CW: 14003, 18073, 21003, 24893, 28003 MHz in CW (+/- QRM).
QSL cards should be sent either direct to G7COD or via bureau to G4KEE.
See also: http://www.8q7ak.freewebspace.com

FM - MARTINIQUE, NA-107
Dim,UT5UGR, is working as FM/KL7WA from NA-107 from Mar 19-29. He will
take part also in the Russian DX Contest and WPX SSB Contest (as TO7A).
QSL cards for both calls should be sent to UT5UGR.

HH - HAITI, NA-096
Jan,HH4/K4QD, and Don,HH4/AF4Z, will be active in CW, SSB und RTTY on
160m-10m from the northwestern part of Haiti between Mar 22 and Apr 2.
Their lowband operation may suffer from the weak power grid during the

night hours but they plan to join the WPX SSB Contest together with
Jean-Robert,HH2JR, using the callsign 4V4JR.
QSLs via homecalls, preferably direct or via LoTW, but also via bureau.

HR - HONDURAS
Andrei,HR2/NP3D, is working in all modes on all bands (focussing on the
top band) from Mar 19-29. He plans to join the Russian DX Contest, the
WPX SSB Contest (signing HQ2T) and the BARTG Spring RTTY Contest.
QSL via W3HNK or RW6HS (both only direct) or LoTW.

KH0 - NORTHERN MARIANA ISLANDS, OC-086
Yoshi,JE2EHP, is going to hit the airwaves from Saipan (OC-086)
signing K1HP/KH0 in SSB, CW and RTTY on HF and 6m from Mar 21-25.
QSL via bureau to JE2EHP.

OA - PERU
Daniel,OA4/DL5YWM, will stay in Peru from Mar 20 until May 15. He plans
to work from Lima and maybe also from other call areas or IOTA islands.

OX - GREENLAND, NA-018
Reid,N0RC, will be active as OX3/K0KU from Thule on Greenland (NA-018)
between Mar 22 and Apr 8. He will be active as often his QRL allows
which will be at the weekends mostly. Reid hopes to find some time to
join a contest during this time. The logs will be uploaded to the LoTW
and QSLs are managed by N0RC via bureau, direct ot eQSL.

PJ4 - NETHERLAND ANTILLES, BONAIRE, SA-006
Michal,PJ4/OK7MT, and Vit,PJ4/OK5MM, are working from the island of
Bonaire (SA-006, WLOTA LH-1279) from Mar 18 until Apr 1. They will sign
PJ4L in the WPX SSB Contest and will also take part in the Russian DX
Contest on Mar 20/21. All QSLs direct or via bureau to OK7MT.

S7 - SEYCHELLES, AF-024
Gav,GM0GAV, and Rob,GM3YTS, announced to show up as S79GM in CW and
maybe RTTY especially on the lowbands between Mar 21 and Apr 1. On 40m
they are only allowed to work above 7050 kHz so they will listen down.
More information can be found at: http://s79gm.blogspot.com
All QSOs will be uploaded to the LoTW afterwards.

T32 - EAST KIRIBATI
Steve,9M6DXX, Derek,G3KHZ, Steve,G4EDG, and Mike,K9AJ, are leaving
Christmas Island on Mar 17 heading towards the Southern Line Islands
like Malden Island (OC-279, as T32MI), Starbuck Island (OC-280, T32SI),
Caroline Island (OC-281, T32CI) and Vostok Island (OC-282, T32VI).
They plan to activate every island with four stations for five days.
They will work with dipoles and verticals on these QRGs on 40m-10m:
CW: 28040, 24920, 21040, 18098, 14040, 10103, 7030, 3530 kHz;
SSB: 28460/28495, 24950, 21260, 18128, 14260/14195, 7078, 3795 kHz
Their return to Kiritimati onboard the "SV Kwai" is planned for Apr 18.
QSLs only direct via SM6CAS. See also: http://www.t32line.webnode.com

TG - GUATEMALA
Roberto,IV3IYH, will be active as TG9IRP in SSB, CW and RTTY on 80m-10m

from Mar 20 until Apr 1. He will join the CQ WPX SSB Contest as well.
QSLs direct or via buro to IK2ILH (also via e-mail to ik2ilh@libero.it)
or via LoTW.

YO - ROMANIA
YP1WFF from the Cheile Bicazului Hasmas national park will be activated
in CW, SSB and RTTY by YO6CHB, YO6EZ, YO6GBE, YO6MP and YO6UO from
Mar 19-21 (including Russian DX Contest). Their QSL manager is YO6EZ.

4J - AZERBAIJAN
The station 4J0WFF in the national park "Yanar Dagh" will be QRV in CW,
SSB and PSK31 on 10m-40m for at least three days starting on Mar 20.
QSLs should be sent direct to: PO Box 86, Baku, AZ-1000, Azerbaijan.

4S - SRI LANKA, AS-003
Alexander,UX4UL, is now working as 4S7ULG from the capital Colombo and
will stay there until Apr 7. Activities are taking place mainly on 20m
and 10m in RTTY and PSK. QSLs via UY5ZZ.

9Q - DEMOCRATIC REPUBLIC CONGO
Anton,ON6NL, and Henk,ON4AHF, are working for the organization
"Medecins sans frontieres" in the Democratic Republic Congo and can
be found on the bands working in CW and SSB as 9Q0AR/6 or 9Q0HQ until
Mar 22. These are club calls.
QSLs for this operation only should be sent to ON6NL (for 9Q0AR/6) and
via ON4AHF for 9Q0HQ/6.

ITALY, SPECIAL EVENT STATION
The special event station IR1C (active from Mar 15 until Dec 31) draws
the attention to a solidarity project in the Central African Republic.
The QSL manager is IK1APO.
More information can be found at: http://www.ir1c.com

TURKEY, SPECIAL EVENT STATION
The "TC Special Wireless Activity Team" is working as TC18M from
Mar 16-18 to remember the 95th anniversary of the Battle of Gallipoli.
Activities take place in CW, SSB and PSK31 on HF from Tschanakkale
which is situated on the Asiatic side of the Dardanelles strait.
QSL via TA1HZ. See also: http://www.tcswat.org

SILENT KEYS: The international DX bulletins announced following silent keys
during the last weeks: Michel Pronier (F5ODS), Sue C. Persing (K3SUE),
Nikolaj I. Tranevskij (RA6AGF), Peter Linsley (SV0XBM/9),
Herman M. Shelchkov (UA3GM), Kim D. Bednarcik (UA4OH),
David Toth (VE3GYQ) and Daniel R. "Bob" Dorsey, Jr. (W4RQ, ex-K4UVT).

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Mar 20/21: Russian DX Contest
Mar 20/21: DARC HF SSTV Contest
Mar 20-22: BARTG HF RTTY Contest

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:
EU-121, EI/EJ, Ireland: Olivier,ON4EI, plans to activate Bere Island as
EJ8GQB from Mar 21-29. QSL via homecall (direct/bureau).
See also: http://www.qrz.com/db/ej8gqb

EU-127, DL, Schleswig-Holstein State SW Group: A German group of Syke (I25)
is going to activate Neuwerk Island as DF0WFF and DA0GLH from Mar 19-21
Neuwerk is a double counter for the WFF and the DLFF-005 award.
For more information see also: http://www.dl2vfr.de

NA-034, W4, FL State Centre West Group: David,K2DBK/4, plans to show up from
the island Island Lido Key from Mar 22-24. QSL via homecall (d/B).

Lighthouse activities (WLOTA/ARLHS/ILLW)

CT8/SP5UAF LH 2016 Sao Luis Mar 17-29
DA0GLH LH 2311 Neuwerk Mar 19-21
EJ8GQB LH 2983 Bere Mar 21-29

R1ANF beacon operational

After a long odyssey from Germany to the Vostok base (R1ANC) in Antarctica,
including a failed start connected with huge logistic problems, the beacon
finally was put into operation at the Russian Antarctic base Bellinghausen
(R1ANF) on King George Island (belonging to the South Shetlands) on Mar 8.
Oleg,ZS1ANF (UA1PBA, ex-R1ANF), picked up the beacon during a trip to the
Antarctic Logistic Center International (ALCI) on Novo Runway and installed
it right away at R1ANF after his return to King George Island. The beacon
consists of an IC-706, AT-180 antenna tuner, a switching power supply,
a PROCOM HF-5000 vertical antenna and a GPS synchronized controller.
The beacon is working on 14101.0 kHz and transmits the following text every
full minute "VVV R1ANF ANTBEAP (carrier signal reduced similar to the NCDXF
beacons, starting with 100 watts) R1ANF AR". Another beacon is ready to be
installed at the Novolazarevskaya base and shall be active on the same
frequency using the callsign R1AND. A few more beacons will be set up with
the Antarctic Beacon Project (ANTBEAP) to explore the wave propagation in
the Antarctic region.
Any SWL reports are very welcome and should be sent to Dominik,DL5EBE.

RAC Bulletin 2010-009E : RAC Section Manager Election Results - Manitoba.
2010-03-15

Congratulations are extended to Jan Schippers VE4JS who was recently
returned as Section Manager for Manitoba for a two year term of office
that will begin on July 1, 2010. Jan was unopposed eliminating the
need for a balloted election.

185. Sr. Citizen Question Re Mode Usages Information ?

Newsgroup: rec.radio.amateur.misc
Date: 2010-03-17 13:58:59 UTC
From: Bob <rgsros@notme.invalid>
Message-ID: <hnqn75$67o$1@news.eternal-september.org>
Source record: 5904

Hello,

Am in my 70's now, and enjoy sw and scanner listening very much.

I am generally uncertain about the modes used in particular ranges.
e.g., whether FMN, LSB, USB, etc.

Spent a fair amount of time with Google, honest, and was able to get
bits and pieces, but nothing too inclusive.

It's not just the band(s) usage that I am after, it is the mode used on
the particular bands that I am having the most difficulty with obtaining
in detail.

Would like to know from perhaps 0.5 MHz through all of the vhf/uhf
scanner frequencies. (and any exceptions)

Anyone perhaps have a link or two to where I can obtain mode usage info.
Would be most appreciative.

Much thanks,
Bob

I'm a retired geezer studying for my first license, so I can relate to
your confusion. I found this fantastic reference website that has more
information than I know what to do with, all in one place:

http://www.ac6v.com/opaids.htm

Go to the "Band Plans" section and dig down. More reference text,
charts, and graphs than Carter has pills (geezer code). ;)

nb

188. trick exam question

Newsgroup: rec.radio.amateur.misc
Date: 2010-03-17 17:37:50 UTC
From: notbob <notbob@nothome.com>
Message-ID: <Or8on.13356$3D3.10859@newsfe19.iad>
Source record: 5907

I'm a retired geezer studying for my technician license. I'm using the previous iteration (out of date) of ARRL's Now You're Talking, 5th ed, technician license study guide. I've run across a question that has me confounded.

The question is based on the statement on pg 2.3 that says, "Radio frequency (RF) waves are electromagnetic waves or cycles that repeat more than 200.000 times per second." I musta not payed attention the first time I read that, cuz when I read/answered the related question based on that statement, I got it wrong. The question reads:

What is a radio frequency wave?
A. Wave disturbancesthat take place at less than 10 times per second
B. Electomagnetic oscillations or cycles that reapeat between 20 and 20,000 times per second
C. Electomagnetic oscillations or cycles that reapeat more than 20,000 times per second
D. None of these answers are correct

Naturally, I chose D. The correct answer, according to the book, is C. WTF!? I went back and found the above quoted statement in the book.

How can this be correct? In more than one place in this book, it is shown that radio frequency waves start at .3MHz (3KHz). This is the MF spectrum and is indicated in both text and charts. Also, electromagnetic waves far above the radio frequency spectrum (infrared, visible light, etc) also fit the definition of "electromagnetic waves or cycles that repeat more than 20,000 times per second" and they are certainly not RF.

So, here's a question that is seemingly correct and at the same time can be incorrect, depending on how one interprets it. I would have chosen C if there had been no answer D, but answer D gives that option which implies the incorrect interpretation is indeed valid. This, to me, is a trick question ....or am I missing something very simple in in answer C? Like, do electromagnetic waves or cycles above EHF not repeat, or....??

TIA.

nb ...one stumped geezer ;)

==> FCC NEWS: FCC RELEASES NATIONAL BROADBAND PLAN

<http://www.youtube.com/watch?v=QYf2AVCdzZw> On Tuesday, March 16,
the FCC held an Open Meeting to introduce its report Connecting
America: The National Broadband Plan (NBP) that was delivered to
Congress that afternoon. Calling it "an ambitious agenda for connecting
all corners of the nation while transforming the economy and society
with the communications network of the future -- robust, affordable
Internet," the Commission found that nearly 100 million Americans lack
broadband at home today and 14 million Americans do not have access to
broadband. Read more here
<http://www.arrl.org/news/stories/2010/03/16/11393/?nc=1>.

==> LEGISLATIVE AFFAIRS: ARRL REQUESTS SUPPORT FOR S.1755

Senate Bill 1755 -- The Amateur Radio Emergency Communications
Enhancement Act of 2009 introduced in October 2009 by Senators Joe
Lieberman (ID-CT) and Susan Collins (R-ME) -- has unanimously passed
the US Senate and has been sent to the US House of Representatives for
```

consideration and now sits in the House Committee on Energy and Commerce. The ARRL is asking its membership to contact the leadership of the Energy and Commerce committee, requesting support and action on moving S 1755 through the committee. S 1755 accomplishes the same things as HR 2160; HR 2160 was introduced in April 2009 by Rep Sheila Jackson Lee (D-TX-18). Since S 1755 has already been approved by the Senate, moving it forward in the House will simplify the process. Click here <http://www.arrl.org/news/stories/2010/03/10/11385/?nc=1> for more information, including instructions on how to encourage the committee's leadership to support S 1755.

==> LEGISLATIVE AFFAIRS: COMPANION BILL INTRODUCED IN US HOUSE TO PROVIDE TECHNICAL RESOURCES TO FCC COMMISSIONERS

Following the Senate's lead, Representatives Jerry McNerny (D-CA-11) and Tom Petri (R-WI-6), introduced HR 4809 -- the FCC Commissioners' Technical Resource Enhancement Act -- in the House of Representatives on March 10. Copying the exact language from S 2881 (a bill with the same name) introduced by Senators Olympia Snowe (R-ME) and Mark Warner (D-VA) in December 2009, the bill seeks to provide greater technical resources to FCC Commissioners. Read more here <http://www.arrl.org/news/stories/2010/03/16/11392/?nc=1>.

==> ARRL SEEKS INPUT FOR NEW IARU REGION 2 BAND PLAN

The International Amateur Radio Region 2 conference -- to be held later this year in El Salvador -- brings together delegations from the national Amateur Radio Societies in the Western Hemisphere. One of the topics on the agenda will be the Region 2 HF band plan. This band plan is "harmonized with" -- spectrum management-speak for "very similar to" -- the IARU Region 1 and Region 3 band plans. At this year's conference, the IARU Member-Societies will consider possible changes to the Region 2 band plan. The ARRL is cooperating with this procedure by inviting input to be sent to the ARRL Board of Directors' Band Planning Committee. The committee will review the existing Region 2 band plan, consider input from the amateur community and make recommendations to the ARRL Board for submission to IARU Region 2. Read more here <http://www.arrl.org/news/stories/2010/03/04/11374/?nc=1>.

==> FCC NEWS: FCC PROPOSES TO ELIMINATE SPREAD SPECTRUM APC REQUIREMENT, REDUCE SPREAD SPECTRUM POWER LIMIT; CLEANS UP PORTIONS OF PART 97

In response to a 2006 ARRL Petition regarding spread spectrum issues, the FCC released a Notice of Proposed Rule Making (NPRM) on March 16 (WT Docket No 10-62), proposing to amend Part 97 to facilitate the use of spread spectrum communications technologies by eliminating the requirement that amateur stations use automatic power control (APC) to reduce transmitter power when the station transmits a spread spectrum (SS) emission and reducing the maximum transmitter power output when transmitting a SS emission. Through an Order attached to the NPRM, the Commission also made "certain non-substantive revisions"

to the Amateur Service rules. Read more here
<http://www.arrl.org/news/stories/2010/03/18/11396/?nc=1>.

==> ARRL PUBLICATIONS: ARRL INTRODUCES UNDERSTANDING BASIC ELECTRONICS,
SECOND EDITION

ARRL's Understanding Basic Electronics, second edition
<http://www.arrl.org/catalog/?item=0823> -- your gateway into the
exciting world of electricity and electronics -- is written in a
friendly, easy-to-understand style that beginners and nontechnical
readers will enjoy. This introductory guide is ideal for students with
basic math skills, as well as radio amateurs and experimenters
interested in gaining a more complete understanding of basic electronic
principles -- anyone eager to unlock the mysteries of electronic
circuits.

Authored by Walter Banzhaf, WB1ANE, this new edition features
student-friendly math made easy -- an inexpensive calculator is all you
need -- and now includes digital electronics. Even if you already have
a foundation in basic electronics, you will enjoy the small module
format of each chapter, allowing readers to digest "bite-sized" chunks
of learning material. Real-world examples and clear illustrations make
the study of electronics interesting and fun! A handful of small
"kitchen table" projects are included to help bring abstract concepts
to life.

Understanding Basic Electronics, second edition includes chapters on
electronics, analog and digital electronic circuits, electrical terms,
conductors, insulators and resistors, electricity and magnetism,
capacitors and inductors, electrical circuits (both series and
parallel), Ohm's law, techniques and tricks on how to solve circuit
problems, energy and power, alternating current (ac), capacitors and
inductors, transformers, impedance, resonant active device concepts,
semiconductors, diodes, transistors and ICs -- and much more.

For a limited time, ARRL members can purchase Understanding Basic
Electronics, second edition for only $29.95
<http://www.arrl.org/catalog/?item=0823> -- that's $3 off the regular
price of $32.95!

==> SOLAR UPDATE

Tad "Doubt that the Sun doth move, doubt truth to be a liar, but
never doubt I love
<http://www.opensourceshakespeare.org/views/plays/play_view.php?WorkID=hamlet
&Act=2&Scene=2&Scope=scene>"
Cook, K7RA, reports: Solar activity recovered nicely from the March 6-9
frightening absence of sunspots, reminiscent of years prior to the end
of November 2009. For our reporting week -- March 11-17 -- the average
daily sunspot numbers increased relative to the prior week by 17 points
to 29.4; the average daily solar flux was up by 9 points to 87.6. A new
sunspot group -- 1055 -- appeared on March 11, following the appearance

of 1054 the day before. Group 1055 only lasted a couple of days and another new spot, 1056, emerged on March 17 and is still visible and active. On March 11-12, a solar wind met a south-pointing interplanetary magnetic field (IMF) and pushed geomagnetic instability, especially pronounced at higher latitudes. Alaska's college K index at Fairbanks went to 5 during several 3-hour readings over both days. So far in March, the average daily sunspot number is 23.9. Every month of March since the end of the last century, the average (1999-2009) was 100.5, 203.6, 166.7, 154.3, 119.7, 81, 41, 21.3, 9.8, 15.9 and 0.77. Sobering, isn't it? And no, that isn't an error for 2009. March of last year had sunspots on only two days -- March 6-7 -- pushing the average for the month to less than one. This Saturday, March 20, is the vernal equinox, the first day of spring, which begins at 1732 UTC. Both the southern and northern hemispheres are bathed in an equal amount of sunlight; the time around the spring and fall equinox is great for HF propagation. Look for more information on the ARRL Web site on Friday, March 18. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/tis/info/propagation.html>. This week's "Tad Cookism" brought to you by William Shakespeare's Hamlet (Act II, Scene 2) <http://www.opensourceshakespeare.org/views/plays/play_view.php?WorkID=hamlet&Act=2&Scene=2&Scope=scene>.

==> THIS WEEK ON THE RADIO

This week, the 10-10 International Mobile Contest is March 20. The Russian DX Contest, the Oklahoma QSO Party and the North Dakota QSO Party are March 20-21. The Virginia QSO Party and the BARTG HF RTTY Contest are March 20-22. The Run for the Bacon QRP Contest is March 22 and the SKCC Sprint is March 24. Next week, the CQ WW WPX Contest (SSB) is March 27- 28. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests/>, the ARRL Contest Update <http://www.arrl.org/contests/update/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/contests/spev.html>.

==> SILENT KEY: BABY BLINDNESS PIONEER ARNALL PATZ, EX-WA3EVC (SK)

Dr Arnall Patz, ex-WA3EVC -- an ophthalmologist who discovered and eliminated a major cause of blindness in premature infants -- passed away from heart disease on March 11. He was 89. In 1954, Patz proved that treating premature babies with pure oxygen could destroy their eyesight. At the time, this was the most common cause of blindness in premature infants. Although the new understanding came too late for thousands of people who were made blind by oxygen -- including the singer Stevie Wonder, ARRL Connecticut Section Manager Betsey Doane, K1EIC, and her twin sister Barbara Lombardi, K1EIR -- it undoubtedly saved many more from a similar fate. "Barb and I are thrilled to learn

that the doctor who discovered the effect of too much oxygen at birth was a ham. We only wish we had met him or worked him on the air. How exciting that would have been!" Doane told the ARRL. Patz operated a ham radio from his home on behalf of the Maryland Eye Bank. According to his nephew Sam, Patz erected an 80 foot tower at his home and became known to amateurs across the country for putting out the word on the airwaves whenever corneas were needed for transplant. Read more here <http://www.arrl.org/news/stories/2010/03/17/11395/?nc=1>.

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

Registration remains open through Sunday, April 25, 2010, for these online course sessions <http://www.arrl.org/cep/student/> beginning on Friday, May 7, 2010: Amateur Radio Emergency Communications Level 1; Antenna Modeling; Radio Frequency Interference; Antenna Design and Construction; Propagation; Analog Electronics, and Digital Electronics. To learn more, visit the CEP Course Listing page <http://www.arrl.org/cep/student> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/arrlletter/.

Amateur Radio Newsline(tm) Report 1701 - March 19, 2010

Amateur Radio Newsline report number 1701 with a release date of
Friday, March 19th, 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. Germany protects its hams from cable
interference by saying no to a cable system that wanted protection from
broadband sharing: the FCC asks for input in preparation for W-R-C
2012, and the ARRL says its time to ask congress to back the Emergency
Communications Enhancement Act. All this and more on Amateur Radio
Newsline(tm) report number 1701 coming your way right now.

(Billboard Cart Here)

**

RADIO LAW: GERMAN COURT REFUSES TO PROTECT CABLE OPERATOR FROM 800 MHz
BROADBAND

A German court's decision to deny a cablecaster from ingress protection
by wireless broadband turns out to be good news for that nations hams.
Frank Haas, KB4T, has the details:

--

A German cable television operator has failed in its attempt to enjoin that
nation's government from auctioning off spectrum in the 800 MHz range.
This
for fear that signal ingress from new wireless broadband systems might
interfere with the cable system's operations.

The Deutscher Amateur Radio Club, which is Germany's national ham radio
society, reports that the Cologne Administrative Court has rejected the
action brought by Kabel Baden-Wuerttemberg. In its denial order the court
said that if the cable operator was afraid of interference it could take
technical steps to improve its system.

The Deutscher Amateur Radio Club views the ruling positively since it will
encourage cable operators to upgrade leaky cable systems. This it says will
not only keep the cable system from suffering signal ingress of any 800 MHz
transmissions, it should also reduce the interference that leaky cable
systems cause to radio amateurs.

For the Amateur Radio Newsline, I'm Frank Haas, KB4T, in Holly Hill ,
Florida.

--

For decades cable operators in Germany have claimed their networks are RF tight and there could be no problem with cable interference to any radio bands. This, despite the fact that the audio channel of one station has disrupted the Amateur Radio use of 145.750 MHz for many years. The DARC report can be seen in Google translated English at http://tinyurl.com/yjdcch9 (DARC)

**

RADIO LAW: FCC PROPOSED LOWERING HAM RADIO SPREAD SPECTRUM POWER IN EXCHANGE FOR DOING AWAY WITH APC RULE

We all know that the use of Spread Spectrum in ham radio has been in the news a lot of late and it is once again. This time the form of a Notice of Proposed Rule Making issued by the Commission on March 16th.

The NPRM is in response to an ARRL petition regarding use of the mode. In 2006, the ARRL petitioned the FCC, requesting that the Automatic Power Control requirement be eliminated , asserting that the provision has proven to be virtually impossible as it requires the operators of the transmitting stations to determine the transmitter power received at distant receivers. This claimed the League that this requirement has proven to be something of a barrier to Spread Spectrum experimentation.

In the new NPRM, the FCC agreed with the ARRL that the Automatic Power Control requirement may be unnecessarily impeding Amateur Radio operators in advancing the radio art,. At the same time the Commission does not propose to simply eliminate the requirement.

Noting that the purpose of the Automatic Power Control requirement is to limit interference to other stations, the FCC pointed out that commercial broadband Internet service providers operating in the 900 MHz and 2.4 GHz I-S-M bands argue that the Automatic Power Control requirement should be maintained. This, in order to prevent interference to other users. They also referred to suggestions maintaining that if the Automatic Power Control requirement is eliminated, the FCC should lower the maximum power limit on amateur stations transmitting Spread Spectrum emissions so that interference is minimized.

And the bottom line: The FCC says that it is proposing to eliminate the Automatic Power Control requirement, but the caveat. The FCC is also proposing to reduce the maximum transmitter power output amateur stations may use when transmitting Spread Spectrum communications from 100 watts to a peak of only 10 watts.

In the Order, the FCC also made amendments to correct the Amateur Service rules or conform them to prior Commission decisions. These revisions will take effect once they are published in the Federal Register. The NPRM is not yet available for comment. Its text can be found on the web at http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-10-38A1.pdf. (FCC, ARRL, Others)

**

RADIO LAW: FCC ASKS INPUT IN PREPARATION FOR NEXT WRC

The International Bureau of the Federal Communications Commission is seeking input from interested parties to help develop its recommendations to the U.S. Department of State for U.S. proposals and positions concerning possible revisions to the International Telecommunication Regulations. This, at the next World Conference on International Telecommunications to revise the terms of the treaty in 2012.

Specifically, the FCC is looking for input on Article 1, Purpose and Scope of the Regulations; Article 2, which are Definitions; Article 3 on International Networks; Article 4 that deals with International Telecommunication Services and Article 5 that covers Safety of Life and Priority of Telecommunications. Also needed in input on Article 6 covering Charging and Accounting; Article 7, Suspension of Services; Article 8, Dissemination of Information; Article 9, Special Arrangements; and Article 10 which are all of the Final Provisions.

The FCC serves as a technical advisor to the Department of State for ITU meetings and conferences, including the upcoming World Conference on International Telecommunications and other international meetings to prepare for that conference. In that role, the FCC provides expert advice and recommendations to the Department of State on U.S. proposals and positions. (FCC)

**

RADIO POLITICS: ARRL SAYS NOW IS THE TIME TO SUPPORT THE AR EMCOMM ENHANCEMENT ACT

The United States Amateur Radio Emergency Communications Enhancement Act of 2009 introduced in October 2009 by Senators Joe Lieberman and Susan Collins has been unanimously passed the Senate. Its now been sent to the House of Representatives for consideration and is currently sitting in the House Committee on Energy and Commerce.

Now, the ARRL is asking hams nationwide to contact the leadership of the Energy and Commerce committee, requesting support and action on moving S 1755 through the committee. S 1755 accomplishes the same things as HR 2160 which was introduced in April 2009 by Representative Sheila Jackson Lee. Since S 1755 has already been approved by the Senate, moving it forward in the House will simplify the overall approval process.

If enacted into law, S 1755 would instruct the Secretary of Homeland Security to undertake a study on the uses and capabilities of Amateur Radio communications in emergencies and disaster relief. It would also limit the Department of Homeland Security to 180 days to report its findings to Congress. (ARRL)

**

RESTRUCTURING: CANADIAN HAMS GRANTED VLF ALLOCATION

Canadian hams now have a Very Low Frequency band. This with word that Industry Canada has approved access by radio amateurs in that nation to the

band from 135.7 to 137.8 kHz, subject to certain conditions.

Canadian hams choosing to use this new band are limited to a maximum radiated power of 1 watt Effective Radiated Power. They also cannot cause harmful interference to stations of other nations that still use this spectrum as a radionavigation service.

According Radio Amateurs of Canada the Revised Canadian Table of Frequency Allocations, announced in December 2009 to incorporate changes from decisions made at World Radiocommunication Conference in 2007.

One of these permits amateur use of this spectrum on a secondary basis to all other users. (RAC)

**

RESTRUCTURING: DENMARK GIVES HAMS 5 MHZ

The Southgate news says that Danish radio amateurs can now apply to operate in 5.250 to 5450 MHz band. Reports are that Bent Christensen, Oh-Zed 0-5-B has already received a 5MHz permit. More on this restructuring is on-line at the Danish national amateur radio society's website. A link to it in electronically translated English is at http://translate.google.co.uk/translate?u=http%3A%2F%2Fwww.edr.dk%2F&slda&tl=en&hl=&ie=UTF-8)
(Southgate)

**

BREAK 1

From the United States of America, we are the Amateur Radio Newsline, heard on bulletin stations around the world including the NS9RC repeater serving Highland Park, Illinois.

(5 sec pause here)

**

RADIO LAW: FCC'S NATIONAL BROADBAND PLAN GOES TO CONGRESS

The FCC has sent its long awaited National Broadband Plan to Congress. Released on Tuesday, March 16th, the Plan is deemed to be a call for action over the next decade that includes goals.

Among these are to provide affordable access to ultra-high-speed broadband in every American community at a speed of at least 1 gigabit per second at anchor institutions such as schools, hospitals, and military installations. It also recommends connect 100 million households to affordable 100-megabits-per-second service by building the world's largest market of high-speed broadband users and ensuring that new jobs and businesses are created in the United States.

Perhaps the most interesting point to those involved in hobby radio is the proposal to provide every first responder with access to a nationwide,

wireless, interoperable public safety network. One that would multiply redundant and let responders anywhere talk with others directly or through a chain of command.

Other than that there is nothing remotely mentioned that directly affects ham radio, however the devil could be in the details if and when Congress gives the FCC a green light to proceed. And the details we are referring to are in the UHF and microwave spectrum which broadband providers believe is ideal for future service build-outs and expansion of services.

You can read the entire document on-line at www.broadband.gov/plan/ (FCC)

**

RADIO RULES: FCC WANTS TO REVISE EX PARTE PRESENTATIONS

A new way of dealing with the FCC may be on the horizon. Amateur Radio Newsline's Jim Meachen, ZL2BHF, has the details:

--

The FCC has proposed that anyone who gives an oral ex parte presentation before it would have to provide a written description of the discussion. Currently such descriptions are required only when new material is involved.

In its recent notice, the commission is asking for comment on whether to require that companies meeting with the commission should disclose ownership information in meeting summaries or filed pleadings. This, so readers can better grasp the filer's interest in the proceeding.

The agency is thinking of requiring summaries within four hours for an item that's to be on the agenda during its open monthly meeting during the seven-day "sunshine period" immediately before those meetings.

For the Amateur Radio Newsline, I'm Jim Meachen, ZL2BHF.

--

For those not aware. ex parte is a Latin legal term meaning from, by or for one party. Ex parte rules are intended to make sure the public is aware of who is possibly influencing the regulators' decision process.
(RW)

**

RADIO LAW: FCC WANTS TO STREAMLINE IT PROCEEDURES

The Federal Communication Commission has put forth several proposals to streamline its procedures.
One of its main objectives is to give bureau and office chiefs the ability to kill defective or repetitive petitions for reconsideration so those don't reach the Commissioners or their staff floor.

By way of background, a defective petition for rule making or for reconsideration is one that contains errors, is untimely, has raised no new arguments, or does not relate to the issue at hand. In ham radio circles this might be one of those regularly filed petitions asking for a ban on closed repeaters or limiting contesters to specific parts of the amateur radio bands. Requests that are either ignored for a long period of time or dismissed using the same language as used to discharge a previous petition making the same request.

The agency has also proposed changing its rule that specifies it can reconsider a decision on its own motion within 30 days. This, to clarify that the Commission has the authority to change a verdict, and not just set it aside or vacate it.

Lastly, the Commission wants to make more use of electronic filing and has upgraded its Electronic Comment Filing System. Now, it is asking for comments on how it can maximize e-filing and minimize paper submissions.

The FCC notes that with over 3,000 dockets open, it has quite a backlog to go through. It also admits that some of those dockets have seen little to no activity in years. (TVT)

**

RADIO LAW: SENATE COMPANION FCC ENGINEER BILL INTRODUCED

A Senate bill that would add an engineer to the staff of each Federal Communications Commission commissioner now has a companion measure in the House. Representative Jerry McNerney of California introduced H.R. 4809 after representatives of the Society of Broadcast Engineers met with his Washington staff a few weeks ago.

SBE's Government Relations Chairman Barry Thomas and General Counsel Chris Imlay, W3KD, visited offices of several House members to garner support for a companion to a Senate bill introduced in January by Senator Olympia Snowe, of Maine, and co-sponsored by Sen. Mark Warner, of Virginia. The bill would authorize an engineering staff person for each of the five FCC commissioners. With a House bill now introduced, the legislation can move through the committee process of both houses of Congress.

SBE President Vinny Lopez said the change would go a long way to ensure technical excellence at the highest levels of the commission.

McNerney is a second-term congressmen representing California's 11th congressional district, which includes a portion of California's Central Valley. He has an engineering background and is a member of the House Commerce Committee and the subcommittee on Communications, Technology and the Internet.

The text of the House bill was not yet available online as we write. (RW)

**

RADIO LAW: LOTS OF AMERICANS HAVE NO BROADBABD

The FCC has determined that about one-third of Americans don't have a broadband Internet connection at home. According to a report from the regulatory agency the main barriers to adoption are cost and literacy.

The agency is working on a plan to deploy nationwide wireless broadband. The usage study, "Broadband Adoption and Use in America," was
released at the Brookings Institution. There appears to be no mention of how many Americans do not want or feel that they have no need for any form of broadband connectivity. (Government report)

**

PUBLIC SERVICE: VOLUNTEERS NEEDED FOR PITTSBURGH MARATHON

About 150 hams will be needed to provide communications for this years running of the Pittsburgh Marathon. Slated for May 2nd, over 6000 participants are expected, including 2000 marathon runners, 2500 half-marathon runners, and 500 relay teams.

According to Jeffrey Hutzelman, N3NHS, there are many positions around the 26.2 mile course that need to be covered, including mile markers, aid stations, buses and sweep vehicles and shadow communicators for race officials. If you plan to be in the Pittsburgh area on that date and want to volunteer, simply take your web browser to marathon.central.org, click on the words "Volunteer Now" and fill out the form.
(N3NHS)

**

RESCUE RADIO: RNW SENDS RADIO STATION IN A BOX TO CHILE
Radio Netherlands Worldwide is sending two complete mobile radio stations to the Chilean broadcaster Radio Universidad Tï¿½cnica Federico Santa Maria. This will enable two of its partner stations in the coastal region of Maule to resume their broadcasts as quickly as possible. This is the region was seriously affected by the earthquake on February 27th.

The mobile radio station, often called radio-in-a-box, is specially built to be used temporarily in countries where radio stations are forced off the air by natural disasters. Each station is less than a cubic meter in size, and is equipped with an FM transmitter, mixer, microphones, a CD player and a laptop computer. Radio Netherlands Worldwide has previously provided such stations following the earthquakes in Indonesia in September 2009 and Haiti this past January. The Chilean broadcaster supplied with the portable gear has worked closely with Radio Netherlands Worldwide for many years. (Media Network)

**

NAMES IN THE NEWS: CAM HARTFORD, N6GA, NAMED QRP EDITOR OF CQ MAGAZINE

A name in the news. This with word that Cam Hartford, N6GA, of Claremont, California, has been named QRP Editor of CQ Amateur Radio magazine.

Hartford, who works for book publisher Houghton Mifflin Harcourt, has been a ham since 1961and has been active in low-power operating for more than 20 years. From 1989 to 1991, he served on the Board of Directors of the QRP Amateur Radio Club International. He also served as that organization's Contest Manager from 1993 to 1999.

Hartford succeeds Dave Ingram, K4TWJ, who passed away in January. Ingram's final bi-monthly QRP column appears in the April issue of CQ. Hartford's first column will be in the June issue. (CQ)

**

THE SOCIAL SCENE: EMCOMMWEST IN RENO IN APRIL

And coming to Reno this spring. Its Emcommwest. Amateur Radio Newsline's Don Carlson is here with the details:

--

Audio report only. Download the MP3 version of this weeks newscast at www.arnewsline.org

--

Again the dates are April 30th through May 2nd in Reno. Nevada. More is on line at www dot emcommwest dot org.

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

HAM HAPPENINGS: EARLY CALL FOR PAPERS FOR ARRL/TAPR DCC

Technical papers are solicited for presentation at the 29th Annual ARRL and TAPR Digital Communications Conference to be held September 24th through the 26th in Portland, Oregon. These papers will also be published in the Conference Proceedings but you do bot need to attend the conference to have your paper included in the publication.

The submission deadline is July 31st. Please send papers to Maty Weinberg, in care of the American Radio Relay League, 225 Main Street, Newington, Connecticut, 06111. You can make your submission via e-mail to maty (at) arrl (dot)org.

**

THE SOCIAL SCENE: MEDITERRANO DX MEETING IN JULY IN ITALY

Turning to the ham radio social scene the next world meeting of the Mediterraneo DX Club takes place July 2nd to the 4th in Messina, Italy. Complete information on this event is on-line in multiple languages at www.mdxc.org. (IZ8CCW)

**

THE SOCIAL SCENE: VISALIA DX DINNER

The Mother Lode DX and Contest Club will host the 11th Annual Contest Dinner on Friday, April 16th, at the International DX Convention in Visalia, California. The dinner will be held in the Oak Room at the Visalia Holiday Inn. Pre-purchase is a requirement to attend and there will not be any tickets sold at the door. To reserve on-line take your web browser to www.mldxcc.org. (MLDXCC)

**

THE SOCIAL SCENE: FORMER ATTL PRES. W5ZN TO SPEAK AT DAYTON CONTST DINNER

And the North Coast Contesters are pleased to announce that Joel Harrison, W5ZN, will be the main speaker at the 2010 Dayton Contest Dinner. An active contest operator, Joel just finished a four year term as President of the ARRL in January of this year. For more information on this dinner, please visit contestdinner.com on the World Wide Web. (North Coast Contesters)

**

ON THE AIR: CELEBRATING THE 2010 SOCCER WORLD CUP

Amateur Radio special event station ZS10WCS will be on the air through July 12th to celebrate the 2010 Soccer World Cup being held in South Africa between June 11th and July 11th. The call will be used by members of various South African Radio League affiliated clubs. Operations through May 31st will only be on weekends. Between June 1st and July 12, ZS10WCS it will be on the air 7 days a week. QSL with a Self Addressed Envelope and one International Reply Coupon to PO Box 1721, Strubensvallei, 1735, South Africa. (SARL)

**

ON THE AIR: COMMEMORATING THE BATAAN DEATH MARCH

Sunday, March 21st is the anniversary of the World War II Bataan Death March. And in solemn commemoration the Mesilla Valley Radio Club will be operating special events station K5B from 1000 to 23 hours U-T-C. Information about contacting the station and getting a K5B Special Events QSL card can be found on the clubs website at www.n5bl.org /bataan. (Mesilla Valley Radio Club)

**

ON THE AIR: 3C0C ANNOBON ISLAND OPERATION DELAYED

On the air -- or maybe off the air is a better term for this. Word that the long awaited 3C0C operation from Annobon Island has suffered a setback.

due to repairs being made to the islands lone airport runway.

On March 12th the ham radio operations planners announced that they had received a statement from Equatorial Guinea informing them that repairs to the runway will begin shortly and are expected to last two to three months. During that time no aircraft can land on or depart from Annobon.

DXpedition planners say that travel by boat is not a reality due to the small number of available water craft and the time it would take. For more details and updates please visit www dot 3c0c-annobon dot com on the World Wide Web. (3C0C)

**

DX

In DX, word that a multi-national group is planning to operate from Kurdistan in Northern Iraq between April 2nd and the 12th. The team has received a ten day visa issued by the government of Kurdistan. No other information is available as we go to air.

K9OT and KB9LIE will operate portable FP to activate Miquelon Island between July 5th and the 14th. They will operate CW and SSB primarily on 80 to 10 meters and possibly 6 meters as well. QSL as directed on the air.

The 3W6C team will activate Cï¿½n Cï¿½ Island near Viet Nam on amateur radio satellites from April 10th to the 18th. Satellites to be activated include AO-07, AO-51, HO-68, SO-50, and SO-67, each on an as available basis. For additional information and operating plan, please visit www dot 3w6c dot qrv dot ch.

X4UL, is now active as 4S7ULG from Colombo, Sri Lanka. He will be there through April 7th working mainly on 20 and 17 meters P-S-K. QSL via UY5ZZ.

SP5ES and SP5UAF will be active as CR1M and CR1Z, respectively, from Sao Miguel in the Azores. This, during the CQWW WPX SSB Contest March 27th to the 28th. QSL CR1M via SP5ES. QSL CR1Z via SP5UAF.

Lastly, K4QD and AF4Z will once again be active portable HH4 from the Northwest Haiti Christian Mission. Their operation is planned to take place between March 22nd and April 2nd. They will operate 160 through 10 meters on CW, SSB and RTTY as time permits. Low band operations will be limited to the availability of AC power. QSL via their home callsigns either direct, via the bureau or using Logbook of the World.

(Above from various DX news sources)

**

THAT FINAL ITEM: NEW INTEREST IN SILICON NANOWIRES

Silicon nanowires are attracting an increasing level of attention from technologists and industry. This, due to their drive to create ever-smaller electronic devices will depend on these mechanical properties.

New research from North Carolina State University shows that silicon nanowires are far more resilient than their larger counterparts. This is a finding that could pave the way for smaller, sturdier nanoelectronics, nanosensors, light-emitting diodes and other yet to be thought up applications.

According to a recent study, silicon nanowires deform in a very different way from bulk silicon. Bulk silicon is very brittle meaning that it cannot be stretched or warped very much without breaking . On the other hand, silicon nanowires are more resilient, and can sustain much larger deforming before rupturing.

Other properties of silicon nanowires include increasing fracture strength and decreasing elastic modulus as the nanowire gets smaller and smaller. This study was funded by grants from the National Science Foundation and North Carolina State University. (Adapted from Science Daily)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

Before we go, a reminder that the nominating period for the 2010 Amateur Radio Newsline Young Ham of the Year Award is now open. Each year, we here at the Amateur Radio Newsline in association with Vertex Standard Corporation -- the makers of Yaesu brand ham radio gear -- and CQ Magazine combine to honor a ham radio operator age 18 or younger for his or her contributions to ham radio or to society itself through ham radio.

All nominations and materials required by the official rules must be received by Amateur Radio Newsline no later than midnight on May 30th. Both "mail-in" and electronic submissions are being accepted this year. Full rules and a downloadable nominating form are now on our website at www.arnewsline.org. Just scroll down until you see "2010 Young Ham of the Year Awards Now Being Accepted" and click on the word "here" to download the directions and the form. You can also leave questions and comments on the official Young Ham of the Year Award page on Facebook dot com.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jeff Clark, K8JAC, saying 73 and we thank you for listening.

** LA / JP65 ** USE/SUBSCRIBE: www.mmmonvhf.de/latest.php?id=3149

OH8K-team will make a ten day pedition to LA 5th-15th June and
main target is JP65 and some squares around it and some squares
on the way to JP65 and back home in SM. We will be active in 7-10
squares depending how we find good QTHs. We must use personal
calls LA/OH6JW & LA/OH9TT. More details near the activity on OH8K
site look www.oh8k.org. 73 de Aulis OH6JW , a member of OH8K

** IC8 / JN60 ** USE/SUBSCRIBE: www.mmmonvhf.de/latest.php?id=3159

After the T7-MS/EME-Activity with PA3FPQ, PE1LWT and the Italian
friends, Chris, PA2CHR, will continue his trip from San Marino to
Ischia Island in JN60 square. Will run MS for a few days and hope
for good reflections in the morning hours. Rig will be the FT847
and HLV600 PA with 10el. yagi - The QTH at JN60WR has a free
horizon from 235-65deg. Pse see www.mmmonvhf.de/latest.php?id=3158
my other message about I8 - activity!
SOURCE: tnx to Chris, PA2CHR, direct to MMMonVHF

** I8 / JM87 ** USE/SUBSCRIBE: www.mmmonvhf.de/latest.php?id=3158

After the JN60 / IC8-activity by Chris, PA2CHR, he is planning to
drive to JM87 square for a few days of MS also. Rig in the FT847
with HLV 600 PA and a 10el. yagi. Will also be QRV during the
contest on 1 and 2 of May. for Tropo QSO's. Best time for MS will
be the morning hours. I will operate from my car with a generator
and hope to find a resonable VHF location between all the mountains
in JM87... SOURCE: tnx to Chris, PA2CHR, direct to MMMonVHF

** HS / OK16 ** USE/SUBSCRIBE: www.mmmonvhf.de/latest.php?id=3043

HS0ZIL - a new 144 MHz Activity from HS0ZIL in OK16BQ soon.
2010-03-13: Good arrive in my QTH in OK16 yesterday evening!
2010-03-16: Hit to all!! hope that i will be setup the antennas
during next weekend!Now 41 degrees during the day!!!
2010-03-16: For the first month i will try to have a good setup
for US and VE! In April than for Europe and Oceania!!

A German team is activating IOTA EU-127 (Neuwerk Island) and WFF
DLFF-005 (National Park Hamburg Wadden Sea). From March 19th to
21st (19.-21. March 2010) we are using DFï¿½WFF and DAï¿½GLH. Our
QTH will be the building where the lighthouse Neuwerk is situated
now. This building is 700 years old ï¿½ therefore DAï¿½GLH will be
using the special DOK ï¿½700NWKï¿½. It is known as the oldest building
of Hamburg because the island belongs to the City of Hamburg.
Access to the island is only possible during low tide. In case of
bad weather we will be not able to go to Neuwerk. We expect to
start our operation very late at the 19th and we will leave again
about 48 hours later. Operators are: DK7LV, DJ4RU, DL4BBH, DB5BZ
DL1BGC, DL2VFR, DL2SWW and DF9TM. We will work SSB, CW and PSK on
all HF-bands and on 2m/70 cm in FM. QSL via DARC-bureau for both
calls. If necessary, direct via DL2VFR. We will upload the logs
to the WFF-logsearch too. http://www.wff-dl.de/ and
http://www.iota-expedition.com/ SOURCE: Ric DL2VFR via F5NQL-News

** KL7 / BP40 ** USE/SUBSCRIBE: www.mmmonvhf.de/latest.php?id=3144

Gene will take the 6 meter gear and try some EME from BP40da in
mid-May till mid-Aug. Of course also he will be looking for some
Es back to the lower 48. He is heading off that way on May 1st
and needs to be set up and ready to go by May 15th. He also would
like to try some TPP with northern EU stations if Kp stays low
next summer. Any EU stations interested in working KL7 are invited
to contact Gene directly via email to set up some TPP or EME skeds
Gene was pretty handy getting his email and internet set up via
cell phone links during his grid hopping last summer, so hopefully
he can be easily contacted once he is set up in Alaska. GL and 73!
SOURCE: tnx to Lance, W7GJ, on UKSMG Announce

** JA / QM05 ** USE/SUBSCRIBE: www.mmmonvhf.de/latest.php?id=3147

Hello all, 8J1AXA will make the final operation on 1296MHz March
20-21. Everybody who can operate please come on and give a call.
2010 March 20(-21):

0900-2145Z for EU/AF window, 1296.020 CW/SSB, 1296.065 JT65
2345-0010Z special time for South America, preferably JT65.
They would strongly like to work SA and AF before closing down,
and will disassemble all the EME equipments after this operation
the local morning of March 21. SOURCE: Mike, JH1KRC, via MoonNet

** FP / ** USE/SUBSCRIBE: www.mmmonvhf.de/latest.php?id=3148

Upcoming DXpedition to St. Pierre and Miquelon (GN17)in July
Paul K9OT and Peg KB9LIE will activate Miquelon Island (NA-032)
on July 5-14, 2010. Callsigns will be FP/homecall. This includes
the IARU HF Championship contest as two single-operator entries.
They will operate CW and SSB 80-10 meters with possibility of 160m
and 6m if conditions are good. They hope to have internet access
from the Motel de Miquelon. Website: www.hamradio.pnpfarms.com.
QSL via homecalls, direct with return postage, buro or LOTW.
SOURCE: tnx to Bill, NG3K, direct to MMMonVHF

** VP5 ** USE/SUBSCRIBE: www.mmmonvhf.de/latest.php?id=3161

By W5CW; QRV Mar 23 - April 6 as VP5/W5CW before/after WPX on
160 - 6 Meters CW/SSB; focus on WARC. Special Callsign in WPX
will be VP50V (VP Fifty V.) QSL via Box 88, Morris, OK 74445-0088.
SOURCE: tnx to Maurice, F5NQL, direct to MMMonVHF

** VK / QF44 ** USE/SUBSCRIBE: www.mmmonvhf.de/latest.php?id=3162

John Moyle Fieldday, march 2010
As per usual, VK2SMC will be operating from QF44FB - near
Cabramurra in SE NSW at altitude 1612m. We will be active on 6m,
2m, 70cm, and 23cm. Operators will be Rod (VK2TWR), John (VK2IJM)
and David (VK2IDM). The weather forecast looks promising for a
change and we are quietly confident that we'll be fully
operational from 0100 on Saturday. We will update the VK2SMC
location details in VK Logger prior to the starting time - for
visibility of our distance and azimuth. Good luck to all.
SOURCE: David, VK2IDM, via VK/ZL-VHF-Reflector
INFO ED.: More activity Infos at: http://www.vklogger.com/forum

** F / IN98 ** USE/SUBSCRIBE: www.mmmonvhf.de/latest.php?id=3163

We go to Normandy on 21st March for 4 days and I hope to work on
JT6M from IN98op. I will be calling on 50.205 when I have time!
73 Robin M5AEF. (e.d. QRV at HF too)

GB2RS NEWS

Sunday 21st March 2010

The news headlines

* Mike Dixon, G3PFR, silent key

* Canadian amateurs now on 137kHz

* DXpedition member sought

The Society is saddened to report the death of Dr Mike Dixon, G3PFR, who passed away on Wednesday 17 March. Mike was a very influential and active figure in the amateur microwave community. He was chairman of the RSGB Microwave Committee several times, and later became the RSGB Microwave Spectrum Manager. Mike wrote the RadCom Microwaves column from 1984 until 1999, and represented the RSGB at numerous conferences. In 2006 Mike Dixon was awarded Life Vice Presidency of the RSGB in recognition of his work. He will be sadly missed. A fuller tribute to Mike will be published in the May edition of RadCom.

The regulatory body in Canada has approved access by Canadian radio amateurs to the 135.7 to 137.8kHz band, subject to certain conditions. Stations in the amateur service using frequencies must not exceed a maximum radiated power of 1W EIRP and shall not cause harmful interference to stations of the radio navigation service.

The Grantham Amateur Radio Club 2010 DXpedition is looking for one more person for their trip to island of Fyn in Denmark. The plan is to leave Grantham on 17 June and arrive back on the 25th. Accommodation and ferry crossings are already booked. Anyone interested or wanting more info please call Alan, G0RCI on 01476 402559 between noon and 9pm. The group say this could be an ideal outing for someone new to pile ups.

There has been high praise for the Radio Club of Chile following the earthquake and aftershocks. A television news report describes the Chilean radio amateurs as a collection of dedicated operators scattered across the country, proving to be an information lifeline during recent events. While telephones and the internet largely failed, many of the radio operators had back-up power and were able to provide vital lines of communication, picked up by National Radio Chile and rebroadcast, giving status of various affected areas. The report went further to say that claims that ham radio is dying were put to rest as these operators provided such vital communication links. The Radio Club of Chile has expressed its thanks to the world's radio amateurs for keeping

emergency frequencies free during their nation's time of need.

A plan to help the US lead the world in providing its citizens with super-fast internet has been officially released. The Federal Communications Commission aims to ensure every American in the country has broadband connections by 2020. This report shows the UK in a very favourable light with DSL connections, but as yet little fibre. It would appear that cable has not made any real progress. The in-home distribution remains a concern for amateur radio especially with the push to interconnect many home devices with PLT. Smart Metering and Smart Grid requirements are also being pushed by all National Administrations and the EU. Work by RSGB and IARU continues to minimise the potential for interference where PLT is used to provide these connections. Thilo Kootz and John Pink were contributors at the meeting of the CISPR PLT project team this week, which was held at the DARC HQ in Germany. Delegates attending came from JA, W, F, ON, HB9, DL, and of course G.

Milan, OK1IF has received permission to use 5258.5 to 5261.5kHz for CW and SSB experimental operation. The permitted output power is 100W and the licence is valid until 31 December 2010.

The Mongolian Radio Sport Federation has opened a QSL Bureau. The address to use is MRSF QSL Bureau, PO Box 573, Ulaanbaatar 16092, Mongolia.

Tamworth Amateur Radio Society will be running a Foundation course on 10, 17 and 24 April, with registration on 25 March between 8-9 pm, at St. Francis' Church, Tamworth. Further details can be had by contacting Bob, G1BCZ on 07811 646870 or by email to tamworthradio.training<at>gmail.com.

And now for the details of rallies and events for the coming week

Today, 21 March, the 25th Wythall Radio Club Radio and Computer Rally takes place at Woodrush Sports Centre, Shawhurst lane, Hollywood near Birmingham B47 5JW. The location is 2 miles from junction 3 of the M42. Doors open from 10am to 3pm and entry is £1.50. There will be trade stands and a Bring & Buy. Talk in is on S22. Details from Chris, G0EYO on 07710 412 819.

The Callington Amateur Radio Society Rally also takes place today, 21 March, at the Callington Community College, Launceston Road, Callington, Cornwall PL17 7DR. Doors open at 10am and entry is £2. There will be trade stands and a Bring & Buy. Contact Chris on 07973 418 371.

Falkirk & District Amateur Radio Society will be holding a Junk Sale today, Sunday 21 March, at Lodge Zetland Masonic Hall, Bo'ness Road, Grangemouth FK3 8AN. Doors open at 12 noon but anyone who has booked a table or would like one will get access from 11am. There will also be an RSGB book stand. Hot refreshments will be available all day.

Information from Peter, GM8GAX, on 01259 761012.

On Sunday 28 March, from 9.30am to 4pm, the Pembrokeshire Radio Society will be holding their annual Bring & Buy sale. Admission is £1 and includes a free cup of tea or coffee. Tables are still available. Contact Elwyn, GW0GUY on 01437 760026.

Also on Sunday 28 March, the South Gloucestershire Rally take place at the Avon Scouts Activity Centre, Woodhouse Park, Almondsbury BS32 4LX, which is about 1.5 miles from the M4/M5 junction. Doors open at 9.30am for disabled visitors and 10am for other visitors. Entry is £2 and no dogs are permitted except assistance dogs. There will be trade stands, a flea market and a car boot sale. Contact Peter Cabban, G4OST on 01454 612689. The Spring Militaria, Electronics & Radio Amateur Hangar Sale will take place on 28 March at Hack Green secret Nuclear Bunker, Nantwich, Cheshire CW5 8AP. Doors open at 10am and entry is £2.50. Contact Rod Siebert, on 01270 623353.

Now for the news of special events

The Newbury & District Amateur Radio Society will be activating GB0VUL throughout March to promote awareness and publicity of the Vulcan Bomber. The main operation will be 20 and 21 March when a station will be run by Norman, M0JEC from the ATC Hut in St Michael's Road Newbury. Visitors most welcome. Full details at QRZ.com.

Listen out for GB0BS on Saturday 27 March for the Boston Scouts at Butterwick in Lincolnshire.

And now the HF DX news compiled from 425 DX News and other sources.

Olivier, ON4EI will be activating Bere Island, which is IOTA reference EU-121, as EJ8GQB between 21 and 29 March. Activity will be 160 through to 10m using SSB and RTTY. He will also take part in the CQ WPX SSB Contest on 27 and 28 March.

Dim, UT5UGR will be active as FM/KL7WA from Martinique, which is IOTA reference NA-107, until 29 March. This will include entry in the CQ WW WPX SSB Contest as TO7A. QSL for both callsigns via UT5UGR.

Andrei, NP3D will be active as HR2/NP3D from Honduras until 29 March. He will operate on all bands and modes, with a focus on 160 metres and will participate in the CQ WW WPX SSB contest as HQ2T. QSL via W3HNK or RW6HS and Logbook of The World.

Roberto, IV3IYH will be active as TG9IRP from Guatemala until 1 April, including an entry in the CQ WPX SSB Contest. He will operate SSB, CW and RTTY on 80 through to 10 metres. QSL via IK2ILH, direct or via the bureau.

Now the contest news

The British Amateur Radio Teledata Group's HF RTTY Contest takes place this weekend and finishes as 0200UTC on 22 March. Exchange a signal

report, a serial number and the time in GMT.

23 March sees the 50MHz UK Activity Contest taking place between 2000 and 2230UTC. Using all modes the exchange is signal report, serial number and locator. The CQ World Wide WPX SSB Contest takes place between 0000 and 2359UTC on 27 and 28 March. Using all bands from 1.8 through to 28MHz, the exchange is signal report and serial number.

Now the solar factual data for the period from the 8th to the 15th of March, compiled by Neil Clarke, G0CAS and Martin Harrison, G3USF on the 15th of March.

Solar activity continued to be mainly very low, though small C-class flares were reported on the 12th,13th and 14th. The Sun was spotless from the 6th to the 9th, but then a new spot group appeared, and the solar flux up from 76 on the 6th to 89 on the 14th. The average for the week was 84 &#65533; an increase of 5 on the previous week. The 90-day average went up one point to 82. The X-ray flux averaged A4.3. The geomagnetic field was mainly quiet, with the Ap index in single figures every day. However, the 11th and 12th were very slightly disturbed as a consequence of solar hole activity. Wind speeds rose from 295km/sec on the 8th to 510km/sec on the 12th before falling to 325km/sec on the 14th. VHF aurora was noted on the evening of the 11th, but only at very high latitudes. Particle densities were consistently low and the interplanetary magnetic field varied by only a few nanoTeslas. HF propagation remained relatively good with predicted values being achieved.

During the week ahead the solar flux is likely to be mainly in the 80s, but there is a fair chance of a fresh spot group emerging and driving it higher. C-class flares are possible and there will be an outside chance of an isolated M-class flare. The geomagnetic field is expected to be predominantly quiet with occasional unsettled periods. MUFs at equal latitudes will be about 23 MHz in the south and 20 MHz in the north. Darkness lows will be about 8MHz. This week marks the spring equinox, so north-south paths should be in seasonal good shape. Paths to the Middle East should have a maximum usable frequency, at which there will be a 50 per cent chance of success, of about 26MHz and an optimum working frequency of about 21MHz. The best time should be between 0900 and 1600UTC.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including e-mail addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your

transmission.]

NEWS FOR THE MIDLANDS On Sunday 21 March Midland Amateur Radio Society is attending the Wythall radio rally. Details from Norman, G8BHE, on 01214 229 787. RAC Bulletin 2010-010E : Ontario South Director Elected
2010-03-16

Congratulations are extended to Mr. Chris Pitre VE3CTP/VE3ZO
who was recently elected as the RAC Director for Ontario South
for the remainder of a two year term which started January
1, 2010 ending December 31, 2011. He ran unopposed, eliminating
the need for a balloted election.

BREAKING NEWS: DAYTON HAMVENTION(c) ANNOUNCES 2010 AWARD WINNERS

Three amateur radio (ham) operators who have made significant contributions to the Amateur Radio Service, will be honored guests when Hamvention¿½ 2010 opens in Hara Arena on May 14. In addition, a club of the year will be honored in keeping with the 2010 Hamvention theme, Amateur Radio Clubs Worldwide: The Lifeline.

Recipients of this year's Hamvention¿½ awards are:

Special Achievement - Dick Ross/K2MGA for his excellent work over the past number of years on CQ magazine.

Technical Excellence - Simon Brown / HB9DRV for the invention and development of Ham Radio Deluxe.

Amateur of the Year - Jim Stafford / W4QO for 50 years of service to Amateur Radio and his support for public service and unending efforts to recruit and develop hams of all ages.

Club of the Year - North Fulton Amateur Radio League, NFARL, North Fulton, GA - Serving the greater Atlanta Area, the State of Georgia and the US with emergency services, training and the preparation of Amateur Radio in general.

" Choosing the finalists was a difficult process due to the number of fine nominations" said Frank Beafore, Chairman of the Awards Committee. This year, an additional award category was added - Club of the Year. This award honors a ham radio organization that contributes to the good of Amateur Radio.

"Although we narrowed our club choice to North Fulton, GA, we had a number of deserving candidates" stated Beafore. "The winner of this year's award is certainly a great example of the thousands of clubs and organizations around the world perpetuating our avocation".

An intimate dinner on May 15 will be held in downtown Dayton honoring the 2010 Hamvention Award winners.

SB QNEWS @ WW $QNEWS100321
QNEWS - Mar 21 - VK4 ON AIR

DID YOU TELL ANYONE ABOUT AMATEUR RADIO THIS WEEK?

Welcome to QNEWS from VK4WIA.

I'm Geoff Emery, VK4ZPP and I'm pondering the irony of whether the
John Moyle will be a contest with the weather.

As Qnews is being put to bed, the weather bureau has announced that
Cyclone Unui will now probably cross over the Queensland Coast. By the time
of this broadcast we will know whether we have been able to share an amateur
field operations contest or whether our attentions have been turned to
putting our preparations to more serious use. It is ironic that the weather
may prove the very purpose of the John Moyle Field Day.

>From The Summerland Amateur Radio Club weekly newsletter, comes the news that
the train the trainer part of the new WIA Emergency Training is being
completed and the next phase will be the training and assessment of the 192
currently registered applicants throughout all VK. This is our WIA working for
the hobby and the community.

Depending on the weather, good contesting or stay safe.

I'm Geoff Emery and that's what I think.....how about you?

BUNDABERG

The news from Bundaberg club this week is that we have held our first meeting for the
year and had a good roll up.

The most important thing we do each February is to organise our yearly calendar and
we're all exhausted after we work through it month by month. We end up with things
like; 6 WICEN training sessions, 4 social events, 4 meetings; numerous fox hunts
and workshops, so it promises to be another busy year for the Bundy members.

We've also held our first WICEN training for the year and had the pleasure of hearing from the Bundaberg Regional Council's disaster planning officer. He outlined our role in the new amalgamated council's welfare plan and commended our members for their ongoing training and dedication.

WICEN Bundaberg has a vastly increased area of responsibility since the Queensland council amalgamations but we are actively working on a new repeater site at Mt Watalgan to ensure we can meet our commitments.

This has been VK4UD with the Bundaberg news

TABLELANDS RADIO AND ELECTRONICS CLUB
vk4wat@wia.org.au
www.treclub.org.au

G'day - I'm Dale VK4DMC from the Tablelands Radio and Electronics Club in Far North Queensland reporting from Innot Hot Springs, located at grid-square QH22oi, where this weekend we are taking part in the John Moyle Memorial Field day contest.

We arrived here on Friday and set up our field station and after much fun getting various antennas located on portable towers and not so portable trees we were on air for the start of the contest at 0100 UTC Saturday.

So far we have made many contacts, using our club call-sign VK4WAT, into most VK call areas and international stations being worked as well.

Innot Hot Springs is known for its hot thermal springs and many of our members have spent time simply soaking in the invigorating hot mineral spas. This has been an added bonus and is helping to re-invigorate our operators for their next stint on the microphone. Listen out for VK4WAT and say G'day.

This has been Dale VK4DMC.

WIANEWS FOR WEEK COMMENCING MAR 21 2010.

WIA CENTENARY

Remembering the unit men, Hertz

HAMS ACROSS AUSTRALIA.

The "VK9 AWARD"

INTERNATIONAL MARCONI DAY AWARDS PROGRAM

VK7 SSTV Gateway

ALL UP AND COMING IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE OF AUSTRALIA FOR WEEK COMMENCING MAR 21 2010

WIA CENTENARY

Registrations are steadily flowing in for this memorable occasion that runs Friday the 28th to Sunday the 30th of May.

Just confirmed for the Friday night is that there will be a once in a life-time opportunity to explore the technical side of the national capital's well known landmark, Black Mountain Telstra Communications Tower. Exclusive for WIA Centenary Convention registrants will be a series of guided tours in areas never seen by the general public. Learn about the history of this 30-year old communications and broadcast facility as well as your opportunity to see Canberra by night from the towers observation deck.

Limited bookings are available for the Black Mountain Telstra Communications Tower tour.

It is just part of a packed three day program with plenty to see and do, catch up with old friends or make new ones as we celebrate the one hundred years of organised amateur radio in Australia.

On Saturday the special program titled "The WIA Centenary through word, picture, and artefacts" will be another highlight, with nine presenters each having an interesting topic. The full details are on the WIA website and were sent to members as an insert in this month's Amateur Radio magazine. The Saturday evening Centenary Dinner has local and overseas dignitaries in attendance and a planned special Centenary Amateur Radio on the International Space Station contact with a local school.

Sunday will include a live transmission of this VK1WIA news broadcast from the Nation's Capital, a public display of amateur radio, sightseeing and a BBQ in the park. On air right across the weekend from Canberra will be the special callsign VK100WIA that offers a collectable QSL card and contacts with it qualify for the WIA Centenary Award.

The WIA Centenary Convention, which includes an excellent partner's program, happening on the last weekend in May in Canberra will be talked about for many years to come - be part of it!

click the following Link for full details and to register now.
http://www.wia.org.au/newsevents/news/2010/20100313-2/index.php

Over 100 ARNSW Members attended the opening of the new premises at the VK2WI Dural site last Sunday. Three of the older members present cut the Centenary Birthday cake. They were Pierce Healy VK2APQ, Bill Hall VK2XT and David Thompson VK2BDT.

ARNSW was pleased to welcome National WIA President Michael Owen VK3KI and Director Phil Wait VK2ASD to the opening.

The Centenary date on Thursday the 11 th was observed by a small gathering at the site in the Sydney CBD of the meeting in 1910 from which has grown today's WIA.

CSIRO and Australian company Sapphicon Semiconductor Pty Ltd have signed an agreement to jointly develop a complete radio receiver on a chip measuring just 5 mm x 5 mm that could eventually be used in mobile phones and other communications technologies.

Trevor Taege VK4BAT has the details----.

"The development of a low-cost, ultra-high-bandwidth
'system-on-chip' device
could also replace traditional receivers currently used in radio astronomy applications, many of which are about the size of a bar fridge.

The chip's first test will be in CSIRO's Australian SKA Pathfinder or ASKAP array of 36 radio dishes that acts as a single telescope now under construction in Western Australia.

It will be trialled in an innovative radio camera (or "phased array feed") developed by CSIRO, which sits at the focal centre of each ASKAP dish to receive incoming cosmic radio waves.

The development project is expected to take about two years to complete and will involve a number of stages of sub-component development and testing.

I'm Trevor Taege VK4BAT for VK1WIA News

HAMS ACROSS AUSTRALIA.

THIS COMING SATURDAY, MARCH 27TH, SEES THE
HOLDING OF THE INAUGURAL BREAKFAST WITH THE
PRESIDENT AT THE BARBEQUES EITHER SIDE OF THE ENTRANCE TO STRAND JETTY.

BRING ALONG YOUR FAVOURITE BREKKIE ITEMS AND
A COMFY CHAIR AND SOCIALISE IN ONE OF NORTH
QUEENSLANDS AWARD WINNING SETTINGS.
THE BREAKFAST STARTS AT 7AM.

FOR THE FINAL ITEM, YOU NEED TO KNOW THAT
ONE OF THE FRIENDLIEST RADIO NETS IN THE LAND
HAPPENS THIS TUESDAY EVENING FROM 7-30PM ON THE TOWNSVILLE VHF REPEATER.
THE ANN RENTON MEMORIAL LADIES NET. IT IS
OPEN TO YOUNG AND OLD, YL OR OM AND IS A
GOLDEN OPPORTUNITY FOR ANYONE WHO NEEDS
PRACTICE ON AIR TO ONTO THE NET AS A SECOND OPERATOR.
SO, JOIN IN ON THE NET THIS TUESDAY EVENING - AND I WILL SEE YOU THERE !

WELL, THATS ALL THE QNEWS FOR THIS SUNDAY 21ST
MARCH... THIS HAS BEEN DON VK4FNQA IN
TROPICAL PARADISE FOR THE TOWNSVILLE AMATEUR
RADIO CLUB INC, AND YOU HAVE BEEN LISTENING TO; AND ENJOYING QNEWS FROM VK4WIA..

VK6 - NEWSWEST

An estimated crowd of 150 people travelled from metropolitan Perth and from
country locations as far away as Kalgoorlie to attend the official opening
of the Neil Penfold State Amateur Radio Centre at Whiteman Park.

The Centre is the home of the Northern Corridor Radio Group Inc. The NPSARC
was officially opened by Neil Penfold, VK6NE.

This magnificent Amateur Radio facility was built by club members over
several years, providing the club with a world class facility for contesting
and other club activities. Contained within the building are two spacious
air conditioned operating shacks, each set up with first class equipment.
The facility also has a meeting room, toilet and shower, kitchen, a workshop,
sleeping quarters and storage space.

Outside is a formidable array of towers, masts and antennas, and a pleasant
grassed recreation area. There is also a rather large diesel generator for
standby power.

The day was celebrated with a car boot sale, sausage sizzle, "open house" of
the clubrooms, a raffle and many face to face QSOs. The WIA was also there,
selling WIA merchandise, callbooks etc.

Congratulations to NCRG on realising their vision.

VK7
local area news :- http://reast.asn.au/news.php
vk7 local news, email vk7regionalnews-subscribe@yahoogroups.com

A big greeting to everyone at the Meet the Voice BBQ at ROSS today.

Many in VK7 will be making their pilgrimage to that wonderful little Midlands
town for a great day of socialising and meeting those amateurs in person.

See you there.

April Hobart REAST Presentation

Tour of ABC TV & Radio Studios

REAST Host will be Jim Parish who is Technical Manager at the ABC and he will be taking you through the newly refurbished TV and radio studios.

The move to digital technology has seen many changes in the studios and processes for bringing TV and radio to Tasmanians.

This should be a fascinating tour and REAST are privileged to have Jim showing them through prior to his retirement from the ABC.

Tour will be held on the 7th April 2010 at 7:30pm please be at the front doors at 7:30pm SHARP.

http://reast.asn.au/events.php#abcstudios

(Justin, VK7TW, REAST Presentations Officer)

VK9

The "VK9 AWARD"

VK4TJF James Fleming on behalf of sponsors "Redcliffe and District Amateur Radio Club." tell us this new non-WIA award is now operational.

Contact each of the "VK9" DXCC entities using any or all bands and all modes.

Band and mode endorsements are available on request from the postal address in the text edition, again a note it is NOT the Redcliffe Clubs address but James home address to save time and man power.

SWL OK, though their applications must show the call signs of both stations heard.

The VK9 DXCC entities are:
Mellish Reef
Lord Howe Island
Norfolk Island
Christmas Island
Willis Island
Cocos Keeling Island

Send GCR list and fee of 5 AUD, 2 IRC's or $US5 to James Fleming VK4TJF, 4 Murchison Ct., Murrumba Downs, 4503 QLD Australia.

(73's from James Fleming, VK4TJF)

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

As parts of earthquake-hit Chile again were shaken by severe aftershocks there has been further news of the role of radio amateurs, including them being a highly sought after reliable source of information.

A television news report describes them as a collection of dedicated ham radio operators scattered across the country, proving to be an information lifeline during the devastating earthquake, tsunami and its aftermath.

Interviewed was R.C.C.H. Secretary Alejandro Jara CE3JWF and Director of S.E.R. (Servicio de Emergencia de Radioaficionados) Rafael Riesco CE3FFR, the Spanish language report, translated to English said "They were on air within 10 to 15 minutes of the quake - where possible. While telephones and the internet largely failed, many of the radio operators have back-up power and were able to provide vital lines of communication, picked up by National Radio Chile and rebroadcast, giving status of various affected areas."

The report added that, "Even where internet still worked, gossip social networking pages could not be trusted, exaggerating and getting things wrong."

The RCCH has also expressed its thanks to the world's radio amateurs for keeping emergency frequencies free during their nation's time of need.

(vk3pc via wia.org.au)

CHANGES TO SOUTH AFRICAN RADIO REGULATIONS

It appears that ICASA is ready to publish the draft radio regulations in the Government Gazette.

As soon as the SARL receives a copy of the draft regulations, it will be posted on the SARL website at www.sarl.org.za

Public comment will be invited which will be considered by ICASA before the regulations will be finalised.

Although the SARL requested that the organisation make input into the draft, the ICASA Councillor charged with rewriting the outdated regulations decided that once the draft is published for comment, is the appropriate time for the SARL to make input.

==========

NEWS FROM ARNEWSLINE

FCC REAFFIRMS ROS ONLY LEGAL ABOVE 222 MHZ

The FCC says that a new digital mode developed in Europe and being used

world-wide is not legal for United States hams to transmit below 222 MHz. This because it uses frequency hopping technology which the regulatory which the agency considers to be spread spectrum and bans hams from using below that frequency. Amateur Radio Newsline's Frank Haas, KB4T, has more.

According to the ARRL, back in mid-February, European amateurs first used a new, experimental digital mode known as R-O S. On February 23, 2010 -- after FCC review of the original documents provided from the developer's website -- the FCC made the following statements on R-O-S. We quote:

"Section 97.305 is the rule that specifies where different emission types are allowed to be transmitted on different bands. 'R-O-S' is viewed as

'spread spectrum,' and the creator of the system describes it as that. We assume that he knows what he created.

Section 97.305 authorizes spread spectrum emission types defined in Section 97.3 to be transmitted by FCC licensed amateur stations at places we regulate communications only on 222-225 MHz and higher frequency amateur bands. European telecommunication regulatory authorities may authorize

amateur stations in Europe to use spread spectrum on the High Frequency

bands, but this is of no concern to us.

"The Commission does not determine if a particular mode 'truly' represents spread spectrum as it is defined in the rules. The licensee of the station transmitting the emission is responsible for determining that the operation of the station complies with the rules. This would include determining the type of emission the station is transmitting and that the frequencies being used are authorized for that type of emission." End quote

Since that initial FCC review, several Internet sites have reported a claim -- attributed to the FCC -- that the original statements made had been reconsidered and that the regulatory agency's view was now that -- quote: "R-O-S cannot be viewed as Spread Spectrum and it would be encompassed within Section 97.309 which covers RTTY and data emissions codes."

The ARRL says that when queried about this new statement, the FCC's Consumer Assistance Office stated that -- and again we quote: "The information contained on the R-O-S website was not provided by the FCC."

The agency then reaffirmed the original statements that came from the FCC's Wireless Bureau, which handles Amateur Radio rules for the United States. In other words, as far as the FCC is concerned, the R-O-S mode can only be used by the hams that it licenses on frequency bands above 222 MHz. And that's where it stands with the FCC as we go to air.

For the Amateur Radio Newsline. I'm Frank Haas, KB4T, in Holly Hill, Florida.

In its closing statement on the matter, the ARRL says that it supports the experimentation and advancing the technical skills of operators. But the League also reminds US licensees that according to Section 97.307, spread spectrum communications are only permissible in the US on frequencies above 222 MHz.

ROS CREATOR SAYS HES DEVLOPED A NEW NARROWBAND VERSION

As if this situation was not complicated enough, the creator of ROS, one Josï¿½ Alberto Nieto Ros, has announced the creation of a narrowband version of ROS that requires only 500 Hz. To operate.

He says that a technical description of this new version will be sent to FCC with the aim of gaining the agency's approval their approval for its use in the United States. Until then, the author says that he will not

make public any technical explanation about this mode.

But here's where there may be a conflict. In his blog posting he claims that if you are a U.S. citizen, that you are in your perfect right to experiment with this new digital mode, until the FCC says otherwise. What he might not understand is that here in the United States hams must abide by the FCC Part 97 rules currently in place as well as any standing FCC

declaration regarding the use of any mode. Also, that violating either

could lead to anything ranging from a warning letter to a Notice of Violation or even a monetary fine. So while U-S hams can sit all day and receive and decode using any version of ROS, that they cannot transmit with it until they get a go ahead from the FCC. (Various sources)

Remembering the unit men - Hertz

Hello I'm Jim Linton VK3PC with the latest in a series of brief looks at those who made discoveries and have their names as units of measurement. The German physicist Heinrich Hertz made important contributions to mankind's knowledge of electromagnetism.

During experiments in 1887 and 88 he proved the existence of radio waves that had previously been mathematically shown by James Clerk Maxwell.

Hertz used a spark gap across an inductor and a loop antenna to send a signal to a loop of wire that also had a small gap.

Reports of his work inspired Marconi who recognised the commercial value of the discovery.

Hertz was the one who demonstrated how radio waves travelled through the ether. They became rightly known as Hertzian waves.

His original experiment was duplicated in many countries much to the amazement who witnessed this scientific discovery, and leading to the era of early wireless experimentation.

In the ultimate recognition, by the 1970s the term 'cycles per second' as a measurement of frequency kilocycles and Megacycles was replaced with the unit Hertz.

INTERNATIONAL MARCONI DAY AWARDS PROGRAM

The 23rd International Marconi Day will take place on April 24th. Although not a contest, awards can be obtained if you pre register for the event. Also, in order to qualify as an award station, operations should take place from a site that either used Marconi equipment prior to his death in 1937 or from which Marconi carried out experiments during the same period. Full details can be found at www.gb4imd.org.uk

International Lighthouse and Lightship Weekend

A total of 100 registrations have been received so far at the website illw.net for this year's event on the weekend of the 21st and 22nd of August, Jim Linton VK3PC reports.

"It will be the 11th annual weekend run by Scotland's Ayr Radio Group GM0AYR. The registrations to date are from 19 countries with nearly half of them from Germany and Australia who always strongly support this fun event.

Other countries include Argentina, Belgium, Chile, Denmark, England, Finland, France, Honduras, Italy, Malaysia, Netherlands, New Zealand, Poland, Scotland, Sweden, USA and Wales.

It's only early days and organisers of the International Lighthouse and Lightship Weekend, the Ayr Radio Group, are hopeful that with improved HF propagation the record of 442 registrations set last year could be beaten.

To register or check out the lighthouses already registered, visit the official website illw.net

(Jim Linton VK3PC)

G'day - I'm Dale VK4DMC from the Tablelands Radio and Electronics Club in Far North Queensland reporting from Innot Hot Springs, located at grid-square QH22oi, where this weekend we are taking part in the John Moyle Memorial Field day contest.

We arrived here on Friday and set up our field station and after much fun getting various antennas located on portable towers and not so portable trees we were on air for the start of the contest at 0100 UTC Saturday.

So far we have made many contacts, using our club call-sign VK4WAT, into most VK call areas and international stations being worked as well.

Innot Hot Springs is known for its hot thermal springs and many of our members have spent time simply soaking in the invigorating hot mineral spas. This has been an added bonus and is helping to re-invigorate our operators for their next stint on the microphone. Listen out for VK4WAT and say G'day.

This has been Dale VK4DMC.

VK4OD CALLS FOR YOUR REPEATER INPUT!

We are looking at updating the VKHAM Website data for all the Repeaters in VK mainland and P29.

I have been asked to obtain data from as many of the VK radio Clubs and Individuals who have a repeater under their control.

I would ask that anyone listening please ask your committee persons to access the following link

http://www.wiaq.com/repeaters.htm

(Of course the main and absolutely accurate site is our own at wia.org.au -- ed)

>From Uganda, 5X7JD will be on the air until 25 May. QSL as directed on air.

5R8UI will be on the air from Madagascar until the end of the year.
QSL IK4ZUI.

AWARDS

Centenary of Aviation Award

On March 18, 1910, Harry Houdini made the first powered flight of an aircraft in Australia at Diggers Rest in Victoria.

To commemorate the centenary of aviation in Australia, the Sunbury Amateur Radio Group (S.A.R.G.) are offering the Centenary of Aviation Award.

Available for all bands and all modes (including EchoLink and IRLP), the award is available for those who make five contacts with SARG members. Contact with the same member is permissible but on different days, between 0000UTC March 14 to March 28, 2010.

Further details are available from vk3tkk@yahoo.com.au

VK7 SSTV Gateway

Work is in progress to re locate the SSTV Gateway from the QTH of VK7AX to a repeater site at Gawler.

The call sign of the gateway has been changed to VK7RTV and subject to final interface and radio checks will become operational from the new site within the next few days, where it is anticipated the range of the repeater/gateway will be increased significantly.

The frequency of the gateway is 145.625 MHz. Simplex and to gateway your SSTV signal over the internet via other gateways World Wide, users need to operate with the FSKID button on.

To use the gateway as a local repeater only, leave the FSKID off.

HAM HEARS AND RECORDS MARS EXPRESS FLY-BY

>From our good friends at ARNewsLine, talk about a true accomplishment for ham radio. This as the European Space Agency website reports that a radio amateur was able to receive and record the Mars Express mission on its recent flyby of the Martian moon Phobos. Bertrand Pinel, F5PL, from near Castelnaudary, France, used his 3.5 meter dish throughout the flyby to monitor the signal from Mars Express. Here's a sample of what he heard:

--

The recording of the tone of Mars Express shifts from high to low because, at the time of the recording, Mars Express was travelling away from the

Earth with a speed of 39 000 km/hr - accelerating as it went. This is the same Doppler effect as the sound of an ambulance siren changing as it passes you.

More on this story and F5PL's complete audio recording is on-line at http://webservices.esa.int/blog/post/7/1058

WW SPECIAL INTEREST GROUPS --- RESCUE RADIO

Canadian Amateur Radio Access to 137 KHz.

Industry Canada has approved access by Canadian radio amateurs to the Low Frequency (LF) band 135.7 ? 137.8 kHz, subject to certain conditions. The Revised Canadian Table of Frequency Allocations, promulgated in December 2009 to incorporate changes arising from decisions taken at World Radiocommunication Conference (WRC) 2007, permits amateur use on a Secondary basis subject to Footnote 5.67A.

The Footnote states: "Stations in the amateur service using frequencies in the band 135.7-137.8 kHz shall not exceed a maximum radiated power of 1 W (EIRP) and shall not cause harmful interference to stations of the radionavigation service operating in countries listed in No. 5.67. (WRC-07)". Industry Canada has advised that Canadian radio amateurs may now use the band and that Schedule I of RBR-4 Standards for the Operation of Stations in the Amateur Radio Service will be amended in due course.

(Richard Ferch VE3IAY/VE3KI VP Regulatory Affairs Radio Amateurs of Canada).

REWIND - A LOOK BACK IN HISTORY

Rewind a look back at our history through the serialised written history by WIA Centenary Committee member Peter Wolfenden VK3RV with assistance of others, that is being published in the WIA journal Amateur Radio magazine.

The challenge of interference

>From the very first meeting ??of like minded people? at the Hotel Australia on the 11th of March 1910, it was recognised that that representation was needed of all amateur experimenters to the authorities. Licence fees and ?fair play? were contentious matters discussed at that initial meeting.

During 1913 major issues relating to interference experienced by official government station almost resulted in the end of experimental stations both here in Australia and in New Zealand where experimenters were closed down for some time.

The newspapers of the day carried letters to the editor echoing ?official? concern ? ?What is virtually the highway for public traffic is no place for private amusements??

Walter King Witt, the Secretary of the Wireless Institute of Victoria had a lengthy letter to the editor published in the Melbourne Argus of the 16th August in which he stated that the experimenters had received notification from the Postmaster-General's Department that unless interference issues were fixed, all experimenter licences would be withdrawn.

That letter also made it known that the Council of the Wireless Institute of Victoria would give any assistance to experimenters to overcome any difficulties. This was in the era of spark-gap transmission and basic reception.

Thankfully closure, due to ?interference? did not eventuate and there is little doubt that the concerted efforts by Institute officers contributed greatly to the preservation of experimenter's privilege in this country.

Newsgroup: rec.radio.amateur.misc
Date: 2010-03-20 19:00:12 UTC
From: website@sarl.org.za
Message-ID: <20100320190005.68F1D33CC2@panix2.panix.com>
Source record: 5916
Cross-posted to: rec.radio.amateur.misc,rec.radio.info

SARL News - SUNDAY 21 MARCH 2010

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a webstream, visit www.sarl.org.za, click on ARMI and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and subscribe to receive future bulletins by email.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 10,130, 7,066 and 3,695 MHz SSB.

In the news today:

GAUTENG PIC COURSE FULLY BOOKED

SARL ANNUAL GENERAL MEETING

MEMBERSHIP BREAKS THE 1 400 BARRIER

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

GAUTENG PIC COURSE FULLY BOOKED

The "learn to programme a PIC microcontroller in 4 hours" course for Gauteng is now fully booked. The course will be held next Saturday at the NARC. If you have booked please check the details on www.sarl.org.za, click on RTA and follow the links to the various PIC2010 pages. A map to the NARC is also available from the PIC2010 pages.

You can still book for the Durban, Cape Town and Port Elizabeth course. If there is no course near you, why not attend the SARL National Convention In Port Elizabeth and take part in the course on Saturday afternoon 24 April. You won't regret it.

LIGHTNING PREDICTOR KIT AGAIN AVAILABLE

The SA Amateur radio Development Trust has the popular Lightning Predictor kit again in stock. The kit is an ideal Saturday afternoon construction project and the predictor is a useful instrument to have in the shack or around the house. It will alert you when a lightning

storm is approaching. The cost is R130 including postage and packing. Full details and how to order is available on www.amateurradio.org.za.

SARL ANNUAL GENERAL MEETING

Members of the SARL are reminded that all the AGM documents are available on the member's pages of www.sarl.org.za. Click on the members button on the top right of the home page and enter your call sign and PIN. There are two documents available, the AGM notice and Agenda and the proposed revised constitution.

If you cannot attend you may appoint any member who is attending to represent you. The person you appoint can vote on your behalf. You need to brief your proxy holder on how he or she should vote. It should be noted that how the proxy holder votes is between you and the proxy holder. It is a matter of trust between you and the person you appoint to represent you.

A proxy form is included in the AGM notice package. Please ensure you follow the instructions and send in the form before due date.

MEMBERSHIP BREAKS THE 1 400 BARRIER

The membership of the SARL broke the 1 400 barrier last week. The SARL is well on track to reach its target set for this year. If you have not yet joined, do it now. Details are available from the SARL Web Pages.

We welcome the following new members and wish them a long and fruitful association with the National Body for Amateur radio, the SARL: ZR6DEK - Andrew Dekenah; ZS2BK - Andre van Deventer; ZR6JJP - Jean-Pierre Jordaan; ZS1L - Alex Smith; ZS6GRT - Gert Visser; ZS1HNM - James Hayes; ZR6IF - Francois Massyn; ZR5DB - Tyron Brown; ZU5K -K Brown; ZS3EY - Colonel J W Papenfus; ZSL610 - Graham Lambrechs; ZS6BZT - Gideon Bothma; ZR1FDT - Francois Du Toit; C9IPAM - Pieter Myburgh; ZS6-6000 - Andreas Raftopoulos.

PRESIDENT'S NET 11 APRIL 2010

This is an early notification for the next President's net. It will be held on Sunday 11 April at 19:30. The main discussion point will be explaining the proposed changes to the constitution and a report back on the Strategy Indaba of Council.

DRAFT REVISED REGULATIONS - PUBLICATION NOT IMMINENT

>From a discussion with a senior executive of ICASA on Friday last week it appears that the information that publication of the draft radio regulations pertaining to Amateur Radio was imminent is incorrect. The draft regulations are still being reviewed by ICASA's legal department and at this stage there is no indication when the draft will be published in the Government Gazette. SARLNEWS will keep listeners informed.

FREQUENCY CHANGE FOR ARMI

On 28 March the 17 860 kHz frequency for Amateur Radio Mirror International will change to 17 560. Amateur Radio Mirror will be on the air on Sundays at 10:00 CAT on 7 205 kHz and 17 560 kHz (this week still on 17 860kHz) with a repeat on Mondays at 21:05 CAT on 3 215 kHz. Receptions reports are invited, send them to armi@sarl.org.za.

SARL OFFICE CLOSED

The SARL office is closed and will reopen on Tuesday 23 March.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at low levels. Sunspot 1054 remains quiet as it transits the northern hemisphere of the sun. In the region towards the eastern part of the sun has finally formed a few sunspots and was numbered 1 056 on Wednesday. The effective sunspot number is expected to be between twenty and twenty-five for the coming week.

20 and 15 m will provide the best opportunities for DX. Conditions to India will be good from the afternoons onwards. During the late afternoons and early evenings it will be fair towards Europe. In the afternoons there are good possibilities of contacts with the USA on 15 m. Contacts with Australia and New Zealand will be challenging. During the afternoons and evenings good 20 and 15 m contacts may also be possible with Brazil.

Most afternoons 17 m is open to many parts of the world. The majority of activity is concentrated on Friday afternoons and also over the weekends.

Local conditions are going to be good on 40 m during the day time. 80 m may perform well during the early mornings and late afternoons over the shorter distances. 30 m will perform well during the middle of the day. 20 m is very useful for contacts over the longer distances during the majority of the day.

80 m is the frequency of choice in the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

19/21 March - SARL VHF/UHF Digital Contest. 20/21 March - SARL VHF/UHF Analogue Contest. 20 March - HABEX information meeting at 09:00 at the Sci Bono centre. 27 March - Pretoria Amateur Radio Club Flea market at 08:00. 27 March - PIC programming in 4 hours course at the NARC. 31 March - SARL 80 m Club Contest with PSK and RTTY. 31 March - Closing date for stage 1 of the Construction Competition. 11 April - President's net at 19:30. 17 April - 2010 SA AMSAT Space Symposium. 23-25 April - SARL National Convention, Port Elizabeth. 24 April - PIC programming course in Port Elizabeth. 7 May - Closing date for stage 2 of the Construction Competition.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items, if possible, in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria-area, with relays on 7 082, 7 205 and 17 860 kHz. There is also a podcast by ZS6RO. For a webstream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 21:00 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League compiled and edited by George, ZS6NE.

Thank you for listening, 73.

================================
Debby says....

MEMBERSHIP
After last months broadcast, I feel it's fair to say there was an enormous amount of discussion that transpired after hearing the President and myself advising the sorry state of our membership.
I am very pleased to say that we have had just under 200 members either renew or join since then. It heartens me to see amateurs getting behind their hobby with such passion.

Advertising
Recently Nelson Branch produced a wonderful advertisement to be played in conjunction with their open day on the 17th March. Gary ZL3SV has written a

generic advertisement that can be used by all branches, he has submitted the following web address for you to take a look and see if it's what you need to raise the profile of your branch.
A broadcast quality copy of the recently produced TV ad to promote Amateur radio is at:
http://www.nzart.org.nz/broadcast/2010/ham_radio_ad.wmv 15 MB
NZART, your branches or anyone else that wants to promote the hobby can use it unedited and at no fee.

Cell Phones and Ham Radio Usage in Vehicles
George Harding ZL3KD has passed this information on, that you may find interesting. Thank you George for looking into this.
HAMS using their HT while driving, could be pulled over by an over zealous cop as they thought the Ham was using a cell phone.
The Boss of Police Operations received George's message and he advised that the use of a Ham radio HT while driving, is OK. Michele de la Cour gave a quasi legal explanation which says that when using a cellphone both parties can be speaking at once but Hams are using what she termed a "binary" exchange, that is, only one party is speaking at the time. The Operations boss noted this also as it is considered less distracting than the simultaneous communications with a cell phone.

Land Transport (Road User) Rule 2004
7.3A Ban on use of mobile phones while driving
[(1)A driver must not, while driving a vehicle,-
(a) use a mobile phone to make, receive, or terminate a telephone call; or
(b) use a mobile phone to create, send, or read a text message; or
(c) use a mobile phone to create, send, or read an email; or
(d) use a mobile phone to create, send, or view a video message; or
(e) use a mobile phone to communicate in a way similar to a way described in any of paragraphs (b) to (d); or
(f) use a mobile phone in a way other than a way described in any of paragraphs (a) to (e).]]
[[(1A) Subclause (1) is overridden by subclauses (2) to (7).]]
(2) An enforcement officer may, while driving a vehicle, use a mobile phone to make, receive, or terminate a telephone call if the officer is making, receiving, or terminating the call in the execution of the officer's duty.
(3) A driver may, while driving a vehicle, use a mobile phone if-
(a) the driver is using the phone to make a 111 or *555 call; and
(b) it is unsafe or impracticable for the driver to stop and park the vehicle to make the call.
(4) A driver may, while driving a vehicle, use a mobile phone to make, receive, or terminate a telephone call if the phone does not require the driver to hold or manipulate it to make, receive, or terminate the call.
(5) Revoked.
(6) A driver may, while driving a vehicle, use a mobile phone to make, receive, or terminate a telephone call if the vehicle has stopped for a reason other than the normal starting and stopping of vehicles in a flow of traffic.
[[(7) A driver may, while driving a vehicle, use a mobile phone in a way described in subclause (1)(a) or (f), if both the following apply:

(a) the phone is secured in a mounting fixed to the vehicle; and
(b) if the driver manipulates or looks at the phone, he or she does so infrequently and briefly.]]
Constable Michï¿½le de la Cour
Laboratory Standards Officer

Definition of Mobile phone
(a) includes a portable electronic device whose functions include being a telephone:
(b) does not include a CB radio:
(c) does not include any other kind of two-way radio:
(d) does not include an earpiece or mouthpiece that is connected, physically or otherwise, to a mobile phone to allow a driver to use the phone without holding or manipulating it]
You can access the whole Land Transport (Road User) Rule 2004 through Google. Just type in 'Legislation', then 'New Zealand Legislation', then search for 'Land Transport (Road User) Rule 2004'. You will find the information you require in clauses 1.6 (interpretation) and 7.3A.
Talk soon...Debby ZL2TDM
****
Tauranga City Council Draft City Plan/District Plan
==========
Tauranga City Council prepared a draft City Plan (previously known, and in District Council areas still is known, as a District Plan).
In December 2009 it called for submissions. When writing the draft the staff stated that the Network Utilities Section Chapter 10 would not cover Amateur Radio Aerials and that they should be covered by the relevant residential Zones. Unfortunately aerials were omitted in the Zone rules; so aerials would be restricted to the standard zone rules and limited to 9m, if the rules were not amended. Tauranga Emergency Communication Group (Inc) Branch 88 wrote a 53 page submission justifying a proposed set of rules to be included in the rewrite.
Tauranga CC is now calling for further submissions on the initial 1024 submissions. Closing date is 4pm 1st April 2010. TECG (Inc) has prepared a proforma submission on its and NZART's submission. It is a Word doc, so that you can add your details, and amend the submission. You can gain copy of the proforma submission by request from brian@nzart.org.nz.
TECG submission can be downloaded from:
http://www.nzart.org.nz/anten-plan/2009/nzart-submission-to-tcc.pdf 3.2 MB PDF
TECG further-submission-form.doc and proposed-rules.pdf can be downloaded from:
http://www.nzart.org.nz/anten-plan/2010/further-submission-form.doc
http://www.nzart.org.nz/anten-plan/2010/proposed-rules.pdf
****
Web and E-mail Notes
==========
On Sunday-14-March-2010 the NZART Web and E-mail services were changed from the USA Internet Service Provider (ISP) to a NZ ISP IServe. The following message was send to all e-mail list users:

Greetings <name of list> Mailing List Subscribers. Apologies to those who are going to see this notice multiple times - it will be sent out at least once-per-mailing-list that NZART hosts...
A team consisting of Jim Tittsler ZL2IA, Mark Foster ZL1VMF and Jamie Pye ZL2NN has been working for several months on a project to migrate NZART Web and Mail services to a new hosting provider.
We're pleased to announce this is nearing completion, however, please note the following as important advice regarding NZART Mailing Lists.

- All Mailing Lists (That is, 'Reflectors') have been moved to the subdomain 'lists.nzart.org.nz'. As of this point forward, please direct any email for your mailing list to <listname>@lists.nzart.org.nz.<listname>@nzart.org.nz will cease to function in the very near future.

- The Mailing lists are now driven with the 'Mailman' mailing list software (one of the worlds best listserv administration tools at the present moment). Many of you will have experience with Mailman-based mailing lists already, so this will be a familiar system. Mailman provides the means for individuals to administer their own mailing list subscriptions by visiting a special website for each mailing list.

For the AREC-NZ Mailing List the main URL you need is:
http://lists.nzart.org.nz/mailman/listinfo/<name of list>
>From here you can request - or reset - your mailing list password, configure your subscription details (daily digest mode, plain-text preference, temporarily (or permanently) disabling delivery, etc) or remove yourself from a list.
If there are any questions about the reflectors please direct them to 'listadmins@lists.nzart.org.nz' and one of the team will get back to you as soon as possible.
A brief note about the NZART Website and NZART email alias service - these have also been migrated and should remain fully functional throughout the changes currently being made; please notify the listadmins if you experience any issues with either service.
Regards
Mark Foster ZL1VMF
Jim Tittsler ZL2IA
Jamie Pye ZL2NN - NZART Webmaster

Did the Chilean Quake Shift Earth's Axis?
==========
March 11, 2010: Pictures of widespread devastation leave no doubt. Last month's 8.8 magnitude earthquake in coastal Chile was strong. NASA scientists say it might have shifted the axis of Earth itself. "If our calculations are correct, the quake moved Earth's figure axis by about 3 inches (8 cm)," says geophysicist Richard Gross of the JetPropulsion Laboratory in Pasadena, California.
You might think you would have noticed the Earth suddenly tilting 3inches. But that's not how the "figure axis" works. "The figure axis defines not how Earth is tilted, but rather how it is balanced," says Gross.

Consider the following: Earth is not a perfect sphere. Continents and oceans are distributed unevenly around the planet. There's more land in the north, more water in the south, a great ocean in the west, and so on. As a result of these asymmetries, Earth slowly wobbles as it spins. The figure axis is Earth's axis of mass balance, and the spin axis wobbles around it. "The Chilean quake shifted enough material to change the mass balance of our entire planet," Gross says.

http://science.nasa.gov/headlines/y2010/11mar_figureaxis.htm

Hawkes Bay Amateur Radio Training Weekend
==========
Hi all. Another amateur radio training weekend is to take place soon 17th and 18th of April (last weekend of the school holidays).
Weekend will take both Saturday and Sunday, and will require some study on the preceding week.
Cost is $160, includes training manual, lunch on sat and sun, membership to HBARC and NZART, and callsign application fees. Basically you can walk out Sunday ready for a callsign to be granted Monday (sorry the callsign cant be activated until a week day).
Please forward this email around any interested parties.
Please email me to register your place on the course.
Regards,
Warren Harris

Report on The Transfer of NZART Web and E-mail Services
==========
In April 2009 readers may recall the NZART experienced a loss of web and mail services, due to a problem with our webhosting provider. The previous host had been serving NZART for some time, but have in recent times been less than satisfactory in terms of support provided to NZART, and service outages were experienced that seriously impacted our confidence in the service, with the April 2009 episode being the proverbial 'straw'. NZART's webmaster, Jamie Pye ZL2NN, had already been looking at alternatives which would provide more flexibility for website development going forward; this service interruption along with offers of assistance from several Amateurs provided a catalyst to put some serious work into a replacement offering.
A working group was established with the blessing of NZART Council; participants included Alan Wallace ZL1AMW, Mark Foster ZL1VMF, Jim Tittsler ZL2IA, Jim Pye ZL2PU and of course Jamie Pye ZL2NN.

A local provider, iSERVE, were negotiated with and their rates compared with other offerings. iSERVE offered an excellent deal on a Virtual Machine,

complete with their Hosting Management Console package that provides a straight-forward user interface for the majority of the webmasters administrative tasks. Combined with full command-line level access to the server, this VM provides NZART with unprecedented flexibility.

ZL2IA, ZL1VMF and ZL2NN began to work up a transition plan and began engineering a replacement. The process had to be approached slowly and with care, with various complications creeping in throughout the process and a strong desire to minimise any impact to NZART services. What has resulted however allows us to continue to offer the @nzart.org.nz email alias scheme used by many NZART members, implement a brand-new listserv for NZART reflectors, and allows development of a new NZART website to move forward.The new system provides for fully customisable backend, and has the added bonus of being located in New Zealand - not overseas.

On Sunday March 14, 2010 the new system was fully commissioned. Subscribers to NZART reflectors will have received notification via email of the changes. The NZART Website and the @nzart.org.nz alias service were transitioned without any loss of service.

Anyone noticing any problems with any of the NZART electronic services, should email listadmins@lists.nzart.org.nz where one of the commissioning team (ZL1VMF, ZL2IA, ZL2NN) can assist.
A big thanks to ZL2IA, ZL2NN, ZL1AMW and ZL2PU for their input and assistance, and to iSERVE for their support.
Regards
Mark Foster ZL1VMF

NASA Science News for March 18, 2010
==========
Researchers who once confidently stated that the Moon was bone-dry are now thinking the unthinkable: The Moon has so much water, there's actually a "lunar hydrosphere." International spacecraft have recently discovered no fewer than three "flavors" of moonwater and no one knows when the discoveries will end.

John Powell ZL1BHQ, Retiring as Contest Manager
==========
This is my last issue of the weekly Contest This Weekend bulletin as Frank Hunt, ZL2BR, has assumed the role of NZART Contest Manager and will continue with these weekly information spots.
Thanks to all who have assisted with information for inclusion in this bulletin, in addition the bi-monthly Break In Contests column. The term of my role as Contest Manager has been a most interesting and enjoyable one and again my appreciation and gratitude for all help provided.

We are off on Monday for a trip around the South Island by car and I am taking the K3 with me, plus a 40m dipole with tuned feeders so may (and I hope) catch up with some of the contesting fraternity, either on the air, or

an eyeball. Also taking a VHF and UHF handhelds for a bit of pedestrian mobile operation.

Thanks again for the most enjoyable term as Contest Manager.
73
John Powell. ZL1BHQ
Thanks you John
Jamie Pye ZL2NN

NZART WARO THELMA SOUPER MEMORIAL CONTEST
When: - 10 and 11 April 2010

Times:- 0800Z until 1000Z both evenings
Modes :- CW and SSB

The Annual memorial contest activity to commemorate the memory of the Late Thelma Souper a former stalwart of the NZ Women Amateur Radio Operators and considered to be "The Grand Old Dame" of WARO.
Contest Rules and Other Operating information are now available from the WARO Website :- http://www.qsl.net/zl6yl/awards.html.

KIWI DX GROUP DIGITAL MODES CONTESTS
80M - 17 April 2010
40M - 24 April 2010
Times - 1000 UTC until 1100 UTC both evenings

Contest Rules and Other Operating Information available from the Group's Website http://www.qsl.net/zl2sky/new_page_1.htm

2010 NZART SANGSTER SHIELD QRP CW CONTEST
When :- Saturday, 15 May 2010 and Sunday, 16 May 2010
Times :- 2000 NZST until 2300 NZST each evening
Band :- 80m
Mode :- CW only.

The contest was established in 1927 at the time the late Mr. Ralph Sangster presented to the radio Amateurs of NZ the trophy, known as the Sangster Shield, for annual competition to be won by the most efficient station. It is pertinent to note not only did the efficiency of the station be taken into account, but also the efficiency of the operator concerned The terms of the gift of the trophy were that the competition was to be conducted on the 80 metre band using input power of not more than 5 watts and to be solely restricted to Morse operation.

2010 NZART MEMORIAL CONTEST
When :- 3 & 4 July 2010
Times :- 2000 NZST until 2300 NZST both evenings
Band :- 80m
Modes :- CW and Phone
The Memorial Contest was established soon after the end of World War 2 to commemorate those who lost their lives in the service of their country. It is a fitting way to honour those Hams and others who selflessly served their country so that we, today, may enjoy the freedoms that we do.
The Contest is split into a number of categories catering for all HF interests so please spare an hour, or two to honour those who paid the ultimate price that we now enjoy in our present lifestyles.
Contest Rules and Other Operating Information is available from the NZART Website :- http://www.nzart.org.nz/contests/index.html
Contest Rules and other Operating Information is available from the NZART website - http://www.nzart.org.nz/contests/index.htmlindex.html

For the contests below please see the NZART Web at:
http://www.nzart.org.nz/contests/index.html
Click on "Contest Manager's Reports" for the latest contest report.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 21st March 2010

Free IRTS Membership for a Year!

A final reminder to members that they have until the end of March to ensure they are included in the draw for five free memberships for a year, which will take place at the AGM in Dundalk on 25th April.

All members who pay their annual subscriptions by direct debit will be included in the draw, full details of which were on page 15 of the February members'newsletter.

Theory Examination

The next theory examination for the Amateur Station Licence will be held on Wednesday, 7th July at 2pm in the ComReg Offices in Dublin and at other centres if warranted by the numbers.

Information on examination fees and other details please see 'Theory Examination' in the 'Information' section of the IRTS website at www.irts.ie

Intending candidates are also referred to 'Studying for the Amateur Radio Examination' in the 'Downloads' section of the website.

The latest date for receipt of applications to sit the examination is Wednesday, 23 June next but it is important to note that places at the exam are allocated on a first come first served basis.

IRTS 78th AGM

Dundalk Amateur Radio Society shall be hosting the 78th
Irish Radio Transmitters Society A.G.M over the weekend
of Saturday 24th and Sunday 25th April 2010.

Further details for booking trader's tables or any
other info please e-mail the following Thos EI2JD at
email address chairman /at/ ei7dar.com or Peter EI4HX at email address
secretary /at/ ei7dar.com

Amateur Radio Society celebrates 50th anniversary instyle.

The Royal Naval Amateur Radio Society was formed in 1960 and to celebrate the 50th anniversary a special callsign GB50RNARS is being aired by members of the Society throughout the year.

>From the beginning of January, the call has been on air in various modes including CW, SSB, RTTY and data transmissions.

The bands used have been from 160 metres up to 23cms and up to now, over 1700 contacts have been made with stations as far away as VK. During the whole of April, the callsign will be used from the Bridge Wireless Office of HMS Belfast.

The Belgian and Netherlands Naval Radio societies are also running special anniversary callsigns this year. A special Anniversary award is available to listeners and licensed radio amateurs who hear or contact RNARS members and the specials event stations during 2010.

Full details can be found on the RNARS web site at: www.rnars.org.uk

---

Radio Sweden ends Medium and Short Wave

Radio Sweden will terminate its medium and short wave broadcasts this October 31st in favor of web services - with Swedish Radio management stating that is the best use of resources and in line with international trends.

The English-language service is to continue on the web and on national broadcasts. The Russian output will be available on the web, as is the German now.

K4T DXpedition success

The K4T DXpedition to Dry Tortugas proved a great success. They ran two amateur radio satellite stations; hopefully other DXpeditions will now consider running a satellite station.

They had a few glitches but it all worked out. They had ran two 910H's. One with yagis and one with egg beaters plus a portable station. It is hoped this sets a new standard for satellite operations on DXpeditions.

There ware two satellite stations, two HF stations, inverter, lighting and all acc running 24 hours a day all on green power for four days and made over 8,000 contacts with only batteries and a wind turbine.

It is also reported that the wind turbine was making so much power that the 900 watts of solar panels never seen outside of the case! The successful K4T Dry Tortugas operation may have been the first-ever major DXpedition to use only wind power.

Bangor and District Amateur Radio Society

Bangor and District Amateur Radio Society meet on the 1st Thursday of every month in "The Boathouse", Groomsport at 8pm.

At 8pm on Thursday 6th May 2010 BDARS are holding an operating evening. This is a great opportunity for members to see and use the society's equipment.

As always, visitors and new members are most welcome. For More information from Mike GI4XSF on 028 4277 2383, or club website:

http://www.bdars.com

Mid Ulster Amateur Radio Club

Mid Ulster Amateur Radio Club will in future, be operating under the new callsign MN0VFW. GI3VFW, The Club's previous call which was kindly donated to the club by Stanley Eakins will now be the Club's historical callsign.

The club members hope to have as much success and enjoyment with the new call as they had with the oldcall.

Bere Isl EU-121 Activation

Olivier ON4EI will be activating BERE ISLAND EU-121 as EJ8GQB, his new Irish callsign (EI8GQB). This solo expedition is planned from 21st-29th March 2010.

Activity will be 160-10m SSB/RTTY. HB: Spiderbeam beam LB: 18m vertical mast top loaded + 30*radials Rig: K3 100W

He will also make part to the CQ WPX SSB CONTEST March 27th-28th 2010.

For more details about the trip, see http://www.qrz.com/db/ej8gqb

---

UK SSTV Net Night

There is now an amateur radio SSTV (slow scan television) net night being held every Monday evening at 19.00 hrs.

All are welcome.

Please call with your cqsstv contact card first but please do listen and announce you are doing this first before sending.

The format, once everyone is logged on, will be a round robin, where each member will send a picture then we hear reports and talk about why you like the picture and the story behind it etc... then the next person and so on.

The frequency being used for this is 144.500 for more info on this net go to

http://rotherhamamatureradio.ning.com/

Rallies

The Bangor and district ARS 2010 rally is to be held on Saturday 3rd July 2010. This year the rally is on a SATURDAY and at a new location!

The Rally Starts at 12 Noon In "Donaghadee Community Centre" ADMISSION
£2!

There will be plenty of attractions including: Special interest stands, bring and buy, ballot and a good selection of radio and computer traders will be inattendance

The ever popular FREE bring and buy will be running as normal For More information and a map is available at the BDARS website www.bdars.com

Contact Bill GI4AAM for further details:Tel: 028 9181 6707 Email: bill.langtry /at/ btinternet.com

For further Rally info and contact details please check out the IRTS Website at

http://www.irts.ie/cgi/rallies.cgi

History this week

1902 N.Stubblefield first ship to shore wireless telephone broadcast.

1904 First colour picture in Daily Illustrated Mirror, New York.

Items for inclusion in next weeks Radio News should be forwarded to Charlie EI8JB, preferably via e-mail to "charlie dot carolan at gmail dot com" Or by phone to 087-6265418 News can also be submitted via e-mail to "newsteam at irts dot ie" for automatic forwarding to both the radio and printed news services.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1LZ, K1XN & GoList, NJ1Q, W2VU, NG3K & ADXO, N4AA & QRZ DX, KH6BZF, K6ND, W7VOA, K8AQM, K8GI, K8YSE, KG8CO, W8GEX (60m News), WD8MGZ, N0TG, A35A, AT International, DL2VFR, DL6UAA, DL7MAE & The DX News Letter, DX World.Net, F5NQL & UFT, F6AJA & Les Nouvelles DX, I1JQJ/IK1ADH & 425 DX News, JA1MFR, JA1XGI, MM0DFV, ON4ZD, ON5NT, OZ6OM & 50 MHz DX News, Pete's-DX-Newsdesk, RSGB IOTA Web Site, VA3RJ & ICPO, VHF-DX-Portal (MMMonVHF) and VE8EV for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 14th-March, through Sunday, 21st-March there were 235 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1U, 4X, 5B, 5H, 5N, 5R, 5V, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9Q, 9V, 9Y, A2, A3, A4, A6, A7, A9, AP, BV, BY, C2, C3, C5, C6, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FS, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HC, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH2, KH6, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, S9, SM, SP, ST, SU, SV, SV5, SV9, T32, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TN, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V5, V6, V7, V8, VE, VK, VK9W, VP2E, VP2M, VP2V, VP5, VP6, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XT, XU, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK2, ZK3, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3B8, MAURITIUS (AF-049). Mart, DL6UAA, will once again be back in Mauritius as 3B8MM beginning April 4th; duration will be 3 weeks. Activity will be on 160-10 meters mostly CW. Some SSB and Digital will be possible. QSL via

DL6UAA, by the Bureau or direct.

3B8, MAURITIUS (AF-049). Slavo, SP2JMB, will once again be active from here between April 7i¿½14th, but as 3B8SC this time. Activity will be on all HF bands using CW. QSL via his home callsign. View photos of Slavo's 2008 trip and operation as 3B8/SP2JMB at:
http://www.sp2jmb.pl/index.php?page=g_mauritius_04.2008&LANG=eng

5D, MOROCCO. Operators Stefano/IK2QEI and Matteo/IK2SGC will be active with the special callsign 5D5A from CN3A contest station during the CQWW WPX SSB Contest (March 27-28th) as a Multi-Single entry. QSL via I2WIJ or LoTW.

8P, BARBADOS. Tom, W2SC, will be active as 8P5A during the CQWW WPX SSB Contest (March 27-28th) as Single-Op/All-Band/High-Power entry. QSL via LoTW or direct to NN1N.

8Q, MALDIVES. Bodo, DL3OCH, will be active as 8Q7QX from North Ari Atoll (AS-103) between March 21st and April 4th. Activity will be mainly on 40-12 meters (depending on conditions), mostly on CW and possibly some RTTY and PSK31, using an IC-7000 (w/100 watts only) into a vertical antenna. Bodo will also try some 80 meters, but there will not be any 160 meters activity. QSL via his home callsign. Look for the log to be uploaded to the LoTW after DXpedition. ADDED NOTE: Bodo is also part of the crew that will be active on 6m, 2m, 70cm and 23cm EME. This EME crew consists of Hermann/DL2NUD (8Q7HP), Bodo/DL3OCH (8Q7QX), Dan/HB9CRQ (8Q7RQ) and Pierre/HB9QQ (8Q7QQ).

9H, MALTA . Steve, G0SGB, will be active as 9H3/G0SGB/p from Malta (EU-023, MIA MM-001, WLOTA LH-1113) between June 12-25th. He will also be active from Gozo Island (EU-023, MIA MM-004, WLOTA LH-0046) as 9H4/G0SGB/p. (No specific dates were provided). His activity will focus on lighthouse activations from Malta. QSL via his home callsign, direct only.

9Q, DEMOCRATIC REPUBLIC OF CONGO. Ghis, ON5NT (ex-9Q1NT), reports that Georges, VE2EK, will once again be active as 9Q1EK from Kinshasa very soon and will be the ONLY radio amateur station left in the DRC with a VALID LICENSE. According to George's BLOG <http://ve2ek.blogspot.com> (edited):
"Soon... ! After several months of standby, I will be again on air.
Due to a QSY of my QRA (in flat now..!!!). I'm going to install very soon my station on my prof. radio broadcast site. The available hours will be reduced. Station will be FT2000 with a OM2500HF. Dipoles for 160, 80, 40 + Delta loop + beam on 45m tower. Major activity will be on CW."
Georges states that he has a second project (which will be later) on EME (144 MHz with 4 x 16 elements + 8877 and 432 MHz with 4 x 21 element + 8938). QSL direct via SM5DJZ. Also, by the LoTW or eQSL.

A5, BHUTAN. Steve, W7VOA, is scheduled to be active again as A52SW next month in Thimpu from about April 23rd until, at least, May 1st. Activity is planned for CW and SSB, primarily 80-10 meters. RF output is limited to 100w, and his planned antenna is a full-length G5RV. Steve informs

OPDX that he will be the sole operator. This is a work trip, so his activity will be limited mainly on the weekends and during the evening weekday hours. Paper QSLs go to his QSL Manager K2AU and e-QSLs via the LoTW only. Steve states (edited), "Although my goal is to complete DXCC for the A52SW callsign. I'll be happy to work as many North American and JA stations as I possibly can."

A7, QATAR (Special Event). Look for special event station A71RCAR to be active during the "2010 Regional Conference on Amateur Radio" in Doha, April 4-6th. This year's event is being hosted by the "Qatar Amateur Radio Society (QARS - A71A) in collaboration with the International Amateur Radio Union (IARU) in Region 1. A special QSL card will be available to commemorate this event. QSL via QARS Bureau: Qatar Amateur Radio Society (QARS), PO Box 22122, Doha, Qatar.

CQ NEWS. Richard Moseson, W2VU, Editor for CQ Amateur Radio, sent out the following press release March 16th: "Cam Hartford, N6GA, Named CQ Magazine QRP Editor -- Cam Hartford, N6GA, of Claremont, California, has been named QRP Editor of CQ Amateur Radio magazine, Editor Rich Moseson, W2VU, announced today. Hartford succeeds Dave Ingram, K4TWJ, who passed away in January. Ingram's final bi-monthly QRP column appears in the April issue of CQ. Hartford's first column will be in the June issue. QRP is the art of low-power ham radio communication. QRP enthusiasts typically use 5 watts or less to make contacts around the world. Many also enjoy building their own portable low-power gear and/or communicating from remote, temporary, locations.
Hartford, who works for book publisher Houghton Mifflin Harcourt, has been a ham since 1961, when he was originally licensed in Ohio as WN8DJX. After moving to California, he was issued WA6PTX; then on upgrading to Extra Class, was able to choose his current callsign of N6GA.
Cam has been active in low-power operating for more than 20 years. From 1989-1991, he served on the Board of Directors of QRPARCI, the QRP Amateur Radio Club International. He also served as that organization's Contest Manager from 1993-1999. Since then, Hartford says, he has spent his ham radio time "building and operating little radios" and trying to find 'the perfect combination of radios, logging computers, power sources, wire antenna arrays and hot chocolate for a very excellent QRP Field Day.'
CQ Editor Rich Moseson said, 'I am looking forward to the opportunity to work with Cam, who comes highly recommended by well-known QRPers and CQ columnists Richard Fisher, KI6SN, and Rich Arland, K7SZ. Cam will have large shoes to fill, following in the footsteps of the late Dave Ingram, K4TWJ. Yet, one of Dave's strengths was his ability to draw on the talents and experiences of our readers, and I am sure that they will continue to provide the same sort of input to Cam as he continues our QRP column.'"

CY0, SABLE ISLAND. Randy, N0TG, informs OPDX: "Planning is continuing and we have identified MID-October for the operation. Commitments of support continue to come in, most recently from the German DX Foundation (GDXF), Tokyo 610 DX Group, 59-Magazine(Japan Ham Radio), Mississippi Valley DX/Contest Club, The Danish DX Group, JA1ELY, and loan of the Battle Creek Special antenna by W8UVZ and group. All sponsors' LOGOs are

displayed on the Web site: http://www.CY0dxpedition.com
Our thanks and appreciation to advisors and information providers:
K1FK, K9LA and NA5U."

DXCC NEWS (8 year old receives DXCC certificate!). Bill Moore, NC1L, Awards Branch Manager, reports that 8 year old William Ferguson, KJ4EYZ, was formally presented his DXCC certificate at a Virginia DX Century Club meeting by the club's Vice President, Ron Young, W8RJL, on March 16th. William is the son of Rich, N2XQM. His achievement makes him the youngest full member of the VaDXCC, and one of the youngest members of the DX Century Club. On a added note, William's 10-year old sister Carissa, KJ4EZA, has 82 countries worked - The DXCC expect to be be hearing from her shortly! To see William's presentation, go to: http://www.arrl.org/blog/Century%20Club%20Awards

FSDXA'S PLANS FOR 2011. Members of the Five Star DXers Association (FSDXA) are planning something in 2011 and will be heading to the Pacific Ocean this time. Specific destination has not been released yet. This group is well known for their great operations to: Comoros (D68C), St. Brandon Island (3B7C), Rodriguez Island (3B9C) and Spratley Islands (9M0C).

GB8, SCOTLAND (WFF Op). Members of the GMFF team have applied for official permission to visit Rum National Nature Reserve (GMFF-058) located on the same name Isle of Rum (IOTA EU-008) and are planning to activate it between April 30th and May 3rd. They have applied for the special callsign GB8RUM to be used from the island during the DXpedition. More details are forth-coming on this WFF (New One) DXpedition. More information is available at: http://www.gmff.org

GW9, WALES. Operators Steve/MW0ZZK and Mike/GW6NLP will be active as GW9T during the CQWW WPX SSB Contest (March 27-28th) as a Multi-Op entry. QSL via GW6NLP.

HB0, LIECHTENSTEIN. Marc, OZ1MDX, will be active as HB0/OU4U between June 22-27th. Activity will be on the HF bands using CW, SSB, RTTY and possibly PSK31. Direct QSL for HB0/OU4U is via Tim, M0URX (United Radio QSL Bureau). For Bureau QSL by E-mail requests, please visit: http://www.m0urx.com/qsl-request-form.html

IOTA NEWS.....
AS-118. Members of the Kuwait Amateur Radio Society (KARS - 9K2RA) will be active using a special callsign 9K2F from Failaka Island between April 1-5th. QSL via 9K2HN. Visit KARS Web page at: http://9k2ra.net

EU-068. Operators Thomas/F4BCG, Patrick/F4FCS, Antoine/F5RAB, Christian/F6AXN, Didier/F6DXE, Francis/F6DPD and Jacky/F8AEJ will be active as TM5EL from Sein Island (DIFM AT007) between April 7-14th. Activity will be on the HF bands, as well as 6m, 2m, 70cm and 23cm, using CW, SSB and the Digital modes. QSL via F6KHI.

EU-121. Olivier, ON4EI, will be active as EJ8GQW on a solo expedition to Bere Island, Ireland, between March 21-28th. Unfortunately, he does not operate CW, but will be active mainly on SSB and sometimes on RTTY. PLEASE NOTE: He has never managed a pile-up on RTTY, so be kind if you try to work him in this mode. Also, Olivier plans to be in the CQWW WPX SSB Contest (March 27-28th). Look for additional info to be on: http://www.qrz.com/db/EJ8GQW

NA-085. If you worked K9RR/4 and K8GI/4 this past weekend, you worked Bill and Rick, respectively, from St. George Island, FL. Using two stations, they were expected to be on CW, SSB, RTTY and possibly some satellite operations. QSL via their home callsign using the QRZ.com addresses.

NA-177. Operators Louis/VE2EZD and Jean-Pierre/VA2SG will be active as VA2SG from Bonaventure Island (CISA QC002) during the RSGB IOTA Contest on July 24th. Activity will be on 40 and 20 meters CW only, and operating QRP. QSL direct via VE2EZD using the QRZ.com address.

NA-182. (Update) John, VE8EV, informs us that contrary to what was reported in the last edition, a second operator for the expedition to Greens Island has been ruled out due to cost and logistical concerns. The trip is now scheduled to go ahead as a solo operation from April 15-20th, using the callsign CK8G (rare prefix as well!). Donations are still being sought to help cover the costs of travelling to this very rare Arctic IOTA. Full information can be found at: http://ve8ev.blogspot.com/search/label/IOTA

JD1, OGASAWARA (Update). Just a reminder that the "JD1 PROJECT 2010" will take place next weekend between March 28th and April 12th. Operators and their callsigns are: Ted/K8AQM (JD1BNM), Kirk/JF3MYU (JD1BNN), Brian/KG8CO (JD1BNJ), Stan/AC8W (JD1BNK) and Steve/K8KQY (JD1BNQ). Activity will be from Chichi-jima Island (AS-031), on 160-10 meters using CW, SSB and RTTY (JD1BNJ only on RTTY). QSL JD1BNN direct to JF3MYU. QSL JD1BNM, JD1BNJ, JD1BNK, JD1BNQ direct to K8AQM, by the Bureau or LoTW. PLEASE NOTE to JA Operators: Do NOT send QSL to the JARL Bureau. Send SASE direct to K8AQM, except QSL request for JD1BNN. A web site is now up and will have online logs. Visit the "JD1/o Ogasawara 2010" Web page at: http://www.ogasawara2010.com

KH0, MARIANA ISLANDS. Nine years old Yoshiki, JF1UCV, is planning to be in the CQWW WPX SSB Contest (March 27-28th) as KH0UA, from the Aquarius Beach Tower Contest Club's radio shack (AH0BT), as a rookie Single-Op/ All-Band/High-Power entry. Yoshiki has just upgraded his licence to Amateur Extra, and it will be his first experience as an entry in this DX contest. QSL via JF1UCV.

KH6BZF PROPAGATION FORECAST/REPORT (For March 22-28th)....
Mar 22 HN-LN SOLAR REFERENCE KEYS
Mar 23 LN-HN --------------------
Mar 24 AN BN - Below Normal

Mar 25 AN AN - Above Normal/Geomagnetic Level is QUIET
Mar 26 AN LN - Low Normal
Mar 27 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Mar 28 AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

LX, LUXEMBOURG. Matt, DJ8OG, will be active as LX7I during the CQWW WPX SSB Contest (March 27-28th) as a Single-Op/All-Band entry. QSL via LX2A. Visit the following Web page at: http://www.lx2a.com

P4, ARUBA. Stefan, DK1MM, will be active as P4/DK1MM between March 19th and April 1st. Activity will include the CQWW WPX SSB Contest (March 27-28th) as a Single-Op/All-Band entry using the callsign P41M. QSL both callsign via DK1MM.

PJ2, NETHERLANDS ANTILLES (Also P4). Seppo, OH1VR, Chairman of the Organizing Committee of GAREC [Global Amateur Radio Emergency Communi-cations] will be in Curacao (SA-006, WLOTA LH-0942) for some meetings with VERONA (IARU Member Society in the Netherlands Antilles) and hotel etc.. between March 23-30th. If time allows, he plans to be active as PJ2/OH1VR. ADDED NOTE: Seppo may also have a one day operation as P41CW from Aruba on March 25th or 29th.

PJ4, NETHERLANDS ANTILLES. Andy, W9NJY, will once again be active as PJ4/W9NJY from Bonaire (SA-006 and WLOTA L1279) between now and April 2nd. Activity is usually casual on 40-10 meters and mainly CW. QSL via WD9DZV or by the LoTW and eQSL.

PJ5, ST. EUSTATIUS (NETHERLANDS ANTILLES). Joe/W8GEX has announced (along w/co-leader Joe/AA4NN) that plans are in the works to activate St. Eustatius this autumn when it becomes a new country. Their plans include 10 days of operations, with an international crew of operators, and at least four stations on the air 24/7. Look for more details to be forthcoming.

QSL INFO AND NEWS.....
MM0DGR/p via MM0DFV. Activity this past weekend (Saturday, March 20th) was from Caerlaverock National Nature Reserve (GMFF-011). The station will be located at the Caerlaverock Castle south of Bowhouse on the north coast of the Solway Firth (NY018651). Reference numbers: WAB Square NY06, QRA Locator IO84GW, EU Area SC06 (Dumfries and Galloway), IOTA EU-005 and WLOTA LH-1234. More information is available at: http://www.gmff.org

QSLS VIA LoTW: None Reported This Week!

QSLS RECEIVED VIA MAIL: 3B8DB, 3D20CR, 6Y7AM, HB0/DL2OBO, M0OVL/p, VP8DMN, XR0Y and Z21DXI

QSLS RECEIVED VIA THE BUREAU: 5J0E, 5K0CW, 5X4X, 7P8FC, J3/DL5AXX, J3/DL7CM, K9FD/KH6, NP2B, RK2FWA, T94B, TM9R, S79NS, UA6LV and VP6PR

ST, SUDAN. Robert, S53R, will be active as ST2AR from Khartoum during the CQWW WPX SSB Contest (March 27-28th) as a Single-Op/All-Band entry. QSL via S53R.

SZ1, GREECE. Members of the Technological Educational Institute of Athens will be active as SZ1TEIA during the CQWW WPX SSB Contest (March 27-28th) as a Multi-Single entry. Operators mentioned are: Tom/SV1BFW and Yiannis/SV5FRI. Listen for a QSL route.

T30, WESTERN KIRIBATI. Haru, JA1XGI/W8XGI, informs OPDX that he will be active once again from Western Kiribati as T30XG or T30/T32XG between June 3-9th. Activity will be on 40-6 meters, including 30/17/12m, using CW and the Digital modes. QSL via JA1XGI, direct or by the Bureau.

T32, EASTERN KIRIBATI (Update). Operators Nils/SM6CAS, Steve/G4EDG, Mike/K9AJ, Derek/G3KHZ and Steve/9M6DXX are now on their way sailing to Malden Island (OC-279) as of March 20th; the first of 4 uninhabited IOTAs to be activated in the Southern Line Islands group. As per their Web page (dated March 21st, 08:15), the team sailing boarded the "S/V Kwai", did not have favorable wind at present and their estimated time on the sea is "at least 3 more days". Watch their Web page for an accurate arrival time. The callsign to be used on Malden Island will be T32MI. Their length of stay is not known. The team wants to remind everyone that this is "primarily an IOTA operation". They will be "concentrating on providing a contact with as many different stations as possible irrespective of band or mode". Activity will therefore be 80-10 meters using CW and SSB, "whichever is providing the best propagation conditions at the time." There will be no operations on 6m moon bounce, RTTY, PSK, low band SSB, 160m etc, etc. For more details and updates, visit the T32 Southern Line Islands DXpedition's Web page at: http://t32line.webnode.com

TM8, FRANCE (Special Event). Members of the Radio Club Haut-Rhin (REF68) will activate special event station TM68X between April 5-18th. Activity is to celebrate "World Amateur Radio Day" on April 18th. The club will also organize a special exhibit at the MJC Fernand Anna de Wittenheim in Upper Rhine. QSL via F8BUO. Visit their Web page at:
http://www.ref68.com/expo
For details on the IARU's "World Amateur Radio Day", see:
http://www.iaru.org/rel030418.html

V2, BARBUDA AND ANTIQUA. Randy, WD8MGZ, will be active as V25WV from Codrington Village on Barbuda (NA-100) between April 24th and May 1st. For frequencies and schedules, use Twitter.com and search wd8mgz. Also, contact Randy via echolink (V21RW-R). He will be using a Icom 706 and a Yaseu 2 meter mobile. For more information, use the Web site:
http://home.comcast.net/~randylwilliams/site

VP5/VP50, TURKS AND CAICOS ISLANDS. Dave, W5CW, will once again be active as VP5/W5CW between March 23rd and April 6th. Activity will be on 160-6 meters (this will include 30/17/12m) using CW and SSB. He will also be in the CQWW WPX SSB Contest (March 27-28th) as a Single-Op/All-Band entry using the special callsign VP50V. QSL via PO Box 88, Morris, OK 74445-0088.

VP8, FALKLAND ISLANDS. Iain, M0PCB, is now active from the RAF Amateur Radio Club Station located at Mount Pleasant Airport using the callsigns VP8FIR or VP8RAF until April 7th. QSNs show that he has been on 15 meters CW. QSL via his home callsign. QSL cards will be printed once Iain is back in the UK.

WH0, MARIANA ISLANDS. Eri, JF1VGZ (10 year old YL OP), will be active as WH0/WH7ZJ during the CQWW WPX SSB Contest (March 27-28th) as a Single-Op/ 10m-Band/Low-Power entry. QSL via JF1VGZ.

WH0, MARIANA ISLANDS. Kuro, AL5A (JH0MGJ), will once again be active as WH0/AL5A from Saipan Island (OC-086), Northern Mariana Islands (KH0), between April 24-26th. Activity will be on 80-10 meters using CW and SSB. He plans to listen especially for "weak" European stations. QSL direct to JA7JEC. Send Bureau QSLs to the JARL Bureau to JH0MGJ.

WRTC 2010 (Russia). Krassy Petkov, K1LZ, U.S. Fundraiser for the WRTC 2010 Organizing Committee, reports: "I am writing to you today to ask for your financial support of the upcoming WRTC Championship Competition that is being held in Moscow, Russia, this coming July 2010. As you may already know, this event is the 'Olympics of Amateur Radio' and about 50 teams from all over the world will compete for Gold, Silver and Bronze in the fields near Moscow.
This time, teams will be set up in tents with generators supplying the power and special new rules will allow both operators to make contacts in a modified form of SO2R with interlocked radios ï¿½ meaning only one signal at a time is permitted on the air.
Our Russian friends have laid on what sounds like a wonderful week of amateur competition for competitors and spectators alike! There will be some side-trips for visitors and, of course, WRTC week always provides wonderful opportunities for socializing and just 'hanging out' with some of the very best amateur radio contesting operators in the world. This will be 'the place to be this July' ï¿½ no doubt about it!
Putting on an event of this magnitude is no small effort both in terms of time and monetary expense. If you are a competitor or plan to be a spectator, I ask that you please consider making a donation to this worthy effort. If you are potentially a corporate sponsor, I also ask for your support in the name of international brotherhood and radiosport com-petition. Contributions are tax deductible to the extent permitted by law for USA taxpayers and can be made as follows:
Please make your check payable to 'NCDXF'. In the lower left corner, write 'For WRTC 2010'. Kindly mail it to Mr. Rusty Epps, W6OAT, 651 Handley Trail, Emerald Hills, CA 94062 USA. For Pay-Pal or credit card donations, please use the NCDXF website (www.ncdxf.org). Click on the Join/Renew button, enter your call, write in the comment box 'For WRTC 2010' and follow the Pay-Pal or credit card instructions. All contributors will be

prominently listed in the WRTC program literature ï¿½ so please give as generously as you can.... thanks! 73, Krassy K1LZ"

XV2, VIETNAM. Retu, OH4MDY (OX3RZ/XU7MDY/XV2MDY), will once again be active as XV2RZ from Southeast Vietnam between March 26th and April 6th. Activity will be on 80-10 meters using the "normal modes". QSL only direct via OH4MDY with a SASE and 2 USDs.

YI, IRAQ (Update). Plans for the YI9PSE DXpedition to Kurdistan is progressing and the operation will take place in about two weeks. The YI9PSE team reported this past week that they shipped 1600KG of radio gear to IRAQ. Their equipment consists of five Icom IC-7600s, four Acom amps, numerous antennas and over 5000' of coax. For more details and updates, visit: http://www.yi9pse.com
Also, you can now follow their activities (as well as regular updates) via Twitter at: http://www.twitter.com/yi9pse

ZK3, TOKELAU. Operators Bill/N7OU and Bob/W7YAQ continue to be active as ZK3OU and ZK3YA, from Te Mahina (The Moon) guesthouse on the six-mile wide Nukunonu lagoon, until March 25th, unless the boat schedule changes. Bob states, "Te Mahina is owned by Zak, the General Manager of Nukunonu atoll. We occupy one upstairs bedroom facing the lagoon as the ham shack, and use another upstairs room to sleep. There is a large eating area downstairs. Zakï¿½s sister Lydia cooks our meals and does our laundry. A DXers paradise!!! The U.S. is straight across the lagoon to the northeast, Europe north, Japan northwest, and South America east. It's a great radio QTH. We have one HF9V on the neighboring property to the east. It is great ï¿½ no noise, and away from tin roofs. The other HF9V is on the seawall directly in front of the house ï¿½ more manmade noise, and about an S-unit poorer on the higher bands. Our 160 antenna to the left, among the palms about 75 feet from the water ï¿½ not an ideal spot, and we had to move it once because the palm fronds were banging into it during a windy 2 day period. 160 condx have been very poor, and we are trying to figure out what to do to improve our signal. We would like to get it out near the water and away from the palms, but there is lots of wave action in the lagoon and the villagers use the beach for their boats. We are getting out well on the other bands, especially on the east HF9V. We have been able to work into Europe on 12/15 meters ï¿½ eastern EU at our sunset, western EU at our sunrise." The duo's activity has been on CW, SSB, RTTY and the lower bands. QSL via their home callsigns.

ZL7, CHATHAM ISLAND. Operator Kaz Oya, ZL3JP, will be active from here between April 28th and May 3rd. He will use ZL7J, a special and temporary callsign issued only to ZL3JP for this operation from Chatham Island. Kaz is planning to arrive on Chatham Island (OC-038) on April 27th, and will be leaving on May 4th. Activity will be on 160-10 meters using CW and SSB. His QSL Manager is JH1HRJ. QSL by the Bureau, direct (w/SASE) and/or e-QSL is also planned.

ZS8M PIRATE? Pierre, ZS1HF, reports this past week: "Hi All, Yes, in true tradition, we will have an idiot pirating my callsign - ZS8M. Shame on you! Please note....ZS8M will only be operational from approx 15 May

2010. Before I get operational, I will notify you all via qrz.com once
I am ready. Please do not entertain any idiot pirating my call sign
before I make the announcement. My technical training is progressing
well. The complete team gathers on Tuesday 23 March in Cape Town to
start team training - fire fighting, first aid and cooking.
73 for now..... Pierre ZS1HF"

*** Welcome to rec.radio.info! ***

Welcome to rec.radio.info, a group that aims to provide a noise-free
source of information and news for the entire rec.radio hierarchy.

Two introductory articles about rec.radio.info are posted to the group
every month. You are now reading the first article, which explains what
rec.radio.info is, and answers some Frequently Asked Questions. The
second article is titled Posting Guidelines, and you only need to read
it if you want to submit an article to rec.radio.info.

You can skip to the next section of this article by searching for the
next
" -- " string. The sections available are:
- What is the purpose of rec.radio.info?
- Why are messages almost always cross posted to rec.radio.info?
- What is a 'follow-up', and what does 'moderated' mean?
- OK, so now I know what 'moderated' means. Tell me more.
- What type of material is considered inappropriate?
- I do not have access to news, how can I get the information posted to
rec.radio.info?
- Will the material appearing in rec.radio.info be archived somewhere?
- I have a regular posting with timely information, is there a way to
speed up it's delivery, or automate for more convenience?

-- What is the purpose of rec.radio.info?

The purpose or charter of rec.radio.info is to provide the Usenet
community with a resource for information, news, and facts about any and
all things radio.

All the other rec.radio groups are intended for discussions and general
chit chat about radio. Rec.radio.info will contain informational,
factual articles only. Follow-ups are redirected to an appropriate other
group, and further discussion (if any) will not take place in
rec.radio.info.
```

In order to ensure that rec.radio.info contains only appropriate articles, it was decided to create the group as a moderated newsgroup.

-- Why are messages almost always cross posted to rec.radio.info?

It provides a "tag" for each article to be assembled into a filtered presentation in rec.radio.info (even with cross-posting, only one message, with a unique Message-ID, is propagated across the net). This tag also facilitates a pre-existing method of dropping or canceling the articles locally within the discussion groups if you don't want to see them. This accommodates individuals who want to separate the bulletins from the discussions, discussions from the bulletins, as well as those who are adamant about not reading another newsgroup and wanted to see everything all in one basket.

With the total size of Usenet (in number of newsgroups and total traffic) doubling every year or so, this is no insignificant contribution to reducing information noise and chaos. Making the discussion groups a catch-all, and making extra newsgroups filters on that catch-all, is also the most realistic way to implement such a scheme (It's not intuitively obvious what the charter, contents, and general appropriate topics for each and every newsgroup are. Seeing FAQ's and charter/intro postings in the home newsgroup is beneficial for new readers).

By cross-posting one only is adding a few tens of bytes to each bulletin (to specify the extra group on the Newsgroups line), but are adding the capability for very powerful filtering features available on most news servers, listservers and readers. Your local news guru could probably explain these features in more detail.

In rn, for example, according to Leanne Phillips in her rn kill-file FAQ, add a line of the form:

/Newsgroups:.*[,]rec\.radio\.info/h:j

either in ~/News/KILL (if you don't want to see rec.radio.info articles anywhere) or ~/News/rec/radio/amateur/misc/KILL (if you don't want to see them just in rec.radio.amateur.misc). The latter method means your kill file will only be consulted during rec.radio.amateur.misc (and hence runs more efficiently), and will probably work for most people.

In nn, according to Bill Wohler in his nn FAQ, add a line of the form:

rec.radio.info:!s/:^

in ~/.nn/kill (if you don't want to see rec.radio.info articles anywhere), or put the following lines:

sequence
rec.radio.info
rec.radio.

at the end of ~/.nn/init in order to see all the rec.radio.info bulletins first, then read the remaining rec.radio.* without the

bulletins.

In slrn, according to the srln FAQ, the following scoring rule will | allow you to see rec.radio.info-crossposted bulletins, while still | filtering out most SPAM or "Velveeta" crossposted to more than 2 | newsgroups (as such articles usually do not contain a 'Followup-To:' | header): |

Score: -9999 |
Newsgroups: ,.*, |
~Followup-To: . |

More information about kill files may be obtained from Dave Fawthrop's Killfile FAQ at:

http://www.hyphenologist.co.uk/killfile/

-- What is a 'follow-up', and what does 'moderated' mean?

If you are new to Usenet and are not familiar with the terminology, you might want to read the general introductory articles found in the newsgroup news.announce.newusers. Doing so will make your life on the net much easier, and will probably save you from making silly beginner's mistakes.

If you think that at this moment you are reading an echo, a conference, or a bulletin board, I'd also strongly suggest a trip over to news.announce.newusers.

For the rest of this article, we will assume you have a basic knowledge of Usenet terminology and mechanics.

A moderated group means that any article that needs to be posted to the group has to be accepted by the moderator of the group. Since we need to ensure that followups to an article (discussion) do not show up in the rec.radio.info newsgroup, the `Followup-To:' header line contains a newsgroup that is appropriate for discussions about the specific article.

-- OK, so now I know what 'moderated' means. Tell me more.

Rec.radio.info is a moderated newsgroup, which means that all articles submitted to the group will have to be approved by the moderator first.

The current moderator of the group is the rec.radio.amateur.moderated Moderation Team. Submissions to rec.radio.info can be posted, or e-mailed to:

rec-radio-info@panix.com

Comments, criticisms, suggestions or questions about the group can be e-mailed to:

rec-radio-info-request@panix.com

But before you do so, please be sure to check out the "Posting Guidelines" article.

The influence of the moderator should be minimal and of an administrative nature, consisting chiefly of weeding out obviously inappropriate articles, while making sure correct headers etc. are used for the appropriate ones.

-- What type of material is considered inappropriate?

There are three broad categories of articles which will be rejected by the moderator:

1) Requests for information: rec.radio.info is strictly a one-way street. We receive information in our mailbox; we then post it to rec.radio.info. Requests for specific information belong in the normal discussion newsgroups. If your request gets answered, you might consider passing the answer on to rec.radio.info, though. Especially if you can edit it into a informational, rather than a discussion, format.

2) Obvious discussion articles, or articles that appear unsubstantiated.

3) Commercial stuff: a relatively unbiased test of a radio product would be accepted, but any hint of for-profit might be reason for rejection. For three reasons: This is not the purpose of the list, for-profit is a controversial topic, and this list may be passed onto Amateur Packet Radio (where for-profit is prohibited except under certain provisos).

rec.radio.swap may be more deserving of the posting in any matter.

Similarly, copyrighted material generally cannot be used. If it's TRULY worthwhile to the net, We would recommend obtaining permission from the copyright holder. Please note the source, and if permission was given. We reserve the right to make the final decision concerning appropriateness in all situations. In most cases, a brief summary of, or pointer to, the copyrighted information may be all we can allow.

-- I do not have access to news, how can I get the information posted to rec.radio.info?

Google has an excellent web interface to Usenet newsgroups. It is available at:

http://groups.google.com

It supports both reading and posting.

Another excellent web interface to at least the radio-related Usenet newsgroups is the RadioBanter site:

http://www.radiobanter.com

sponsored by the NewsgroupBanter project:

http://www.newsgroupbanter.com

It, too, supports both reading and posting.

-- Will the material appearing in rec.radio.info be archived somewhere?

Yes. See Google Groups and RadioBanter above.

Effectively this means that anything you post to rec.radio.info will be permanently stored, so your work will not be lost.

-- I have a regular posting with timely information, is there a way to speed up it's delivery, or automate for more convenience?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as time critical.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires co-operation and goodwill to be beneficial to the community in the rec.radio hierarchy.

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

*** rec.radio.info - Posting Guidelines and Etiquette ***

Two introductory articles about rec.radio.info are posted to this group
and to rec.answers/news.answers every month. You are now reading the
second article, which explains how to submit something to
rec.radio.info, and which answers some Frequently Asked Questions about
the submission process. The first article is titled "Welcome to
rec.radio.info", and it might be a good idea to check it out as well.

-- How do I submit something to rec.radio.info?

Two possibilities. You can use your newsreading software to just post
the article to rec.radio.info, as you would do with any other
newsgroup. The difference is that the software recognizes the special
status of rec.radio.info as a moderated group, and will e-mail your
article to us, the moderation team, instead of posting it to the group.

Alternatively, you can mail your article directly to us at the following
address:

rec-radio-info@panix.com

Mailing us directly is probably (a wee bit) faster, but using the
transparency offered by the newsreading software is probably more
convenient.

If you have any questions, or wish to deal with some administrivia with
the moderation team, we suggest mailing to the following address:

rec-radio-info-request@panix.com

-- How soon will I see my article appear?

It depends on how busy we are. Your article reaches us as mail, we have
to read it first, give it the stamp of approval, and finally send it on
to the group. We will attempt to read and decide on all submissions
within 72 hours at the very least, though we will probably be able to
process submissions much faster in actual practice.
```

The site from which we moderate this newsgroup, "Public Access Internet and Unix, NYC" (Panix), is directly connected to the Internet, and articles posted at that site should appear at most major news sites, including Google Groups, the same day. The principal delay, therefore, will be the wait in the moderator's submission queue.

If you post a periodic article, and have shown to be trustworthy, we may allow you to post directly if the article is of a timely nature. See the section below on direct posting.

-- Should my article be in a specific format?

No. If it is not totally illegible, we will accept it, and if it does not have a correct subject-line we will correct it with your permission -- that's what a moderator is for.

However.

You could do us a big favor by making sure your article conforms to these simple requirements:

1) The article must present information, not discussion or requests, We will reject the article or require you to change the wording if it is worth it.
2) A good, descriptive Subject line.
3) Always mention what source you got the information from.
4) Don't forget to include a Followup-To header, at least if you don't want further discussion to automatically be forwarded to you, the poster, which is the default if the article is only posted to rec.radio.info.

As we said: if your article is appropriate we will post it even if you don't follow these guidelines, but then don't blame us for not processing it immediately. 'Perfect' articles we can send on with a couple of keystrokes. Stuff that needs minor editing is going to have to wait until we have time to do so.

Please do not waste both our and your time by posting requests, as this is an information only news group.

-- What about crossposting?

If you send something to rec.radio.info, just name any group you'd like to cross-post to in the Newsgroups field. Then, when we approve the article for rec.radio.info it will get automatically cross-posted to any other groups mentioned. This will also override the default Followup-To: poster, replacing it with the groups you cross posted to.

We would prefer if the group be cross-posted to the various discussion groups in the rec.radio.* hierarchy that are appropriate:

rec.radio.amateur.misc Amateur (ham) radio and related matters
rec.radio.amateur.packet Amateur Packet Radio discussions
rec.radio.amateur.policy Amateur Radio practices, rules, etc.
rec.radio.noncomm Non commercial radio discussions

rec.radio.shortwave International broadcasting on the 'HF' bands
rec.radio.cb Citizens Band (27 MHz) discussion
rec.radio.scanner Scanner discussions (unsupported group)

or in one of the moderated groups:

rec.radio.amateur.moderated Amateur radio practices, rules, etc.
rec.radio.broadcasting Discussion of *domestic* radio broadcasting

We will leave it up to the poster to decide which group(s) are appropriate, but reserve the right to add groups if we feel it has broader interest. We will consult with the poster first.

Notes on crossposting:

- rec.radio.broadcasting is also a moderated group. The rec.radio.broadcasting moderator prefers to review all articles himself before posting. Placing rec.radio.broadcasting before rec.radio.info on the Newsgroups line should accomplish this. We will typically abide by the rec.radio.broadcasting moderator's decision whether the article is appropriate for rec.radio.info.

- rec.radio.amateur.moderated is also a moderated group. As the rec.radio.amateur.moderated Moderation Team manages both rec.radio.amateur.moderated and rec.radio.info, we can manage crossposting and approvals for both newsgroups. The rec.radio.amateur.moderated group does not allow crossposting to other discussion newsgroups, whether moderated or unmoderated. However, we would like to manage rec.radio.info as consistently as possible with how it was done by previous moderators, including the grandfathering of existing regular postings. Therefore, the submitter can choose rec.radio.amateur.moderated or the other unmoderated rec.radio.amateur.* discussion newsgroups for crossposting, but not both.

- Any FAQ or informational posting approved by the rec.answers/news.answers moderation team that is also crossposted to any rec.radio.* newsgroup (besides just rec.radio.info) is also automatically pre-approved for rec.radio.info. See below for more information.

If you post to another moderated group, it may be better to make special arrangements with both moderators before posting by contacting us at our administrivia addresses.

In addition, cross-posts do not take up extra space; modern newsreaders can be configured to show you cross-posted articles only once anyway; not everybody reads rec.radio.info; and rec.radio.info was never meant to reduce the volume of the regular discussion newsgroups. But keep in mind that some of the mail gateways may filter out the informational postings (at request of the subscribers) to keep the load down.

You decide.

-- I have a regular posting with timely information, can I make arrangements to help speed up delivery by posting directly from my site?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as timely.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires cooperation and good will to be beneficial to the community in the rec.radio.* hierarchy.

If you are currently maintaining (or plan to maintain) a radio-related periodic information posting, you may wish to consider crossposting it to rec.answers/news.answers. Postings that are approved by the rec.answers/news.answers moderators for this treatment are automatically pre-approved for crossposting to rec.radio.info (as the news.answers requirements are far more rigorous than the requirements this newsgroup ever plans to use). For more information about this option, consult the appropriate information articles and posting guidelines in rec.answers/news.answers.

Realize also, that even if your post is not approved for rec.answers/news.answers, it can still be approved for rec.radio.info. The intention is not so much to get every last bit of radio-related information on rec.answers/news.answers, but rather to provide an alternative avenue of approval (as well as grandfather existing maintainers of radio-related information and spare them additional bureaucratic hurdles). Again, crossposting to either rec.radio.info or rec.answers/news.answers, both, or neither, is at the discretion of the poster (subject to the approval of the moderators). You decide what is most appropriate for your article.

Please remember that as an information maintainer, you are not alone. There are many others on the net who maintain and post periodic information postings, using various intermediate-to-advanced features of Usenet (usually via automated tools). Various degrees of technical support and general hand-holding are available from many Usenet veterans. Send us some E-mail describing your needs to our administrative address below, and we'll try to help, or at least refer you to the right knowledgeable individual(s).

-- And Follow-ups?

If the only newsgroup you have specified is rec.radio.info, then the Followup-To: field will always be set to poster. If you do not want this, you must supply a Followup-To line of your own, and we will honor that one, as long as it is a subset of the original Newsgroups line.

If you specify newsgroups to cross-post to, then the Followup-To field will be set to include all the cross-posted groups, excepting rec.radio.info itself. Again, if you do not wish this behavior, supply your own Followup-To line.

We maintain other standards on the various RFC-1036 (news transport) header lines. For example, if the article is appropriate for passing into the Packet Radio Information Network, we encapsulate the Packet Bulletin Identifier (BID) in the Message-ID: news header line indicating the machine of origin as the ampr.org domain:

Message-ID: <$opa.55.1994@ampr.org> |

where the Packet Radio BID, in this example, is `$OPA.55', and it was posted in the year 1994, because some of the Bid numbers are cycled yearly. Hopefully, this can be used as a key to re-introduce the articles for the Packet Radio network. Also, if the article is a repost of an already existing information article in the rec.radio heirarchy, we ensure that the References: header line is linked to that previously posted article. This also helps to tag articles, and may be used for additional filtering if needed.

Since the articles are archived, please use the Summary and Keywords header lines to help one search for your article.

-- Why have I received no reply from you?

We never reject anything in silence, and we make a point of it to answer all our mail. However, E-mail, like a brain cell, can and does get lost, every now and again.

So, if you send us something, and you don't see it appear it rec.radio.info, and you still have not heard from us in reply after say, five days, you can be pretty sure that either your mail never reached us, or that our answer has never reached you. In that case, please try again (We will filter out duplicates).

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

(e-mail: dl7voa@darc.de)

CT9 - MADEIRA, AF-014
Helmut,DF7ZS, will be in Madeira again for one week starting on Mar 25.
He will sign CR3L or CQ3L in the WPX SSB Contest and if time permits
also as CT9/DF7ZS before and after the contest. Unfortunately he has
not that much time left outside the contest so he will spend his few
hours of additional operation on the WARC bands.
QSLs for CR3L or CQ3L via DJ6QT, CT9/DF7ZS via DF7ZS.

JD1/OG - OGASAWARA ISLANDS, AS-031
Ted,K8AQM (JD1BNM), Brian,KG8CO (JD1BNJ), Steve,K8QKY (JD1BNQ), and
Stan,AC8W (JD1BNK), will activate Chichi-jima Island (AS-031) between
Mar 28 and Apr 12. The team will be active in CW, SSB and RTTY on
160m-6m and their operation is planned like this:
JD1BNJ: RTTY and PSK31 only
JD1BNK: mostly CW on all bands
JD1BNM: mostly CW on the lowbands
JD1BNQ: mostly on HF and 6m.
The QSL manager for all calls will be K8AQM. He confirms QSLs direct,
via bureau or per LoTW.

Kirk,JF3MYU (JD1BNN), is belonging to the team as well but has to leave
the island on Mar 31 already. Kirk will focus on the WARC bands mainly
in SSB and some CW. He manages his QSLs himself via bureau or direct.

P4 - ARUBA, SA-036
Stefan,P4/DK1MM, is staying on Aruba (SA-036) since Mar 19 and will
stay there until Apr 1. He will join the WPX SSB Contest as P41M.
QSLs for both calls via DK1MM, via bureau or direct.

PJ4 - NETHERLAND ANTILLES / BONAIRE, SA-006
Andy,PJ4/W9NJY, is active from Bonaire (SA-006, WLOTA L1279) mostly in
CW on 40m-10m until Apr 2. QSLs via WD9DZV or via LoTW or eQSL.

V7 - MARSHALL ISLANDS, OC-028
Neil,V73NS (WD8CRT), finishes his operation from Kwajalein (OC-028)
earlier than planned already by the end of March. He will then move
to Afghanistan in the end of April or the beginning of May.
QSLs for V73NS should be sent direct via W3HNK.

VP5 - TURKS AND CAICOS ISLANDS
David,VP5/W5CW, will show up in CW and SSB on 160m-6m between Mar 23
and Apr 6. He will sign VP50V during the upcoming WPX Contest.
QSLs direct via PO Box 88, Morris, OK 74445-0088, USA.

XV - VIETNAM
Reijo,XV2RZ, is going to hit the airwaves on 80m-10m from the southeast
of Vietnam from Mar 26 until Apr 6. QSL only direct via Reijo Laitinen,
Mantytie 13,76940 Nenonpelto, Finland.

YS - EL SALVADOR
Roberto,I2JIN, will show up mainly in CW signing YS3CW from Mar 24
until Apr 11. QSLs via bureau or direct to his homecall.

8P - BARBADOS, NA-021
The members of the "Amateur Radio Society of Barbados" (ARSB) are
celebrating the 55th anniversary of their radio club this year.
For this reason the special event station 8P55AW will active throughout
the year. QSL via bureau ok.

8Q - MALEDIVES, AS-013
Bodo,DL3OCH, is active as 8Q7QX mostly in CW but also in RTTY and PSK31
on 80m-12m between Mar 21 and Apr 4. QSL via bureau, direct or LoTW to
DL3OCH. Bodo will try to work EME as well because he is accompanied by
his friends 8Q7QQ (HB9QQ), 8Q7RQ (HB9CRQ) and 8Q7HP (DL2NUD) who are
mainly working via EME.

http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Mar 27/28: CQWW WPX Contest, SSB

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:
AF-024, S7, Seychelles, Inner Islands: Rob,GM3YTS, and Gav,GM0GAV, are
working as S79GM from Mahe from Mar 21 until Apr 1. QSL via GM4FDM.

AS-003, 4S, Sri Lanka (main): Alex,UX4UL, is still active as 4S7ULG from
Sri Lanka until Apr 7. QSL via UY5ZZ (direct/bureau).

EU-127, DL, Schleswig-Holstein State SW: A group of German HAMs will sign
DA0HEL from Helgoland Island (LH) and DL0IH from Dune Island (LH)

from Mar 23-31. QSLs for both calls via DF6QC (direct/bureau).

NA-231, VY0, Nunavut (Hudson Bay) NE Group: Cezar,VE3LYC, tries to become
active as VY0V from East Pen Island (IOTA-new) from Mar 26-31.
QSL via homecall (direct/bureau).

Lighthouse activities (WLOTA/ARLHS/ILLW)

DA0HEL LH 0518 Helgoland Mar 22-31
DL0IH LH 2130 Dune Island Mar 22-31
HH4/AF4Z LH 0343 Haiti Mar 22-Apr 2
HH4/K4QD LH 0343 Haiti Mar 22-Apr 2
P4/DK1MM LH 0033 Aruba until Apr 1
PJ4L LH 1279 Bonaire Mar 27/28
TM5EL LH 2721 Sein Apr 7-14
V21ZG LH 1118 Anigua Mar 16-Apr 4
4S7ULG LH 0762 Sri Lanka until Apr 7
4V4JR LH 0343 Haiti CQ WPX SSB

Following lighthouses were added to the WLOTA list recently:

LH 2555 Petit St. Pierre Rock FP
LH 2559 Sea Breakwater FP
LH 2570 Ko Palai HS
LH 2558 Innlandet LA
LH 2564 Nordlandet LA
LH 2647 Tevikholmen LA
LH 2544 Klah YB5-6
LH 2575 Pulau Jemur YB5-6

205. Linear Amp value ?

Newsgroup: rec.radio.amateur.misc
Date: 2010-03-23 00:03:22 UTC
From: Cannuck <abra@cabedra.com>
Message-ID: <3zTpn.77705$wr5.18804@newsfe22.iad>
Source record: 5924

Any advice about this linear amp value?

I am not sure if this is too much or not enough.

http://cgi.ebay.ca/ws/eBayISAPI.dll?ViewItem&item=110510605077&ssPageName=STRK:MESELX:IT

Thanks

The SB-220 is a classic. Lots of them are still on the air.

Read the eham reviews:
http://www.eham.net/reviews/detail/62

Porblem with buying one used, sight unseen, and untested is that you
have no way to knowing what you are getting.

Note the guy says : " I have only used it for its tuner and never
used it as an amp. " ??????????? What does he mean by this????
Exactly how would he use the amp as a "tuner?"

At best, you could plug it in and put it on the air.

At worst, you'd have to strip out and replace a lot of parts -- mainly
the electrolytics in the power supply, other capactors. If the amp
has been abused, you might wind up replacing rare, hard to find parts
--- band switches, variable capacitors.

Will he take it back if you aren't happy with it?

Also, I note that he's selling it for pick-up or local delivery only.
If you live that close to him, contact him and go check it out.

You can get replacement parts and upgrades from this place:
http://www.harbachelectronics.com/

207. The ARES E-Letter for March 24, 2010

Newsgroup: rec.radio.amateur.misc
Date: 2010-03-24 05:33:10 UTC

The ARES E-Letter

Published by the American Radio Relay League
****

March 24, 2010

Editor: Rick Palm, K1CE <k1ce@arrl.net>

==> THE VIEW FROM FLAGLER COUNTY

The ARESï¿½ renewal effort here is humming along. Registration for ARESï¿½ in the East Coast District, with emphasis on Flagler County is now underway with a new registration form available: It requests typical data on license and station capabilities, and Driver's License Number, which is required for inter-county deployï¿½ment when requested by the Florida state EOC. This is not optional if you wish to be deployed outside of your county of residence. The registration form also requests the applicant's signature, which indicates that he/she will comï¿½ply with an ARESï¿½ Code of Conduct listed on the back side of the form. I was very pleased to submit my application for membership.

Eddie Cail, KJ4LRB, a relatively new licensee, has been appointed to the position of Assistant DEC for Membership and Administration. Cail will keep memberï¿½ship and training/certification records in order. To ensure continuity and proper sucï¿½cession planning, we will be continually forwardï¿½ing our records to the Northern Florida Section Manager and Section Emergency Coordinator.

We are accepting nominations for the Emergency Coordinator (EC) position for Flagler County. A few very good nominations have already been received, and candidates will be interviewed after March 22. The ideal candidate should have thick skin and a bias to action. There is no lack of projects, communication and coordination that needs to be performed both within Flagler County and with our partners in Volusia and St. Johns counties, and surrounding areas.

ARESï¿½ operators are being encouraged to complete the FEMA classes IS-100, IS-200, IS-700 and IS-800, which are now required by all county EOCs. All of these classes are available online and are FREE. Start with IS-100 at the following URL: http://training.fema.gov/EMIWeb/IS/IS100A.asp. Cerï¿½tificates of successful completion will be forwarded to local EOCs as training confirmations. - Flagler ARESï¿½ Newsletter, March 2010 issue

==> SOUTHEASTERN DIVISION TO HOST NATIONAL HURRICANE CONFERENCE MARCH
29 - APRIL 2

ARRL Southeastern Division Director Greg Sarratt, W4OZK, proudly
announces that the division will host the 2010 National Hurricane
Conference, March 29 - April 2 at the Orlando Hilton, Orlando, Florida.
This is the nation's forum for education and professional training in
hurricane preparedness.

The primary goal of the National Hurricane Conference is to improve
hurricane preparedness, response, recovery and mitigation in order to
save lives and property in the United States and the tropical islands
of the Caribbean and Pacific. In addition, the conference serves as a
national forum for federal, state and local officials to exchange ideas
and recommend new policies to improve Emergency Management.

On Tuesday, March 30, from 1:30 to 5:00 PM, all hams are invited at no
cost to attend the "Amateur Radio: Disaster Communications Before,
During and After Hurricanes" session in room Orange C.

On Wednesday, March 31, from 8:30 to 10:00 AM there will be an Amateur
Radio session designed for Emergency Managers called "Amateur Radio:
The Emergency Manager's Hidden Resource."

This conference will help Amateur Radio be successful in hurricane
preparedness, response, recovery and mitigation. For more info: 2010
National Hurricane Conference <http://www.hurricanemeeting.com/>.

==> CHILEAN EARTHQUAKE

Radio Club de Chile (RCCH <http://www.ce3aa.cl/>) President Dr Galdino
Besomi, CE3PG, reported that the situation in Chile is "very complex"

as the country suffered aftershocks registering 6.0 or higher after the 8.8 magnitude earthquake that hit Chile on February 27. "Red Chilena Nor Austral de Servicio (RECNA <http://www.ce3aa.cl/index.php?option=com_content&task=view&id=38&Itemid=40>) and RCCH networks worked in coordination with the Army of Chile, handling information about people localization, condition of roads and support for the emergency administration," IARU Region 2 (Area G) Emergency Coordinator Jorge Sierra, LU1AS, told the ARRL. He asked the amateur community to keep certain frequencies free from non-essential, emergency traffic. The RCCH set up an e-mail address where people could request information concerning people affected by the earthquakes. - ARRL Letter

==> HAWAII MOBILIZED FOR POTENTIAL TSUNAMI

Ron Hashiro, AH6RH, Hawaii State Civil Defense ARESï¿½/RACES Coordinator, thanked the Amateur Radio community for outstanding support of a state-wide tsunami net convened in the immediate aftermath of the Chilean earthquake. The net was held on the State RACES VHF network, and on HF at 7088 kHz. "We had a combined total of 60 stations on VHF and HF checked into the net," said Hashiro. "Real-time observations from the field were passed, and tactical messages were injected directly into the State Civil Defense's information tracking and reporting systems." Hashiro added: "At the same time, amateurs in three county EOCs were able to receive the same radio reports for informational updates for their EOC operations."

The location reports, time-stamping, and timeliness with the estimates of water height information demonstrated the professionalism of the Amateur Radio Service to the SCD staff operations and to the Governor. SCD Director Ed Teixeira was extremely pleased and grateful for these reports and extended his thanks to the Amateur Radio community for an outstanding job well done.

==> HAITI MEDICAL MISSION SUPPORTED BY ARRL, AMATEUR RADIO

ARRL and Amateur Radio has supported a medical mission to Haiti. Project Medishare <http://projectmedishare.org/> was founded in 1994 by the University of Miami Medical School and Haiti physicians and health officials. Over the years, Medishare constructed several health clinics, all of which were destroyed in the earthquake. In the quake's aftermath, Medishare was able to rapidly deploy medical teams and assets to begin the overwhelming task of meeting medical needs. A field hospital was established within the relatively secure boundaries of the Port-au-Prince Airport. Large tents were supplied to set up makeshift operating rooms, patient treatment and recovery areas and mass sleeping quarters for the volunteers.

Overall conditions were basic to primitive. An immediate need was to establish a logistics chain for supplies from cots, food, water, medical equipment and pharmaceuticals to handling the more than one hundred volunteers rotating in and out every five to seven days.

Establishing reliable local and international communication was also a high priority. The University of Miami's IT group set up two broadband Vsat satellite links to handle e-mail and two channels of VoIP phone circuits, but they were unstable and not reliable. An operations director then contacted Julio Ripoll, WD4R, one of the volunteer leaders at the National Hurricane Center in Miami. Ripoll in turn contacted ARRL to request help in soliciting volunteers.

ARRL immediately sent an HF "Ham Aid Kit" and put Ripoll in touch with Neil Lauritsen, W4NHL/NNN0TFH, ARRL West Central Florida Section Emergency Coordinator and Navy MARS Florida State Deputy Director. Ripoll described the mission profile and that he had only two WX4NHC operators ready to go to Haiti. He requested operators to go to Haiti to provide two to three weeks of backup communications until such time as the permanent satellite system was stabilized. John McHugh, K4AG, assembled the list of equipment needed, and Medishare provided it for both ends of the circuit: Haiti and Miami. The equipment came from AES in Orlando.

The WX4NHC Club built a complete station at the Haiti Command Center Building on the UM Medical Campus including erecting antennas on the roof. Dale Botwin, KR4OR, and Ivan Menendez, KB4RMB, configured the HF radio for remote control, Skype and Winlink e-mail capability. EchoLink was added later as an internal coordination system between UM Haiti and the principal coordinators stateside with the help of Rob Macedo, KD1CY, and Tony Langdon, VK3JED.

Operations

The original mission profile was to set up an HF station capable of providing backup voice via phone patch and backup e-mail capability via HF Winlink. Both of these objectives could be met using normal Amateur Radio frequencies, but with limitations due to propagation and stations available when needed for phone patch traffic, it was decided to increase flexibility and capability by using MARS assets to extend the number of Winlink stations available and use the Air Force MARS-dedicated phone patch circuit that was available 24/7. The volunteers were arranged in teams of two operators with at least one being a MARS operator. Equipment included an ICOM IC-718 and AH-710 supplied by ARRL.

VHF operations were set up on 146.52 MHz with Ron Tomo, KE2UK/AAT2BC at the Nassau medical clinic approximately five miles from the airport. The clinic had limited medical resources, and consequently there was much traffic conducted with Miami Medical as a resource for patient consulting, patient transfers to Miami, to other medical facilities and to the US Navy ship Comfort.

Once the need to establish direct communications with the Comfort was apparent, a VHF radio was modified to work on marine frequencies. When contact was made, priority and emergency traffic was passed. Communications with the Comfort were conducted seamlessly. The link with the Comfort was critical to saving a lot of lives.

Twenty five phone patches were made over the AF phone patch net and the Maritime Mobile Net on 14.300 MHz. Having access to the AF phone patch net was valuable providing virtually 100% phone patch availability regardless of propagation or time of day or night. All were routine health and welfare messages that were appreciated by the Miami Medical personnel.

A communications link was also established with the U.S. Joint Operations Command (JOC) to coordinate certain local security concerns. The six-meter band was used for this purpose.

One of the unexpected communication needs was to maintain the GMRS radios being used by the UM personnel. They had 12 radios, most of which were not working. The volunteers worked on the radios by replacing dead batteries, battery connections, wrong frequencies, and so forth. The radios then worked within the hospital grounds, but could not work when needed over longer distances. A Yaesu FT-897 was used on Channel 21 (462.700 Mhz) and acted as a manual repeater to relay traffic between operators.

A VHF/UHF MARS-modified hand-held was also put into service on 462.700 MHz when extended range was needed; for example, for daily trips to a medical supply point four miles away.

HF Winlink was used for routine traffic. Its primary purpose was to provide backup for emergency traffic should the VSAT e-mail link go down. This was never needed but having the capability was a safety net that met the mission requirements.

Lessons Learned

The major lesson was the importance of interoperability, which was managed well: Army, Navy and Air Force MARS each stepped in with a coordinated effort, each with defined support roles. The ARRL was there from the beginning with equipment and reciprocal licensing support, to contacting the FCC to clear the use of traffic, to supporting the ordering of medical supplies and meeting other logistical requirements.

The mission provided a new perspective on interoperability, primarily among the three MARS services, ARESï¿½, ACS and U.S. Military assets.

One other critical observation was the obvious need for more MARS operators in support of the various U.S. military units operating in Haiti. The team was asked to supply operators and equipment to help them improve their communications across the various services deployed. Based on this experience and the new mission statement for MARS, it is hoped that this will facilitate the three MARS Chiefs and the DOD to review the communication support MARS can provide during future humanitarian missions. MARS members should train and be prepared for deployment, not if but when the U.S. Military is called upon to provide the leadership for another major humanitarian relief mission. -- Jack Satterfield W4GRJ/AFA4DG, Saint Pete Beach, Florida

==> CHEMICAL STOCKPILE EXERCISE SUPPORTED IN ALABAMA

The annual Chemical Stockpile Emergency Preparedness Program <http://www.fema.gov/government/grant/csepp.shtm> (CSEPP) exercise was conducted Wednesday, March 17, 2010 in northeast Alabama. The six CSEPP counties are centered around Calhoun County where the Anniston Army Depot at one time housed 7% of the nation's stockpile of chemical weapons. (Congress has directed that the U.S. Army destroy certain kinds of chemical weapons stockpiled at six U.S. Army installations in the U.S. over the next several years. Experts believe the chance of an accident involving these obsolete chemical munitions is remote. However, local officials and responders have to be ready for such an emergency today and every day until the stockpile in their community no longer exists),

It was a multi-hazard exercise this year. In Anniston, at the primary hospital, the Northeast Alabama Regional Medical Center, a mock fire at 7:30 AM destroyed several wards. A mobile hospital was requested from another CSEPP county. The hospital had just received new Amateur Radio equipment through a grant from the Alabama Department of Public Health. The hospital had five ARES operators Tracy Stephens, KI4OZG, David Whilhoite, KM4DLW and Peggy Whilhoite, KM4MPW who were all in the radio room while Mike Phillips, KI4KOT operated the "Decon" Site. James Adams, W4FMI operated the Mobile Hospital.

The second part of the exercise involved a mock tornado in the northern part of Calhoun County hitting two schools, the Pleasant Valley Elementary and Pleasant Valley High School with structural collapse and many trapped, injured, and killed. ARES AEC David Spinks, W4EMG, and AEC James Brown, KG4HXN operated the Alabama Department of Homeland Security Region 7 Communications Vehicle. They were dispatched to the Staging area and set-up the communications and camera system for the EMA to view the staging area scene. Jacksonville Fire Chief Wade Buckner, KD4TFS played a big part in the exercise as well.

At 9 AM the CSEPP part of the exercise began with a simulated release of Mustard agent from the Anniston Army Depot. The sirens and Tone Alert Radios alerted (simulated) citizens in the affected areas. Residents were instructed to shelter in place and wait for further instructions. Calhoun County DEC/EC Randall Landers, KG4EUD activated the Calhoun County EMA ARES staff and the Alabama Emergency Net on the state's highest repeater located on Cheaha mountain.

All six CSEPP county ECs were active on the Alabama Emergency Net: checked in were Landers, Clay County EC David Hester, KC4LQT, Cleburne County EC Randy Smith, W4AUB, Etowah County EC Dave Waits, K4VMV, St Clair County EC Steve Ayres, KG4VSH and Talladega County EC Jim McIlwain, W4LVT. Each EC managed their

own operations to support Calhoun County, running their own nets as well as monitoring the main District wide net with Alabama State EMA station KF4LQK. The Calhoun County EMA Director Dan Long, KI4SUF requested EC Landers take over on 800 MHz so the EMA could manage the CSEPP. Landers performed dispatch duties on the 800 MHz Digital trunking system.

During the exercise, the D-STAR <http://icomamerica.com/en/products/amateur/dstar/dstar/default.aspx> net had seven agencies represented. Twenty-four D-RATS <http://www.d-rats.com/> messages were sent with many between the hospital and the EMA. Dave Dostie, AE9Q operated the Joint information Center.

During the hot wash the FEMA lead evaluator said that communications was by far the best part of the exercise with so many systems employed. The Alabama District 7 team did a great job. -- Randall Landers, KG4EUD [Landers is District 7 District Emergency Coordinator; Calhoun County EMA RACES Commander; Calhoun County Citizens Corps Council Chairperson; Calhoun County ARES Emergency Coordinator; Alabama Association of Emergency Managers; Calhoun County Amateur Radio Association Trustee]

==> RACES REVITALIZATION EFFORT UNDERWAY IN NEBRASKA; SM SEEKS INPUT

The ARRL Nebraska Section leadership is considering how to re-energize RACES in the state. Current thinking is that RACES would be revamped as an elite emergency communications corps, administered operationally as well as organizationally under the Nebraska Emergency Management Agency (NEMA). There would be eight divisions of RACES, one in each of the eight Planning, Exercise, and Training (PET) regions. "Elite" means that to be a member of RACES, you would have to pass a sequence of on-line (and maybe "live") courses in emergency communications and emergency management and to take part in periodic emergency drills and exercises. Membership in RACES would be open to any qualified Amateur Radio operator who meets the training requirements.

While RACES members would report to a leader in each of the PET regions, they would be available for assignments at the request of the county emergency managers in that region. This action would create a corps of well-qualified, trained individuals for emergency managers to count on.

To implement this new organization, current RACES operators would be cancelled after a period long enough to allow them to qualify under the new rules. New RACES certs would be issued as soon as hams met the training requirements.

The RACES state Radio Officer (RO) would become a single point of contact between NEMA and organized Amateur Radio emergency communications in the state. The Nebraska SM Art Zygielbaum, K0AIZ, has been asked to serve in that capacity.

So what happens to ARESï¿½? The current thought is that ARESï¿½ would be administered within counties just as it is now. ARESï¿½ members would be encouraged to qualify for the new RACES certs. An appropriate protocol would be worked out to prevent a conflict of commitment for hams who are members of both ARESï¿½ and RACES. Since the head of ARESï¿½ in the state, Section Emergency Coordinator Jon Morris, KA0JGG, reports to the Section Manager, both RACES and ARESï¿½ will have common leadership at the top.

Early support from the field has been encouraging. Before formal action is taken, however, Zygielbaum is asking for broader participation in discussions. The objective is for the Nebraska Amateur Radio community to do a better job of supporting the state's emergency management organizations. Zygielbaum said "I am hoping that the actions under consideration will strengthen us and encourage the participation of new hams." "Thoughts and ideas would be very valuable." Zygielbaum can be contacted at k0aiz@arrl.org.

==> FCC SEEKS COMMENTS FOR BLANKET WAIVER TO ALLOW AMATEUR RADIO IN HOSPITAL EMERGENCY DRILLS

In February, 2010, the American Hospital Association (AHA) filed a request with the FCC for a blanket waiver of Section 97.113(a)(3) of the Commission's Rules "to permit hospitals seeking accreditation to use Amateur Radio operators who are hospital employees to transmit communications on behalf of the hospital as part of emergency preparedness drills." On March 3, the FCC issued a Public Notice -- WP Docket 10-54 -- seeking comments if the Commission "should grant AHA's request for a blanket waiver of Section 97.113(a)(3) to permit amateur operators who are hospital employees to participate in emergency drills that are conducted by hospitals for accreditation purposes and that are not government-sponsored." Section 97.113(a)(3) specifically prohibits amateur stations from transmitting communications "in which the station licensee or control operator has a pecuniary interest, including communications on behalf of an employer." Instructions on how to paper file or file electronically comments are listed in the Public Notice.

==> ARRL REQUESTS SUPPORT FOR SENATE BILL 1755

Senate Bill 1755 -- The Amateur Radio Emergency Communications Enhancement Act of 2009 introduced <http://www.arrl.org/news/stories/2009/10/07/11127/?nc=1> in October 2009 by Senators Joe Lieberman (ID-CT) and Susan Collins (R-ME) -- has unanimously passed the US Senate and has been sent to the US House of Representatives for consideration <http://www.arrl.org/news/stories/2009/12/15/11247/?nc=1> and now sits in the House Committee on Energy and Commerce. The ARRL is asking its membership to contact the leadership of the Energy and Commerce committee, requesting support and action on moving S 1755 through the committee. S 1755 accomplishes the same things as HR 2160; HR 2160 was introduced in April 2009 <http://www.arrl.org/news/stories/2009/04/30/10792/?nc=1> by Rep Sheila Jackson Lee (D-TX-18). Since S 1755 has already been approved by the Senate, moving it forward in the House will simplify the process.

S 1755 points out that "[t]here is a strong Federal interest in the effective performance of Amateur Radio Service stations, and that performance must be given -- (A) support at all levels of government; and (B) protection against unreasonable regulation and impediments to the provision of the valuable communications provided by such stations."

If enacted into law, S 1755 would instruct the Secretary of Homeland Security (DHS <http://www.dhs.gov/index.shtm>) to undertake a study -- and report its findings to Congress within 180 days -- on the uses and capabilities of Amateur Radio communications in emergencies and disaster relief.

The study shall:

*Include recommendations for enhancements in the voluntary deployment of Amateur Radio licensees in disaster and emergency communications and disaster relief efforts.

*Include recommendations for improved integration of Amateur Radio operators in planning and in furtherance of the Department of Homeland Security initiatives.

*Identify unreasonable or unnecessary impediments to enhanced Amateur Radio communications, such as the effects of private land use regulations on residential antenna installations, and make recommendations regarding such impediments.

*Include an evaluation of Section 207 of the Telecommunications Act of 1996 (Public Law 104-104, 110 Stat. 56 (1996)).

*Recommend whether Section 207 should be modified to prevent unreasonable private land use restrictions that impair the ability of amateurs to conduct, or prepare to conduct, emergency communications by means of effective outdoor antennas and support structures at reasonable heights and dimensions for the purpose, in residential areas. The Secretary of Homeland Security shall utilize the expertise of stakeholder entities and organizations, including Amateur Radio, emergency response and disaster communications.

Please contact Committee Chairman Henry Waxman (D-CA-30) and Ranking Member Joe Barton (R-TX-6), urging them to send this bipartisan bill to the House floor for adoption. A sample letter can be found here <http://www.arrl.org/govrelations/sample-letter-S-1755.doc>. Send your letters urging consideration of S 1755 by the House Committee on Energy and Commerce to Rep Waxman via fax at 202-225-2525, and to Rep Barton via fax at 202-225-1919. Also, please fax a copy of your letters to the ARRL's Washington representative, Chwat & Co at 703-684-7594.

For more information on S 1755, please visit the ARRL Government Relations Web page <http://www.arrl.org/govrelations/>.

X50 Antenna Tips

I saw the notes (January issue) about those who may use the X50 antenna. I have one as my main carry out antenna. I keep coax attached. I used the mounting brackets to attach it to a piece of PVC pipe that slips over my fiberglass mast assembly I use as an emergency antenna support. That way I don't have to use a wrench to take the base apart to attach coax or to a mast. It goes together in less than a minute after the mast is put together. - Chris Rose, KB8UIH, Midland, Michigan

==> K1CE FOR A FINAL

I lost my wonderful wife, Joanne Palm, W1GUN, to cancer this month. I met her at ARRL HQ in Newington in 1980 when we both worked there; she was a secretary in the old Communications Department. Joanne always enthusiastically supported my passion for Amateur Radio, and when I was traveling away from home on the hamfest and convention circuit for many weekends of my HQ staff years. Thanks to the vanity call sign program, she was able to obtain her father's call sign.

While she was home on Hospice these last few months, we communicated around the house using two Yaesu hand-held 2-meter rigs that I was testing for a QST Product Review. For example, if I was working on this newsletter in the ham shack, she could call me if she needed anything. It was fun, too!

I am reminded of the timeless "The Amateur's Code," written by Paul M. Segal, W9EEA, in 1928: The amateur is "BALANCED . . . radio is an avocation, never interfering with duties owed to family, job, school or community." While Amateur Radio was also a vocation for me, I always ensured that I spent more time with Joanne, devoting it to her needs and interests. This was not so much because of duty, but for love. We both enjoyed doing things together, no matter what they were.

Give your spouse or significant other an extra hug for me today, and thank him or her for their support of your Amateur Radio passion. - 73, Rick, K1CE

Before the Federal Communications Commission Washington, D.C. 20554

In the Matter of

Amendment of Part 97 of the Commission's Rules Regarding Amateur Radio Service Communications During Government Disaster Drills))))))

WP Docket No. 10-72

NOTICE OF PROPOSED RULEMAKING

Adopted: March 18, 2010 Released: March 24, 2010

Comment Date: (30 days after publication in the Federal Register).
Reply Comment Date: (45 days after publication in the Federal Register).

By the Commission:

I. INTRODUCTION

1. In this Notice of Proposed Rulemaking, we propose to amend the Commission's amateur radio service rules with respect to amateur radio operations during government-sponsored emergency preparedness and disaster readiness drills and tests. Although public safety land mobile radio systems are the primary means of radio-based communications for emergency responders, experience has shown that amateur radio has played an important role in preparation for, during, and in the aftermath of, natural and man-made emergencies and disasters. Current rules provide for amateur radio use during emergencies. At the same time, the rules prohibit communications in which the station licensee or control operator has a pecuniary interest, including communications on behalf of an employer. While there are some exceptions to this prohibition, there is none that would permit amateur station control operators who are employees of public safety agencies and other entities, such as hospitals, to participate in drills and tests in preparation for such emergency situations and transmit messages on behalf of their employers during such drills and tests. Accordingly, we propose to amend the rules to provide that, under certain limited conditions, amateur radio operators may transmit messages during emergency and disaster preparedness drills, regardless of whether the operators are employees of entities participating in the drill.

II. BACKGROUND

2. One of the fundamental principles underlying the amateur radio service is the "[r]ecognition and enhancement of the value of the amateur service to the public as a voluntary noncommercial communication service, particularly with respect to providing emergency communications." Further, the rules state that "[n]o provision of these rules prevents the use by an amateur station of any means of radio communication at its disposal to provide essential communication needs in connection with the immediate safety of human life and immediate protection of property when normal communication systems are not available." Indeed, amateur radio operators provide essential communications links and facilitate relief actions in disaster situations. While land mobile radio services are the primary means of conducting emergency communications, amateur radio plays a unique and critical role when these primary facilities are damaged, overloaded, or destroyed. For example, during Hurricane Katrina, amateur radio operators volunteered to support many agencies, such as the Federal Emergency Management Agency, the National Weather Service, and the American Red Cross. Amateur radio stations provided urgently needed wireless communications in many locations where there was no other means of communicating and also provided other technical aid to the communities affected by Hurricane Katrina.

3. Since amateur radio is often an essential element of emergency preparedness and response, many state and local governments and public safety agencies incorporate amateur radio operators and the communication capabilities of the amateur service into their emergency planning. In this regard, some entities, such as hospitals, emergency operations centers, and police, fire, and emergency medical service stations, have emphasized the participation of their employees who are amateur station operators in emergency and disaster drills and tests. For example, a representative of the New Orleans Urban Area Security Initiative recently emphasized the importance of conducting emergency drills and the need for amateur participation.

4. The Commission's rules expressly permit operation of amateur stations for public service communications during emergencies, and on a voluntary basis during drills and exercises in preparation for such emergencies. Given, however, that the Amateur Radio Service is primarily designated for "amateurs, that is, duly authorized persons interested in radio technique solely with a personal aim and without pecuniary interest," the rules expressly prohibit amateur stations from transmitting communications "in which the station licensee or control operator has a pecuniary interest, including communications on behalf of an employer." Accordingly, public safety entities seeking to have employees operate amateur stations during government-sponsored emergency preparedness and disaster drills presently must request a waiver.

III. DISCUSSION

5. We seek comment on whether to amend the rules to permit amateur radio operators to participate in government-sponsored emergency and

disaster preparedness drills and tests, regardless of whether the operators are employees of the entities participating in the drill or test. The rules already recognize the importance of amateur radio in emergencies, and permit participation in such drills and tests by volunteers (i.e., non-employees of participating entities). As noted above, experience has shown that amateur operations can and have played an essential role in protecting the safety of life and property during emergency situations and disasters. And as evidenced by recent waiver requests, state and local government public safety agencies and other entities often conduct disaster and emergency preparedness drills to be best-prepared for such eventualities. The proposed rule would obviate the need for a waiver in such instances by allowing employees of public safety agencies and other entities to operate amateur stations for testing and drilling of emergency communications preparedness. We thus tentatively conclude that employee status should not preclude or prevent participation in government-sponsored emergency and disaster tests and drills. Further, we tentatively conclude that extending authority to operate amateur stations during such drills will enhance emergency preparedness and thus serve the public interest.

6. In reaching these tentative conclusions, we do not disturb the core principle of the amateur radio service as a voluntary, non-commercial communication service carried out by duly authorized persons interested in radio technique with a personal aim and without pecuniary interest. Rather, we believe that the public interest will be served by a narrow exception to the prohibition on transmitting amateur communications in which the station control operator has a pecuniary interest or employment relationship, and that such an exception is consistent with the intent of the amateur radio service rules. Accordingly, we propose that amateur operations in connection with emergency drills be limited to the duration and scope of the drill, test or exercise being conducted, and operational testing immediately prior to the drill, test or exercise. 7. Furthermore, we propose that the emergency tests and drills must be sponsored by Federal, state, or local governments or agencies, in order to limit the narrow exception to ensure that drills further public safety. We note, however, that there may be circumstances where conducting emergency drills for disaster planning purposes, even if not government-sponsored, would serve the public interest. Accordingly, we seek comment on whether we should permit employee operation of amateur stations during non-government-sponsored emergency drills, if the purpose of the drill is to assess communications capabilities, including amateur radio, in order to improve emergency preparedness and response.

8. A large number of agencies and organizations at the state and local levels coordinate with their local volunteer amateur radio operators to conduct drills and exercises in concert with other modes of communication. This joint activity is essential to allow for a practiced response on the part of the first responder community.

Because some of those drills and exercises include transmission of amateur communications by employees of participating entities, we believe the proposed rule changes would be in the public interest, consistent with ongoing national emergency preparedness and response priorities. We therefore seek comment on the tentative conclusions contained herein.

III. PROCEDURAL MATTERS

9. Initial Regulatory Flexibility Certification. The Regulatory Flexibility Act (RFA) requires an initial regulatory flexibility analysis to be prepared for notice and comment rulemaking proceedings, unless the agency certifies that "the rule will not, if promulgated, have a significant economic impact on a substantial number of small entities." The RFA generally defines the term "small entity" as having the same meaning as the terms "small business," "small organization," and "small governmental jurisdiction." In addition, the term "small business" has the same meaning as the term "small business concern" under the Small Business Act. A "small business concern" is one which: (1) is independently owned and operated; (2) is not dominant in its field of operation; and (3) satisfies any additional criteria established by the Small Business Administration (SBA).

10. Because "small entities," as defined in the RFA, are not persons eligible for licensing in the amateur service, this proposed rule does not apply to "small entities." Rather, it applies exclusively to individuals who are the control operators of amateur radio stations. Therefore, we certify that the proposals in this Notice of Proposed Rulemaking, if adopted, will not have a significant economic impact on a substantial number of small entities. The Commission will send a copy of the Notice of Proposed Rulemaking, including a copy of this Initial Regulatory Flexibility Certification, to the Chief Counsel for Advocacy of the SBA. This initial certification will also be published in the Federal Register.

11. The rulemaking shall be treated as a "permit-but-disclose" proceeding in accordance with the Commission's ex parte rules. Persons making oral ex parte presentations are reminded that memoranda summarizing the presentations must contain summaries of the substance of the presentations and not merely a listing of the subjects discussed. More than a one or two sentence description of the views and arguments presented generally is required. Other requirements pertaining to oral and written presentations are set forth in Section 1.1206(b) of the Commission's rules.

12. Comment and Reply Comment Filing Instructions. Pursuant to sections 1.415 and 1.419 of the Commission's Rules, 47 C.F.R. ï¿½ï¿½ 1.415, 1.419, interested parties may file comments and reply comments on or before the dates indicated on the front page of this document. Comments may be filed using: (1) the Commission's Electronic Comment Filing System (ECFS), (2) the Federal Government's eRulemaking

Portal, or (3) by filing paper copies. See Electronic Filing of Documents in Rulemaking Proceedings, 63 Fed. Reg. 24121 (1998).

ï¿½ Electronic Filers: Comments may be filed electronically using the Internet by accessing the ECFS: http://www.fcc.gov/cgb/ecfs/ or the Federal eRulemaking Portal: http://www.regulations.gov. Filers should follow the instructions provided on the website for submitting comments. ï¿½ For ECFS filers, if multiple docket or rulemaking numbers appear in the caption of this proceeding, filers must transmit one electronic copy of the comments for each docket or rulemaking number referenced in the caption. In completing the transmittal screen, filers should include their full name, U.S. Postal Service mailing address, and the applicable docket or rulemaking number. Parties may also submit an electronic comment by Internet e-mail. To get filing instructions, filers should send an e-mail to ecfs@fcc.gov, and include the following words in the body of the message "get form." A sample form and directions will be sent in response.

ï¿½ Paper Filers: Parties who choose to file by paper must file an original and four copies of each filing. If more than one docket or rulemaking number appears in the caption of this proceeding, filers must submit two additional copies for each additional docket or rulemaking number. Filings can be sent by hand or messenger delivery, by commercial courier, or by first-class or overnight U.S. Postal Service mail (although we continue to experience delays in receiving U.S. Postal Service mail). All filings must be addressed to the Commission's Secretary, Federal Communications Commission. ï¿½ The Commission's contractor will receive hand-delivered or messenger-delivered paper filings for the Commission's Secretary at 236 Massachusetts Avenue, NE, Suite 110, Washington DC 20002. The filing hours at this location are 8:00 am to 7:00 pm. All hand deliveries must be held together with rubber bands or fasteners. Any envelopes must be disposed of before entering the building. ï¿½ Commercial overnight mail (other than U.S. Postal Service Express Mail and Priority Mail) must be sent to 9300 East Hampton Drive, Capitol Heights, MD 20743. ï¿½ U.S. Postal Service first-class, Express, and Priority mail must be addressed to 445 12th Street, SW, Washington DC 20554. People with Disabilities: To request materials in alternative formats for people with disabilities (Braille, large print, electronic files, audio format), send an e-mail to fcc504@fcc.gov or call the Consumer and Government Affairs Bureau at (202) 418-0530 (voice), (202) 418-0432 (tty).

13. Interested parties may view documents filed in this proceeding on the Commission's Electronic Comment Filing System (ECFS) using the following steps: (1) Access ECFS at http://www.fcc.gov/cgb/ecfs. (2) In the introductory screen, click on "Search for Filed Comments." (3) In the "Proceeding" box, enter the numerals in the docket number. (4) Click on the box marked "Retrieve Document List." A link to each document is provided in the document list. Filings and comments are

also available for public inspection and copying during regular business hours at the FCC Reference Information Center, 445 12th Street, SW, Room CY-A257, Washington, DC 20554. Filings and comments also may be purchased from the Commission's duplicating contractor, Best Copy and Printing, Inc., Portals II, 445 12th Street, SW, Room CY-B402, Washington, DC 20554, telephone 1-800-378-3160, or via e-mail to fcc@bcpiweb.com. This Notice of Proposed Rulemaking also may be downloaded from the Commission's web site at http://www.fcc.gov/.

14. Congressional Review Act. The Commission will send a copy of this Notice of Proposed Rulemaking to Congress and the Government Accountability Office pursuant to the Congressional Review Act, see 5 U.S.C. ï¿½ 801(a)(1)(4).

15. Paperwork Reduction Act Analysis. This Notice of Proposed Rulemaking does not contain proposed information collection(s), subject to the Paperwork Reduction Act of 1995, Public Law 104-13. In addition, therefore, the Notice of Proposed Rulemaking does not contain any proposed new or modified "information collection burden for small business concerns with fewer than 25 employees," pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107-198, see 44 U.S.C. ï¿½ 3506(c)(4).

16. Federal Rules that May Duplicate, Overlap, or Conflict with the Proposed Rules. None.

17. For further information, contact Jeffrey Cohen, Senior Legal Counsel, Public Safety and Homeland Security Bureau, (202) 418-0799, or via e-mail at Jeff.Cohen@fcc.gov.

IV. ORDERING CLAUSES

18. Accordingly, IT IS ORDERED, pursuant to sections 4(i), 303(r), and 403 of the Communications Act of 1934, 47 U.S.C. ï¿½ï¿½ 154(i), 303(r), and 403, that this Notice of Proposed Rulemaking is HEREBY ADOPTED.

19. IT IS FURTHER ORDERED that the Commission's Consumer and Governmental Affairs Bureau, Reference Center, SHALL SEND a copy of this Notice of Proposed Rulemaking, including the Initial Regulatory Flexibility Analyses, to the Chief Counsel for Advocacy of the Small Business Administration.

Federal Communications Commission Marlene H. DortchSecretary

APPENDIX

Proposed Rules

Part 97 of Chapter 1 of Title 47 of the Code of Federal Regulations is amended as follows:

The authority citation for part 97 continues to read as follows:

AUTHORITY: 48 Stat. 1066, 1082, as amended; 47 U.S.C. 154, 303. Interpret or apply 48 Stat. 1064-1068, 1081-1105, as amended; 47 U.S.C. 151-155, 301-609, unless otherwise noted.

1. Section 97.113 is amended by revising paragraph (a)(3), adding new paragraphs (a)(3)(i) and (a)(3)(ii), redesignating paragraphs (c) and (d) as new paragraphs (a)(3)(iii) and (a)(3)(iv) respectively, and redesignating paragraphs (e) and (f) as (c) and (d) respectively, to read as follows:

ï¿½ 97.113 Prohibited transmissions.

(a) ***

(3) Communications in which the station licensee or control operator has a pecuniary interest, including communications on behalf of an employer, with the following exceptions:

(i) A control station operator may participate on behalf of an employer in a government-sponsored emergency preparedness or disaster readiness test or drill, limited to the duration and scope of such test or drill, and operational testing immediately prior to such test or drill.

(ii) An amateur operator may notify other amateur operators of the availability for sale or trade of apparatus normally used in an amateur station, provided that such activity is not conducted on a regular basis.

==> ARRL EXECUTIVE COMMITTEE EXAMINES PROPOSED VANITY CALL SIGN CHANGES, LEGISLATIVE, REGULATORY ISSUES, MORE

The ARRL Executive Committee (EC) held its first 2010 meeting Saturday, March 13 in Denver. The EC worked through a lengthy agenda that for the first time had been shared in advance with ARRL members -- the result of an ARRL Board action at its January meeting intended to increase transparency in the governance of the organization.

The EC administers the League's affairs in between Board meetings. It consists of the President (Kay Craigie, N3KN), five Directors elected annually by the Board, and - without vote - the First Vice President (Rick Roderick, K5UR) and Executive Vice President (David Sumner, K1ZZ). For 2010 the Director members are Tom Frenaye, K1KI (New England), George R. Isely, W9GIG (Central), Brian Mileshosky, N5ZGT (Rocky Mountain), Bob Vallio, W6RGG (Pacific) and Dr David Woolweaver, K5RAV (West Gulf). Also in attendance at the meeting were General Counsel Chris Imlay, W3KD; Vice President Bruce Frahm, K0BJ, and International Affairs Vice President Jay Bellows, K0QB. Read more here <http://www.arrl.org/news/stories/2010/03/25/11404/?nc=1>.

==> FCC NEWS: FCC ISSUES NOTICE OF PROPOSED RULE MAKING ON GOVERNMENT DISASTER DRILLS AND AMATEUR RADIO

On March 24, the FCC released a Notice of Proposed Rule Making (NPRM) proposing to amend the Commission's Amateur Radio Service rules "with respect to Amateur Radio operations during government-sponsored emergency preparedness and disaster readiness drills and tests." While current rules provide for Amateur Radio use during emergencies, the rules prohibit communications where the station licensee or control operator has a pecuniary interest, including communications on behalf of an employer. In October 2009, the FCC released a Public Notice clarifying the Commission's rules relating to the use of Amateur Radio by licensed amateurs participating in drills and exercises on behalf of their employers. To date, the FCC has granted several dozen waivers under this new policy.

The FCC notes that while there are some exceptions to this prohibition, "there is none that would permit amateur station control operators who are employees of public safety agencies and other entities, such as hospitals, to participate in drills and tests in preparation for such emergency situations and transmit messages on behalf of their employers during such drills and tests." Based on that, the Commission proposes to amend the rules to provide that, under certain limited conditions, Amateur Radio operators may transmit messages during emergency and disaster preparedness drills, regardless of whether the operators are employees of entities participating in the drill. Read more here <http://www.arrl.org/news/stories/2010/03/25/11405/?nc=1>.

==> GLITCH DELAYS LAUNCH OF NEW ARRL WEB SITE

The ARRL's launch of a new Web site has been delayed following problems that appeared as the huge computer programs were being transferred to their main Web server. Normally the Web site connects ham radio operators around the world, dynamically presenting the services that ARRL offers the ham radio community at www.arrl.org. "When we tried to switch over to the new Web site on Wednesday, we encountered unanticipated technical issues during the process of transferring to the new Web site," said ARRL Chief Operating Officer Harold Kramer, WJ1B. "It appears that with all of the new technology and vast simultaneous hits to the site, the code had problems keeping up. We are working to fix the issues and should be online very soon. We have temporarily switched back to the old Web site until these issues are resolved. Obviously, we are trying to complete this transfer as quickly as possible and we will keep you informed of our progress."

==> DAYTON HAMVENTION(R): ANNOUNCING THE 2010 DAYTON HAMVENTION AWARD WINNERS

Three Amateur Radio operators who have made significant contributions to the Amateur Radio Service will be honored guests when the 2010 Dayton Hamvention(R) opens in Hara Arena on May 14. In addition, Hamvention organizers will recognize a Club of the Year in keeping with the 2010 Hamvention theme: Amateur Radio Clubs Worldwide: The Lifeline.

"Choosing the finalists was a difficult process due to the number of fine nominations," said Hamvention Awards Committee Chairman Frank Beafore, WS8B. Click here <http://www.arrl.org/news/stories/2010/03/25/11403/?nc=1> to read more about these three deserving individuals and a club that personifies what Amateur Radio is all about.

==> LEGISLATIVE AFFAIRS: ARRL REQUESTS SUPPORT FOR S 1755

Senate Bill 1755 -- The Amateur Radio Emergency Communications Enhancement Act of 2009 introduced in October 2009 by Senators Joe Lieberman (ID-CT) and Susan Collins (R-ME) -- has unanimously passed the US Senate and has been sent to the US House of Representatives for consideration and now sits in the House Committee on Energy and Commerce. The ARRL is asking its membership to contact the leadership of the Energy and Commerce committee, requesting support and action on moving S 1755 through the committee. S 1755 accomplishes the same things as HR 2160; HR 2160 was introduced in April 2009 by Rep Sheila Jackson Lee (D-TX-18). Since S 1755 has already been approved by the Senate, moving it forward in the House will simplify the process. Click here <http://www.arrl.org/news/stories/2010/03/10/11385/?nc=1> for more information, including instructions on how to encourage the committee's leadership to support S 1755.

==> ARRL SEEKS INPUT FOR NEW IARU REGION 2 BAND PLAN

The International Amateur Radio Region 2 conference -- to be held later this year in El Salvador -- brings together delegations from the national Amateur Radio Societies in the Western Hemisphere. One of the topics on the agenda will be the Region 2 HF band plan. This band plan is "harmonized with" -- spectrum management-speak for "very similar to" -- the IARU Region 1 and Region 3 band plans. At this year's conference, the IARU Member-Societies will consider possible changes to the Region 2 band plan.

The ARRL is cooperating with this procedure by inviting input to be sent to the ARRL Board of Directors' Band Planning Committee. The committee will review the existing Region 2 band plan, consider input from the amateur community and make recommendations to the ARRL Board for submission to IARU Region 2. Be sure to get your comments in by Monday, April 5. Read more here <http://www.arrl.org/news/stories/2010/03/04/11374/?nc=1>.

==> SOLAR UPDATE

Tad "We are too much like oysters observing the Sun through the water, and thinking that thick water the thinnest of air <http://www.classicreader.com/book/309/7/>" Cook, K7RA, reports: The average daily sunspot numbers were down nearly 5 points this week from last week -- 24.6. A new sunspot group 1057 appeared on March 23, and by March 24, it was 25 times its original size. It covered 10 one-millionths of the solar hemisphere on Tuesday; on Wednesday, it

grew to 25 one millionths. This is the largest area seen since February 11. Just past the Northern Hemisphere's spring equinox, radio conditions are good and geomagnetic indices are still quiet. In fact, the mid-latitude A index for March 21-23 was 0 for all days. Look for more information on the ARRL Web site on Friday, March 26. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/tis/info/propagation.html>. This week's "Tad Cookism" brought to you by Herman Melville's Moby Dick <http://www.classicreader.com/book/309/7/> (Chapter 7, "The Chapel").

==> THIS WEEK ON THE RADIO

This week, the CQ WW WPX Contest (SSB) is March 27- 28. Next week, look for the Lighthouse Spring Lites QSO Party on April 1-11. The QRP ARCI Spring QSO Party, the SP DX Contest and the EA RTTY Contest are April 3-4. The Missouri QSO Party is April 3-5 and the Low Power Spring Sprint is April 5. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests/>, the ARRL Contest Update <http://www.arrl.org/contests/update/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/contests/spev.html>.

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

Registration remains open through Sunday, April 25, 2010, for these online course sessions <http://www.arrl.org/cep/student/> beginning on Friday, May 7, 2010: Amateur Radio Emergency Communications Level 1; Antenna Modeling; Radio Frequency Interference; Antenna Design and Construction; Propagation; Analog Electronics, and Digital Electronics. To learn more, visit the CEP Course Listing page <http://www.arrl.org/cep/student> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/arrlletter/.

HAMVENTION 2010: DAYTON AWARD WINNERS ANNOUNCED - PART 1

The Emmy, Oscar and Tony awards of amateur radio have been announced, and this year there's a ham radio Grammy as well. But its not for music. Rather its for being for what the Dayton Hamvention Awards Committee considers the club most representative of the hobby. Bruce Tennant, K6PZW, is here with the story of this years Dayton award winners:

--

W4QO: "Well it was a total shock. In fact I almost got weak in the knees and fell to the floor because I didn't think they got the right guy. So it was a big shock to me."

**

That's 2010 Dayton Radio Amateur of the Year Jim Stafford, W4QO, telling Amateur Radio Newsline how he felt when he received the call from the Hamvention Awards Committee. A call telling him that he had been selected as this years top honoree.

According to the Hamvention Awards Committee, W4QO was selected for this honor based on his half century of dedication to the hobby during which he has accomplished so much that we have no time to list them all, but here ate some of them.

Stafford is a founding member of the North Georgia QRP Club, he is the past president of the North Fulton Amateur Radio League, the past president of the Metro Atlanta Telephone Pioneer Amateur Radio Club, and is a member of several other ham radio organizations. And back in 1993 he was named as the recipient the prestigious Herb Brier Instructor of the Year award by the American Radio Relay League. . He tells Amateur Radio Newsline that he enjoys just about all aspects of ham radio from DXing to home-brewing to working with youngsters who want to get to know the thrill of ham radio. He also says that it all began when he himself was just a kid:

--

W4QO: "I grew up on a farm as farm-boy in Indiana and I discovered amateur radio when I was about 15 and got my license when I was 16. And that really shaped my entire life because that lead me into looking into things like Electrical Engineering and colleges and universities that taught that. So I feel as though ham radio has played a big role in my life and anything I have done to help other people has been kind of motivated by saying '-hey it worked for me and maybe it will work for you.' "

--

The Hamvention says that it is honoring Stafford for his 50 years of service to amateur radio, his support for public service and unending efforts to recruit and develop new hams of all ages. Among his other accomplishments the Awards Committee noted was his service to the 14000 member QRP Amateur Radio Club International. Better known as QRP ARCI this group is the world-wode organization promoting the construction and operation of low powered amateur radio gear.

--

W4QO: "QRP is kind of misunderstood in a way. Most QRP'ers are tinkerers. They like to build things. And its easier to build a 5 watt radio or transceiver than it is to build a 100 watt or a 1000 watt transceiver and it costs a lot less and you can do a lot more of them if you build small transceivers. And so most people who are QRP'ers are really -- I would say -- first into construction -- build things -- build kits -- make kits -- and so on. So the organization is promoting -- as their magazine says -- it's the QRP construction and operating sourcebook."

--

The recognition of Jim Stafford, W4QO, has been greeted with enthusiasm by the Georgia ham radio community. In a posting to Q-R-Zed dot com, Bob Ross,WA2EXZ, of Roswell says that this is most deserving recognition to a great amateur radio operator as well as a wonderful man. He says that Jim Stafford gives so much of his time and energy to the hobby and service of amateur radio. He adds that Stafford has a tremendous passion for teaching others and especially the younger crowd. A group that W4QO seeks out to learn about and enjoy amateur radio.

And in a related item, the first ever Hamvention Radio Club of the Year Award will be presented to the North Fulton Amateur Radio League of Atlanta Georgia. This for both its resurgence as a major as a major provider of emergency communications as well as its work in public service and training. Wes Lamboley,W3WL, is a club spokesman. He tells Newsline that the success of the rebirth of the club is really about its members:

--

W3WL: "Its about a whole bunch of people that are really inspired to pass the word about what a great hobby amateur radio is. And our leader in getting all of this going is the ham of the year. So we are very pleased with his being the awardee this year and we are very pleased about our club being recognized as well. But we couldn't have done it without Jim Stafford's leadership".

--

By way of background, in 2006 the North Fulton Amateur Radio League was on the verge of extinction. It had only 6 to 12 people attending its regular low budget dinner and rag chew. Today, the club has grown to 260 very active members. 81% of the membership belong to the ARRL and 15% are youth. As a result, the North Fulton Amateur Radio League is now considered a truly exciting and dynamic organization, and one that proves that amateur radio clubs can change to meet the times.

HAMVENTION 2010: DAYTON AWARD WINNERS ANNOUNCED - PART 2

The 2010 Hamvention Special Achievement Award winner is Richard Ross, K2MGA. He is being honored for his half century career dedicated to serving ham radio through CQ Magazine. Better known as Dick Ross to his many friends world-wide, K2MGA began his career at CQ in 1960. He became Editor of CQ in July, 1964, when the magazine's then owner, Cowan Publishing, moved its offices from New York City to Long Island. By 1979, he was General Manager and Controller for all of Cowan Publications, which back then consisted of seven magazines. CQ was not the strongest of them, and Publisher Richard Cowan, WA2LRO, was considering shutting it down. Sensing an opportunity, K2MGA and his successor as CQ Editor, the late Alan Dorhoffer, K2EEK, bought the magazine from the Cowan family and set out to build it into a totally new publication that would instill a new vitality to the ham radio hobby. And it did.

Dick and Al quickly got the new CQ on a solid footing and within three years, they were ready to start expanding. Popular Communications was introduced in 1982. In the years since then, CQ has published a variety of magazines and books. In 1992, the company added videos to its product line, followed by CDs, DVD's calendars and more. Today, CQ Communications publishes CQ, Popular Communications, CQ VHF and WorldRadio Online. The latter, acquired in late 2008, is the first major on-line-only ham radio magazine.

But that's not where the K2MGA story ends. Over the course of the past 50 years, Dick Ross has also become a respected leader in the ham radio community. He works closely with the many businesses that make up the ham industry, as well as with contesters, DXers and other active hams through oversight of the CQ contest and award programs. He is also responsible for starting the CQ DX, CQ Contest and CQ Amateur Radio Halls of Fame. Each of these honors outstanding amateurs in various areas of the hobby.

Dick Ross is keenly aware that the real future of amateur radio lies in the next generation of hams. As such he is a fervent supporter of bringing more youth to our hobby. He dedicates space in CQ and Worldradio Online to the achievements in ham radio by its youngest members through the "Kids Korner" column in CQ written by teenager Brittany Decker, KB1OGL. Worldradio OnLine features the longtime popular "Youth Column" penned by 1987 Hamvention Radio Amateur of the Year, Carole Perry, WB2MGP.

In yet another youth oriented undertaking, since 1996, Dick and CQ have been one of two key corporate underwriters -- the other being Vertex-Standard / Yaesu -- of the "Amateur Radio Newsline Young Ham of the Year Award." As a result, beginning in 1996 everyone selected to be a Young Ham of the Year Award recipient has been offered the opportunity to attend Spacecamp-Huntsville and take the course of his or her choice.

Last but by no means least, this years Technical Achievement Award winner is Simon Brown, HB9DRV. Brown is being honored for his for the development of Ham Radio Deluxe. Ham Radio Deluxe or H-R-D is a suite of free Windows-based programs providing computer control for commonly used transceivers and receivers. It also includes the mapping, satellite tracking and the digital mode program called Digital Master 780.

Simon Brown was first licensed GD8IQM in February 1974. He became GD4ELI in September 1975. He now resides in what he describes as the beauty of the Swiss Alps, near Laax, Switzerland. After taking a break of 17 years from amateur radio he became licensed as HB9DRV and his interest in applying digital technology to amateur radio lead to the creation of Ham Radio Deluxe.

For the Amateur Radio Newsline, I'm .Bruce Tennant, K6PZW, in Los Angeles.

--

This years Hamvention Awards winners will be honored at Hamvention 2010 slated for the weekend of May 14th to the 16th at the Hara Arena in suburban Dayton, Ohio. In the meantime we at Amateur Radio Newsline join with the Hamvention Awards Committee and the world wide amateur radio

community in congratulating this years honorees. (ARNewsline(tm) with some information provided by Hamvention 2010)

**

MANES IN THE NEWS: FCC HAM RADIO ENFORCER TO ATTEND GREATER BALTIMORE HAMBOREE

If you hear this before the weekend of March 27 & 28th then be aware that the Greater Baltimore Hamboree and Computerfest will be held rain or shine, at the Maryland State Fairgrounds. One of those speaking will FCC chief ham radio rules enforcer, Laura Smith. For more information go to www.gbhc.org on the World-Wide-Web. (KB3JQQ)

RESCUE RADIO: FCC ISSUES NPRM TO PERMIT HAM EMPLOYEES TO TAKE ART IN DRILLS

The FCC has issued a Notice of Proposed Rule Making to permit limited use of hams in their employ to take part in emergency and disaster preparedness drills. Bill Pasternak, WA6ITF, is in the newsroom with the details:

--

The FCC is proposing a limited amendment the amateur radio service rules. This, with respect to operations during government-sponsored emergency preparedness and disaster readiness drills and tests.

Current rules provide for amateur radio use during emergencies. At the same time, the rules -- specifically section 97.113 (a)(3) -- prohibits communications in which the station licensee or control operator has a pecuniary interest. This includes any communications on behalf of an employer, whether direct or indirect. Translated it means that even if a ham employee is off the clock he or she cannot take part in emergency training exercises.

The FCC says that while there are some exceptions to this prohibition, there is currently none that would permit amateur station control operators who are employees of public safety agencies and other entities, such as hospitals, to participate in drills and tests in preparation for emergency situations. Nor may they transmit messages on behalf of their employers during such drills and tests.

The FCC notes that public safety land mobile radio systems are the primary means of radio-based communications for emergency responders. But it goes on to add that experience has shown that amateur radio has played an important role in preparation for, during, and in the aftermath of natural and man-made emergencies and disasters.

The FCC says that amateur radio is often an essential element of emergency preparedness and response. Because of this, many state and local governments and public safety agencies incorporate amateur radio operators and their communication capabilities into their emergency planning. In this regard, some entities, such as hospitals, emergency operations centers, and police, fire, and emergency medical service stations, have emphasized the participation of their employees who are amateur station operators in emergency and disaster drills and tests.

Based on what it terms as a public need, the FCC is proposing to amend Section 97.113 of the Amateur Service rules to provide that, under certain limited conditions, amateur radio operators may transmit messages during emergency and disaster preparedness drills.

This, regardless of whether the operators are employees of government entities participating in the drill. It also seeks comments on whether certain other drills that are not sponsored by government agencies -- such as those conducted by hospitals -- should be included in the proposed exemption as well.

WP Docket No. 10-72 will carry a commentary cutoff date of 30 days after publication its publication in the Federal Register. Reply comments will be due no later than 45 days after publication in the Federal Register. As we go to air those dates have not yet been announced.

In the Newsroom in Los Angeles, I'm Bill Pasternak, WA6ITF.

RESCUE RADIO: CHILIAN HAMS DRAW PRAISE FOR RESPONSE TO QUAKE

There has been high praise for the Radio Club of Chile and its members following the recent earthquake and its aftershocks. At least one television news report describes the Chilean radio amateurs as a group of dedicated operators scattered across the country, proving to be an information lifeline during recent events.

According to news reports, while telephones and the internet largely failed, many of the radio operators had back-up power and were able to provide vital lines of communication. These were picked up by National Radio Chile and rebroadcast, giving status information of the various affected areas. The report went further to say that claims that ham radio is dying were put to rest as these operators provided some truly vital communication links.

For its part, the Radio Club of Chile has expressed its thanks to the world's radio amateurs for keeping emergency frequencies free during their nation's time of need. (GB2RS)

**

RADIO LAW: CEPT TO MEET IN ISTANBUL

The International Amateur Radio Union Region 1 website reports that LZ1US will represent ham radio interests at the annual European Conference of Postal and Telecommunications Administrations or C-E-P-T Civil/Military meeting of the Frequency Management Working Group. That gathering takes place over the 30th and 31st of March. It will be followed by a meeting of the CEPT WRC 12 Conference Preparatory Group Project Team C running from April 6th to the 9th.

While there are no immediate matters to concern the amateur services during the Civil/Military meeting the IARU believes that it is always a good opportunity to have a presence. This, just in case matters arise that could affect amateur radio.

But the second meeting could affect amateur radio interests. The Project Team C meeting will discuss, among other things, WRC 12 Agenda Item 1 point 23. This is the International Amateur Radio Union proposal for a secondary frequency ham radio allocation around 500 kHz. (GB2RS)

**

NAMES IN THE NEWS: VE4JS RETURNED TO MANATOBA SM OF RAC

Some names in the news. First a word of congratulations to Jan Schippers, VE4JS, who was recently returned as Section Manager for Manitoba, Canada. This, for a two year term of office that will begin on July 1, 2010. Schippers was unopposed eliminating the need for a balloted election. (RAC)

HAMVENTION 2010: YOUTH FORUM ADDS PRIZE FOR ADULT ATTENDEES

Carole Perry, WB2MGP, reports that Icom has offered to donate a radio as a prize for the adults attending her three hour extended Youth Forum at Hamvention 2010. This, in addition to the gear it donates to reward the young speakers taking part in the session.

According to WB2MGP, this is the first time the adults can have a chance for a prize at the Youth Forum. She adds that Ray Novak, N9JA, of Icom America has been just terrific in supporting the session through the donation of prizes for the kids and now one for the adults as well.

This years Hamvention Youth Form will be on Saturday, May 15th, 9:15 a.m. to 12:15 p.m.. The session will be held in Meeting Room 1 at the Hara Arena in suburban Dayton, Ohio. (WB2MGP)

**

NAMES IN THE NEWS: THE YOUNG IN DXCC

And congratulations also to 8 year-old William Ferguson, KJ4EYZ. This after formally being presented his DXCC certificate at a Virginia DX Century Club meeting on March 16th.by the club's Vice President, Ron Young, W8RJL.

Bill Moore, NC1L, is the ARRL's Awards Branch Manager. He says that William's achievement makes him the youngest full member of the Virginia DXCC, and one of the youngest members of the DX Century Club.

William is the son of Rich Ferguson,, N2XQM. His 10-year old sister Carissa, KJ4EZA, already has 82 countries worked. (Southgate)

**

NAMES IN THE NEWS: KF4KWW REDESIGNS 2010 YHOTY NOMINATING FPRM

And a big thank-you to Dave Crawford, KF4KWW, who maintains the Dayton Hamvention website. Dave recently offered to redesigned our 2010 YHOTY nominating form. Thanks to his effort, the form in Microsoft Word is now a download, fill in the blanks, and mail or e-mail back. Go to our website, www.arnewsline.org -- scroll down to the words "2010 Young Ham Of The Year Nominations Now Being Accepted," right click on the word "Here" and have a look at Dave's creativity. Then print it out, fill it in and nominate a worthy youngster in your area. (ARNewsline(tm))

EMERGING TECHNOLOGY: NEW FORMAT OF HARD DRIVE STORAGE COMING IN 2011

Hard drives are about to undergo one of the biggest format shifts in 30 years. Amateur Radio Newslines Norm Seeley, KI7UP, has more:

--

By early 2011 all magnetic hard drives will use an advanced format that changes how they go about saving the data people store on them. The move to the advanced format will make it easier for hard drive makers to produce bigger drives that use less power and are more reliable. However, it might also mean problems for Windows XP users who swap an old drive for one using the changed format.

According to Science On-Line, since the days of the original DOS operating system, the space on a hard drive has been formatted into blocks 512 bytes

in size based on the floppy disks of that era. Each 512 byte sector has a marker showing where it begins and an area dedicated to storing error correction codes. In addition a tiny gap has to be left between each sector.

While 512 bytes made sense hard drives were only a few megabytes in size, its of less significance when drives can hold a terabyte or more of data. As a result, in large drives this wasted space where data cannot be stored can take up a significant proportion of the drive.

Drive makers say that moving to an advanced format of 4 kilobyte sectors means about eight times less wasted space. This will allow drives to devote twice as much space per block to error correction technology.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

Through the International Disk Drive Equipment and Materials Association all hard drive makers have committed to adopting the 4 Kilobyte advanced format by the end of January 2011. These manufacturers same have begun an education and awareness campaign to let people know about the introduction of the news advanced format. Also, to warn about the problems it could cause for users of older operating systems such as Windows XP or ME. This is because Windows XP, ME, 2000 and the like were all released well before the new 4 kilobyte format was decided on. (Science OnLine)

HAM RADIO IN SPACE: AO-51 FM REPEATER TO BE DEDICATED TO SCOUT JAMBOREE

AMSAT North America will be supporting the Boy Scouts of America 100th Anniversary Jamboree. This, by dedicating an AO-51 VHF UHF FM repeater in space for the event.

From Friday April 16th, at 15:00 UTC until Sunday April 18th at 19:00 UTC, an AO-51 repeater will be allocated for Jamboree use. The frequencies used will be 145.880 MHz uplink, and 435.150 MHz downlink. The mode will be narrowband FM and no tone access will be required.

All regular AO-51 users are requested to give priority to Jamboree stations or QSO's with Jamboree stations.

AMSAT adds that it wishes the Scouts good luck operating via the AO-51 satellite for this milestone event and so do we. (AMSAT)

**

HAM HAPPENINGS: INTERNATIONAL LIGHTHOUSE AND LIGHTSHIP WEEKEND NOW PLANNING

A total of 100 registrations have been received so far at the website collecting entries for the 2010 International Lighthouse and Lightship weekend. The event is slated for the weekend of August 21st and the 22nd.

This will be the 11th annual outing of this event sponsored by Scotland's Ayr Radio Group and its station GM0AYR. The registrations to date are from 19 countries with nearly half of them from Germany and Australia who always strongly support this fun event. Other countries taking part include Argentina, Belgium, Chile, Denmark and England to name only a few.

To register or check out the lighthouses already registered, visit the official website at illw dot net on the World-Wide-Web (ILLW)

THAT FINAL ITEM: 600 METERS ALIVE DOWN UNDER

And finally this week, an old Very Low Frequency transmitter has come back to life down-under thanks to the dedication of a group of ham radio operators. Jim Meachen, ZL2BHF, has the rest of the story:

--

The General User Radio Licence for Amateur Radio Operators detailed in the New Zealand Gazette of 18th February, and effective from the 1st of March, included the additional frequency range 505 - 515 KHz for New Zealand Amateur Radio Operators.

This new allocation was great news to the Suburban Amateur Radio Club Branch 86 NZART which is based at the Musick Memorial Radio Station at Bucklands Beach in Auckland. Established in 1942 the Musick Point radio

station with the callsign ZLD was formerly a base for the New Zealand Post Office aeronautical and maritime communications. Over the past decade or so members of the Suburban Amateur Radio Club have worked tirelessly restoring equipment associated with the 600 metre band to operating condition. I asked Ian Walker ZL1BFB the Chairman of Suburban Club what the new allocation would mean for the Club:

--

Actuality audio here: Hear it by downloading this weeks MP3 audio file at www.arnewsline.org

--

On Saturday 13th March the Suburban Amateur Radio Club held a special event to commemorate the introduction of 600 metres to the NZ Amateur Radio Bands. At zero hundred hours gmt former operator Ramon Chandler ZL1ARY threw the switch and ZL1ZLD was on the air on 512 KHz.

--

Actuality audio here: Hear it by downloading this weeks MP3 audio file at www.arnewsline.org

--

Since at this time not many New Zealand Amateurs have transmitting capability on 600 metres a call back frequency to ZL1ZLD was established 3686KHz. Operators said that it was rewarding to get a few call backs with acknowledged reception of ZL1ZLD's signal on 512KHz. Club Chairman Ian Walker ZL1BFB reflects on the occasion:

--

Actuality audio here: Hear it by downloading this weeks MP3 audio file at www.arnewsline.org

--

Indeed, restoration work at the station has been a project over many years and how rewarding it is for the Suburban Amateur Radio Club team to see the Dansk transmitter in service once again on 600 metres.

You can find more information on the Suburban Amateur Radio Club and the Music Memorial Radio Station ZL1ZLD under Northern Branches on the NZART Web page.

For the Amateur Radio Newsline, I'm Jim Meachen, ZL2BHF.

--

You can find more details on the Suburban Amateur Radio Club and the Musick Memorial Radio Station ZL1ZLD at http://www.nzart.org.nz/branches/sarc/index.htm) (ZL2BHF)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

Before we go, a reminder that the nominating period for the 2010 Amateur Radio Newsline Young Ham of the Year Award is now open. Each year, we here at the Amateur Radio Newsline in association with Vertex Standard Corporation -- the makers of Yaesu brand ham radio gear -- and CQ Magazine combine to honor a ham radio operator age 18 or younger for his or her contributions to ham radio or to society itself through ham radio.

All nominations and materials required by the official rules must be received by Amateur Radio Newsline no later than midnight on May 30th. Both "mail-in" and electronic submissions are being accepted this year. Full rules and a downloadable nominating form are now on our website at www.arnewsline.org. Just scroll down until you see "2010 Young Ham of the Year Awards Now Being Accepted" and click on the word "here" to download the directions and the form. You can also leave questions and comments on the official Young Ham of the Year Award page on Facebook dot com.

And less we forget, a speedy recovery to RAIN producer Hap Holly following back surgery and to Newsline's own Don Wilbanks AE5DW, and his wife Dawn on their recent weight loss surgery. We know that you join in wishing all three the very best.

For now, with Bill Pasternak, WA6ITF, at the editors desk -- who is also planning weight loss surgery, -- I'm Fred Vobbe, W8HDU, saying 73 and we thank you for listening.

MOONBOOUNCE from MALDIVES ISLANDS (8Q7/MJ64je)
Big NEWS Letter from Bodo, 8Q7-Team, dated 2010-03-24 07 UTC:
Greetings from the 8Q7QQ EME team. Again and again we have to fight
with some problems but we could fix everything more or less good.
After 25 QSOs on 2m our PA died but we could fix it and have now
only 350W left. Additionally we had to fight yesterday with a lock
out for several hours were we did not copy anything and probably
were not heard as well. We will continue to be QRV on 2m from moon
rise to moonset. Please pay attention to the limited window to NA.
This will get shorter from day to day. We encourage the stations from
NA to work us as soon as possible. Window to EU is not problem at all
6m will be on air daily up to 20deg elevation. Our schedule for the
other two bands will be at MMMonVHF, as well the LOG and FOTO:
http://www.mmmonvhf.de/latest.php?id=2896
LATEST NEWS from Dan, 8Q7-Team, dated 2010-03-25 12 UTC:
All very well at the Team. Over 140 QSOs on 2m and 5 QSOs on 6m. Vy
strange and difficult condx sometimes (lockouts, faraday, oneway)
Next complete Update tomorrow (26th afternoon)

N8CQ QRV 144Mhz Dubus EME
Got one of my "internet gaming" sons to help put up the portable H-frame this morning. Looks like I will be able to retain limited polarity rotation on 144Mhz also - at least 45 degrees of rotation at low elevation and 90% of rotation at higher elevations and still clear the ground. I am trying to mount the M2 yagis towards the ends which is a lot of dead weight but the H-frame was built for a much larger 432Mhz array so hopefully no problems with attempting this. Still lots of work to do to get ready for my first attempt on 144Mhz EME. 4 x 12 ele M2 yagis, limited pol. rotation, 1.5KW homebrew 8877PA I will post updated photos of the setup on my web page tomorrow when completed.

** 3C0C DX-pedition planned for early April is delayed **

The Guineans are working to repair the island's runway and it will take 2 or 3 months to finish. The good news is that they will take a 5 elements yagi for 6 metre +amp to the remote Annobon. http://www.3c0c-annobon.com/ other issue, after two weeks of daily African beacons into S. Europe, last night some PY stations were loud in EA8/CT3 and marginal in EA7/South CT, for the first transatlantic TEP opening since cycle 23rd started to decline, and that was long time ago. SOURCE: EA7KW, via The UKSMG Announcement

** T31 DX-pedition Cancellation Announcement Sept./Oct. 2010 **

It is with great regret that David (K3LP - Co-Leader) and I (Hrane as YT1AD - Leader) must inform the DX Community that after 16 months of planning our DX-pedition trip to T31 - Canton Island (http://www.yt1ad.info/t31/), slated for 11 days in Oct. 2010, the trip will be cancelled. We planned 6 stations fully equipped for HF plus two additional stations for UHF/VHF/Satellite plus 13-14 ops. Our goal was to make 100,000 plus QSOs much like our N8S - Swains Island DX-pedition in 2006. This decision is based on the March 7, 2010 announcement by the T31X team planned for June 2010 (http://www.uz1hz.com/pacificodyssey.html). Unfortunately, it is cheaper to send a smaller crew with three radios and two amplifiers. In light of this recent announcement, the total cost of the trip versus the uniqueness will evaporate prior to our arrival. For this reason, we will pick another location for a future date. Minus some team member partial cash contributions and planned equipment sponsors there were no cash donations made that need to be refunded. We will forfeit our $40K cash deposit on the boat and seek other places in 2011. Sincerely, T31F team 2010
SOURCE: tnx to Maurice, F5NQL, direct to MMMonVHF

** 9Q, DEMOCRATIC REPUBLIC OF CONGO **

Ghis, ON5NT (ex-9Q1NT), reports that Georges, VE2EK, will once again be active as 9Q1EK from Kinshasa very soon and will be the ONLY radio amateur station left in the DRC with a VALID LICENSE. According to George's BLOG <http://ve2ek.blogspot.com> (edited): "Soon... ! After several months of standby, I will be again on air. Due to a QSY of my QRA (in flat now..!!!). I'm going to install very soon my station on my prof. radio broadcast site. The available hours will be reduced. Station will be FT2000 with a OM2500HF. Dipoles for 160, 80, 40 + Delta loop + beam on 45m tower. Major activity will be on CW." Georges states that he has a second project (which will be later) on EME (144 MHz with 4 x 16 elements + 8877 and 432 MHz with 4 x 21 ele. + 8938). QSL direct via SM5DJZ. Also, by the LoTW or eQSL.

... for your News (pse use: http://www.mmmonvhf.de/newsuser.php)
to the next MMMonVHF Newsletter will be next thursday 21 UTC...

****
The VHF-DX-Portal MMMonVHF - Newsletter Credits & Info
****

Our Newsletter is compiled from the input of the USER of the VHF-DX-Portal MMMonVHF as well by a lot of free usable HF-V-U-SHF-Info-Sources and chats like ON4KST-, RU-VHF-DX-Net, EA-V-U-SHF-Chat, N0UK-Chat and others...

* Many thanks to all USER who send us info and news *

Wherever we found the info we always indicate the source of the info. If you get knowledge of an expedition, which is NOT listed at our VHF-DX-Portal MMMonVHF or if you have additional info for an expedition, PLEASE be so kind and send us this info at

* www.mmmonvhf.de/newsuser.php or www.mmmonvhf.de/kontact.php *

The MMMonVHF-Team is always trying to spread any expedition info as much up-to-date and reliable as possible and as long as the info does not violate with our MMMonVHF-Policy.

Have a lot of fun and enjoy the VHF-DX-Portal MMMonVHF!

73 de Guido "Guy" DL8EBW
on behalf of the MMMonVHF-Team

** EDITOR'S SPECIAL NOTICE: This week's bulletin was sent out earlier than normal to accommodate the late CQWW WPX SSB Contest announcements. Also, we wanted to provide the readers with a consolidated listing of the CQWW WPX SSB Contest participants.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Friday, 19th-March, through Friday, 26th-March there were 236 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1U, 4X, 5B, 5H, 5N, 5R, 5V, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9Q, 9V, 9Y, A3, A4, A6, A7, A9, AP, BV, BY, C2, C3, C5, C6, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, S7, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T2, T32, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TN, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK9W, VP2E, VP2M, VP2V, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK2, ZK3, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3V, TUNISIA. SWL Ashraf "Ash", 3V4-002 (KF5EY), will be active as 3V8SS from the "Radio Club Station of Tunisian Scouts" in Sousse, during the CQWW WPX SSB Contest (March 27-28th) as a Single-Op/All-Band/Low-Power entry. QSL via IZ8CCW. Read about Ashraf on the following Web page at: http://www.qsl.net/3v4-002

50TH CELEBRATION (Update). Last week we mentioned that Seppo, OH1VR, would be active from Curacao (SA-006, WLOTA LH-0942) between now and March 30th. Since then we found out that he is celebrating his 50th anniversary in Ham Radio and plans to be in the CQWW WPX SSB Contest (March 27-28th) in Curacao as a Single-Op/Single-Band (15m)/Low-Power entry. Seppo also plans to be active from Aruba on March 29th, as P41CW for 6-8 hours. He is also planning to be active from Crete as SV9/OH1VR between April 15-21st. PLEASE NOTE: Seppo plans to make 12 mini DXpeditions in 2010 - about one per month. Those of you who work him at least from eight (8) destinations will participate in a drawing of three small gifts in January 2011. You are invited to join this "lottery". For more details and updates, visit his Web page at: http://www.oh1vr.net

C4, CYPRUS. Operators Norman/5B4AIE, Vesselin/5B4AIV (LZ3CQ), Savi/LZ1UK and Andrey/LZ2HM will be active as C4I during the CQWW WPX SSB Contest (March 27-28th) as a Multi-? entry. QSL via LZ2HM.

CO8, CUBA. Eduardo, CO8LY, will be in the CQWW WPX SSB Contest (March 27-28th) as a Single-Op/Single-Band (15m)/Low-Power entry. QSL via EA7ADH. Also, look for Juan Carlos, CO8TW, to be active in the contest as a Single-OP/Single-Band (20m)/Low-Power entry. QSL via HB9SVT. His log will be on-line at: http://www.qsl.net/co8tw

CR3, MADEIRA ISLAND (AF-014). Members of the CT3 Madeira Contest Team will be active as CR3A during the CQWW WPX SSB Contest (March 27-28th) as a Multi-? entry. QSL via CT3EE. Operators mentioned are: Jose/CT3BD, Luis/CT3DL, Jose/CT3DZ, Jose/CT3EE, Antonio/CT3EN, Jose/CT3IA, Eusebio/CT3KU and Jose/CT3KY.

CQ8, AZORES (Brand New Prefix For The WPX Contest). A press release sent out by Martti/OH2BH and Jarmo/OH2BN states: "March 27-28 Weekend -- For the first time, the Azores Islands will be active under the callsign CQ8X in this weekend's WPX Contest, featuring a multinational team of CU2CE, CU2DX, DL6LAU, N6RC, OH1TV, OH2BH, OH2UA, OH6KN, OH6RM and OH8NC. They may even put another station on as CR2X to push for more Xtremes. Please kindly update your CTY file. This not only marks Arcala Extreme's (OH8X) Annual Meeting, now held in the Azores, but also forms part of their 3rd anniversary activity - OH8X, from Arctic Circle will be there as well courtesy of Marko, OH4JFN. As part of the upcoming festivities, the 2nd phase DX Summit will be made available to limited Beta testers for Easter. If you wish to be one, please kindly contact Radio Arcala by E-mail at: oh8x@sral.fi
QSL: CR2X/CQ8X via OH2BH and OH8X via OH2UA."

EB8, CANARY ISLANDS. Operators Pekka/EA8AH, Juan/EA8CAC, Manuel/EA8ZS, Sal/EA5DY, EA5FDV, Toivo/ES2RR and Jussi-Pekka/OH6RX will be active as EB8AH during the CQWW WPX SSB Contest (March 27-28th) possibly as a

Multi/2 or Multi/Multi entry. QSL via LoTW.

FK, NEW CALEDONIA: Some members of the Noumea ARC (FK8KAB) are repairing the club's tower which will be set up again very soon. Claude, FK8IF, reports that a multi-band Spiderbeam has been purchased, and it should be delivered in about under three weeks. Also, another center fed antenna is under construction for the lower bands. At the moment, a dipole is used for 20 meters and some openings to Europe are observed in the FK evenings. Claude is on the air every evening between 0600-0800z, between Monday and Friday, on CW between 14005-14015 kHz, using the club's callsign, operating barefoot. QSL via FK8KAB, direct (QRZ.com + return funds and SAE) or via the French Bureau.

FR, REUNION ISLAND. Cedric "Ced", F4EGZ, is once again active as FR/F4EGZ from St Pierre until April 19th. Activity will be on 20-6 meters, including 17/12m, using a Hexbeam for HF and a 3 element wire beam for 6m. He also plans to be in the CQWW WPX SSB Contest (March 27-28th) as a Single-Op/Low-Power entry, but only on 20/15/10 meters. QSL via his home callsign. PLEASE NOTE: Ced will accept 6m skeds via E-mail at: f4egz@yahoo.fr

H2, CYPRUS. Spyros, 5B4MF, will be using the special prefix callsign H22H during the CQWW WPX SSB Contest (March 27-28th) as a Single-Op/All-Band/ possibly as a QRP entry. He states, "If things run smoothly, I will continue QRP, otherwise I may switch to a higher power category." Please note that H22 is a unique prefix for the contest as nobody else will be using the special prefix. QSL via 5B4MF, direct (address on QRZ.com), by the Bureau or LoTW.

IOTA NEWS.....
EU-074. Members of the Union Francaise des Telegraphistes (UFT) and the Clippertton DX Club (CDXC) will be active as F8UFT from Brehat Island (DIFM MA-012, WLOTA LH-2010) between April 7-12th. Activity will be on the HF bands using CW, SSB and the Digital modes. Operators mentioned are: Jean/F5IRC, Christophe/F5UBH, Francois/F5JNE and Jean-Claude/F5IL. QSL for this operation ONLY is via F5UBH, direct (w/SAE and return funds) or by the Bureau. PLEASE NOTE: A SSB/Digital mode operator is needed. If interested, please contact as quickly as possible; Christophe, F5UBH, at: f5ubh-at-orange.fr

JX, JAN MAYEN (Update). The Jan Mayen DXpedition set between July 4-16th, 2011, (see OPDX.949) and lead by Stan, SQ8X, has announced their team of operators. Currently, they are: Stan/SQ8X (team leader), Pete/SQ9DIE, Vicky/SV2KBS, Decan/EI6FR, Leszek/NI1L, Tomek/SQ9C, Bernie/HB9ASZ, Pekka/ OH2TA and Deon/K6WH Deon. The group plans to be on the air for 10-12 days with 2-3 stations. More detils will be forthcoming later this year.

JY, JORDAN. Abdalla, JY5CC, will be active during the CQWW WPX SSB Contest (March 27-28th) as a Single-Op/All-Band entry. QSL via direct to JY5CC (see QRZ.com for address).

K4M MIDAWAY ATOLL DVD. It has been announced that the 2009 K4M DXpedition to Midway Atoll DVD by well known DXpedition video photographer James Brooks, 9V1YC, is now available for 25.00 USDs. To order yours today, go to: http://www.dxvideos.com/k4mvideo.htm

KH6BZF PROPAGATION FORECAST/REPORT (For March 29-April 4th)....
Mar 29 HN-LN SOLAR REFERENCE KEYS
Mar 30 LN-HN --------------------
Mar 31 AN BN - Below Normal
Apr 1 AN AN - Above Normal/Geomagnetic Level is QUIET
Apr 2 AN LN - Low Normal
Apr 3 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Apr 4 AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

KP3, PUERTO RICO. Felipe, NP4Z, will be active during the CQWW WPX SSB Contest (March 27-28th) as a Single-Op/All-Band/High-Power entry. QSL via N4AO.

MM0, SCOTLAND (WFF Op). Members of the GMFF Team <www.gmff.org> will be active as MM0DGR/p from Den of Airlie National Nature Reserve (GMFF-021) on March 27th. This is a new one for the WFF (World Flora and Fauna) award program <www.wff44.com>. The exact QTH for operating is not known, but it's going to be quite close to the Airlie Castle located in the Angus Glen. Activity will be on CW, SSB, and BPSK63, on all bands between 40-10 meters. They will also be in the CQWW WPX SSB Contest (March 27-28th), operating mainly on 40 and 20 meters; if propagation allows, possibly 15 and 10 meters. QSL via MM0DFV. Reference numbers are: WAB Square NO25, Grid Locator IO86KP, IOTA EU-005 and WLOTA LH-1234.

N8, UNITED STATES (USI Activity). Activity from North Bass Island will be sponsored by the Massillon Amateur Radio Club and will be active between 1200z Saturday, July 23rd and 1600z Sunday, July 24th. Callsign will be N8B or maybe N8B/P. Suggested frequencies (on or near) are:
SSB - 7250, 14250-260 and 28450
CW - 3530, 7025, 14040, 18098 and 21040 kHz.
There will be some 6 meters after they are officially recognized as Ohio-06L after 25 QSOs and two countries. Listen for QSL information by the operator.

OG0/OH0, ALAND ISLAND. Juha, OH9MM, will be active as OG0Z during the CQWW WPX SSB Contest (March 27-28th) as a Single-Op/Single-Band (15m) entry. QSL via W0MM. Also, look for Raimo, OH3BHL, to be active as OH0Z during the contest as a Single-Op/Single-Band (20m) entry. QSL also via W0MM.

OPDX.952 TYPO (OOOPPP!!). In last week's bulletin (OPDX.952) there was a typographical error under "WRTC 2010 (Russia)". The city listed for "NCDXF" was incorrect and it should have been "Redwood City" (not Emerald Hills).

OX, GREENLAND (YL DXpeiditon). Six international YLs will be active as OX6YL from Kangerlussuaq on the western edge of Greenland between September 16-20th. Activity will be on the HF bands using CW and SSB. Operators mentioned at this time: Inger/OZ7AGR, Unni/LA6RHA, Ingrid/LA8FOA, Ruth/ IT9ESZ, Evelyne/F5RPB and Waltraud/DJ6US. A Web site is currently under construction at: http://www.qsl.net/la6rha/greenland

OY6, FAROE ISLANDS. Look for OY6A to be active from Torshavn (EU-018) during the CQWW WPX SSB Contest (March 27-28th) as a Multi-Single entry. QSL via LoTW or direct to OY2J. Visit the Faroese Radio Amateurs Web page at: http://www.fra.fo
Also, a live webcam will be active during the contest weekend at: http://www.ustream.tv/channel/oy6fra

P4, ARUBA (SA-036). Andy, AE6Y, is once again active as P49Y until March 30th. His activity will include the CQWW WPX SSB Contest (March 27-28th) as a Single-Op entry. QSL via AE6Y.

PY5, BRAZIL (Contest/Tribute). Members of the Araucaria DX Group (ZW5B) will activate their club station as PY5GA during the CQWW WPX SSB Contest (March 27-28th) as a special tribute to their beloved friend Olav, PY5GA, who became a "Silent Key" (SK) last Sunday. Olav was a major elmer to many of the members of the Araucaria DX Group. QSL via K3IRV.

QSL INFO AND NEWS.....
9M0M QSLS STILL AVAILABLE. Tru, VE6TP, states that QSL for the 2001 9M0M Spratly Island DXpedition are still available. He received a QSL via: LAKE POWELL COMMUNICATIONS INC., KXAZ FM KPGE AM, P.O. BOX 1030, PAGE, AZ 86040. OPDX did some more research and found the QSL route for this operation is via NA7DB, direct or by the Bureau.

A25NW QSL STATUS. Mike, K9NW/A25NW, reports: "QSLs should be going out the first part of April. Thanks for hanging in there."

NEW QSL ROUTE. Joe, W3HNK, is now the QSL Manager for Arvo, ES2MC, in Estonia.

VQ9LA NEW QSL ROUTE. Larry, VQ9LA/N0QM, informs OPDX that starting April 15th, 2010, his new QSL route will be via N0QM: Larry Arneson, 705 Rhodes Ave, Grandview, MO 64030, USA. The reason for this change is that Larry's plans are to depart Chagos Island, December 2010. All QSL cards sent to the FPO Box will be honored up to December 2010. Larry states, "I want to get the mail going in the right direction prior to my new address at the end of this year. This info can be verified on my QRZ page. Thank You."

QSLS VIA LoTW: None Reported This Week!

QSLS RECEIVED VIA MAIL: 4L6AA, A92GE, E51WWB, FT5GA, J88DR, TX4T,
VP8BUG, VP8BUH, VP9/W6PH, XR0Y and XR0ZA

QSLS RECEIVED VIA THE BUREAU: 5D0IPY, 9A60A, 9A8M, 9A8TQF, AA3B, EK0B,
GB2LS, I8QJU, IU7SRE, K6YRA, KB1H, N2QT, N2RJ, OJ0B, SM2EKM and TO6T

T32, EASTERN KIRIBATI (Update). Operators Nils/SM6CAS, Steve/G4EDG,
Mike/K9AJ, Derek/G3KHZ and Steve/9M6DXX are now active as T32MI from
Malden Island. Their length of stay is not known. Activity will be
80-10 meters using CW and SSB. For more details and updates, visit the
T32 Southern Line Islands DXpedition's Web page at:
http://t32line.webnode.com

TF, ICELAND. Siggi, TF3CW, will be active as TF1CW during the CQWW WPX
SSB Contest (March 27-28th) as Single-Op/Single-Band (40m) entry. QSL
via LX1NO.

TR, GABON. Silvano, I2YSB, and a team of Italian operators will activate
Gabon during the first half of October. The team also intends to activate
an IOTA in the Estuaire Province Group (AF-043) during this DXpedition.
Also, the low bands are expected to be one of their major goals. No other
details have been provided other than the pilot station will be IK7JWY.
An opened survey on I2YSB's Web page is now available to list your wants
for bands and modes at: http://www.i2ysb.com/joomla5
More details should be forthcoming.

V8, BRUNEI DARUSSALAM. Nasran, V85ZX (ex-V88NIZ), will be in the CQWW
WPX SSB Contest (March 27-28th) as a Single-Op/Single-Band (20m)/Low-
Power entry. He will use a Yaesu FT450 with a home-brew rotary dipole
antenna. QSL via V85ZX (see QRZ.com).

YA, AFGHANISTAN. Neil, V73NS (WD8CRT), who is just finishing up his
operation from Kwajalein (OC-028), will be deploying to Afghanistan
at the end of April. Neil told OPDX that once there, he will have his
radio sent to him. He states, "I will be QRP and I will be 100% CW."
More details should be forthcoming. QSLs for his V73NS operation should
be sent direct via W3HNK.

ZC4, UK SOV. BASE AREAS ON CYPRUS. Operators Neil/G6MC, Lee/M0LMH and
Andy/ZC4VJ will be active as ZC4T during the CQWW WPX SSB Contest (March
27-28th) as a Multi-Single entry. QSL via LoTW or direct to: ESBA Radio
Club, c/o Andy Chadwick, PO Box 36575, 5526 Dasaki Achnas, Cyprus.

ZK3, TOKELAU ISLANDS. Right before going to print, Carl, N4AA, from
"QRZ DX", sent out the following note from Bob/ZK3YA and Bill/ZK3OU:
"We pull the plug at 2359z Friday, March 26 (1259 Friday local time),
just as the WPX contest starts. We have over 28,000 Q's from ZK3 and
over 50,000 total for the trip. Our intention is to upload all logs
for our 5W and ZK3 operations to LoTW within a month of our return.
Hopefully that will make a dent in the QSL volume we face."

The following stations are expected to be active in the
CQWW WPX SSB Contest (March 27-28th, 2010)

Thanks to Bill, NG3K, for providing OPDX readers with the following
consolidated listing of the participants in the 2010 CQWW WPX SSB Contest.
For a more detailed listing (and up-to-date changes/corrections) in HTML
format, please visit Bill's Web page at:
http://www.ng3k.com/Misc/wpxs2010.html (By callsign)

SARL News - SUNDAY 28 MARCH 2010

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a webstream, visit www.sarl.org.za, click on ARMI and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and subscribe to receive future bulletins by email.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 10,130, 7,066 and 3,695 MHz SSB.

In the news today:

WIN A MICROCHIP PICDEM TOUCH SENSE 1 DEVELOPMENT KIT

KNOW THE FACTS BEFORE YOU DEBATE

INTERNATIONAL LIGHTHOUSE AND LIGHTSHIP WEEKEND

OPERATING OUT OF BAND

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

WIN A MICROCHIP PICDEM TOUCH SENSE 1 DEVELOPMENT KIT

Entries are invited in the 2010 construction competition which this year is a competition with a difference. The SA Amateur Radio Development Trust is looking for an innovative approach to a construction project that has application in Amateur Radio but based on microchip technology.

Stage one is the paper design stage. Develop a project of your choice using a microchip and submit a short write up of the project including a circuit diagram and description of operation. The closing date for stage one is 9 April 2010.

Three entries, which in the opinion of the judges are the most original coupled with their usefulness in Amateur Radio, will receive R500 to build a proto-type for entry into the second stage of the competition.

The second stage entry is a complete proto-type entry and must be suitably packaged and operating. This entry must be accompanied by all

the necessary paperwork as well as an article with circuit diagram and other necessary illustrations for publishing in Radio ZS.

The winning entry in stage two will be awarded the Microchip PICDEM Touch Sense 1 Development Kit plus an ARRL handbook. The two runner-ups will each receive an ARRL Handbook. The closing date for stage 2 is 10 May 2010.

The winner will be presented with the prize at a gala lunch on 17 May 2010 at the Midrand Protea Hotel.

Get all the details on www.amateurradio.org.za.

KNOW THE FACTS BEFORE YOU DEBATE

Debate is healthy, but you should know the facts before you engage in a discussion. Recently on the SARL forum there has been a debate about motions at an SARL AGM with some of the postings making incorrect statements. A motion submitted for discussion and acceptance at a SARL Annual General Meeting is published on the Agenda. At the AGM the proposer or his or her nominated representative is called up to present the motion and provide additional information and motivation. The motion is then debated by the members present at the AGM. During the discussion it is possible for a member to propose an amendment to the motion. It has to be seconded by another member before the amended motion is discussed. It is also possible to propose an amendment to the amendment.

At the end of the debate the proposer of the original motion will get two minutes to give closing arguments before voting commences. The last amendment is voted on first. If the amendment is carried, all other amendments and the original motion falls away and the amended motion is accepted. All amendments are voted on in turn and if rejected than the final vote will be on the original motion.

Another debate has been about the proposed changes to the constitution. The changes are mainly cosmetic and the incorporation of decisions taken at previous AGMs. The SARL President's net on April 11 will be devoted to explaining the proposed changes. Clubs are invited to connect their repeaters to the teleconference network by sending a request to armi@sarl.org.za.

INTERNATIONAL LIGHTHOUSE AND LIGHTSHIP WEEKEND NOW IN PLANNING

A total of 100 registrations have been received so far at the website collecting entries for the 2010 International Lighthouse and Lightship weekend. The event is scheduled for the weekend of August 21st and the 22nd.

This will be the 11th annual outing of this event sponsored by Scotland's Ayr Radio Group and its station GM0AYR. The registrations to date are from 19 countries with nearly half of them from Germany and Australia who always strongly support this fun event. Other countries

taking part include Argentina, Belgium, Chile, Denmark and England to name only a few. There are currently no South African entries recorded on the official website.

To register or check out the lighthouses already registered, visit the official website at www.illw.net.

SARL NATIONAL CONVENTION

This is a further call to register for the SARL National Convention to be held in Port Elizabeth from 23 - 25 April 2010. Full details can be found on www.sarl.org.za. If you are missing out on the PIC courses presented in the main centres, here is an opportunity to take in the course while attending the National Convention.

While talking about the course "learning how to program Microcontrollers in 4 hours", the Gauteng course held yesterday was oversubscribed. Bookings are open for Durban, Cape Town and Port Elizabeth. Avoid disappointment, book early. There is a substantial discount if you are a SARL member. Full details on www.sarl.org.za, click on RTA and follow the links.

OPERATING OUT OF BAND

It has again been noticed that some operators in IARU Region 1 were operating outside the Region 1 allocation of the 160 m band. The lowest limit is 1810 kHz. It is illegal to work stations in IARU Regions 2 and 3 who are operating below 1810 kHz. ZR and ZS stations are reminded that the South African allocation is 1810 to 1850 kHz.

CONTEST NEWS

2010 SARL Contest Manual. The Contest Manual has been updated with respect to clubs hosting contests and some grammatical errors have been corrected. The updated version of the 2010 SARL Contest Manual will be made available on Monday 29 March, this version will be the only valid contest manual.

There are three local contests in the coming week. On Wednesday evening, 31 March the second SARL Club Contest will be run from 17:30 to 18:30 UTC and it is PSK and RTTY on 80 metres. The exchange is a RST report and a serial number. Stations may be worked once on PSK and once on RTTY. Logs must be e-mailed to hfcontests@netactive.co.za to reach the contest committee by midnight on 7 April.

On Thursday evening, 1 April the first leg of the SARL 80 metre QSO Party will be run from 17:00 to 20:00 UTC. It is a phone contest using the segments 3,603 to 3,650 and 3,700 to 3,800 MHz. The exchange is call signs, a RS report and the operators names. A QSO with a South African station counts 10 points, while a QSO with a station outside the borders counts 15 points. Please be aware of amateur stations operating AM on the band. Logs must be sent to the Durban ARC, 17 Brownlee Place, Bluff, Durban, 4052 or by e-mail to

zs5lp@vodamail.co.za.

On Saturday 3 April, the first leg of the RaDAR Contest is on the air, RaDAR means Rapid Deployment Amateur Radio. The contest runs from 12:00 to 18:00 UTC and activity take place on all HF contest bands as well as VHF/UHF and microwaves, utilizing all modes. The contest is aimed at promoting the use of Rapid Deployable Amateur Radio stations and antennas preferably without relying on normal mains power. Logs must be sent to the Lichtenburg ARC, PO Box 410, Lichtenburg, 2740 or by e-mail to zs6lrk@nwinternet.za.org.

The complete rules for all three contests are available in the updated 2010 SARL Contest Manual.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP reports that the solar activity is still at low levels. Sunspot 1057 is big but remains quiet. New sunspot 1058 was numbered on Thursday. It is a very small speck located in the northern hemisphere. The effective sunspot number is expected to be between twenty and twenty-five for the coming week.

20 and 15 m will provide the best opportunities for DX. Conditions to India will be good from the afternoon onwards. During the late afternoon and early evenings it will be good towards Europa. In the afternoon there is a good possibility of contacts with the USA on 15 m. Contacts with Australia and New Zealand will be challenging. During the afternoons and evenings good 20 and 15 m contacts may also be possible with Brazil.

17 m is most afternoons open to many parts of the world. The majority of activity is concentrated on Friday afternoons and also over the weekends. 10 m is also showing signs of life.

Local conditions are going to be good on 40 m during the day time. 80 m may perform well during the early mornings and late afternoons over the shorter distances. 30 m will perform well during the middle of the day. 20 m is very useful for contacts over the longer distances during the majority of the day.

80 m is the frequency of choice in the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

31 March - SARL 80 m Club Contest with PSK and RTTY, 17:00 - 20:00 UTC. 1 April - 1st leg of the SARL 80 metre QSO Party from 17:00 to 20:00 UTC. 3 April - 1st leg of the RaDAR Contest from 12:00 to 18:00 UTC. 9 April - Closing date for stage 1 of the Construction Competition. 11 April - President's net at 19:30. 17 April - 2010 SA AMSAT Space Symposium. 23-25 April - SARL National Convention, Port Elizabeth. 24 April - PIC programming course in Port Elizabeth. 10 May - Closing date for stage 2 of the Construction Competition.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items, if possible, in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria-area, with relays on 7 082, 7 205 and 17 860 kHz. There is also a podcast by ZS6RO. For a webstream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 21:00 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League compiled and edited by George, ZS6NE.

Thank you for listening, 73.

Hello,

Unfortunately for me, but lucky for you, I need to sell my lovely 27'
Coronado sailboat. She's really a beautiful boat, with a VHF radio,
stove, icebox, head, galley, can sleep 5, and lots more!

Please take a look, she's currently on eBay with pictures and a long
description, here: http://bit.ly/dAOa1O

Thanks a lot!

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 28th March 2010

IRTS 78th AGM

The 78th AGM of Irish Radio Transmitters Society will be hosted by the Dundalk Amateur Radio Society, over the weekend of the 24 /25th April 2010.The venue will be Fairways Hotel Dundalk Co Louth.

Tickets for the Dinner on Saturday night at 8.30PM are selling well at 35 Euro each and are available from Peter Grant EI4HX Peter's email address is secretary /at/ ei7dar.com or by Telephone 087 7944779..

The Rally will be on Sunday 25th Doors opening at 11.00 AM, all the usual traders will be represented plus some new ones. Tables will also be available for sole traders without charge.

The IRTS AGM will start at 2pm; all paid up IRTS Members are welcome to attend. Outdoor activities will also be available for Children and XYL's plus some unusual stuff. The AREN Mobile Command Post will be on display with elevated antennas for most bands.

Bookings for Traders tables to Thos EI2JD email chairman /at/ ei7dar.com or Peter EI4HX chairman /at/ ei7dar.com OR Peter EI4HX secretary /at/ ei7dar.com Talk in Saturday & Sunday on the 2m Dundalk Repeater EI2CCR.

For Further details on accommodation please check out www.fairways.ie & www.ei7dar.com

Sunday Lunch and afternoon Tea will be available in the venue or at any of the many suitable Restaurants in and around Dundalk.

DXpedition to Mozambique

Since going to Hawane in Swaziland with the IRTS 75th Anniversary DXpedition in March 2007 there has been plans in working with Daniel Hubbard ZS6JR and Bob Wood (formerly African DX Safaris - now CQ-DX African Safaris) to promote DXpeditions to African locations. There is a web page at http://www.3da0ss.net/ which gives the latest information.

There is a DXpedition to Mozambique in October 2010 which will include a JOTA operation from the capital Maputu and a CQWW SSB contest operation from Xai Xai (approx 200km North of Maputu). So far those who have expressed interest in the DXpedition are mostly CDXC members.

For more information on the DXpedition check out the web pages at www.3da0ss.net

---

Ferry Special Event Station Enters Final Week

Ei2GBW, the special event station celebrating the return of the Cork-Swansea ferry service, enters its final week of operations. John Ei9JO and Tim Ei2KA will be operating as much as possible to allow any last stations to get in the log by Good Friday the 2nd of April, which is the last day of operations.

Stations interested in qualifying for the Spirit of Innisfallen Award for working both Ei2GBW and GB2EI have until 30 April to bag GB2EI. So far, Ei2GBW has logged about 1800 QSOs and has sent out about 1600 QSL cards and over 100 Spirit of Innisfallen Award certificates.

The organisers wish to thank all those involved in helping make Ei2GBW a complete success.

Bere Isl EU-121 Activation

Olivier ON4EI is currently activating Bere Island EU-121 as EJ8GQB, his new Irish callsign (EI8GQB). This solo expedition is planned from 21st-29th March 2010.

Activity will be 160-10m SSB/RTTY.Oliver will also be participating in the CQ WPX SSB CONTEST March 27th-28th 2010.

For more details about the trip, see http://www.qrz.com/db/ej8gqb

---

GB10GKA Special Event Station

To mark the 10th Anniversary of the closure of the World's largest Maritime Radio Station Portishead Radio / GKA, a special callsign GB10GKA has been granted. GB10GKA is being activated for a period of one month from 30th April 2010 through 27 May 2010.

Hours of operation will be dependent on individual operator's free time however, it is intended that the callsign will be active extensively throughout the licensed period. Operation will be primarily on CW. Operations will be on all HF bands from the following stations, each manned by an ex-GKA Radio Officer.

The operational schedule is as follows G3YEC Rick 30 April thru 6 May QTH near Colchester, Essex. G3ZRJ Tony 7 May thru 13 May QTH near Hereford, Herefordshire. GW3UOF Mike 14 May thru 20 May QTH near Treorchy, Mid Glamorgan, Wales & G3TJE/G4HLN Pete/Larry 21 May thru

27 May QTH Nr Burnham on Sea, Somerset.

Special Anniversary QSL cards will be produced to mark this historic event, eQSL will also be used. Certificates for contacting GB10GKA on more than 4 HF bands will be available via soft copy thus at no cost to the winners. If you work us on more than 4 bands please contact G3ZRJ as shown below so that your certificate can be sent to you via email.

Point of contact: Tony Roskilly G3ZRJ g3zrj.morsekey /at/ btinternet.com

Information about Portishead Radio can be found at: http://www.gka.btinternet.co.uk/

Worked All Ireland at Lough Erne Rally

The Irish Radio Transmitters Society stand will attend the Lough Erne Rally in SHARE on Sunday 11 April.

This Rally has been a major meeting place for radio amateurs and radio experimenters from both sides of the border since the first one in Enniskillen back in 1982. This history was behind the Club invitation to IRTS to attend, and the Club is honoured that IRTS has taken up the invitation.

Furthermore, in this same context, the Club asked that the IRTS stand be used to encourage a revival of Worked All Ireland activity.

With better propagation, it is again possible to work on 40 and 80 metre bands across the whole island, making contacts in all counties and in the squares on Irish Ordnance Survey maps. WAI is an ideal way to foster amateur radio contacts across the whole island.

Moreover, it could involve many new amateurs and experimenters licensed in the ten years since Worked all Ireland activity was last busy around 2000.

Using the Fermanagh Repeater, GB3CP, Martin Gi7JGT will operate a talk in service for those travelling to the Rally on Sunday morning 11 April. This Repeater's coverage includes the northern stretches of the N2 and N3 in the Republic, and the western M1 from Belfast.

Kenwood have donated a fine raffle prize. It is a TH-F7 dual band FM hand held. The ticket selling team will be led by three of the women among 18 on the Club's recent Foundation course that were first on air - Fidelma M6UIM, Shauna Mi6SFH and Noreen Mi6NCC. All 18 new Foundation licensees will be presented with Welcome to Amateur Radio Certificates at the Rally by Billy Pollock, GI3NVW, who is himself over 50 years licensed.

Michael Clarke Mi5MTC, Chairman Lough Erne ARC. Tel 048-6862-1436. Email mi5mtc /at/ learc.eu

---

EI / G request for volunteers for 50MHz WSPRExperiment.

Ian Hogan G6TGO, UK Six Metre Group Sponsorship Manager and SIX NEWS columnist, would like to invite Stations to Participate in a WSPR Experiment with a Demo Station which will be at the Norbrek Rally Blackpool on the11th April.

The Station will be a Kenwood TS2000 DIAL SET 50.293,TX 50.294.500 ,5W to a HALO within the Main hall pointing out toward the Irish Sea.

All contributors will be credited in the Magazine SIXNEWS.

Tipperary Amateur Radio Group

The next monthly meeting of the Tipperary Amatuer Radio Group will take place on Thursday next the 1st of April in Raheen House Hotel, Raheen Road, Clonmel at 8.00pm. All are welcome to attend.

CARA Echolink Talk

Crossakiel Amateur Radio Association is pleased to welcome Richard Hendy from DAR to the Club for an Echo link talk on Wednesday 31st March 2010. The Club meet in the Welcome Wagon in Crosskiel every Wednesday at 8.30pm

---

Dundalk Amateur Radio Society.

The next meeting of the Society is scheduled for 7th April 2010 at the Clubhouse. Meetings start at 20.30pm sharp all are welcome to attend.

Wicklow Radio Club

The Next meeting of the Club is confirmed for wed 14th of April at 19:30, in the Glebe National School, Wicklow Town. All are welcome to attend.

Rallies

Sunday 11th April 2010 Event:Lough Erne Amateur Radio Club Rally Venue:The Share Holiday Village Lisnaskee Co. Fermanagh BT92 0EQ.For more details contact Iain 028 66326693, email gibbjgbb /at/ aol.com

Website www.learc.eu

For further Rally info and contact details please check out the IRTS Website.

GB2RS NEWS

Sunday 28th March 2010

The news headlines

* Bletchley Park receives £250,000 Government boost

* German cable operators encouraged to improve their system

* Post Grad students studying for Foundation Exam at Plymouth Uni

Bletchley Park Trust has received a grant of £250,000 from the Department of Culture, Media and Sport. The money will be used to fund repairs to the site including work on dilapidated roofs. Announcing the grant on Thursday 25 March, Culture Secretary Ben Bradshaw said, "I am delighted to announce this grant which will help renovate the buildings and ensure that future visitors enjoy a really high quality experience when they come here."

The Cologne Administrative Court has rejected an action brought by a German cable company against the auction of 800MHz for wireless networks saying that if the cable operator was afraid of interference they could take action to improve their cable system. The Deutscher Amateur Radio Club views the ruling positively since it will encourage cable operators to upgrade leaky cable systems. As well as stopping the pickup of any 800MHz transmissions it should also reduce the interference that leaky cable systems cause to radio amateurs.

The Mathematics department of the University of Plymouth is teaching a Physics Enhancement Course to post graduate students who will become teachers after their physics training. As part of this training, twelve graduates are doing a radio communication awareness session in order to get a Foundation License. This awareness session will be an amateur radio Foundation Course run by the Plymouth Training Team at the University, which is affiliated to the Plymouth Radio Club. Hopefully, when these graduates are teaching physics in schools, the seeds of amateur radio will be sown amongst the future generation. Details of courses run by the Plymouth Training Team can be found on the website www.radioclubs.net/plymradiotraining

The National Hamfest organisers are calling for volunteers to deliver short lectures at the National Hamfest in Newark on 1 and 2 October. Anyone interested in participating should contact the Hamfest Chairman, Jonathan Whiting, by e-mail to jonathang6jut<at>googlemail.com.

Radio Sweden will end its medium and short wave broadcasts on 31 October in favour of web services because they believe it is the best use of resources and in line with international trends. The English-language service is to continue on the web and on national broadcasts. The Russian output will be available on the web, as is the German service now.

Solihull Amateur Radio Society will be running a training course for the Foundation licence during April and May at the Shirley Centre, Stratford Road, Shirley, Solihull. The course is open to all and suitable for young people of around 12 plus through to those of pensionable years. The sessions will include classroom tuition and hands-on radio operation. More details can be obtained from the course coordinator Roger Hancock, G4BBT, on 0121 743 7277

Jersey repeater GB3GJ could be on the air by the end of May. The original site at Westmount fell through late in 2009 but a new site on the Jersey Electricity Companies building has been found. The repeater group is now putting together the ancillary items needed. Anyone who can lend their time and assistance will be gratefully received. If you think you can help please e-mail mj0rzd<at>robluscombe.com.

Jim, M0JHW is organising another amateur radio get-together and field day on 3 and 4 April. It's at the usual venue of the Sports and social club, Harlaxton, near Grantham, which is postcode NG32 1HX. There will be amateur radio operations that visitors can join as well as plenty of tea and coffee. A barbecue is planned for Saturday afternoon.

The Royal Air Force Amateur Radio Society will be activating Airfields On The Air on the weekend 3 and 4 April. All amateur radio stations are eligible to receive a certificate if they work 5 AOTA stations or more. It is intended to make this an annual event on the first weekend of April. Stations will be located at present day or former RAF Airfields or other establishments. If you wish to activate any location or have any queries relating to AOTA please contact Vince, G4DQP, QTHR or look up details on QRZ.com.

Bolsover Amateur Radio Society has an introduction to six meters by Don, G4KXW on their website, www.g4rsb.org.uk. They are encouraging amateurs to visit the site and have a go at 50MHz.

And now for the details of rallies and events for the coming week

Today, Sunday 28 March, from 9.30am to 4pm, the Pembrokeshire Radio Society is holding its annual Bring & Buy sale. Admission is £1 and includes a free cup of tea or coffee. Tables are still available. Contact Elwyn, GW0GUY on 01437 760026.

Also today, 28 March, the South Gloucestershire Rally takes place at the Avon Scouts Activity Centre, Woodhouse Park, Almondsbury BS32 4LX, which is about 1.5 miles from the M4/M5 junction. Doors open at 9.30am for disabled visitors and 10am for other visitors. Entry is £2 and no dogs except assistance dogs are permitted. There will be trade stands,

a flea market and a car boot sale. Contact Peter Cabban, G4OST on 01454 612689.

The Spring Militaria, Electronics & Radio Amateur Hangar Sale takes place today, 28 March, at Hack Green secret Nuclear Bunker, Nantwich, Cheshire CW5 8AP. Doors open at 10am and entry is £2.50. Contact Rod Siebert, 01270 623353.

Now for the news of special events

GB0AOA will be on the air from the Isle of Man for Airfields on the Air on 1 April. On the same day, listen out for GB0BME from the Bancraft Mill Engine in Barnoldswick.

The weekend of 3 and 4 April sees two stations taking to the air from Grantham. GB0HDX will be on the air for Harlaxton Delta Xray and GB0GRA will be on the air for Grantham Radio Amateurs. Preston Amateur Radio Society is running GX3KUE/P from the 400 year old Bank Hall at Bretherton near Preston on 4 April. Bank Hall appeared on the BBC programme Restoration. The club will be on 40 or 80m depending on band conditions.

Over the Easter weekend of 3 to 5 April, Marches ARS will be running GB2CAM from Chirk Airfield. The station celebrates the opening of the Chirk Airfield Museum for the 2010 season. The Chirk Airfield and Museum is a family run aviation facility located approximately half way between Oswestry and Wrexham adjacent to the A5. They plan to be active on HF from 80 to 10m, although the actual bands used will depending on propagation conditions as well as 6m, 2m and 70cm. Further details from Dave, MW0AYM on 01691 777242.

GB0LAD will be on the air for the United Nations' International Landmine Awareness Day on 4 April. Operating from the Carpetbaggers Aviation Museum, the station will be using the 80 to 20m bands using SSB, CW and Digimodes.

And now the HF DX news compiled from 425 DX News and other sources.

DL7AFS and DL7ZG will sign V21ZG from Antigua until 2 April. They will concentrate on RTTY, PSK31/63 and SSB.

Four amateur radio operators, JD1BNM, JD1BNJ, JD1BNQ and JD1BNK will activate Chichi-jima Island, which is IOTA reference AS-031 between 28 March and 12 April. The team will be active in CW, SSB and RTTY on 160 through to 6m. The QSL manager for all calls will be K8AQM.

An international team will be operating as 3W6C from Con Co Island, Vietnam, which is IOTA reference AS- 185, from 10 to 18 April. Plans are to run four stations 24/7 for two weeks with a goal of 60,000 QSOs.

The YI9PSE DXpedition will operate from the Kurdistan area in Northern Iraq from 3 to 11 April. This looks like being a big effort.

Now the contest news

On 30 March the 70MHz UK Activity Contest takes place from 2000 to 2230UTC. Using all modes the exchange is signal report, serial number and locator.

The ever-challenging RoPoCo 1 is on 4 April. What has often been challenging in the past is finding enough people to work in the second hour of what was a 2-hour event, so this year it has been reduced to 90 minutes in duration. RoPoCo isn't the busiest of events, but what it's all about is logging accuracy, because full postcodes are exchanged. Times are 0700 to 0830UTC and it's a CW event on 3.5MHz with the exchange being the signal report and postcode received.

Also on 4 April, the 1st 70MHz Contest takes place, although it is a little early in the year for there to be a substantial possibility of any Sporadic-E propagation. The contest takes place between 0900 and 1200UTC using all modes and the exchange is signal report, serial number and locator. On Monday 5 April the 80m Club Championships CW leg takes place. Times are 1900 to 2030UTC and the exchange is signal report and serial number.

Internationally, there are two 24-hour contests on 3 and 4 April. The EA RTTY event is the first. Single-ops can make a single band or all-band entry, but multi-op stations can only make an all-band entry. >From 1600 to 1600UTC, the bands are 3.5 to 28MHz and the exchange is signal report and serial number, with EA stations sending their Province code.

If RTTY isn't your thing, maybe the SP DX CW and SSB Contest will be more appealing. There are numerous categories, mainly for single ops. Timings are 1500 to 1500 using CW and SSB, the exchange is signal report and serial number. SP stations also send their Province code.

The 144MHz UK Activity Contest takes place between 1900 and 2130UTC on 6 April. All modes may be used and the exchange is signal report, serial number and locator.

Now the solar factual data for the period from the 15th to the 21st of March, compiled by Neil Clarke, G0CAS on the 22nd of March.

First the latest news on the Solar Dynamics Observatory, which is the latest spacecraft to study the Sun in detail that we have never seen before. After a series of engine burns the SDO has now reached geosynchronous orbit. Data will be available after a series of activities that include powering up the Ka-band transmitter, opening the instrument doors, and configuring the instruments to start science observations. All of the EVE subsystems are now turned on and all are doing very well. We can expect to see the first images after the middle of April. We wish the SDO team continued success with the mission.

The solar disc had spots visible every day. However, solar activity remained at very low levels. Solar flux levels varied little day to day and averaged 85 units. The 90 day solar flux average on the 21st was 82 units, that's the same level as last week. X-ray flux levels averaged A4.7 units and varied little. Geomagnetic activity was quiet everyday

and the average was 5 units. The Ap index on the 21st was only 2 units. Solar wind data from the ACE spacecraft saw solar wind speeds vary between 320 and 460 kilometres per second. Particle densities were low everyday except for a brief increase to 15 particles per cubic centimetre during the morning of the 16th. Bz varied no more than minus 7 and plus 8 nanoTeslas during the period.

And finally the solar forecast. This week the quiet side of the Sun is expected to be looking our way. Solar activity should be very low to low. Solar flux levels are expected to be in the 80's for most of the week. Geomagnetic activity should be quiet everyday. MUFs during daylight hours at equal latitudes should be around 24MHz for the south and 21MHz for the north. Darkness hour lows should be about 9MHz. Paths this week to South Africa should have a maximum usable frequency with a 50 per cent success rate of around 29MHz. The optimum working frequency with a 90 per cent success rate will be about 23MHz. The best time to try this path will be between 1000 and 1600 Zulu.

And that's all for this week from the propagation team.

Next, the Local News:

transmission.]

NEWS FOR THE MIDLANDS On Monday 29 March Gloucester Amateur Radio & Electronics Society is having an operating evening. Contact Anne, 2E1GKY, on 01452 548478, daytime. On Monday 29 March South Birmingham Radio Society is planning for field day. Contact Don, on 0121 458 1603. On Tuesday 30 March Derby & District Amateur Radio Society is on the air. Contact Richard Buckby, by email to radio<at>dadars.org.uk. On Tuesday 30 March Loughborough & District Amateur Radio Club is having a practical evening. More information from Chris, G1ETZ, on 01509 504 319. On Wednesday 31 March Bolsover Amateur Radio Society is having a committee meeting. For details, send an email to postmaster<at>g4rsb.org.uk. On Wednesday 31 March Hinckley Amateur Radio Society is holding a junk sale. Details from John, M0JAV, on 07836 731544. On Wednesday 31 March Lincoln Short-Wave Club is having a talk on Morse code by Ian, G4XFC. For more information contact Pam Rose, G4STO, on 01427 788356. On Wednesday 31 March Midland Amateur Radio Society is planning for field day and holding training classes. Details from Norman, G8BHE, on 01214 229 787. On Wednesday 31 March South Notts Amateur Radio Club is reworking homebrew number 1 with M0RIA. Details from Terry, M0RIA, via the web at www.radioclubs.net/snarc. On Wednesday 31 March Telford & District

Amateur Radio Society is holding its AGM. Contact Mike, G3JKX, on 01952 299 677. On Thursday 1 April Brigg & District Amateur Radio Club is holding its AGM. Contact John, M6BBB, on 01652 632038. On Thursday 1 April RAF Waddington Amateur Radio Club is having a practical night. For more information contact Bob, G3VCA, by email to g3vca<at>pyewipe.co.uk. On Thursday 1 April Salop Amateur Radio Society is having a natter night, Morse classes with G0EML and commences its Foundation Course. Details on the club website at www.salop-ars.org.uk. On Thursday 1 April Stafford & District Amateur Radio Society is having an illustrated talk by Gordon Meddings, G4DGM, on HF Beacons in the US and Canada. Details from Tony Bairstowe, G4RSW, on 01785 363025. On Friday 2 April Bromsgrove & District Amateur Radio Club is having a QSL card night. Contact Chris, M0BQE on 01905 776 869. On Friday 2 April Coventry Amateur Radio Society is having a talk by Bob Nash, G4GEE / 7P8DD on the DXpedition to Lesotho. Contact John, G8SEQ, on 07958 777363. On Friday 2 April Nunsfield House Amateur Radio Group is having a shack and natter night. Details from Ken Frankcom, G3OCA, on 01332 720976. On Friday 2 April South Birmingham Radio Society is closed for Good Friday. Contact Don, on 0121 458 1603. Over the Easter weekend of 3 and 4 April there will be a family fun field day at the Sports and Social Club, Harlaxton, near Grantham, postcode NG31 1HX. All are welcome, amateurs and families alike. There is plenty of space, tea and coffee and a barbecue on Saturday afternoon. GB0GRA will be on the air for voice operation and GB0HDX will be running CW. Both stations are operating on all bands. For more information contact Jim, M0JHW, on 07752 619617.

NEWS FOR THE NORTH OF ENGLAND

On Monday 29 March Angel of the North Amateur Radio Club continues its Morse class with Mike Taylor. Contact Nancy Bone, G7UUR, on 0191 477 0036. On Monday 29 March Sheffield Amateur Radio Club is holding its AGM. Details from Trevor Wood, M0TWS, by email to trevorwood6<at>yahoo.co.uk. On Monday 29 March South Manchester Radio and Computer Club is holding its monthly technical forum. Details from Ron, G3SVW, on 0161 969 3999. On Monday 29 March Thornton Cleveleys Amateur Radio Society is making final preparations for the NARSA Rally. Details from John Foster, 2E0EZY, on 01253 399377. On Tuesday 30 March Chester & District Amateur Radio Society is having a talk on 45 years of amateur radio by Brian Levett, G3TXH. Details from Barbara Green on 07957 870770. On Tuesday 30 March Otley Amateur Radio Society is taking part in the 70MHz UKAC. Contact Paul, 2E0PAK, on 07768 996370. On Wednesday 31 March Denby Dale Radio Club is holding a mini-rally and auction of surplus goods. Contact Gerald, G3SDY, on 01484 602905. On Wednesday 31 March Hornsea Amateur Radio Club is having DF foxhunting practice with G4YTV and G3RMX. Contact Gordon MacNaught, G3WOV, on 01377 240573. On Thursday 1 April Brigg & District Amateur Radio Club is holding its AGM. Contact John, M6BBB, on 01652 632038. On Thursday 1 April South Manchester Radio and Computer Club is having a shack workshop night. Details from Ron, G3SVW, on 0161 969 3999. On Thursday 1 April York Radio Club is holding Foundation lessons. Details from

Tony Skaife, G4XIV, on 01904 330502. On Friday 2 April East Cleveland Amateur Radio Club is having a radio component catalogues evening. For more information contact Alistair, G4OLK, on 01642 475 671.

NEWS FOR NORTHERN IRELAND

On Thursday 1 April Bangor & District Amateur Radio Club is holding its annual constructors competition. Bring along something you've built and you may win a great prize. Contact Mike, GI4XSF, on 028 4277 2383. Mid Ulster Amateur Radio Club will, in future, be operating under the new callsign MN0VFW. The previous call, GI3VFW, kindly donated to the club by Stanley Eakins, will now be the club's historical callsign. The club members hope to have as much success and enjoyment with the new call as they had with the old call. Dr David Hutchinson, GI4FUM, who used to be a GB2RS newsreader for Northern Ireland on 80m a few years ago, has offered to try and resurrect the schedule. However, he would need one or two volunteers, who must be RSGB members, to take turns with him. If you live in Ulster and are suitably equipped, then kindly contact the GB2RS News Manager Gordon Adams, G3LEQ on 01 565 652652 for more details. Alternatively you may e-mail him via gb2rs<at>ntlworld.com. The time slot available would be 10am on Sunday mornings, with the reading lasting about twenty minutes. We also take this opportunity to encourage club secretaries and event organisers in Northern Ireland to continue to submit news items to RSGB HQ for publication on GB2RS and in RadCom. Please email your information to GB2RS@rsgb.org.uk.

NEWS FOR SCOTLAND

On Tuesday 30 March Ayr Amateur Radio Group is having a DVD night. Contact Charlie, MM0GNS, on 01563 551704. On Tuesday 30 March Livingston & District Amateur Radio Society is having a club evening. For more information contact Norman, on 07740 946192. On Thursday 1 April Aberdeen Amateur Radio Society is having a junk sale. More information from Lewis, GM4AJR, on 01224 575 663. On Friday 2 April Cockenzie & Port Seton Amateur Radio Club is having a normal club night. More information from Bob, GM4UYZ, on 01875 811 723.

NEWS FOR THE SOUTH-EAST and EAST ANGLIA

On Sunday 28 March Waterlooville Amateur Radio Club is having a talk. Details from Rich, G4IBW, on 02392 680852. On Monday 29 March Milton Keynes Amateur Radio Society is having a shack open night. For more information go to www.mkars.org.uk. On Tuesday 30 March Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720815. On Tuesday 30 March Chelmsford Amateur Radio Society is running a club net. Contact Martyn, G1EFL, on 01245 469 008. On Wednesday 31 March Chesham & District Amateur Radio Society is having a QSL card evening. More details from Terry, G0VFW, on 01442 831 491. On Wednesday 31 March Dover Radio Club is having a talk on APRS by Matt, M1CMN and Declan, M0TMX. For more information contact Brian, G4SAU, by email to g4sau<at>darc.org.uk. On Wednesday 31 March Norfolk Amateur Radio Club is having a talk on square bashing via Sporadic-E by

Jim Bacon, G3YLA. Details from Chris Danby, G0DWV, on 01603 419204. On Wednesday 31 March Worthing & District Amateur Radio Club is having a discussion evening and putting GX3WOR on the air. For more information contact Roy, G4GPX, on 01903 753 893. On Thursday 1 April Cray Valley Radio Society is having a talk by Malcolm, G8MCA on 20 years in the Royal Signals, Territorial Army. Details from Bob, 2E0RCV, on 020 8265 7735 after 8pm. On Thursday 1 April Horsham Amateur Radio Club is having a talk by Brian Kendal, G3GDU, on the beginnings of airborne communication and navigation. Details are on the web at www.harc.org.uk. On Thursday 1 April King's Lynn Amateur Radio Club is having a club night and 2m club net. Contact Ray, G3RSV, by email to ral-g3rsv<at>supanet.com. On Thursday 1 April Lowestoft & District PYE Amateur Radio Club is having a club night at the shack. Details from Phil, G0JSG, on 01502 585448. On Friday 2 April Mid-Sussex Amateur Radio Society is closed for Good Friday. Contact Peter, G4AKG, on 01444 239371. On Friday 2 April Whitton Amateur Radio Group is having an introduction to digital modes. Details on the web at www.warg.info. On Saturday 3 April Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720815.

NEWS FOR THE SOUTH WEST

On Sunday 28 March Thornbury & South Gloucestershire Amateur Radio Club is running its rally at Woodhouse Campsite. Contact Tony, G0WMB, on 01454 417048. A7 - QATAR
A71RCAR will be active from Doha during the "2010 Regional Conference
on Amateur Radio" from Apr 4-6. A special QSL card is available via
QARS Bureau, Qatar Amateur Radio Society (QARS), Box 22122, Doha, Qatar

C3 - ANDORRA
The amateur radio society of Andorra (URA, Union de Radioaficionats
Andorrans) celebrates its 30th anniversary. HAMs in Andorra may use
the special prefixes C35 and C36 throughout the month of April 2010.
More information about the special award is available online at:
http://ura30anys.blogspot.com

FK - FRENCH NEW CALEDONIA, OC-032
Claude,FK8IF, writes that FK8KAB, the clubstation of the Noumea ARC,
will be equipped with new antennas soon. They already made some repairs
on the mast and installed a new multiband Spiderbeam. Another antenna
for the lowbands is still being built. Claude is on the air with the
clubcall every day from 0600 until 0800 UTC.
QSL cards should be sent direct to FK8KAB or via the REF bureau.

FR - REUNION, AF-016
Ced,FR/F4EGZ, is active on 10m/12m/15m/17m/20m/6m from Reunion (AF-016)
between Mar 25 and Apr 19. QSLs via his homecall.

HK - COLOMBIA
HK3OVP and HK3OCH are going to hit the airwaves as 5K7SNC from the
Sierra Nevada mountains on Apr 1/2. Their preferred frequency will
be 7140 kHz. QSL via bureau, direct or LoTW to HK3OCH.

LX - LUXEMBURG
Joel,LX1ER, Steffi,ON3AEO, Luc,ON3CL, Jean,ON3JEP, Filip,ON4AEO,
Kath,ON7BK, Jose,ON4CJK, Ronny,ON4RK, Gert,ZS6GC, Lucas,ZS6ACT,
Sid,ZS6AYC, Adele,ZR6APT, OM Dennis and the YLs Magda, Elna and Marina

will show up as LX9FC working in CW, SSB, RTTY and PSK on 80m-10m
from Apr 5-11. QSLs direct or via bureau to ON4CJK. More info at:
http://www.filipstattooshop.be/luxemburg/expeditie 2010/nieuw

VP8/F - FALKLAND ISLANDS, SA-002
Ian,M0PCB, is now active as VP8FIR and VP8RAF from the RAF Amateur
Radio Club Station at Mount Pleasant Airport until Apr 7. He has been
spotted in CW on 15m already. QSLs for this activity via M0PCB.

YI - IRAQ
A team of thirteen OPs (AH6HY, FM5CD, JH4RHF, K1LZ, K3LP, K3VN, N2WB,
N6OX, N6PSE, W5KDJ, W0UCE, YI1UNH and YT1AD) will show up as YI9PSE
from Erbil (Kurdistan) from Apr 2-11. They will activate not less than
five stations simultaneously (including four with an amplifier). Their
pilot stations will be Toshikazu,JA1ELY (JA), Col,MM0NDX (EU),
Don,N1DG (USA eastcoast), and Chuck,AA6G (USA westcoast).
The following operating frequencies were announced:
CW: 1824, 3504, 7004, 10104, 14024, 18074, 21024, 24894, 28024 kHz
SSB: 1845, 3780, 7065/7180, 14195, 18145, 21295, 24945, 28495 kHz
RTTY: 7035, 10140, 14080, 18100, 21080, 24920, 28080 kHz.
The QSL manager for YI9PSE is N6NKT. Unfortunately their website does
not indicate if he confirms QSL cards also via bureau. However, you can
find their online log and more information at: http://www.yi9pse.com
---
Eric,KG4GYS, is working in Tikrit during the next few months. You can
find him working as YI9GYS in SSB mostly on 20m and 17m.QSL via KG4GYS.

3B8 - MAURITIUS, AF-049
Mart,DL6UAA, will be QRV again as 3B8MM from Mauritius (AF-049) working
mostly in CW on 160m-10m for three weeks starting on Apr 4.
QSL via bureau or direct to DL6UAA.

Slavo,SP2JMB, will be active from Mauritius as well from Apr 7-14.
He will sign 3B8SC in CW on all HF bands. QSL via homecall.
Photos of Slavo's trip as 3B8/SP2JMB in 2008 can be found online at:
http://www.sp2jmb.pl/index.php?page=g_mauritius_04.2008&LANG=eng

9Q - DEMOCRATIC REPUBLIC OF CONGO
Ghis,ON5NT, (ex-9Q1NT), writes that Georges,VE2EK, will show up again
as 9Q1EK from Kinshasa soon. He will be the only station with a valid
license in the country. To keep updated all the time you should check
his website http://ve2ek.blogspot.com regularly. His station will be a
FT2000 with an OM2500HF amplifier (max. 2500 watts output) and Georges
will use dipoles for 160m, 80m, 40m, a delta loop and a yagi on a 45m
mast mainly in CW. Later during his stay he also plans to work in EME
(144 MHz with 4 x 16 elements and on 432 MHz with 4 x 21 elements).
QSL direct via SM5DJZ, via LoTW or eQSL.

FRANCE, SPECIAL EVENT STATION
On the occasion of the "World Amateur Radio Day" on Apr 18 some members
of the "Radio Club Haut-Rhin" will activate the special callsign TM68X
from Apr 5-18. QSL via F8BUO. More information concerning this activity

can be found at: http://www.ref68.com/expo and if you want to learn
more about the "World Amateur Radio Day" you should visit the website:
http://www.iaru.org/rel030418.html

ITALY, SPECIAL EVENT STATION
II0SPQR will be active during the month of April celebrating the
2763th anniversary of the city of Rome. QSL via IK0QNZ.

THE NETHERLANDS, SPECIAL EVENT STATION
"WOTA" stands for Women On The Air. Anneke,PB7XYL, is member of the
WOTA Club and will activate the special call PB88XYL from Apr 3-30.
QSL via bureau or direct.
For more information click on: http://wotaclub2010.blogspot.com

DXCC: Eight year old William Ferguson,KJ4EYZ, son of Rich,N2XQM, is proud
owner of the DXCC award since Mar 16. Carissa,KJ4EZA, the ten year old
sister of William, already contacted 82 DXCC entities by now.

PIRATE: The callsign ZS8M was abused by a pirate in March. But there are
also good news about this call. In a few weeks ZS8M will be activated
legally by Pierre,ZS1HF, for one year. More info will follow later.

SILENT KEYS: Following DXers passed away lately:
Kenneth M. Miller (K6IR), William "Bill" W. Loucks (VE3AR) and
Joe T. Pinella (WA9VGY).

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de
---
The CQWW VHF Contest rules can be found online at:
http://www.cqww-vhf.com

The official K4M video can be ordered as DVD now at:
http://www.dxvideos.com/k4mvideo.htm

UPCOMING CONTESTS

Apr 3/4: SP-DX-Contest
Apr 3/4: EA-WW-RTTY Contest
Apr 5: Low Power Spring Sprint

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:
AS-118, 9K, Kuwait Group: Some members of the Kuwait AR Society (KARS-9K2RA)
are planning an activity from Failaka Island signing 9K2F from Apr 1-5.
QSL via 9K2RA. See also: http://9k2ra.net

NA-199, FS, St. Martin's Coastal Islands: Alain,F6BFH, and Serge,F6AUS,
will sign TO5SM/p from Tintamarre Island on Mar 31 from 1200-2000 UTC.

QSL via F6BFH (direct/bureau).

QSL V55V: Alfons,DJ8VC, is the correct QSL manager for V55V. Some QSLs for
V55V arrived at DF3GY by mistake. Alfons asks everybody to send the
QSL cards only to him - direct or via bureau.

QSLs arrived direct: JD1BLY (JI5RPT), TX4T (G3TXF), 3A2MD, 4U1UN (HB9BOU)

QSLs arrived bureau: HB0/DL5YL, HK3Q, TS7C (F4EGD), UK/JI2MED,V25WY (W4OWY),
VP5T (N2VW), VQ9LA, VQ9X, VR2C (WA4WTG), XU7MWA (KM0O),
6V7G (EA1FDI), 6W/DL2RMC (DL1RTL), 6Y5/K4BAI,
9Y4W (DL4MDO)

Many thanks for contributing to this issue of the DXNL are going to:
Carl Smith (QRZ DX), 425DXNews, OPDX Bulletin, DF6EX (WINQSL), DJ5AV,
DJ5MN, DJ8VC, DJ9ZB, DK8JB, DL1SBF, DL3IE, DL7VOA, DL8EBW, DL8LAS, F5NQL,
NG3K, SWL Norbert Maibaum and others.

**********************************************
The ARRL Contest Update

Published by the American Radio Relay League
**********************************************

March 31, 2010

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- Loud and Proud - QRP ARCI Spring QSO Party
- MOGAMT QSO Party (Missouri-Georgia-Montana)
- Mexican States To Multiply on 10 Meters
- Rookie Roundup Revisions
- Sing EME A Melody
- Whole Lotta Logs
- Ever Metamaterial You Didn't Like?
- Poachin' Eyes

NEW HF OPERATORS - THINGS TO DO

Why not take your newly acquired HF contest skills up to two meters and
try the VHF Spring Sprint on the evening of April 12th? This would be a
good opportunity to put that all-band multi-mode rig to work on the
"weak signal" frequencies.

BULLETINS

Caveo aprilis primoris!

BUSTED QSOS

Coffee-ologist Alan N9AZR wrote to point out that French Roast coffee
is actually LESS caffeinated than regular because of the extra roasting
time. For all of you trying to stay awake on the dreaded "second
night", that is definitely good information to have!

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

Apr 3-4

- Lighthouse Spring Lites QSO Party (Apr 1 to Apr 11)
- LZ Open 40 Meter Contest--CW
- QRP ARCI Spring QSO Party--CW
```

- SP DX Contest
- EA RTTY Contest
- Missouri QSO Party
- Low Power Spring Sprint--CW

Apr 10-11

- Montana QSO Party (Apr 9 to Apr 11)
- EU Spring Sprints--CW
- Japan International DX Contest --CW
- PSK31 Flavors Contest
- QCWA Spring QSO Party
- Georgia QSO Party
- Yuri Gagarin DX Contest--CW
- International Vintage Contest
- VHF Spring Sprints - 144 MHz (Apr 12)

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

Welcome to the ARRL 10 Meter Contest, amigos and amigas! Effective with the 2010 event, the multiplier list has been expanded to include all of the Mexican states, replacing the single multiplier for the DXCC entity of XE. The island of Revillagigedo (XF4) will remain a multiplier based on its status as a separate DXCC entity. This is a net increase of 31 multipliers. A list of names and abbreviations for each state is posted on the ARRL Contest Branch log <http://kx9x.wordpress.com/2010/03/30/33-new-multipliers-in-arrl-10-meter-contest/>. This change does NOT apply to any other ARRL contest, only the 10 Meter Contest. One can only wonder if there will be QRP entries from the state of Quintana Roo (QRO)?

As expected, there are changes as the first running of the ARRL Rookie Roundup approaches. As of the end of March, no major logging programs yet support real-time QSO submission. (They will eventually, but not for this first event.) Therefore, we are simplifying how information will be submitted to the getscores.org <http://getscores.org> Web server. The first method is to submit a scoring summary (score, QSOs, multipliers) using the existing getscores Universal Score Uploader <http://www.getscores.org/universal.aspx>. The second way is to submit individual QSOs using the new online Web browser logging interface (the URL for this interface will be announced shortly). To use the Web-browser interface, your call sign will be registered using the common technique of an emailed password that allows you to log on to the interface. The interface is used like a regular logging program while you are operating. Alternately, you can log on paper (a logging form will be provided) and enter your QSOs intermittently or after the contest using that same Web page. More complete information will be posted on the Rookie Roundup Blog <http://rookieroundup.wordpress.com/> and on the getscores Rookie Roundup FAQ in the next few days.

Technical papers are being solicited for presentation at the 29th Annual ARRL and TAPR Digital Communications Conference to be held

September 24-26, 2010 in Vancouver, Washington (across the Columbia River from Portland, Oregon). These papers will also be published in the Conference Proceedings (you do NOT need to attend the conference to have your paper included in the Proceedings). The submission deadline is July 31, 2010. Please send papers to: Maty Weinberg, ARRL, 225 Main St, Newington, CT 06111 or to maty@arrl.org. Papers will be published exactly as submitted and authors will retain all rights. (Thanks, Steve Ford WB8IMY)

Mighty-Mites, take heart! The QRP ARCI <http://qrparci.org/> has created a brand new Multioperator category for QRP ARCI contests. This is effectively immediately and includes the upcoming Spring QSO Party, QRP-dom's biggest contest of the year. There is also a Team category for up to five members with the caveat that the team's members must be registered before the event. (Thanks, QRP ARCI Contest Manager, Jeff VA3JFF)

Steve XE1UFO-6H1UFO-KA5SUT-and-now-4B1UFO writes noting, "We just received notice from the Mexican Federation that we are allowed to use the 4B prefix during 2010, in commemoration of Mexico's 200-year anniversary of independence from Spain, and 100-year anniversary of the Mexican revolution!" You no doubt encountered some 4B prefixes during last week's WPX SSB contest. Continue to expect a swarm of 4B's throughout the year and make sure your CTY files <http://www.country-files.com/cty> are up to date!

Responding to the needs of the burgeoning digital community, beginning with the April 1st edition in 2015, the Contest Update will be distributed as raw HTML code using a reverse-shifted Feld-Hell AFSK mode.

Did you know that there are power restrictions on operation in the 70 cm band based on your location? This might be important for VHF+ contesters, especially rovers. The rule is stated in Part 97.313(f) and cites this footnote of CFR 2.106 - http://www.fcc.gov/oet/info/maps/us7/. The restriction applies in areas such as those near military bases that use 420-450 MHz communications. (Thanks, Joel WU8Y)

WFWL could change from "Work 'Em First, Worry Later" to "Work 'Em First, Cause They'll Be Wet Later"! In the case of this Slashdot <http://slashdot.org/> item about Moore Island <http://www.weather.com/outlook/weather-news/news/articles/indian-island-submerged_2010-03-25>
in the Sunderban group in the Bay of Bengal, rising sea levels have effectively ended an ownership dispute between India and Bangladesh. IOTA Contest fans may have to revise their directories if this keeps up!

Web Site of the Week - This very useful reference about that famous ham radio critter, the QSL Burro <http://uncyclopedia.wikia.com/wiki/QSL_Burro>, was passed along by

Jack WA0RJY. That Jack, he's certainly a card!

WORD TO THE WISE

Tubing and Pipe Size - sooner or later, antenna builders will be tripped up by diameter measurements. Pipe is measured by ID (inside diameter), tubing by OD (outside diameter). There will be considerable variation in the outside diameter of a piece of pipe, depending on wall thickness. If you plan on doing a lot of antenna building, check out K7LXC's "Up The Tower <http://www.championradio.com/>" - there is a whole chapter on this topic.

==> SIGHTS AND SOUNDS

What would happen if you bounced Beethoven's "Moonlight Sonata" off said orb? Katie Patterson <http://www.katiepaterson.org/EME/info.html> decided to find out by translating the sonata from the keys of the piano keys to those of Morse, sending the resulting dots dashing in a lunarly direction, receiving the reflected re-Morse, and combobulating it back into pianissimo pieces and fortissimo fragments. (Thanks, Doug K1DG)

Part of the new solar cycle, a large solar prominence was photographed on Mar 16 by Alan Friedman <http://www.avertedimagination.com/img_pages/a_big_one_color031610.html>. It's featured in the online Astronomy Picture Of the Day <http://antwrp.gsfc.nasa.gov/apod/ap100323.html> for Mar 23rd.

Back in the days of paper tape and teleprinters, the alphanumeric art form reached its zenith, as shown in this 1968 animation from Russia <http://technologizer.com/2010/03/21/1968-ascii-animation-from-russia/>. It certainly took some effort - hundreds of separate images - and I'll bet the bag of punch chads was mighty full when this was done. (Thanks to Slashdot <http://slashdot.org/> for the link)

As long as we're on the subject of paper tape, the other famous data-related application for that media is the Turing Machine <http://en.wikipedia.org/wiki/Turing_machine>. Somebody finally built one <http://aturingmachine.com/> as originally envisioned by Turing. It's almost as much fun to watch as a teleprinter in action! I love the eraser, don't you?

Continuing with cosmic conundra, would a lava lamp work on Jupiter? See what happens <http://neil.fraser.name/hardware/centrifuge/> when you try it! There is a fine line between curiousity and insanity. (Thanks, Alan AD6E)

==> RESULTS AND RECORDS

ARRL Contest Branch Manager, Sean KX9X reports that electronic log submission continues to soar with more than 3000 logs received <http://www.arrl.org/contests/claimed/> so far for the ARRL International DX SSB Contest - excellent! (The CQ WPX SSB Logs Received

page <http://www.cqwpx.com/logs_received_ssb.htm> shows more than 2100 logs received less than 48 hours after the event.) The ARRL DX CW contest page shows 3923 electronic logs in the hopper. Gee, do you think this electronic log thing is catching on? Sean also reports that Sweepstakes participation pins and much-anticipated Clean Sweep mugs will be shipped beginning Monday, April 5th.

The results for the 2010 March NA RTTY Sprint are now posted <http://www.ncjweb.com/sprintrttyprelim.php>. The full article and results will be in the May-June issue of NCJ <http://www.ncjweb.com/>. Request your LCR (Log Check Report) from rttysprintmgr@ncjweb.com. (Thanks, NA RTTY Sprint Manager, Ed W0YK)

The 2009 MM All America Contest results <http://www.powerline.com.br/cwjf/Resultado2009Ing.pdf> are published in English on the CWJF Web site. There were 314 South American and 808 North American participants. (Thanks, Luc PT7AG)

A bit of an extended discussion about the Alabama FM Simplex Contest <http://www.arrl-al.org/Alabama_ARES_FM_SIMPLEX_EXERCISE_AAR_JUNE_2009.pdf> results is contributed by Les N1LF. Run as a "contest within a contest", the event is intended to attract new VHF+ contesters. "This was the third such FM-Sprint event that we incorporated within the larger ARRL VHF Contests. Participation this year included 31 logs submitted, and over 100 unique call signs who participated across the state...Our event runs for four hours during the late afternoon on Saturday...to take advantage of a normally slow period of a contest when local contacts have been made, and evening enhancement hasn't quite started. Our hope is that weak signal operators would switch to FM during this time, and log some new QSO's and hand out some long range contacts to get newcomers excited. That part of the plan seems to be working...We have five basic categories; Fixed stations, Portable, Mobile, HT, and EMCOMM Group. We encourage our ARES Emergency Coordinators to involve their members, and also award certificates to EC's who turn in the highest score per county. Runner-ups get wallpaper too to further encourage folks to give it a try...Many stations reported working four or more grids on 2 Meter FM, with our longest QSO being over 300 miles...Promoting FM contesting likely isn't the answer to growing our ranks, but it does help over time. This is only our third event, and each one has produced at least one casual weak-signal operator and now a new "hard-core" VHF Man." Perhaps your contest club could set up a similar event encouraging participation by ARES and other emcomm groups?

In another groundbreaking, some might say sod-busting or even clod-flinging, advance the Poisson d'Avril contest <http://www.freewebs.com/poissondavril/> has set a new record for promptness by publishing the results BEFORE the contest is even run, compressing the traditional, hidebound, fuddy-duddy sequence of "announce-operate-check-publish" to just "publish". The rules, such as they are and as if they mattered, are published in several popular

tongues (eww) and the usual suspects are properly disqualified.
Congratulations to the winner...some Doug guy.

OPERATING TIP

Two new forms of cut numbers have come to the attention of your editor.
Perhaps you'll encounter them on the air! The first is an old friend -
Roman numerals. Using this handy format, 599 becomes VIXIX and should
become particularly popular in RTTY contests since it avoids the
FIGS/LTRS shift entirely. In ARRL DX contests, sending power levels as
C (100) or M (1000) watts could save time in Morse. The second method
is another adaptation - tally marks! A dit would represent a tally and
the slash mark a group of five, so one would be sent as a single dit,
two sent as two dits, until five is sent as dah-di-di-dah-dit. The date
April 1st would be sent as IV/I or di-di-di-di-dah-di-di-dah-di-dit.
Simple, no?

==> TECHNICAL TOPICS AND INFORMATION

In the category of "We Can Dream, Can't We?" comes this Science Daily
story <http://www.sciencedaily.com/releases/2010/01/100126175915.htm>
on using special "metamaterials" to cause antennas to act as if they
were electrically larger than their physical size. Can that rooftop
6-over-6-over-6 stack be far away? (Thanks, Doug N6RT)

How fast does your rig generate RF after you close the mike PTT switch
or tap the key? Larry W0QE measured several radios and lists the
results <http://www.w0qe.com/amplifier_timing.html> along with a
detailed description of the control signals. Note the wide variation in
radios, including a couple that release the transmitting indication
signal before the RF output is finished. Jim VE7RF and Roy K6XK also
contributed to this list:

- Elecraft K3 - 8ms
- ICOM IC-706 - 15ms
- ICOM IC-7000 - 10ms
- Kenwood TS-480/2000 - 10ms
- TenTec Orion/OmniVII - 15ms
- Yaesu FT-1000MP MKV - 5ms
- Yaesu FT-2000 - 15ms
- Orion - 15 ms

Jim K9YC has published another excellent tutorial, this time on Coaxial
Cable and Stubs <http://audiosystemsgroup.com/Coax-Stubs.pdf>. This
tutorial is in FAQ format and would be particularly good for contesters
that are beginning to optimize or expand their stations. This is the
first draft of the tutorial and will likely expand over time.

Gee, does this story about technology changing a sport sound familiar?
A recent issue of Computerworld
<http://www.computerworld.com.au/article/339594/how_do_they_do_it_/?fp=4&fpid=2359>
describes how top F1 racing teams run their IT systems. Each car
transmits data from approximately 100 sensors back to the pit crew - up

to 20 Gbytes per race! It takes about week to set up the full system.

The 40673 dual-gate MOSFET was a common part in preamps and mixers built designed in the 1970's and 1980's. It's no longer manufactured, but if you are trying to replace it during a repair, the NTE222 is a direct replacement. Another substitute is the 3N201. (Thanks, Steve AI0W and Leon G1HSM)

Can there be an Earth ground on Mars? Just thinking...

To speed your search for a suitable ac line filter, here is a page reference from the Mouser Electronics on-line catalog <http://www.mouser.com/catalog/catalogUSD/641/1124.pdf> summarizing common parts from Qualtek. Mouser also carries Corcom filters and other well-known brands of EMI control items, such as Murata-Erie and TDK. (Thanks, Peter N5UWY)

More on filters, this time band-pass receiving filters. David K1NQ has designed a six-band switchable filter <http://www.kv1j.com/6BPF/index.html> package. This would be quite useful in a multi-op station or at Field Day. A receiving filter can't remove in-band noise generated by a nearby transmitter, but it can greatly reduce out-of-band signal strength and prevent overload.

We all know the various "Scents Of Approaching Doom" for our various electronic gadgets...Eau de Eauverleauded Transformer, Bouqet of Baked Resistor, and so forth. Apparently, having a nose for troubleshooting is useful in the Web server business, too, as this PC Pro story <http://www.pcpro.co.uk/blogs/2010/03/19/whats-that-eggy-smell-in-the-server-room/> illustrates.

Technical Web Site of the Week - Thanks to Jim K9YC and Paul W9AC, here's a mother-lode of information about surge suppression and suppressors from the SurgeX Company <http://www.surgex.com/library.html>. There are papers about how surge suppressors work, voltage charts, and information on power wiring and grounding. Excellent stuff! Jim W6RMK recommends Standler's "Protection of Electronic Circuits from Overvoltages <http://store.doverpublications.com/0486425525.html>" as an authoritative reference, as well.

==> CONVERSATION

Please humor Dr Beldar. He only gets out now and then - around the first of April is when he's usually heard from.

73, Ward N0AX

Poachin' Eyes
Plucked by Dr Beldar from "Lyin' Eyes" by the Eagles

Some operators seem to find out early
How to find a spot and start a pile
An amp and beam and he won't have to worry

He's soon accustomed to the Top Ten style

Late at night the frequency gets lonely
Every form of winning has its price
Missing contacts drives him nuts, if only
He could pad his score it would be nice

So he tells himself he'll log on for the evening
He'll only watch the flux go up or down
But he knows where he's goin' as he's reading
He's headed for the poachin' side of town

(Chorus)
You can't hide your poachin' eyes
Single op's a thin disguise
Thought by now you'd realize
There ain't no way to hide your poachin' eyes

Over broadband Internet the cluster's waiting
With juicy mults for anyone to steal
He loads the latest spots anticipating
'Cause it makes him feel the way he needs to feel

He browses down and works the stations listed
He whispers that it's only for awhile
He swears he'll start submitting as Assisted
But he calls each one and logs them with a smile

(Chorus)

He zero beats and bags another strong one
Bouncing off the layers in the sky
The morning run is gonna be a long one
A call pops up and he clicks to QSY

He wonders how it ever got this crazy
He thinks about his club years back at school
Did he get smart or did he just get lazy?
He's too far gone to care about the rules

My, oh my, you sure know how to arrange things
You hid your tracks so well, so carefully
Ain't it funny how the fake call didn't change things
You connected from your local ISP

You can't hide your poachin' eyes
Single op's a thin disguise
Thought by now you'd realize
There ain't no way to hide your poachin' eyes
There ain't no way to hide your poachin' eyes
Cheater, you can't hide your poachin' eyes

==> CONTESTS

31 March through 13 April 2010

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

222. Crossposting Permitted to rec.radio.amateur.moderated

Newsgroup: rec.radio.amateur.misc
Date: 2010-04-01 06:00:02 UTC
From: rram@panix.com
Message-ID: <radio/ham-radio/moderated/crossposting-1-1270101601@panix.com>
Source record: 5941
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.amateur.space,rec.radio.info

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.1 2009/04/12 19:42:04
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team has decided to consider
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. We are currently trying
this on a temporary basis (90 days, through early July 2009), and adopt
it permanently if successful.

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

CLUBBING -

GYMPIE
www.gceginc.org.au
Trevor Taege, VK4BAT

GympieCommunications & Electronics Group Inc.

GCEGinc Q-News for 28 Mar 2010

I'm Trevor Taege, VK4BAT with news from the Gympie Communications & Electronics Group:

What a great weekend it was with several Club members making the trip up to Mt. Wolvi for the John Moyle Memorial Field Day Contest. The score for this year was certainly an improvement on last year's effort and there's talk now of our little group running for the full 24 hours in the 2011 event. The weather was and will usually be challenging and so it will influence the final decision. The less than perfect weather was part of the exercise in the portable situation and some experience from last year's trip was used to improve the setup this time round. Thanks to all the Club members who participated and also to the stations that gave us contact numbers. It was agreed by all involved that the weekend was a lot of fun and very successful.

The Gympie group is having a meeting with a Council representative to exchange more information about the Club's involvement in the "Tracey 2"
simulated cyclone exercise.
The GCEG will be assisted by the Sunshine Coast Amateur Radio Club who will be bringing their Wicen Van Comms Centre to the exercise and thus ensuring a fully equipped representation of Amateur Radio comms. Thanks once again to SCARC for their support. The event is planned for late June in the Tin Can Bay area. We'll have more information following the meeting with Council.

The next Club meeting is at 7:30pm this Thursday, the 1st of April in the basement of Leading Edge Electronics in Gympie. Entrance is via Reef St. All members and visitors are most welcome.

For Gympie Area News, I'm Trevor Taege, VK4BAT.

WIANEWS FOR WEEK COMMENCING MAR 28 2010.

ALL UP AND COMING IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE OF
AUSTRALIA FOR WEEK COMMENCING MAR 28 2010

WIA CENTENARY

100 Years on - the first military wireless message.

Today, Sunday 28 of March is the Centenary of the first military wireless message sent in Australia.

The credit for this operation goes to Lieutenant George Taylor. The same George Taylor, who a couple of weeks earlier had chaired the meeting of wireless experimenters from which came the begining of the WIA.

The military exercise took place near Helensburgh which is on the southern edge of Sydney. Two stations were set up, one of which was at - what is now - Veno reserve. The object was for the forward station "B" - set up in a cave - to report the movements of an imaginary enemy back to HQ at "A" which was in a tent near Veno Reserve.

Over two days they tried various combinations of spark based equipment. To add to their troubles - it rained. About to pack up - they tried again with the equipment out of the cave and this time success.

The story has been written up at various intervals over the years - the latest in the Engadine District News for the 16th of March. It has been passed on by Barry VK2FP. The report goes on to say that the Heathcote RSL Sub Branch will be holding a special presentation at Veno Reserve Today, the 28th.

(a VK2WI Historical News report)

HAMS ACROSS AUSTRALIA.

VK1
vk1 local news email broadcast@vk1.wia.ampr.org and ask for subscription.

CRARC has come to the point that the club has runout of storage for its collection of equipment (which is currently spread across several locations)

What does this mean !!

Simply the club is looking for storage for it's two WICEN trailers, several dozen antennnas, coax, several portable repeaters, racks and other items.

In short about a 2 car garage worth. It needs to be accesible 24x7, have power, secure and last but not least CHEAP !!!.

So if you have such a facility or know of one please contact the committee with the details.

committee@crarc.ampr.org

VKG Roundup http://www.police.nsw.gov.au/news

Westlakes Mini field day will be held Sunday May 30 and the gates open 9am. As in the past quality items are welcome for the auction

WICEN(NR) AGM, April 11 will be held at Lismore Workers Club from 2pm.
Member subs of $15 are now due, renew, rejoin as soon as possible.
Please send your subs to:-
Secretary, John Toland VK2XKX.
101 College St. Lismore, NSW, 2480.

Several members of the St. George Amateur Radio Society have travelled to the Mt. Bindo repeater site near Jenolan Caves. They replaced the batteries and carried out some general maintenance including cutting the grass around the repeater hut. It was found that the repeater's controller board was faulty and had been locking the repeater on and running down the battery.

Hopefully the maintenance will keep this 30+ year old repeater going for a little longer.

The Clareview Gathering is a yearly event where Radio Amateurs meet at a spot on the coast between Rockhampton and Mackay to relax, talk radio, re-establish acquaintances and participate in the world renown Saturday Night Mega-Auction.

It is one of the main revenue raisers for the Rockhampton and District Amateur Radio Club and Mackay Amateur Radio Club.

The Clareview Gathering is so popular that on-site accommodation is booked out years in advance, so if you want to go you will have to either camp, caravan or motor-home over the weekend.

For further details contact Don Wilchefski VK4BY of the RADAR Club.

vk7 local news, email vk7regionalnews-subscribe@yahoogroups.com

The Cradle Coast Amateur Radio Club provided comms coverage for the Kentish Endurance Riders March 13.

While they encountered some fog on the road near Sheffield while travelling to make the 6am meet-up time, it later on improved to a warm day with some cloud cover.

The event had 77 riders doing the 80km stages and approx 45 riders doing the 40km event. There were 5 checkpoints, with one being used 3 times, no wonder Keith, VK7KW, ran out of printed writing paper-hihi.

Radio coverage was over a 15km radius and was good, with base able to contact all checkpoints using a simplex 2m frequency.

The Kentish Endurance Riders were extremely pleased with the service that was provided and look forward to next years event.

ACMA NEWS

Reregister Now to Avoid Telemarketing Calls

ACMA reminds people that it is time to re-register for the Do Not Call Register for people who signed up in 2007. This will ensure you do not get any unwanted telemarketing calls.

Registrations for the Do Not Call Register are valid for three years. Anyone who signed up when the service was launched in May 2007 should re-register now to maintain protection from unwanted marketing calls.

More than 4.3 million home, mobile and VoIP numbers are now listed on the Do Not Call Register.

It's fast, free and easy -
simply call 1300 792 958 or go to www.donotcall.gov.au

Foundation Course and Assessments

A very small roll-up for this months Foundation Licence course with only 2 participants on the day despite there being numerous enquiries in the preceeding months. On the Sunday a total of four candidates, two for the foundation licence assessment, one for the standard assessment and one for the practical assessment only.

The candidates for the Standard and practical were successful unfortunately one candidate failed the Foundation theory but passed the practical.

CRARC's next Foundation assessment weekend is scheduled for May 15th / 16th.

VK2

Richard VK2FRMA has successfully passed his Advanced Licence exam and is awaiting a new call sign, possibly VK2CRA. Richard doesn't believe in letting the grass grow under his feet. Congratulations Richard.

Just like Richard did, persons around WESTLAKES wishing to study for either Standard or Advanced class licence are asked to contact the Westlakes Secretary ASAP.

Come on you Foundation calls here is your chance to study for your upgrade under expert tutoring.

As advised classes will be held Saturday afternoons at Westlakes ARC's classroom.

To find out more about Westlakes Amateur Radio Club, or Amateur Radio in general, leave a message on their 24 hour voice mail box on 02 49-581 588.

(VK2FJL)

Announcing a QRP contest for the Centenary

The VK QRP Club is sponsoring a new commemorative contest that should have very wide appeal and be a lot of fun too.

The WIA Centenary QRP Contest is open to all radio amateurs whether they be Foundation, Standard or Advance licensees with the aim of encouraging interest in the use of low level transmit power.

For the entire UTC month of May the contest will be on the 80m and 40m bands using either CW, AM or SSB.

It?s hoped that a lot of stations will be calling ?CQ WIA Centenary QRP Contest?.

The rules will be published in the April edition of Amateur Radio magazine and on the WIA website.

SILENT KEYS

BABY BLINDNESS PIONEER ARNALL PATZ, EX-WA3EVC (SK)

Dr Arnall Patz, ex-WA3EVC -- an ophthalmologist who discovered and eliminated a major cause of blindness in premature infants -- passed away from heart disease on March 11. He was 89.

In 1954, Patz proved that treating premature babies with pure oxygen could destroy their eyesight. At the time, this was the most common cause of blindness in premature infants. Although the new understanding came too late for thousands of people who were made blind by oxygen -- including the singer Stevie Wonder, it undoubtedly saved many more from a similar fate.

Patz operated a ham radio from his home on behalf of the Maryland Eye Bank. According to his nephew Sam, Patz erected an 80 foot tower at his home and became known to amateurs across the country for putting out the word on the airwaves whenever corneas were needed for transplant.

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

TELECOMMUNICATIONS AND BROADCASTING RETURNING TO HAITI

Telecommunications and broadcasting are both slowly returning to earthquake ravaged Haiti. This according to Federal Communications Commission officials who went to Port-Au-Prince in January to assess communications damage and help that country's communications regulators with their restoration efforts.

As previously reported, the team was deployed in response to a request from Director General of Conatel, the communications agency in Haiti, in coordination with the U.S. Agency for International

Development. In an update delivered to commissioners, FCC staffers Mindel Del La Torre, and Jamie Barnett, detailed the states of Haiti's communications and the ongoing efforts by the FCC to assist.

According to the two officials, hard-wired phones were heavily damaged.

There were 108,000 telephone lines in the country in 2008. But the quake lead to a total loss of its wire-line infrastructure and those phones are still not working.

Wireless service fared better in the quake. De La Torre noted that Haiti had 2.5 million cell users before the quake. Now, with new equipment having replaced destroyed cell sites and cellular coverage is nearly back to 100%,

In the area of broadcasting some definite strides have been made. Before the earthquake Haiti had some 50 radio stations and 18 TV stations operating. Now, about 30 radio stations as well as six TV stations are

back on the air.

The FCC has said that it intends to help with the restoration of Haiti's telecommunications and broadcast infrastructure over the long term. Meantime a limited ham radio response is still at work aiding in

quake relief efforts.

RNW SENDS RADIO STATION IN A BOX TO CHILE

Radio Netherlands Worldwide is sending two complete mobile radio stations to the Chilean broadcaster Radio Universidad T�cnica Federico Santa Maria.

This will enable two of its partner stations in the coastal region of Maule to resume their broadcasts as quickly as possible.

This is the region was seriously affected by the earthquake on February 27th.

The mobile radio station, often called radio-in-a-box, is specially built to be used temporarily in countries where radio stations are forced off the air by natural disasters.

Each station is less than a cubic meter in size, and is equipped with an FM transmitter, mixer, microphones, a CD player and a laptop computer.

Radio Netherlands Worldwide has previously provided such stations following the earthquakes in Indonesia in September 2009 and Haiti this past January.

Regional Conference on Amateur Radio 2010

The Regional Conference on Amateur Radio will be held April 4 - 6, in Doha, State of Qatar and will be the biggest Regional Symposium on Amateur Radio in the Middle East in 2010.

The Conference is organized by the Qatar Amateur Radio Society (QARS) jointly with the International Amateur Radio Union (IARU).

So far the kind invitation from the QARS Chairman
H.E. Abdullah bin Hamad Al-Attiyah, A71AU, has been
accepted by a number of IARU societies in the Middle East
as well as one from Region 3 together with Telecom Regulators
and Administrations from the GCC area.

Participation is also expected from ITU officials as well as local
Qatar officials.

The program consist of presentations on Regulatory issues, preparation for
WRC-12, Amateur Radio Emergency and Disaster Communication,
national regulations of Amateur Radio in the GCC States combined with
panel discussions and workshops with the aim to assist in building and
maintaining good working relationship between the National Regulators and
Amateur Radio Societies.

WEIRD AND WONDERFUL

Up to 250 watts harvested from your shock absorbers

All you mobilers could be generating enormous amounts of energy as you hit
those bumps- HIHI.

In a recent study, mechanical engineers from the State University of New York
have designed and tested a retrofit regenerative shock absorber that recovers
a vehicle's vibrational energy.

The researchers built a 1:2 scale prototype of the regenerative shock
absorber, and demonstrated its ability to harvest 2-8 watts of power during
typical driving conditions at a speed of about 45 mph. They predict that a
full-scale system on a four-wheel car should be able to recover up to
256 watts under these driving conditions.

The researchers predict the ability to harvest approximately 64 watts per
wheel, for a total of about 250 watts for a 4-wheel car, the value increasing
considerably when the system is used on irregular roads.

It was found that the power regenerated is proportional to the square of the
magnetic flux across the coils. Consequently, increasing the flux by twos,
quadruples the peak power output.

Hello listeners

We are looking at updating the VKHAM Website data for all the Repeaters in VK
mainland and P29.
Following from my request last week, I have received some Emails from clubs and
individuals to update their repeater data.
Do you have a repeater under your control, then I would ask you to send a message
to repeaters@vkham.com with your repeater information.

This data will also be used to update the WIA main database.
If you log onto the link www.wiaq.com/repeaters.htm
This page represents the type of data we are looking at including on the new pages.
Of course the main and absolutely accurate site is our own at wia.org.au , that
is IF we have your correct data.Back to news central

2010 NZART SANGSTER SHIELD QRP CW CONTEST

When :- Saturday, 15 May 2010 and Sunday, 16 May 2010
Times :- 2000 NZST until 2300 NZST each evening
Band :- 80m
Mode :- CW only.

The contest was established in 1927 at the time the late Mr. Ralph Sangster
presented to the radio Amateurs of NZ the trophy, known as the Sangster
Shield, for annual competition to be won by the most efficient station. It
is pertinent to note not only did the efficiency of the station be taken
into account, but also the efficiency of the operator concerned The terms of
the gift of the trophy were that the competition was to be conducted on the
80 metre band using input power of not more than 5 watts and to be solely
restricted to Morse operation.

INTRUDER WATCH - ENFORCEMENT ZONE

Region III IARUMS Coordinator Peter Young VK3MV

VK IARUMS reflector email to subscribe intruders@wia.org.au

INTRUDER NETS
Friday 0730 UTC 7.065.5 with VK4CEU David.

Amateur exclusive frequencies where any non-amateur signal is definitely an intruder.

Amateur HF Spectrum world wide
7.050 to 7.100
14.000 to 14.250
14.250 to 14.350 No broadcasters
21.000 to 21.450
24.890 to 24.990
28.000 to 29.700

IARU Region 2 Intruder watch are reporting pirate signals from our neck of the woods.

Although no reports from Region 3 and the Aussie Intruder team, it would seem according to the region 2 guys that Indonesian Pirates are still very active on our bands, partiuarly 21 mHz.

They found them daily on 21030.2 kHz in USB from 0900 - 1200 UTC and later. Location: Area of Sumatra and Java. Another group was active on 21388.9 kHz in LSB.

Talking to them is wasted time. Use these frequencies for ham traffic!

THE QNEWS WORK BENCH - the nuts and volts report -
(Measure twice - Cut once!)

MARCH 28 AND THIS AUDIO IS IN UPLOAD AREA ROBERT......

Super-fast wireless connections may be just a flip of the switch away

No, this is not a re-launch of spectrum polluting broadband over powerlines (BPL), but rather researchers believing that household lights could one day carry a broadband signal.

None other than the Heinrich Hertz Institute in Germany - we all remember that Hertz proved the existence of radio waves in 1887 - now scientists at centre which honours his name are experimenting with visible light as a possible alternative to the already crowded radio spectrum.

The German scientists had initially been able to dramatically increase the bandwidth available from Light Emitting Diodes lighting to achieve a download data rate of 100 megabits per second.

In an announcement at the recent Optical Fibre Communication Conference and Exposition in San Diego California, the scientists claimed a 230 megabits per second throughput - a record for visible wireless using commercial LEDs.

What a bright idea - one that surely Heinrich Hertz himself would be proud.

I'm Jim Linton VK3PC and you're listening to VK1WIA.

French speaking numbers station

A YouTube video shows an unusual Numbers Station, it's in French.

Numbers Stations are believed to send messages to spies.

The YouTube description reads:

Enigma 2000 member Hans alerted the group to a new numbers station on
13420kHz saying that it has been active since 07:42z.

This station was passing French numbers.

Its family resemblance to the Russian family 1 numbers stations such as
E06 and G06 was clear from the start.

Further surprises were in store and this video documents them for you.

Please see numbers station site

==> PUBLIC SERVICE: ARRL SIGNS MEMORANDUM OF UNDERSTANDING WITH
AMERICAN RED CROSS

On Thursday, March 25 ARRL President Kay Craigie, N3KN, signed a new
Memorandum of Understanding (MoU
<http://www.arrl.org/news/files/ARRL-ARC_MoU.pdf>) with the American
Red Cross (ARC <http://www.redcross.org/>) at ARC National Headquarters
in Washington, DC. The MoU, which replaces an earlier Statement of
Understanding that expired in 2007, provides a "broad framework for
cooperation" between the ARRL and the ARC "in preparing for and
responding to disaster relief situations at all levels in rendering
assistance and service to victims of disaster, as well as other
services for which cooperation may be mutually beneficial." Read more

in the Great Smoky Mountains National Park near Mt LeConte. When he was
```

about 1 mile up from Alum Cave Bluff, he came across Judy Potter, 57, of Atlanta who had broken her ankle while on the trail. Oakberg reached for his cell phone to call 911, but there was no coverage available. He then reached for his handheld transceiver and put out a call to any Amateur Radio operators who may be listening via some nearby VHF 2 meter repeaters. Read more here <http://www.arrl.org/news/stories/2010/03/30/11411/?nc=1>.

==> NEW ARRL WEB SITE UNDERGOES FURTHER TESTING BEFORE LAUNCH

According to ARRL Chief Operating Officer, Harold Kramer, WJ1B, we are currently finishing the final pre-launch adjustments and testing the new ARRL Web site and plan to launch it by April 12. "This launch has been a longer than anticipated process for all of us," Kramer said, "but we have learned a lot during the past two years as we conducted research about what people want from the ARRL Web site. We created a new architecture and navigation scheme to meet those needs and we implemented a contemporary new design. After that, we updated our current Web content and created lots of brand new content, including multimedia. We then began integrating the incredibly complicated functionality, e-commerce, advertising and database connections from the current Web to the new Web site. It has been a lot of work, and while it is disappointing that we are not out the door quite yet, we are now in the home stretch. When the new ARRL Web site debuts, we just want to be sure that it looks great, works well in meeting the needs of our members and that it is something that we can all be proud of."

==> AMATEUR RADIO IN THE CLASSROOM : 2010 ARRL TEACHERS INSTITUTE BEGINS WITH A BANG IN TUCSON

The ARRL Teachers Institute on Wireless Technology (TI) began its 2010 sessions in February with a TI course designed specifically for teachers in the Tucson (Arizona) Unified School District (TUSD). Taught at Jefferson Park Elementary School, 21 educators -- including the school principal, school counselor and three resource personnel -- took part in five Saturday sessions, working through an expanded 45 hour Teachers Institute (TIs usually are done in about 32 hours). The teachers completed homework assignments that included building the clock kit, building a flashing LED Santa and reading the first two chapters of What's a Microcontroller? In addition, five parents attended the TI as observers. The course was taught by TI Instructor Miguel Enriquez, KD7RPP, who teaches in the TUSD. Read more here <http://www.arrl.org/news/stories/2010/03/31/11413/?nc=1>.

==> ARRL IN ACTION: WHAT HAVE WE BEEN UP TO LATELY?

This feature -- including convenient Web links to useful information -- is a concise monthly update of some of the things ARRL is doing on behalf of its members, including signing a new Memorandum of Understanding with the American Red Cross, preparing for WRC-12, legislative actions, holding workshops to help teachers introduce wireless technology in their classrooms, promoting on-the-air events,

investigating power line noise and more. This installment covers the month of March. Read more here <http://www.arrl.org/news/features/2010/04/01/11415/?nc=1>.

==> ARRL SEEKS INPUT FOR NEW IARU REGION 2 BAND PLAN

The International Amateur Radio Region 2 conference -- to be held later this year in El Salvador -- brings together delegations from the national Amateur Radio Societies in the Western Hemisphere. One of the topics on the agenda will be the Region 2 HF band plan. This band plan is "harmonized with" -- spectrum management-speak for "very similar to" -- the IARU Region 1 and Region 3 band plans. At this year's conference, the IARU Member-Societies will consider possible changes to the Region 2 band plan. The ARRL is cooperating with this procedure by inviting input to be sent to the ARRL Board of Directors' Band Planning Committee. The committee will review the existing Region 2 band plan, consider input from the amateur community and make recommendations to the ARRL Board for submission to IARU Region 2. Be sure to get your comments in by Monday, April 5. Read more here <http://www.arrl.org/news/stories/2010/03/04/11374/?nc=1>.

==> SOLAR UPDATE

Tad "The uncertain glory of an April day, which now shows all the beauty of the Sun <http://shakespeare.mit.edu/two_gentlemen/two_gentlemen.1.3.html>" Cook, K7RA, reports: Last week's bulletin <http://www.arrl.org/news/stories/2010/03/26/11408/?nc=1> said new sunspot group 1057 appeared March 23, but it was actually short-lived group 1056 according to summaries <http://www.swpc.noaa.gov/ftpmenu/forecasts/SRS.html>. Group 1057 emerged on March 24, and on March 25 1056 became a plage <http://en.wikipedia.org/wiki/Plage_29> without spots.
Sunspot group 1058 arrived March 26, but was gone two days later when 1059 emerged. Group 1059 has not become as large as 1057. From March 28-April 1, the size in millionths of the Sun's surface was 120, 100, 150, 130 and 70. But the size of 1057 from March 24-April 1 was 5, 240, 400, 320, 380, 410, 290, 260 and 250. Group 1059 is surely fading, but 1057 may be holding steady, even though it is down from peaks of 400 and 410 on March 26 and 29. The average daily sunspot numbers for the week were up more than 4 points to 28.9, and the average daily solar flux changed from 84.2 to 84.9. The renewed sunspot activity seems constant and steady. We have new 3-month moving averages of daily sunspot numbers through the end of March, which is centered on February, and the number has increased a few points from last time. The 3-month moving average of daily sunspot numbers centered on July 2009-February 2010 was 4, 4, 4.6, 7.1, 10.2, 15.2, 22.4 and 25.7. The rate of increase has slackened, but it steadily moves higher. Look for more information on the ARRL Web site on Friday, April 2, where Tad will have a bit more about the numbers, a visit to NWRA -- the home of the Effective Sunspot Numbers -- and reports on recent conditions. For

more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" brought to you by William Shakespeare's Two Gentlemen of Verona <http://shakespeare.mit.edu/two_gentlemen/two_gentlemen.1.3.html> (Act I, Scene 3).

==> THIS WEEK ON THE RADIO

This week, the Lighthouse Spring Lites QSO Party is April 1-11. The QRP ARCI Spring QSO Party, the SP DX Contest and the EA RTTY Contest are April 3-4. The Missouri QSO Party is April 3-5 and the Low Power Spring Sprint is April 5. Next week, look for the Montana QSO Party on April 9-11. The Japan International DX Contest, the QCWA Spring QSO and the Georgia QSO Party are April 10-11. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/special-events>.

==> ARRL RECOGNIZES: RUDY SEVERNS, N6LF, WINS MARCH QST COVER PLAQUE AWARD

The winner of the QST Cover Plaque Award for March is Rudy Severns, N6LF, for his article "An Experimental Look at Ground Systems for HF Verticals." Congratulations Rudy! The winner of the QST Cover Plaque award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll Web page <http://www.arrl.org/members-only/qstvote.html>. Cast a ballot for your favorite article in the April issue by Friday, April 30.

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

Registration remains open through Sunday, April 25, 2010, for these online course sessions <http://www.arrl.org/courses-training> beginning on Friday, May 7, 2010: Amateur Radio Emergency Communications Level 1; Antenna Modeling; Radio Frequency Interference; Antenna Design and Construction; Propagation; Analog Electronics, and Digital Electronics. To learn more, visit the CEP Course Listing page <http://www.arrl.org/online-courses> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/arrlletter/.

Amateur Radio Newsline(tm) Report 1703 - April 1 2010

Amateur Radio Newsline report number 1703 with a release date of
Thursday, April 1st, 2010 to follow in 5-4-3-2-1.

The following is a QST. The ARRL and the American Red Cross finally
sign a new Memorandum of Understanding. What might this mean to those
of you involved in rescue radio? Also, a crossband repeater will be
launched into space in November, a bill to have engineers as advisors
to the FCC Commissioners moves forward and a message to families with
a member who is a ham: There is hope! Find out the details on Amateur
Radio Newsline(tm) report number 1703 coming your way right now.

RESCUE RADIO: ARRL AND RED CROSS SIGN NEW MOU

Its going to be business as usual between the American Red Cross and
the American Radio Relay League. This as the two sign a new
Memorandum of Understanding to continue their joint public service and
humanitarian work. Mark Abramowicz, NT3V, is at our North-East Bureau
with the details:

--

The signing of this new Memorandum of Understanding by the ARRL's President
Kay Craigie, N3KN, completes a process whose intent was to preserve the
role of amateur radio in Red Cross operations without ARRL volunteers being
subjected to what some felt were intrusive background checks by an
independent company.

In a statement accompanying the March 25 signature on the document, Craigie
noted: "Because of the importance of emergency communications, we are happy
to be able to continue the League's long-standing relationship with the
American Red Cross."

But nearly four years ago, when this issue rose to a boil among amateurs
who worked with the Red Cross, it was anything but assured that the ARRL
would be seeing an easy resolution to this situation.

In 2006, the American Red Cross began requiring all of its volunteers to
submit to a criminal background check by an independent organization it had
hired called MyBackgroundCheck.com.

Those who went to the company's website also found that MBC was requiring consent for a credit check and mode-of-living investigation.

Essentially, the company wanted to gather a broad range of personal information that would go to "character, general reputation (and) personal characteristics."

MBC clearly stated on its website at the time that the background check would be "all-encompassing."

In an October 2006 advisory, ARRL President Joel Harrison W5ZN, suggested ARRL members become aware of what they were allowing MBC to gather.

And, while the American Red Cross assured ARRL at the time that it was strictly interested only in the criminal background check, its contractor - MBC - still had the right to gather the other information on an applicant's background.

That sparked invasion of privacy concerns and a whole host of other issues and some communications volunteers walked away.

The compromise hammered out in the new Memorandum of Understanding allows ARRL radio volunteers to arrange at their own expense a criminal background check performed by a state or local police agency.

The Red Cross also agrees under the memorandum that ARRL volunteers won't be asked or required to submit to credit checks or any kind of investigative consumer reports or lifestyle investigations.

The memorandum stipulates that ARRL and Red Cross volunteers will cooperate at disaster scenes and allows for ARRL volunteers to perform such roles as amateur radio liaison, communication equipment operator, communication equipment installation and repair technician and even take part in disaster assessment.

And, the Red Cross agreed that during a Red Cross Disaster Relief Operation, Red Cross credentials will be provided to ARRL volunteers as required and consistent with Red Cross policy.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

Hopefully, this new Memorandum of Understanding will allay the fears of those hams who objected to the Red Cross using an outside contractor to do background checks on those who want to volunteer. (ARRL)

**

RESCUE RADIO: HAMS BECOME THE EARS OF 911 IN LINCOLN NB. AS TELECOM SWITCHING FAILS

I'm Bill Pasternak, WA6ITF, with breaking news:
--

K0NEB: "I'm at 48th and Cornhusker right now in Lincoln, Nebraska, and we are on the major intersections in Lincoln in case somebody needs to call 911 for any kind of emergency."

--

That's Joe Eisenberg, K0NEB, who is just one of a large number of Lincoln, Nebraska area hams who are stationed all across the city. This, after a major failure of telecommunications provider Windstream's switching system wreaked havoc on phone service in Lincoln and across much of Southeast Nebraska on Thursday, April 1st. The outage that began at about 7 a.m. Central time disabled 911 from both dial up and cellular service in several communities including the city of Lincoln.

According to the latest news reports, by early afternoon, landline service in Lancaster County had been restored but cellular service into 911 still was not operating. As a result, an unknown number of hams are still at major area intersections. They are primarily using the Lincoln 146.76 MHz repeater to relay emergency messages to authorities. How long they will be out there as 911 back-up is not known as we go to air.

More on this next week. Jim. (ARNewsline(tm))

**

HAM RADIO IN SPACE: CROSSBAND REPEATER IN SPACE TO LAUNCH IN NOVEMBER

A true crossband repeater should be on-orbit by years end. This with word that three small research satellites with amateur radio educational payloads are scheduled for launch in late November with one being billed as a true crossband relay device.

The new CubeSats come from Montana State University, the University of Colorado and Kentucky Space as part of NASA's Educational Launch of Nanosatellite mission. And it's the one from Kentucky that's of interest
to the ham in the street.

KySat-1 is believed to be the first ever CubeSat to carry a 2 meter-to-70 cm FM transponder. This will make it a true crossband repeater in space and one that should be accessible by most radio amateurs within its flight path.

For those not aware, CubeSats are in a class of small research spacecraft called pico-satellites. They have a volume of about one quart and weigh no more than 2.2 pounds. The University of Florida was selected as an alternate in case one of the three primary spacecraft cannot fly. (ANS)

**

RADIO POLITICS: IARU REGION TO MEET IN EL SALVADOR

The 17th session of the International Amateur Radio Union Region 2 General Assembly will take place from October 4th to the 8th in El Salvador. This meeting will be hosted by the Club de Radio Aficionados de El

Salvador. Matters to be discussed include the promotion and defense of amateur radio, High Frequency band plans along with other issues of importance to member societies within the region. More information is available on line at http://elsalvador2010.org/en/ (Southgate)

**

RESCUE RADIO: FCC GRANTS 97.113 WAIVER TO LA SHERIFF DEPT FOR TWO EXERCISES

The waivers to section 97 dot 113 of the Amateur Service Rules to permit various entities to use employee hams in emergency training exercises continue to be granted. The latest is to the Los Angeles County Sheriff's Department in California that requested a permit for certain amateur radio licensees to transmit communications on behalf of their employer during upcoming government emergency drills.

The venue for this drill are two medical centers operated by Providence Little Company of Mary. The purpose of the exercises is to demonstrate reliable equipment operation and operator proficiency as a means of back-up communications between and among hospital facilities, law enforcement agencies, and emergency operations centers. This, in the event that normal communications channels are unavailable.

An exercise with emphasis on Providence's Torrance, California, facility will take place on April 22nd. Another with emphasis on Providence's San Pedro facility will take place on June 17th. In total the drills involve 17 hams employed at the two facilities. Participants for the Sheriff's Department will be non-employee volunteers, who do not require a waiver.

In granting the request, the FCC says that the waiver to Section 97 dot 113 of the Amateur Service Rules is warranted in the public interest under the circumstances requested. (FCC)

**

RESCUE RADIO: FCC GRANTS KC 97.113 WAIVER REQUEST IN KANSAS CITY

The FCC has also issued a Part 97.113 waiver to Wyandotte County KCK Emergency Management of Kansas City, Kansas. This also to permit certain Amateur Radio Service licensees to transmit communications on behalf of their employer during an upcoming government emergency drill.

In his March 23 request, Larry Eker who is the Program Coordinator of Homeland Security for Wyandotte County Emergency Management told the FCC that the County will be participating in a Kansas City Metro Mass Causality Incident Exercise titled Perfect Storm. That it is to take place on April 7th from 8:00 a.m. to 5:00 p.m. at several locations in Platte County, Missouri, and Wyandotte and Johnson Counties, Kansas.

Scot Stone is the Deputy Chief of the Mobility Division of the FCC's Wireless Telecommunications Bureau. He said that in granting the waiver for the dozen requested government employed hams to take part, that granting of the waiver request is appropriate under the circumstances presented. This because the public interest is served in facilitating the

April 7th public safety exercise and by permitting the amateur licensees to take part. (FCC)

BREAK 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the WA6TWF Super System serving the world from Los Angeles California.

(5 sec pause here)

**

RESCUE RADIO: HIKING HAM BECOMES FIRST RESPONDER

A ham radio operator truly became a first responder on Sunday morning March 28th. It happened when John Oakberg, NK4N, was hiking in the Great Smokey Mountains National Park near Mount LaConte. That's where he came across a 57 year old female hiker who has sprained or broken her left ankle and leaving her unable to walk back down off the hill.

Oakberg and several others in the woman's hiking party first tried cellular phones to summon assistance but there was no service available where they were. But NK4N had with him a hand held transceiver with which he was able to put out a call for assistance over several local repeaters. As Oakberg's signal was noisy into all of the repeaters but two other hams identified as Dean Webb, N4NLT, operating mobile and Cleve Hayes, KB4UAL, at his home who could hear NK4N direct. They assisted in relaying data to Scott Wyrick, KD4CWB. After obtaining the necessary information KD4CWB called the National Park Service dispatcher, relayed the facts and requested a rescue team to be dispatched.

It took a few hours but rescuers were finally able to reach the victim and successfully carry her to safety. Paramedics treated her on the scene but she refused transport via ambulance and left the area in a private vehicle. Reportedly her hiking group took her to the Sevier County Medical Center for additional treatment. (KD4CWB)

**

RESCUE RADIO: HAMS TAKE PART IN SIMULATED TSUNAMI DRILL

Amateur radio was part of an simulated tsunami emergency training exercise along the Northern California coastline held on March 24th. Timothy Hanna, WB9JNS, a member of the Mendocino County Amateur Radio Communications Service, was one of over a dozen hams that participated in a portion of the test involving the use of amateur radio.

Through the use of ham radio channels, the Mendocino County Amateur Radio Communications Service was able to have contact with an emergency operations center in Eureka. The message Hanna and his associates sent was a simulated report of conditions in Mendocino County.

Hanna told the Ukiah Daily Journal that in all, hams demonstrated at least four separate methods of getting in contact with Humboldt County. A total of 13 licensed Ham radio operators involved in the training exercise. (Ukiah Daily Journal)

**

RADIO LAW: BILL TO ADD ENGINEERS TO COMMISSION MOVES ON

A bill that would allow each FCC commissioner to add an electrical engineer or computer scientist to his or her staff has been approved by the Senate Commerce Committee.

Called the FCC Commissioners' Technical Resource Enhancement Act, the proposed legislation says that the new technical staffers would provide the commissioners with technical consultation when appropriate. They would also interface with the Office of Engineering and Technology, commission bureaus, and other technical staff of the commission for additional technical input and resources.

As previously reported, the bi-partisan bill was co-sponsored by Senators Olympia Snowe and Mark Warner. A similar was introduced in the House by Representative Jerry McNerney earlier and has been referred to the House Commerce Committee. (Adapted from Radio Ink)

**

ELECTRONICS DISPOSAL: CEA SETS UP RECYCLING WEBSITE

With the digital television transition now almost a year old and new flat panel sets selling as fast as they can be manufactured, the Consumer Electronics Association has commented on an aspect of the transition that hasn't been too widely discussed. That being what to do with all those old
analog television receivers.

In its well publicized remarks, the Association is urging consumers to take advantage of the many ways to safely dispose of used analog TV sets. It noted that it offers a list of manufacturer and retailer electronics recycling programs as well as a searchable database of electronics recyclers by Zip code on its web site.

The Association also says that many consumers are unaware of other local options for recycling unused consumer electronics products. It emphasizes that its website site lets consumers access ways to find electronics recycling opportunities in their area and other information as well. The Consumer Electronics Association's electronics recycling website is located in cyberspace at www.mygreenelectronics.org. (RW)

**

HAM HAPPENINGS: RAIN DROPS TELEPHONE DIAL IN SERVICE

RAIN, the Radio Amateur Information Network produced by Hap Holly, KC9RP, has discontinued its dial-up outgoing programming service effective April

1st and will only be available over the World Wide Web. This, due to a lack of activity on the phone line that has been provided to Hap by Uddle Systems.

As with most ham radio audio providers, RAIN has found that the majority of its listeners prefer the quality of downloadable audio over the Internet to the relatively constricted trait obtainable over a normal telephone. So it is shifting its entire emphasis to digital distribution from its website at www.therainreport.com. There you can find the latest programming provided by KC9RP along with files and podcasts from the last three years.

And less we forget, Hap had his back surgery and his recovery is progressing well. Once out of the hospital he will be in rehab for several weeks. During this period, RAIN listeners will be treated to highlights of shows from the past. Get well wishes can be sent by e-mail to hap at the rainreport dot com or by regular mail to his callbook address. (RAIN)

**

THE SOCIAL SCENE: CROATION TELEGRAPHY CLUB OFFERS FREE MEMBERSHIP

If you like CW, the Croatian Telegraphy Club invites you to become a member. Joining by E-mail is free and every member is also inducted into the European CW Association as well. More is on-line at www.hamradio.he/ctc. (Croatian Telegraphy Club)

**

THE SOCIAL SCENE: SOUTHEASTERN VHF SOCIETY CONFERENCE APRIL 23 - 24

Registration is still open and available for this years Southeastern VHF Society Conference to be held at Morehead State University in Morehead, Kentucky from April 23rd to the 24th. You can download more information about the conference and a registration form at www.svhfs.org/conference.html (WA4KXY via VHF Reflector)

**

HAMVENTION 2010: K4SV TO SPEAK AT SWODXA DAYTON DX DINNER

The SouthWest Ohio DX Association has announced that their speaker for their 25th annual DX Dinner on May 14th, will be Dave Anderson, K4SV. The DX Dinner is held annually in conjunction with the Dayton Hamvention, this year at the Crowne Plaza Hotel, Dayton, Ohio. Door prizes include an Icom IC7600 transceiver and an Alpha 8410 amplifier. More is on-line at www.swodxa.org (SWODXA)

**

HAMVENTION 2010: PANEL ALMOST COMPLETE FOR 2010 HAM RADIO TOWN MEETING

The panel is now almost complete for this years Amateur Radio Town Meeting to be held on Saturday, May 15th at the 2010 Dayton Hamvention. This years Town Meeting is titled "Amateur Radio As A Way To Find Or Keep A Job In Today's Shrinking Job Market", and in reality it will be a job advisory

fair of sorts. One where people who have built their careers in part or in total because of being radio amateurs will share their experiences with you.

This year brings some new names to the long running Town Meeting panel. Among them is Diana Eng, KA2UHB. Diana is a New York City based fashion designer who integrates electronics into many of her of her designs. A former Project Runway contestant, KA2UHB also produces and hosts on-line videos explaining the various aspects of electronics, communications and ham radio.

From the ARRL comes Allen Pitts, W1AGP who is the League's Media Realizations specialist. Simply said, his job background will amaze and astound you. Allen has truly been there and done that. Now he will share his knowledge with all of you.

And we will also have a presenter who can answer the question of what to do when you are nearing retirement and the company you have spent most of your lifetime working for suddenly folds. So there you are without a job or a pension to fall back on. That's what happened to Bob Sherman, K2SJP, but thanks to being a ham radio operator since his teen years a new career in the same industry was not that far away.

They, along with returning speakers that include Heil Sound's Bob Heil, K9EID, ABC television's Steve Mendelsohn, W2ML, and Rich Moseson, W2VU of CQ Magazine will make up the panel of experts.

As usual we will be in Meting Room 2 from 11:45 a.m. to 2 p.m. at the Hara Arena on Saturday, May 15th. If you are at Hamvention 2010, please join us. We will not have all the answers, but hopefully we will at least be able to give you some general guidance in gaining employment or keeping a job you now have. (ARNewsline(tm))

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

**

EMERGING TECHNOLOGY: WORLDS SMALLEST SUPERCONDUCTOR REVEALED

Science Daily reports that researchers have discovered the world's smallest superconductor. This, in a sheet of four pairs of molecules less than one nanometer wide. On March 29th, the Ohio University led study, published as an advance online of its findings in the journal Nature Nanotechnology. It provides the first evidence that nanoscale molecular superconducting wires can be fabricated. These it says could be used for nanoscale electronic devices and energy applications. The study also is

noteworthy for providing evidence that superconducting organic salts can grow on a substrate material. You can find out more at www.sciencedaily.com/releases/2010/03/100329112151.htm (Science Daily)

**

WORLDBEAT: RADIO SWEDEN TO END MW AND SW BROADCASTS

Radio Sweden will end its medium and short wave broadcasts on October 31st. This, in favor of web services that the broadcaster believes to be the best use of resources and in line with international trends.

According to a news release the English-language service is to continue on the web and on national over the air broadcasts. The Russian transmissions will be available only on the web, as is the German service is now. (Worldwire)

**

WORLDBEAT: NEW VIDEO OF THE RADIO DOCUMENTATION CENTER IN VIENNA

A visit to radios golden past is now available on-line. Amateur Radio Newsline's Fred Vobbe, W8HDU, has the story of the journey:

--

Jonathan Marks, G8WGN, the former host of Radio Netherlands Media Network has made available a video of his visit to the Radio Documentation Center in Vienna, Austria. That's the home to millions of QSL cards, magazines and other radio related documents.

Marks says that he was there in September of 2009 that his colleague and friend Wolf Harranth, OE1WHC. Harranth showed Marks around the world's largest collection of radio related documents that contains artifacts from both from the broadcast and amateur radio world. OE1WHC also shared a bit of his own philosophy as to the reason for the archive:

--

OE1WHC: "Its always great fun to listen to the radio and to transmit yourself . To listen to amateur radio. Communications is fun; sometimes its sad but its sad fun at that time."

--

Marks notes that there are millions of QSL cards, magazines, books and unique government records that tell the story of communication across international borders. He adds that the center survives on help from volunteers and he hope that his video will help to explain why they are so passionate about preserving the golden age of international radio.

For the Amateur Radio Newsline. Im Fred Vobbe, W8HDU.

--

The video that was shot in High Definition. Part 1 of this is on line at http://vimeo.com/10320815. Marks says that Part 2 will follow shortly. More information in both English and German at http://dokufunk.org. (Southgate)

**

WORLDBEAT: NEW MORE ISLAND IS NO MORE ISLAND

If you are thinking of sponsoring a DXpedition to New Moore Island in the Sunderbans you might as well forget it. This is because the disputed island in Bay of Bengal has disappeared into sea.

For nearly 30 years Bangladesh and India have argued over ownership of a tiny rock island in the Bay of Bengal. Now Mother Nature has resolved the dispute for them. Due to rising sea levels, as of March 24th the island's gone.

According to news reports, its disappearance below the waves has been confirmed by satellite imagery and sea patrols and one might now say that New Moore Island is, no more. (Published news reports)

**

DX

In other D-X, the long hoped for Jan Mayen DXpedition is now set for July 4th to the 16th of 2011 and will be lead by SQ8X. He and his group of operators plan to be on the air for 10 to 12 days with 2 to 3 stations. More details will be forthcoming later this year.

F4EGZ, is active portable FR from Reunion Island. He will be there through April 19th operating 20 through 6 meters. He will accept 6 meter skeds via E-mail at f4egz (at) yahoo (dot) fr. Please QSL via his home callsign.

Six female operators will be on the air as OX6YL from the western edge of Greenland between September 16 and the 20th. Activity will be on the HF bands using CW and SSB. A Web site for this operation is currently under construction at www.qsl.net/la6rha/greenland

According to a report from the South African Radio League, its again been noticed that some operators in IARU Region 1 have been operating outside the allocation of the 160 meter band. The low frequency limit in Region 1 is 1810 kHz. This makes it illegal to work stations in IARU Regions 2 and 3 who are operating below that frequency.

A DXpedition to Mozambique is now slated for October which will include a scouting Jamboree on the Air or JOTA operation from the capital Maputu. The group also plans to operate the CQ World Wide SSB contest from the city of Xai Xai. For more information on the DXpedition check out the web pages at www.3da0ss.net

Lastly, V73NS who is just finishing up his operation from Kwajalein will be deploying to Afghanistan
at the end of April. Neil told the OPDX newsletter that once there, he

will have his radio sent to him. He says that he plans to operate QRP CW only. QSLs for his V73NS operation should be sent direct via W3HNK.

(Above from various DX news sources)

THAT FINAL ITEM: STUDY INDICATES HAMS CAN BE SAVED FROM HAM RADIO

And finally this week, some good news from the world of science for the families of hams. There is hope for recovery! Recovery from what you ask? Newsline roving correspondent Pierre Pullinmyleg is here with the answer in his annual, April 1st report:

--

Researchers at zee American Museum of Natural History have found evidence zat evolutionary adaptations of cave-dwelling scorpions in Mexico are reversible as zee creatures move closer to sunlit areas. Writing in zee April issue of the science journal Cladistics, the museum's Lorenzo Prendini, Associate Curator for Invertebrate Zoology, says zat "three more generalized scorpion species living closer to za surface evolved from specialized ancestors living in caves deep below zee surface."

Zis discovery gives new hope to zee families of hams who spend most of zeir lives in dimly-lit basements and attics, and who have developed adaptations to survive in zeese environments, such as extra stores of body fat for sustenance during lengthy periods of confinement and reduced olfactory function.

Zee only potential problem, according to scientists, is zat zeese changes may not be reversible in a single generation. In za scorpions zat were studied, for example, it is believed xat ze reverse evolution has occurred over a period of some 65 million years.

From a cave somewhere in eastern Mexico, zis is Pierre Pullinmyleg reporting for Newsline.

--

Thanks Pierre. You may have made the relatives of ham radio operators feel truly good. Then again, maybe not. (Source: The Pierre Pullinmyleg Foundation for April 1st Reportage')

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin

Avenue, Santa Clarita California, 91350

Before we go, a reminder that the nominating period for the 2010 Amateur Radio Newsline Young Ham of the Year Award is now open. Each year, we here at the Amateur Radio Newsline in association with Vertex Standard Corporation -- the makers of Yaesu brand ham radio gear -- and CQ Magazine combine to honor a ham radio operator age 18 or younger for his or her contributions to ham radio or to society itself through ham radio.

All nominations and materials required by the official rules must be received by Amateur Radio Newsline no later than midnight on May 30th. Both "mail-in" and electronic submissions are being accepted this year. Full rules and a downloadable nominating form are now on our website at www.arnewsline.org. Just scroll down until you see "2010 Young Ham of the Year Awards Now Being Accepted" and click on the word "here" to download the directions and the form. You can also leave questions and comments on the official Young Ham of the Year Award page on Facebook dot com.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim Davis, W2JKD, saying 73, we thank you for listening and a truly happy April Fools Day 2010 to all.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Friday, 26th-March, through Friday, 2nd-April there were 233 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1U, 4X, 5B, 5H, 5N, 5R, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9Q, 9V, 9Y, A2, A3, A4, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FP, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HC, HC8, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T32, T7, T8, TA, TF, TG, TI, TK, TL, TN, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VP2E, VP2V, VP5, VP6, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZK3, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

4B, MEXICO (Special Prefix). The Mexican Federal Telecommunications Commission, "CoFeTel" (Comision Federal de Telecomunicaciones), announced this past week that it has authorized the use of the special prefix 4B for Mexican stations throughout the year 2010, to celebrate the bicentennial of Mexico's independence and the centennial of the Mexican Revolution.

5I, TANZANIA. Niko, S53A, is now active as 5I1S from Zanzibar until possibly April 7th. He states this is his first holiday style trip with some radio operation; "when time permits". He will be using an IC-7000, w/100W and fixed delta loop antennas pointed to Europe (This will also cover North America quite well). Activity is expected to be on 20/15/10 meters and possibly 17 meters as well. Niko is a CW fan, but this time he took his mic on this trip, so there will be some possible SSB. QSL via his home callsign S53A, by the Bureau or direct (see QRZ.com).

CV7, URUGUAY (Special Event). Ricardo, CX7ABK, will be using the special callsign CV7G between April 17-19th. Activity is to celebrate "the landing of 33 Orientales on Agraciada Beach in Uruguay". For more details, see: http://en.wikipedia.org/wiki/Thirty-Three_Orientals
Operations will be SSB on 40 and 20 meters. A special QSL card will be issued. QSL via CX7ABK.

EF8, CANARY ISLANDS. Luis, EA8AY, will be active as EF8E during the CQWW WPX CW Contest (May 29-30th) as a Single-Op/All-Band entry. QSL via EA8AY. Visit Luis's Web page at: http://www.ea8ay.com/cw4evr

IOTA NEWS.....
EU-062. Waldi, SP7IDX, will be active as LA/SP7IDX from Engeloya Island between June 2&#65533;17th. Activity will be holiday style (DXing and fishing) on 20-10 meters using SSB and RTTY. He will operate with 100 watts into a Hexbeam antenna. QSL via his home callsign.

EU-074. Members of the Charente DX Group (CDXG) will activate Brehat Island (DIFM MA-012) as TM0B between May 21-28th. Activity will be on all HF bands, with 4-5 stations on the air, using CW, SSB, RTTY and PSK. Operators mentioned are Joel/F1BLQ, Michel/F5EOT, Gemon/F5LOW, Laurent/F5MNK, Fabrice/F5NBQ, Bertrand/F6HKA and Leon/ON4ZD/OS0S. QSL via F6ANA, direct or by the Bureau. After the DXpedition the log will be online at: http://users.belgacom.net/cdxg

NA-029. Gregg, VE3ZZ, will again operate from Prince Edward Island (CISA PE-001, WLOTA 0523, WW Loc: FN76vs) between July 21-26th. He will operate from the VY2TT superstation during the RSGB IOTA Contest (July 24-25th) as VY2X, and outside of the contest as VE3ZZ/VY2. QSL both callsigns to VE3ZZ, direct or by the Bureau.

NA-231. As this was being typed, there was news of a search and rescue for Cezar, VE3LYC, who was active as VY0V for a short time from East Pen Island (a new IOTA), Nunavut. Reports indicate that Cezar was in "fierce rain and wind, visibility poor, he had no

water, no fire, no gas for generator, battery getting low, and native guide had abandoned him 38 hours ago. He was worried and seemed delirious, rambling on while running down his battery." For updates, watch the DX-World.Net Web page at: http://dx-world.net LAST MINUTE ADDITION: It was reported late Thursday night that Cezar is now SAFE and back at Fort Severn, which is about 120km from East Pen Island. Read the complete details at the above mentioned Web site.

JD1, OGASAWARA. Makoto, JI5RPT, will be active as JD1BLY from Chichijima Island (AS-031), Ogasawara, between May 2-7th. Activity will be on 40-6 meters (No 6m EME) using CW, SSB, Digital and the Satellites. QSL via his home callsign JI5RPT. A log search will be available on his Web site at: http://www.ji5rpt.com/jd1

JT, MONGOLIA. Alex, IW5EDA, will be active as JT1/IW5ELA from Ulaanbaatar between July 7&#65533; 22nd. His friend Giampiero, I5NOC, will also be tagging along with Alex, and they plan to operate for one week from the radio club station in Ulaanbaatar. The following week, they will be operating mobile. QSL via his home callsign.

KH6BZF PROPAGATION FORECAST/REPORT (For March 29-April 4th)....
Mar 29 HN-LN SOLAR REFERENCE KEYS
Mar 30 LN-HN --------------------
Mar 31 AN BN - Below Normal
Apr 1 AN AN - Above Normal/Geomagnetic Level is QUIET
Apr 2 AN LN - Low Normal
Apr 3 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Apr 4 AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between 0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between 7-16 and "K" index will be 3 or less

MM0, SCOTLAND (WFF Op). Members of the GMFF Team <www.gmff.org> will be active as MM0DGR/p from the Loch Leven National Nature Reserve (GMFF-045) on Saturday, April 3rd. The portable station will be located at the northern point of Loch Leven. The most important location references are: OS National Grid Reference NO134040, WAB Square NO10, Grid Locator IO86HF, IOTA EU-005, WLOTA LH-1234 and EU Area SC24 (Perth and Kinross). MM0DGR/p will be working CW, SSB and BPSK63 on all bands from 40-10 meters. The QSL Manager is MM0DFV. For more info, please visit the GMFF Web page listed above.

NEW DX BOOK AVAILABLE BY W9KNI (Press Release). "Idiom Press, book publisher and manufacturer of items for Amateur Radio Operators, is pleased to announce the forthcoming publication of a new book by famed

DX author Bob Locher, W9KNI. Bob is the author of 'The Complete DX'er,' which has sold over 28,000 copies, making it the run away all time best selling DX book ever published.
Bob's new book is entitled 'A Year of DX' and follows Bob as he makes an all out effort to win the 2008 running of CQ Magazine's DX Marathon. The Marathon is a year long operating event during which a contestant works as many countries and CQ zones as possible, any band or any mode. The Marathon chase is like telescoping a career of DX'ing into a single year, but without requiring QSL's.
While the book chronicles Bob's efforts in the pileups and through the lonely watches of the night, it also contains discussions of what DX'ing is all about, the possibilities of DX'ing in low sun spot periods contributed by Jim Henderson, KF7E, a chapter on optimizing your SSB transmit audio by Hall of Famer Chip Margelli, K7JA, a discussion of what is the ideal linear amplifier, and much more. Anyone who read and enjoyed Bob's 'Compete DX'er' is sure to find this book equally worthwhile.
Book publication is May 1st, 2010; however advance orders are being accepted now at: http://www.idiompress.com/yearofdx.php "

PACIFIC 2009 ULTRA LIGHT SOLO DXPEDITION STORY. Gerben's, PG5M, has made available on the Web, his story called the "Pacific 2009 Ultra Light Solo DXpedition" which is in PDF format. His publication is 12 pages long and goes into detail about his activities and netting 13000 QSOs from Fiji (3D2GM), Tuvalu (T2G) and Tarawa (T30GM). The story can be downloaded from his Web page at: http://www.dx.to

QSL INFO AND NEWS.....
K4M QSL STATUS (March 26th). "The K4M team is happy to announce that approximately 5000 QSLs were mailed on March 26th. This represents QSL requests received by March 15th. Those received after March 15th are being processed daily. QSLs mailed included those received via regular mail and OQSL. The OQSL feature will continue to be available for approximately 3 more months. QSLs received that have problems such as 'Not in Log', incorrect postage, no postage, no SAE, separate card request, or any other issue have not been mailed and are being processed. Bureau QSLs will be mailed at some point in the future after the major amount of direct requests are processed. We have set up a special Email request feature at midway2009QSLs@gmail.com to answer any inquiries. Please don't inquire until April 15th, to allow us to process most all requests on hand. As such we will not answer any inquires before that date......The K4M QSL Management team."
ADDED NOTE: Remember, the 2009 K4M DXpedition to Midway Atoll DVD by well-known DXpedition video photographer James Brooks, 9V1YC, is now available for 25.00 USDs. To order yours today, go to: http://www.dxvideos.com/k4mvideo.htm

W5KNE/VE1 ST. PAUL ISLANDS AVAILABLE ON LOTW! Bob, W5KNE, has uploaded his 1988 St. Paul Island (CY9) log to LoTW. He operated as W5KNE/VE1 betweeb August 13-18th, 1988, on 160, 80, 40 and 20 meters.

QSLS VIA LoTW: None Reported This Week!

QSLS RECEIVED VIA MAIL: 5E50SA, 5H3EE, 5N50K, 7N4QID, 9G5XX, C91VM/5, CP4BT, DS5USH, EK6RL, EP3SMH, J7Y, JA1EUL, JA7FTR, JA7KQC/4, JA9WA, JD1BMM, JE1RID, JG8FWH, JH2FOR, JH4RNY, JK1DNW, K4M, OX/EA4NA, OX2A, PY0S/PS7JN, RA9AD, RU0SYL, RW9OA, RZ0SN, TM6KBK, UA0CGR, UA0FO, UA0STT, UA0UK, UA9OEX, V31JZ/P, XV4D, YU40DW, ZS1AFS and ZX5J

QSLS RECEIVED VIA THE BUREAU: None Reported This Week!

T32, EASTERN KIRIBATI (Update). As this was being prepared, operators Nils/SM6CAS, Steve/G4EDG, Mike/K9AJ, Derek/G3KHZ and Steve/9M6DXX were active as T32CI from Caroline Island (the second island out of the four uninhabited islands to be activated) on April 1st. They plan to be active on this island for 3 days. Activity will be 80-10 meters using CW and SSB. For more details and updates, visit the T32 Southern Line Islands DXpedition's Web page at: http://t32line.webnode.com
ADDED NOTE: The team reports that they almost made 9,000 QSOs in 3 days of operations from Malvern Island.

T8, PALAU. Kazumasa, JA4CZM, will be active as T88NY from Palau (OC-009) between April 27-29th. Activity will be active on the HF bands. QSL via his home callsign or LoTW.

T8, PALAU. Tony, KQ2I, will once again be active as T88AT between April 9-17th. Activity will be mostly CW. QSL via his home callsign.

TA, TURKEY. Ali, TA2LM, from Istanbul, will be active during the CQWW WPX CW Contest (May 29-30th) as a Single-Op/Single-Band (??) entry. QSL via TL2LM.

TT8, CHAD. Phil, F4EGS, will once again be active from here for two months starting on April 10th. Currently his callsign is not yet known, but it will possibly be his old callsign TT8PK (operations in 2006-2008). Activity will be limited to his spare time on 40-10 meters using CW, SSB and some RTTY. His equipment will be a FT-850 and a old R7 vertical (which he would like to replace). QSL via F4EGS, by the Bureau or direct (QRZ.com address). Skeds are possible before he departure at: cocheese37@msn.com

V3, BELIZE. Dave, N4QS, will be active as V31QS from Placencia (V31MD's rental QTH) between April 2&#65533;11th. Activity will be on 80-10 meters using CW, SSB and RTTY. QSL via LoTW or his home callsign.

V8, BRUNEI DARUSSALAM. Nasran, V85ZX (ex-V88NIZ), will be in the CQWW DX SSB Contest (October 30-31st) as a Single-Op/Single-Band (20m)/Low-Power entry. He will use a Yaesu FT450 with a home-brew rotary dipole antenna. QSL via V85ZX (see QRZ.com).

YI, IRAQ (Reminder). By the time you read this, a group of multi-national operators should be active as YI9PSE from Northern Iraq (Kurdistan) and will be active until April 12th. The suggested frequencies are:
CW - 1824, 3504, 7004, 10104, 14024, 18074, 21024, 24894 and 28024
SSB - 1845, 3780, 7065/7180, 14195, 18145, 21295, 24945 and 28495
RTTY - 7035, 10140, 14080, 18100, 21080, 24920 and 28080 kHz
The current updated YI9PSE Team consists of the following operators:

Paul/N6PSE (Team Leader), Bob/N6OX, David/AH6HY, Krassy/K1LZ, Bill/N2WB,
Dave/K3LP, Al/K3VN, Wayne/W5KDJ, Jack/W0UCE, Michel/FM5CD, Jun/JH4RHF,
Heathem/YI1UNH and Hrane/YT1AD. Pilot stations are: Don/N1DG (East Coast),
Chuck/AA6G (West Coast), Toshikazu/JA1ELY (JA) and Col/MM0NDX (EU). The
group is still looking for donations to help fund their DXpedition.
Donations can be made via PayPal or mail a check to: Kurdistan 2010
DXpedition, 3052 Wetmore Dr., San Jose, CA 95148, USA. Online logs will
be available during and after the DXpedition. QSL via N6NKT. For more
details and updates, visit: http://www.yi9pse.com
Also, you can now follow their activities (as well as regular updates)
via Twitter at: http://www.twitter.com/yi9pse

WIANEWS FOR WEEK COMMENCING APR 04 2010.

WIA CENTENARY

WIA Centenary ARISS contact

As previously advised on this broadcast a school contact with the International
Space Station is planned to occur during the WIA Centenary dinner in Canberra
next month.

The news we have today is that it has been confirmed ten students from the
Trinity Christian School in Canberra will take part in this Amateur Radio
on the International Space Station (ARISS) event.

School principal Carl Palmer VK1TP/VK2TP is very pleased that the students
will be given such an honour to attend the WIA Centenary dinner and talk
with an astronaut on the International Space Station.

The school at Wanniassa, in the beautiful Tuggeranong Valley at the southern
end of the Australian Capital Territory, will also celebrate its 30th anniversary

next month, adding to what will indeed be a very special occasion.

Australian ARISS Coordinator Tony Hutchison VK5ZAI is finalising arrangements for the contact between the International Space Station NA1SS, and the WIA special callsign VK100WIA, on the evening (Australian time) of Saturday the 29th of May during the WIA Centenary dinner.
(Jim Linton VK3PC)

AM and CW on air event on ANZAC Day - an international event

The worldwide on-air event to use AM and CW to commemorate ANZAC Day is growing!

Here is a sample of activity where across the world ONLY AM/CW is used.

AM Afternoon Net on 7093kHz from 0600UTC on ANZAC Day.

Mareeba Warbirds Museum in Far North Queensland.

North Queensland Net on 3605.4kHz from 0930UTC on ANZAC Day using AM with the net controlled from a World War 2 RAAF HQ Communications Bunker.

Stations will be set up onboard the ex RAN Museum Ships Whyalla, Castlemaine and Diamantina

And as special "guests" Turkey's TC Special Wireless Activity Team known as TCSWAT, will be operating as TC57A from 22 April to 25 April overlooking ANZAC Beach.

If you want to join in or find out more please contact
Mike Patterson VK4MIK
vk4mike@yahoo.com.au

HAMS ACROSS AUSTRALIA.

CRARC Repeaters

The two repeaters on Isaccs Ridge have now been set to Hi Power (50 watts), also the CTCSS tone has been removed from 146.725 MHz for a trial period just to see how it is affected by other services...
CRARC 10 Metre Night
Instead of heading to Mt Mugga Scout Hall for a meeting or tech night the club is holding a Ten Metre FM night.

All classes of licence can use the 10 metre band and most amateurs have some suitable equipment so the idea is

to get up on air on 29.150 MHz from 7.30 PM local time.

You can go mobile and "hilltop" if you so desire, or you can operate from home. There are no rules on what you

operate (within your licence conditions of course), just fire up and take part.

It will be interesting to see what sort of signal paths get around town, and sure not every person will be able

to hear every other person, but that is Amateur Radio!

VKG Roundup http://www.police.nsw.gov.au/news

Well the dust has well and truly settled settled on the 2010 Wyong Field Day and believe it, work has started on the 2011 Field Day.

CCARC hope every one that attended enjoyed the experience, the Club is of the opinion that Amateur Radio was the winner on the day.

A good sign for Amateurs was the large number of candidates who sat for their Radio Licences and passed at the Field Day.

To all those that did the hard work to bring us VK's Major Field Day a very big thank you.

Oh and last fortnight the Club was part of the John Moyle competion, from Mt. Allyn, near the Barrington Tops.

(Ray VK2HAY)

WICEN(NR) AGM, 11th Apr - Lismore Workers Club.

>From 1400 in an upstairs meeting room. Come along.
Member subs of $15 are now due, renew, rejoin as soon as possible. Please send your subs to our Secretary, John
Toland VK2XKX, QTHR.

Oxley Region Amateur Radio Club 35th Annual Field Day.

The Oxley Region Amateur Radio Clubs 35th annual field day is being held on Sunday 13th June 2010 at the Sea Scouts Hall in Buller Street Port Macquarie. NSW.

A good representation of the trade will be in attendance on Sunday 13th June, along with the sale of preloved

gear etc. Free coffee, tea and biscuits as well as a BBQ on Sunday from midday, if necessary we will fire up the

BBQ for lunch on Saturday.

Entry is a mere $5 per person, children under 5 free.

Traditionally it has been a 2 day field day, but unfortunately due to various reasons we have found it necessary to reduce it to an one day event.

But for the avid fox hunter, we will be holding events on the Saturday afternoon and Sunday, the venue will be the Sea Scouts Hall.

There will be a trophy for the best presented mobile equipped vehicle.

The Weekends Programme:

Saturday 12th June 2010
10:00 am - 2m 1 x Transmitter, 2m Pedestrian, 2m 2 x Transmitter
12:00 pm - BBQ lunch if required
4:30 pm - 2 metre talk in (points allocated)
6:00 pm - Social dinner at the Port City Bowling Club, Owen Street, Port Macquarie. Smorgasbord at reasonable prices and your own expense, or make own arrangements for evening meal.

Sunday 13th June 2010
8:30 am - doors open for sales & registrations
09:00 am - 80 m 1 x Transmitter Fox Hunt
10:30 am - 2 m 2 x Transmitter Fox Hunt
Midday - BBQ lunch. Pay as you eat
12:30 pm - Draw raffles and all competitions
12:45 pm - 10 m 1x Transmitter Fox Hunt (points allocated)
14:00 pm - 2 m Pedestrian Fox Hunt (points allocated)
14:30 pm - Presentation of Fox Hunt trophies
15:00 Presidents address and farewell.

Please note that sales will only be on Sunday 13th June there will be nothing for sale on Saturday 12th June.

The Far North and North Queensland Amateur Radio Gathering (FNNQARG!) will be happening from the 11th to 14th June at Cardwell Village Beachcomber Motel and Tourist Park.

It is a yearly gathering of hams and support crews from the Cairns, Atherton Tablelands and Townsville Regions plus lots of places in between and far away.

FNNQARG! is a friendly, relaxing time with the only energetic event being the traditional FNQ vs NQ Cricket Match on Sunday morning.

The TREC Trivia Challenge is a rip snorter fun event too !
Get along and catch up with that face you have been speaking to for ages across the ether.

Its advisable to ring Reception at the park on 1800 005633
to book your accommodation as soon as possible
as the long weekend in June is a popular time.
A wide mix of accommodation from Motel to Villa
to Camping is available.

VK5

April 28 South Coast Amateur Radio Club Inc. will hold a talk "Vertically Polarised Antennas" by Dean VK5LB at 7:30pm local.

Members and guests are invited to this talk on the operation and construction of Vertically Polarised Antennas.

Want to know more or get some ideas? please get along to Clubrooms - 16 Roberts Road, Hackham.

Club General Meeting

Members of the North West Tasmania Amateur Television Group are advised the next general meeting of the North

West Tasmania Amateur Television Group is scheduled for Saturday April 10th. At the QTH of Ross VK7WP, 78 Pine

Road, Penguin, commencing around 2.00PM.

As the normal date would have fallen on Easter Saturday it was necessary to move the meeting to the 10th.

If time permits, at the conclusion of the meeting, Tony VK7AX, will bring those present up to speed on facilities

and operation of the VOIP machines, including IRLP, EchoIRLP and VoiceMail.

As always an invitation is extended to all to attend.

(Tony VK7AX, News Officer NWT-ATV Group)

�ateur Radio Magazine
Barry Robinson with what's in the current Armag
Amateur Radio magazine for April is hot off the presses and full of interesting reading.

For example, WIA President and IARU Region 3 Chairman Michael Owen VK3KI

reports on the crucial regional meetings that make decisions that will affect the amateur radio service.

There are reports on Amateur Radio New South Wales celebrating its centenary, including the opening of its new building at the VK2WI Dural site.

Good to see the photo of three elders - David Thompson VK2BDT, Pierce Healy VK2APQ and Bill Hall VK2XT cutting the cake.

Turning to page 5 now and there?s Foundation Corner with Ross Pittard VK3CE and Geoff Emery VK4ZPP who discuss the practical side of amateur radio for new radio amateurs and encouraging them to be hand-on and not afraid to fiddle.

On page 11, WIA Centenary Committee member Peter Wolfenden VK3RV gives us the latest instalment in his excellent serialised history.

In technical articles:

Ben Broadbent VK5BB shows a multimedia computer headset adaptor with press-to-talk for ham rigs

Rick Hill VK6XT has the ultimate multiband dipole

Brian Morgan VK7RR looks at the Flex-3000 Software Defined Radio

and Drew Diamond VK3XU has an active loop receiving antenna and converter for 136 kHz.

The WIA journal, Amateur Radio magazine is a WIA membership service, and

copies are also available at selected newsagents.

I?m Barry Robinson VK3PV and you?re listening to VK1WIA.

When :- 3 & 4 July 2010
Times :- 2000 NZST until 2300 NZST both evenings
Band :- 80m
Modes :- CW and Phone

The Memorial Contest was established soon after the end of World War 2 to commemorate those who lost their lives in the service of their country. It is a fitting way to honour those Hams and others who selflessly served their country so that we, today, may enjoy the freedoms that we do.
The Contest is split into a number of categories catering for all HF interests so please spare an hour, or two to honour those who paid the ultimate price that we now enjoy in our present lifestyles.
Contest Rules and Other Operating Information is available from the NZART Website :- http://www.nzart.org.nz/contests/index.html

Calling CQ all WIA Members going to Dayton

Calling CQ CQ all WIA Members attending the Dayton Hamvention on the 14 to 16 May of 2010. Those WIA members

going to the Dayton Hamvention this year over 14-16th May are invited to register with the WIA National Office

their interest in doing some minor promotional activities at Dayton highlighting the 2010 WIA Centenary. Please

send an email with your contact details and include the word Dayton in the subject line to

nationaloffice@wia.org.au.

SPECIAL EVENT CALLS, REPEATER BEACON DX AND NET ADVICE
hf nets ON the net, www.timroberts-vk4yeh.id.au/

*Weekly Nets conducted by SCARS.*

The South Coast Amateur Radio Service (known as "SCARS" or SOUTHCARS) based in the US, conducts several weekly nets World Wide at various times throughout the week.

The main goal of the group is to foster further interest in the combined

use of VOIP sytems such as EchoLink and IRLP along with Amateur Radio to conduct a friendly envioronment between amateurs of all nationalities

world wide and at the same time to have fun.

The addition of a relatively new net in recent times, is the AUSTRALIAN CONNECTION.
First impression is that it is open to Australian amateurs ONLY... NOT SO...
Amateurs World Wide are welcome and invited to join the Net,
Australian Amateurs are encouraged to join in.

To fall in line with changes to Summer Time in Australia,
The AUSTRALIAN CONNECTION Net will change on SUNDAY 4th. April 2010,
when all Eastern States will drop back 1 Hour.

As of Sunday 4th. April, the Net has been rescheduled for
1100 - 1200 Hrs.EAST (0100-0200 Zulu).

TO CONNECT TO THE *SCARS* SERVER. (USE ECHOLINK 96140 OR IRLP 9614)

It is suggested amateurs may care to try the net by connecting to the SCARS Server at 1100 hrs. (0100 Hrs. Zulu) following local broadcasts.

Futher information about SOUTHCARS and ALL Net schedules can be found at

WWW.VOIP.SOUTHCARS.COM

Again the connect details are...
IRLP connects for the AUSTRALIAN CONNECTION net are through Reflector 9614 and Echolink connects are through *SCARS* node 96140.

R1ANF beacon operational

The Deutscher Amateur Radio Club reports that, after a long odyssey from
Germany to the Vostok base (R1ANC) in Antarctica, the 20 meter beacon
is in operation on King George Island (belonging to the South Shetlands.)

The beacon consists of an IC-706, AT-180 antenna tuner, a switching power
supply, a PROCOM HF-5000 vertical antenna and a GPS synchronized controller.

The beacon is working on 14101.0 kHz and transmits text every full minute
"VVV R1ANF ANTBEAP (carrier signal reduced similar to the NCDXF beacons,
starting with 100 watts) R1ANF AR".

Any SWL reports are very welcome and should be sent to Dominik, DL5EBE.

MEDIA WATCH
Community digital TV on the way

Channel 31 which services the Melbourne and Geelong areas is to switch over to digital broadcasts next month, with some financial support from both federal and state governments.

It is to transmit on digital channel 44 from Mount Dandenong, while simulcasting on analogue Channel 31 until 2013.

It has experienced a rapid decline in viewer numbers as a result of the uptake of digital TV sets in households, but can now hopefully recover its audience through the new digital signal.

A visit with Wolf Harranth OE1WHC Dokufunk Curator

Jonathan Marks has made available an HD video of his visit to the radio documentation centre in Vienna, home to millions of QSL cards, magazines and radio related documents.

Jonathan has posted this description of the video:

"I wanted to share part one of a short documentary I am making about the radio documentation centre in Vienna. When I was there in September last, my colleague broadcaster and friend Wolf Harranth showed me around the world's largest collection of radio related documents, both from the broadcast and amateur radio world.

In fact the millions of QSL cards, magazines, books and unique government records tell the story of communication across international borders.

They survive on help from volunteers and I hope that this video will help to explain why they are so passionate about preserving the golden age of international radio.

I worked closely with Wolf Harranth, the German media editor at the ORF, when I was host and presenter of Media Network on Radio Netherlands. We swapped transmission tapes and I am glad we both had the foresight to keep a lot of radio history others have subsequently thrown away.

There is more information in both English and German at
http:// dokufunk.org

Digital communications boost in VK2

Amateur Radio New South Wales has appointed a Digital Communications Coordinator, Andrew Gilbett VK2XAG, to research, coordinate and provide advice on current and emerging digital modes and systems.

His first step is to set up a Software Defined Repeater at the VK2WI Dural site on the 70cm band.

Andrew VK2XAG has been a radio amateur for three years and currently studying Electrical Engineering at the University of Technology, Sydney. This SDR

repeater will be part of his university theses.

Anyone within range of Dural is asked to watch for the repeater on 438.600 MHz with a negative 5 MHz offset.

Email contact details for Andrew VK2XAG (vk2xag@gmail.com) can be found in the text edition of this broadcast.

WICEN Capability Display

WICEN Tasmania (South) Inc will be holding a "show and tell" day around the
REAST clubrooms on Saturday 10th April.

The main purpose of the display is to provide an idea of what WICWEN do and
what they are capable of. Lots of equipment will be on display and
WICEN members will be there to answer your questions.

The local repeaters are very quiet these days, so there must be many
thousands of dollars worth of radio equipment sitting around doing next to
nothing. Why? Difficult to say, but maybe chatting about nothing in
particular doesn't turn you on. Why not get switched on and use your radio
for some community service? WICEN provides radio communications to various
community groups and events on a regular basis. Much of it well suited to
having the family along. Maybe you've thought about it but weren't sure

what's involved?

Why not goe along, have a look, ask some questions and chew on a tasty snag.

http://reast.asn.au/events.php#WICENDisplay

REWIND - A LOOK BACK IN HISTORY

Rewind a look back at our history through the serialised written history
by WIA Centenary Committee member Peter Wolfenden VK3RV with assistance
of others, that is being published in the WIA journal Amateur Radio magazine.

War ends wireless experiments

>From August 1914 as a result of World War I all experimental stations in
Australia were put off the air and instructed to lodge their equipment at
the local Post Office.

While radio clubs and societies closed during the War, the Wireless Institute
of Victoria decided to stay an entity to ensure the return of equipment and

the right to experiment further after the hostilities were over. And to offer its services to the Defence Department.

The war effort desperately needed wireless operators, indeed anyone with Morse code proficiency was in demand.

Although the Great War ended on the 11th of November 1918, the Navies of the United Kingdom, the USA and Australia held tight to their control of the spectrum.

The United States first lifted restrictions in September 1919 but only after much pressure from the Congress. The UK and Australia followed, however many restrictions remained in force for some years.

In Australia temporary receive only licences were issued from November 1919, and further pressure was required before the general issue of transmitting licences occurred nearly three years later.

Written by Chris Comollattie VK4VKR
news for ar magazine to qtc@wia.org.au

APRIL 4

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP and I've been thinking ....

As the memorial day rolls closer, it is interesting to see that a number of venues will be activating amplitude modulated and CW stations as part of the heritage of ANZAC Day. Here is both an opportunity for all licence holders to honour our past on a day of significance by using a mode which has largely been left to a few enthusiasts and a way of saluting those who participated in the wars in which Australians have fought.

When we think of the cinematic depictions of war and the use of battlefield radio communications, those clumsy man-pack radios were mostly QRP. The suit case spy radio had the power of a modern QRP rig and few of the facilities that we amateurs take for granted.

Remember to assist the operators of the stations using old military rigs by netting on their transmission and be prepared to use the RIT. The radio in use is probably older than many amateurs so please make allowance for the older technology.

Let us reflect on ANZAC Day, Lest we forget......

For QNews, I'm Geoff Emery and that's what I think.....how about you?

Hallo dear MMMonVHF friends,

please find below our SPECIAL-NEWSLETTER of the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2010-04-03

****
MOST WANTED SQUARE/DXCC SURVEY 2010
MMMonVHF The VHF-DX-Portal
****

Hallo dear VHF-Friends,

first off all - HAPPY EASTER TIME to you and yours!

As always since early 90ï¿½s, we wants to remind you PLEASE
to be so kind and update the MOST WANTED SQUAREï¿½s / DXCCï¿½s
for the 144 MHz segment - SURVEY will run in next 2 weeks!

The Team of DUBUS & Funk-Telegramm and as well the Team of the
VHF-DX-Portal Make More Miles on VHF, took 2007 the decission
still to evaluate once per year the european 144 MHz M[ost]
W[anted] Lists in advance of an up coming MS / ES-Saison in
parallel to the daily up to date online - PSE USE AND UPDATE:

eMWS-List [http://www.mmmonvhf.de/emws.php]
&
eMWDXCC-List [http://www.mmmonvhf.de/dxcc.php]

We will spread around the results at the weekend 24th/25th of
april 2010, early enough to plan trips for the summer MS showers.

If you do need any help for the updates please go to our FORUM
http://www.mmmonvhf.de/minibb/index.php?action=vtopic&forum=5

As well we did decide to scrap stations from the MW Lists did
not update within past 3 years! We made yesterday a short
review and so those will receive a special mail as well...
If nothing to update please click on the "NO CHANGE"

Have a lot of fun and enjoy the VHF-DX-Portal MMMonVHF!

*** DEADLINE ***

... for your News (pse use: http://www.mmmonvhf.de/newsuser.php)
to the next MMMonVHF Newsletter will be next thursday 21 UTC...

****
The VHF-DX-Portal MMMonVHF - Newsletter Credits & Info

****

Our Newsletter is compiled from the input of the USER of the
VHF-DX-Portal MMMonVHF as well by a lot of free usable
HF-V-U-SHF-Info-Sources and chats like ON4KST-, RU-VHF-DX-Net,
EA-V-U-SHF-Chat, N0UK-Chat and others...

* Many thanks to all USER who send us info and news *

Wherever we found the info we always indicate the source of the info.
If you get knowledge of an expedition, which is NOT listed at our
VHF-DX-Portal MMMonVHF or if you have additional info for an
expedition, PLEASE be so kind and send us this info at

* www.mmmonvhf.de/newsuser.php or www.mmmonvhf.de/kontact.php *

The MMMonVHF-Team is always trying to spread any expedition info as
much up-to-date and reliable as possible and as long as the info does
not violate with our MMMonVHF-Policy.

Have a lot of fun and enjoy the VHF-DX-Portal MMMonVHF!

Woger hasn't been around the net for years. Lloyd, has also
mysteriously vanished from the net.

I hope they're not buried in Mark Morgan's backyard.

> provide that, under certain limited conditions, amateur radio

> operators may transmit messages during emergency and disaster
> preparedness drills, regardless of whether the operators are employees
> of entities participating in the drill.
>
> II.   BACKGROUND
>
> 2.   One of the fundamental principles underlying the amateur radio
> service is the "[r]ecognition and enhancement of the value of the
> amateur service to the public as a voluntary noncommercial
> communication service, particularly with respect to providing
> emergency communications."   Further, the rules state that "[n]o
> provision of these rules prevents the use by an amateur station of any
> means of radio communication at its disposal to provide essential
> communication needs in connection with the immediate safety of human
> life and immediate protection of property when normal communication
> systems are not available." Indeed, amateur radio operators provide
> essential communications links and facilitate relief actions in
> disaster situations. While land mobile radio services are the primary
> means of conducting emergency communications, amateur radio plays a
> unique and critical role when these primary facilities are damaged,
> overloaded, or destroyed. For example, during Hurricane Katrina,
> amateur radio operators volunteered to support many agencies, such as
> the Federal Emergency Management Agency, the National Weather Service,
> and the American Red Cross. Amateur radio stations provided urgently
> needed wireless communications in many locations where there was no
> other means of communicating and also provided other technical aid to
> the communities affected by Hurricane Katrina.
>
> 3.   Since amateur radio is often an essential element of emergency
> preparedness and response, many state and local governments and public
> safety agencies incorporate amateur radio operators and the
> communication capabilities of the amateur service into their emergency
> planning. In this regard, some entities, such as hospitals, emergency
> operations centers, and police, fire, and emergency medical service
> stations, have emphasized the participation of their employees who are
> amateur station operators in emergency and disaster drills and tests.
> For example, a representative of the New Orleans Urban Area Security
> Initiative recently emphasized the importance of conducting emergency
> drills and the need for amateur participation.
>
> 4.   The Commission's rules expressly permit operation of amateur
> stations for public service communications during emergencies, and on a
> voluntary basis during drills and exercises in preparation for such
> emergencies. Given, however, that the Amateur Radio Service is
> primarily designated for "amateurs, that is, duly authorized persons
> interested in radio technique solely with a personal aim and without
> pecuniary interest," the rules expressly prohibit amateur stations from
> transmitting communications "in which the station licensee or control
> operator has a pecuniary interest, including communications on behalf
> of an employer." Accordingly, public safety entities seeking to have

> employees operate amateur stations during government-sponsored
> emergency preparedness and disaster drills presently must request a
> waiver.
>
> III. DISCUSSION
>
> 5. We seek comment on whether to amend the rules to permit amateur
> radio operators to participate in government-sponsored emergency and
> disaster preparedness drills and tests, regardless of whether the
> operators are employees of the entities participating in the drill or
> test. The rules already recognize the importance of amateur radio in
> emergencies, and permit participation in such drills and tests by
> volunteers (i.e., non-employees of participating entities). As noted
> above, experience has shown that amateur operations can and have
> played an essential role in protecting the safety of life and property
> during emergency situations and disasters. And as evidenced by recent
> waiver requests, state and local government public safety agencies and
> other entities often conduct disaster and emergency preparedness drills
> to be best-prepared for such eventualities. The proposed rule would
> obviate the need for a waiver in such instances by allowing employees
> of public safety agencies and other entities to operate amateur
> stations for testing and drilling of emergency communications
> preparedness. We thus tentatively conclude that employee status
> should not preclude or prevent participation in government-sponsored
> emergency and disaster tests and drills. Further, we tentatively
> conclude that extending authority to operate amateur stations during
> such drills will enhance emergency preparedness and thus serve the
> public interest.
>
> 6. In reaching these tentative conclusions, we do not disturb the
> core principle of the amateur radio service as a voluntary,
> non-commercial communication service carried out by duly authorized
> persons interested in radio technique with a personal aim and without
> pecuniary interest. Rather, we believe that the public interest will
> be served by a narrow exception to the prohibition on transmitting
> amateur communications in which the station control operator has a
> pecuniary interest or employment relationship, and that such an
> exception is consistent with the intent of the amateur radio service
> rules. Accordingly, we propose that amateur operations in connection
> with emergency drills be limited to the duration and scope of the
> drill, test or exercise being conducted, and operational testing
> immediately prior to the drill, test or exercise. 7. Furthermore,
> we propose that the emergency tests and drills must be sponsored by
> Federal, state, or local governments or agencies, in order to limit the
> narrow exception to ensure that drills further public safety. We note,
> however, that there may be circumstances where conducting emergency
> drills for disaster planning purposes, even if not
> government-sponsored, would serve the public interest. Accordingly,
> we seek comment on whether we should permit employee operation of
> amateur stations during non-government-sponsored emergency drills, if

> the purpose of the drill is to assess communications capabilities,
> including amateur radio, in order to improve emergency preparedness and
> response.
>
> 8. A large number of agencies and organizations at the state and
> local levels coordinate with their local volunteer amateur radio
> operators to conduct drills and exercises in concert with other modes
> of communication. This joint activity is essential to allow for a
> practiced response on the part of the first responder community.
> Because some of those drills and exercises include transmission of
> amateur communications by employees of participating entities, we
> believe the proposed rule changes would be in the public interest,
> consistent with ongoing national emergency preparedness and response
> priorities. We therefore seek comment on the tentative conclusions
> contained herein.
>
> III. PROCEDURAL MATTERS
>
> 9. Initial Regulatory Flexibility Certification. The Regulatory
> Flexibility Act (RFA) requires an initial regulatory flexibility
> analysis to be prepared for notice and comment rulemaking proceedings,
> unless the agency certifies that "the rule will not, if promulgated,
> have a significant economic impact on a substantial number of small
> entities." The RFA generally defines the term "small entity" as

SARL News - SUNDAY 4 APRIL 2010

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a webstream, visit www.sarl.org.za, click on ARMI and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and subscribe to receive future bulletins by email.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 10,130, 7,066 and 3,695 MHz SSB. (Other newsreaders change as applicable.)

SILENT KEY

It is with deep regret that the passing of John Bastiaans, ZS4ABQ, on 29 March 2010 must be announced. We extend our sincere condolences to his wife, Adela, ZS4ABR, family and friends.

(PAUSE)

In the news today:

LAST OPPORTUNITY TO BOOK FOR THE SA AMSAT SPACE SYMPOSIUM AT EARLY BIRD RATES

INNOVATION IN AMATEUR RADIO - A NEW SA AMATEUR RADIO DEVELOPMENT TRUST PROJECT

SARL NATIONAL CONVENTION HAS SO MUCH TO OFFER

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

LAST OPPORTUNITY TO BOOK FOR THE SA AMSAT SPACE SYMPOSIUM AT EARLY BIRD RATES

Make your booking this week for the SA AMSAT Space Symposium, to be held in Durban on 17 April 2010, to benefit from the low early bird rate. The full programme is available for download. The registration form and all details are on www.amsatsa.org.za.

The conference is supported by the Department of Science and Technology, and offers free attendance by learners and students. The programme itself includes exciting papers on SumbandilaSat and the

lessons learned, details about two new CubeSat satellite projects in South Africa, the Around the World balloon project and many other interesting topics covering satellites and space.

INNOVATION IN AMATEUR RADIO - A NEW SA AMATEUR RADIO DEVELOPMENT TRUST PROJECT

Here is a new exciting project sponsored by the South African Amateur Radio Development Trust (SAARDT). "Innovation in Amateur Radio" is a eighteen-month project aimed at promoting innovation in Amateur Radio. "While Amateur Radio is one of the oldest and still the most rewarding of all the scientific hobbies, there comes a time when one has to look at innovation, new ideas and new technologies to keep the activities relevant and exciting." This is the view of Hannes Coetzee, ZS6BZP, a technologist and a member of the Board of Trustees of SAARDT. Hannes was one of the principal architects of the Amateur Radio payload on SumbandilaSat which is attracting wide interest amongst radio amateurs worldwide.

Radio amateurs and technology fundis are invited to submit innovative amateur radio-related projects. There are no limits on creativity, whether it is software, amateur radio and the Internet, the development of compact HF antennas for flat and complex dwellers or innovation in Emergency Communications.

Hannes says that innovation is particularly needed in the area of disaster communication such as incorporating high speed images and data transmission utilizing amateur radio equipment and frequencies and interfacing all the networks available to amateur radio.

When it comes to satellites, radio amateurs have made a major contribution in the development of low earth-orbiting satellites, technologies that have found their way into commercial satellite projects. He feels that here is another great opportunity for innovation in developing payloads that will make people of all ages want to be part of the scientific and technological communities.

Out-of-the box ideas are required to solve some of the problems and challenges faced by 21st century radio amateurs. The innovation project is in the form of a competition to stimulate the creative side of radio amateurs to develop those solutions that will make the hobby more enjoyable to amateurs all over the world. Even old ideas improved with modern design techniques and modern components can generate a "wow" factor. Solutions will be judged by their uniqueness, e.g. not having been previously published.

Entries with a description of your designs are invited by 30 September. The designs must be innovative but also practically implementable. Three entries will be chosen to go to the final stage of the competition which requires the entrant to develop and build a prototype.

The innovation competition is supported by Multisource who has made a HF transceiver, an ICOM7000, available as the main prize for the overall winner. Announcing the sponsorship, the CEO of Multisource, Richard Smuts-Steyn, said that innovation in communication technology is an ongoing process. "We believe that the amateur radio innovation project will benefit industry as the enthusiasm of radio amateurs for new technologies will rub off to others." Get all the details on www.amateurradio.org.za.

SARL NATIONAL CONVENTION HAS SO MUCH TO OFFER

The SARL National Convention will be held in Port Elizabeth from 23 to 25 April. This is the second time that the convention will be attended by the President of IARU Region 1. The current President, Hans Blondeel Timmerman, PB2T, will address the annual Awards Dinner as well as attend the AGM. He will be accompanied by Executive committee member Nikola Percin, 9A5W.

Besides the dinner and AGM there are several activities to participate in. The popular course "Learn to program a PIC Micro-Controller in Four Hours" will be presented and bookings can now be made by going to the RTA pages on the SARL web at www.sarl.org.za. The course is also being advertised by Microchip to the general public at substantially higher rates than the cost of registration for SARL members. Members are urged to make their bookings as soon as possible.

For DXers and Contesters there will a special forum on the Saturday afternoon. Several tours including a visit to a game park have been arranged. Book for the event now on www.sarl.org.za.

ZS10WCS FROM THE NORTHERN CAPE

The Northern Cape Amateur Radio Club is operating the World Cup Soccer special event station, ZS10WCS, for the month of April. Listen out and work the station.

The Sandton and West Rand ARCs are thanked for their operation of the call sign during March 2010.

WORLD AMATEUR RADIO DAY

World Amateur Radio Day will be celebrated on Sunday 18 April 2010, the theme for 2010 is "Amateur Radio: Combining communication experience with modern digital techniques." This Sunday can be a great opportunity for radio clubs to demonstrate amateur radio to the public at a shopping centre or mall.

The Autumn QRP Sprint will be run on Sunday afternoon 18 April 2010.

CLUB NEWS

The Antique Wireless Association will be holding its annual Open Day at the Rand Airport TAC on Saturday 10 April from 10:00. Apart from the antique wireless display there will be a flea market and the best seats for watching the aircraft coming and going from the airport. Bring the

family along for an enjoyable outing. Refreshments from a cash bar and restaurant will be available.

To book flea market tables, contact Andy, ZS6ADY, on 082 448 4368.

The Overberg Amateur Radio Club held its annual general meeting on 27 March 2010. The following committee was elected:

Chairman: Andre Meintjes, ZS1AZ Vice-Chairman: Sam Mcleary, ZS1OR Treasurer: Judy Gardener, ZS1JEG Secretary: Lindsey Magnus, ZS1LGM Technical: Len van Riell, ZS1LEN

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at low levels. Currently sunspots 1 057 and 1 059 are doing their bit for HF although they are in general not very active. The effective sunspot number is expected to be between 15 and 20 for the coming week.

20 and 15 m will provide the best opportunities for DX. Conditions to India will be good from the afternoon onwards. During the late afternoons and early evenings conditions will be good towards Europe. Contacts with the USA are once again becoming challenging. Contacts with Australia and New Zealand will be challenging. During the afternoons and evenings good 20 and 15 m contacts may also be possible with Brazil.

17 m is open most afternoons to many parts of the world. The majority of activity is concentrated on Friday afternoons and also over the weekends. 10 m is also showing signs of life.

Local conditions are going to be good on 40 m during the daytime. 80 m may perform well during the early mornings and late afternoons over the shorter distances. 30 m will perform well during the middle of the day. 20 m is very useful for contacts over the longer distances during most of the day.

80 m is the frequency of choice in the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

10 April: Antique Wireless Association Open Day 17 April: 2010 SA AMSAT Space Symposium. 18 April - World Amateur Radio Day. 18 April - Autumn QRP Sprint. 23-25 April:- SARL National Convention, Port Elizabeth. 7 May: Closing date for stage 2 of the Construction Competition. 30 September - Closing date for entries in new SAARDT Innovation in Amateur Radio project.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items, if possible, in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding

the bulletin date.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 570 kHz - note the change in this frequency. There is also a podcast by ZS6RO.For a webstream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 21:00 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League compiled by Leon, ZS4V, and edited by Hester van der Walt.

Thank you for listening, 73.
/EX

Whatever happened to old Roger Weissman or Wiseman as he used to lurk here. Just wondering if his net privleges got taken away or did they take him off to the loony bin. Used to sit back and smack him around on here for a long time. Just wondering, haven't been on newsgroups for a couple years and remember the old wars back about 5 to 10 years ago. Just wondering if he crawled back under the rock he came from.

Buy an FL-2100B and you'll be happier and they are cheaper as well with
heavy duty components. Had one for a few years. Great little amp.

Debby says....
Not a lot of news this week.
Just wishing you all a very happy Easter. Not long now until the Conference in Auckland, so as advised, I posted out the branch membership voting figures to all secretaries yesterday.
Talk soon....Debby ZL2TDM

****
==> ARRL IN ACTION: WHAT HAVE WE BEEN UP TO LATELY?
This feature -- including convenient Web links to useful information -- is a concise monthly update of some of the things ARRL is doing on behalf of its members, including signing a new Memorandum of Understanding with the American Red Cross, preparing for WRC-12 (World Radio Conference-12), legislative actions, holding workshops to help teachers introduce wireless technology in their classrooms, promoting on-the-air events, investigating power line noise and more. This installment covers the month of March. Read more here:

http://www.arrl.org/news/features/2010/04/01/11415/?nc=1

****
Sixty-two Years of The Transistor
"Where a calculator on the ENIAC is equipped with 18,000 vacuum tubes and weighs 30 tons, computers in the future may have 1,000 vacuum tubes and perhaps weigh 1.5 tons."
Popular Mechanics, March 1949
In 1947, John Bardeen and Walter Brattain at AT&T's Bell Labs in the United States noted that the output power was larger than the input power when electrical contacts were applied to a crystal of germanium. Another worker at the AT&T's Bell Labs, William Shockley, saw the potential in this and developed the transistor. The term, 'transistor', was coined by John R. Pierce from the words 'transfer' and 'resistance'.
The first silicon transistor was produced by Texas Instruments in 1954. This was the work of Gordon Teal, an expert in growing crystals of high purity, who had previously worked at Bell Labs. The first MOS transistor actually built was by Kahng and Atalla at Bell Labs in 1960.
The transistor is the key active component in practically all modern electronics.
Although several companies each produce over a billion individually-packaged (known as discrete) transistors every year, the vast majority of transistors now produced are in integrated circuits (IC). Complete electronic circuits are made by combining integrated circuits with diodes, resistors, capacitors and other electronic components.
In 2010, a microprocessor, the heart of your home computer, could have up to 820 million transistors with a speed of over 3 GHz.
Do you remember the XT or '286' computer? This computer, from 1982, had a microprocessor that had 134 000 transistors in it and a speed of 6 MHz!
About 60 million transistors were built in 2002 for each man, woman, and child on Earth.
The transistor's low cost, flexibility, and reliability have made it a universal device. Transistorised mechatronic circuits have replaced electromechanical devices in controlling appliances and machinery. It is often easier and cheaper to use a standard microcontroller (a microprocessor with input and output circuits), and write a computer program to carry out a control function than to design an equivalent mechanical device.

****
WEIRD AND WONDERFUL
Up to 250 watts harvested from your shock absorbers
All you mobilers could be generating enormous amounts of energy as you hit those bumps...HIHI.
In a recent study, mechanical engineers from the State University of New York have designed and tested a retrofit regenerative shock absorber that recovers a vehicle's vibrational energy.
The researchers built a 1:2 scale prototype of the regenerative shock absorber, and demonstrated its ability to harvest 2-8 watts of power during typical driving conditions at a speed of about 45 mph. They predict that a full-scale system on a four-wheel car should be able to recover up to 256 watts under these driving conditions.

The researchers predict the ability to harvest approximately 64 watts per wheel, for a total of about 250 watts for a 4-wheel car, the value increasing considerably when the system is used on irregular roads.
It was found that the power regenerated is proportional to the square of the magnetic flux across the coils. Consequently, increasing the flux by twos, quadruples the peak power output.

****
Copper Wire
After having dug to a depth of 10 feet last year, New York scientists found traces of copper wire dating back 100 years and came to the conclusion, that their ancestors already had a telephone network more than 100 years ago.
Not to be outdone by the New Yorkers, in the weeks that followed, a California archaeologist dug to a depth of 20 feet, and shortly after, a story in the LA Times read: "California archaeologists, after finding 200 year old copper wire, have concluded that their ancestors already had an advanced high-tech communications network a hundred years earlier than the New Yorkers"
One week later, a local newspaper in Ohio reported the following:
"After digging as deep as 30 feet in his pasture near Findlay, Ohio, Bubba, a self-taught archaeologist, reported that he found absolutely nothing. Bubba has therefore concluded that 300 years ago, Ohio had already gone wireless".
Buckeyes are such a proud bunch.
(BUCKEYES is the general name for members of The Ohio State University Department of Athletics)

Contest News

VHF/UHF/SHF Contest Notes
NEXT WEEKEND
The next contest is the LOW BAND CONTEST, 50 MHz to 440 MHz, on Saturday the 10th and Sunday the 11th of April 2010. This is the weekend after Easter. The operating times are: Saturday 1700 to 2300 NZT and Sunday 0700 to 1300 NZT.

The rules are available at: http://www.vhf.org.nz/VHF-UHF-SHF-ContestRules
Logs should be sent within two weeks, to:
zl2wa@clear.net.nz with Contest Log in the subject line,
or by post to:
Contest Manager, Wellington VHF Group, P.O. Box 12-259, Thorndon, Wellington
Wellington VHF Group Website http://www.vhf.org.nz

HF Contests
NZART WARO THELMA SOUPER MEMORIAL CONTEST
When: - 10 and 11 April 2010
Times:- 0800Z until 1000Z both evenings
Modes :- CW and SSB
The Annual memorial contest activity to commemorate the memory of the Late Thelma Souper a former stalwart of the NZ Women Amateur Radio Operators and considered to be "The Grand Old Dame" of WARO.
Contest Rules and Other Operating information are now available from the WARO Website :- http://www.qsl.net/zl6yl/awards.html.

KIWI DX GROUP DIGITAL MODES CONTESTS
80M - 17 April 2010
40M - 24 April 2010
Times - 1000 UTC until 1100 UTC both evenings
Contest Rules and Other Operating Information available from the Group's Website http://www.qsl.net/zl2sky/new_page_1.htm

2010 NZART SANGSTER SHIELD QRP CW CONTEST
When :- Saturday, 15 May 2010 and Sunday, 16 May 2010
Times :- 2000 NZST until 2300 NZST each evening
Band :- 80m
Mode :- CW only.
The contest was established in 1927 at the time the late Mr. Ralph Sangster presented to the radio Amateurs of NZ the trophy, known as the Sangster Shield, for annual competition to be won by the most efficient station. It is pertinent to note not only did the efficiency of the station be taken into account, but also the efficiency of the operator concerned The terms of the gift of the trophy were that the competition was to be conducted on the 80 metre band using input power of not more than 5 watts and to be solely restricted to Morse operation.

2010 NZART MEMORIAL CONTEST
When :- 3 & 4 July 2010
Times :- 2000 NZST until 2300 NZST both evenings
Band :- 80m
Modes :- CW and Phone
The Memorial Contest was established soon after the end of World War 2 to commemorate those who lost their lives in the service of their country. It is a fitting way to honour those Hams and others who selflessly served their country so that we, today, may enjoy the freedoms that we do.
The Contest is split into a number of categories catering for all HF interests so please spare an hour, or two to honour those who paid the ultimate price that we now enjoy in our present lifestyles.
Contest Rules and Other Operating Information is available from the NZART Website :- http://www.nzart.org.nz/contests/index.html
Contest Rules and other Operating Information is available from the NZART website - http://www.nzart.org.nz/contests/index.html

For the contests below please see the latest "Contest Manager's Report"
This can be found on the NZART Web Contest page at:
http://www.nzart.org.nz/contests/index.html

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 4th April 2010

IRTS Annual Dinner AV Presentations

One of the audio visual presentations being prepared for the Annual Dinner in Dundalk will feature the Islands on the Air Contest.

Individuals or Groups who have still photos or video of last year's contest, or indeed any amateur radio related activity, and who would like them to be considered for inclusion should forward them to Seamus EI8BP. In particular, Seamus is anxious to feature all the Island expeditions.

Seamus may be contacted on 087 259 0691 or at smccague /at/ eircom.net

---

IRTS Committee Meeting

Next IRTS Committee Meeting, Saturday April 10th at 1100 Shamrock Lodge Hotel, Athlone.

IRTS 78th AGM

The 78th AGM of Irish Radio Transmitters Society will be hosted by the Dundalk Amateur Radio Society, over the weekend of the 24 /25th April 2010.The venue will be Fairways Hotel Dundalk Co Louth.

Tickets for the Dinner on Saturday night at 8.30PM are selling well at 35 Euro each and are available from Peter Grant EI4HX Peter's email address is secretary /at/ ei7dar.com or by Telephone 087 7944779..

Fore more info on the AGM weekend, Dinner & Rally please check www.irts.ie or www.ei7dar.com

---

IRTS 2m Counties Contest

The next IRTS Contest will be held on Easter Monday from 14:00 to 16:00 local time. Rules and information are available on the IRTS website.

EI4HF in Haiti

Mike Lee EI4HF has been in contact with the IRTS Radio News with an update of his Experiences in Port au Prince Haiti, where he has spent the last two months as part of the UN Humanitarian relief.

Mike has been putting his radio qualifications and Skills to good use and is helping the UN to setup and establish a vhf radio network, simplex and repeaters,

These will be used by the UN and various organizations such as Goal and Concern. Mike has also applied for a licence for Haiti and if successful he hopes to be on the air.

EI / G request for volunteers for 50MHz WSPRExperiment.

Ian Hogan G6TGO, UK Six Metre Group Sponsorship Manager and SIX NEWS columnist, would like to invite Stations to Participate in a WSPR Experiment with a Demo Station which will be at the Norbrek Rally Blackpool on the11th April.

All contributors will be credited in the Magazine SIXNEWS.

EI2HOT/P special activation

As part of the Hot air Balloon Fiesta in Trim over Easter Weekend the BARC (Ballooning Amateur Radio Club of Ireland) are running a special event station during the festival.

The special call will be EI2HOT/p for the event. More info from the Website.

http://www.trimballoonfiesta.com/

Limerick Radio Club

Eight members of Limerick Radio Club recently completed works on the 2M repeater site which consisted of erecting a tilt over mast and the erection of a new antenna & feeder. Initial reports suggest an improvement of coverage, reports from users and SWL's throughout the region are welcomed, and can be sent to any member of the club.

As the club have gone to major expense on this project all users are reminded to contribute toward the repeater maintenance fund to club treasurer Tony EI2AW QTHR. The club wish to thank EI2GT, EI7ALB, EI4GXB. EI6IW, EI3JU, EI2GGB,EI4GB and SWL Kris for their workon the day.

Limerick Radio Club will be taking part in the IRTS 2M counties contest this bank holiday Monday. Signing EI4LRC/P operators will be Simon EI7ALB, Gerry EI3JU, David EI2GGB and Ger EI4GXB and look forward to a busy period of activity.

The Club are also now on Facebook. Go to www.facebook.com and type in Limerick Radio Club, join up and say hello.

AREN

Last Sunday the 28 March AREN members provided assistance to the Galtee Walking Club in Tipperary for their annual marathon. Up to 90 participants assembled for the early morning start.

Declan EI2GE took part in the half marathon and relayed information on participant numbers at check points, Michael Norris SWL Son of Paul EI3ENB, also walked the route with a portable APRS tracker, John EI2JB was stationed in the MCP on net control and the following members were stationed at strategic points along the route, Eddie EI3FFB, SWL Dave Maxwell, Paul EI3ENB, Simon EI7ALB, Gerry EI3JU and Ger EI4GXB.

Tommy EI2IT while on baby sitting duties at home provided signal reports which resulted in EI2JB, EI7ALB and EI4GXB extending the height of the 2M/70cm antenna at the MCP and it is rumoured that their method is being used in the next McGyver movie HI!

The next AREN Voice net will take place next Wednesday Evening 7th April at 19.30 local time and all members are requested to be QRV.

Lough Erne Rally Webcast on Sunday 11 April

Responding to requests, arrangements are in hand for a live webcast over the internet from the Lough Erne Rally on Sunday 11 April. Of particular interest may be the afternoon's QRP talk on by George Dobbs G3RJV.

Also worth watching will be the happy crowd of radio amateurs and experimenters around the stalls in the main arena at the SHARE centre. The final arrangements on how to access the webcast will be posted on the Club website - www.learc.eu.

Other details of the rally are all on page 26 of April's Echo Ireland which was circulated last week.

Dundalk Amateur Radio Society.

The next meeting of the Society is scheduled for 7th April 2010 at the Clubhouse. Meetings start at 20.30pm sharp all are welcome to attend.

Wicklow Radio Club

The Next meeting of the Club is confirmed for wed 14th of April at 19:30, in the Glebe National School, Wicklow Town. All are welcome to attend.

Rallies

Lough Erne Amateur Radio Club Rally

Sunday 11th April 2010 The venue is The Share Holiday Village Lisnaskee Co. Fermanagh BT92 0EQ.For more details contact Iain 028 66326693, email gibbjgbb /at/ aol.com

Website www.learc.eu

For further Rally info and contact details please check out the IRTS Website.

http://www.irts.ie/cgi/rallies.cgi

History this week

1889 The Eiffel Tower opened for the Paris Exposition.

1910 First military wireless message sent in Australia, Helensburgh, Sydney.

1995 US Coast Guard last Morse message ending over 100years use.

Items for inclusion in next weeks Radio News should be forwarded to Charlie EI8JB, preferably via e-mail to "charlie dot carolan at gmail dot com" Or by phone to 087-6265418 News can also be submitted via e-mail to "newsteam at irts dot ie" for automatic forwarding to both the radio and printed news services.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

Kenwood TRC 80 Programming Please help me if you can.

Good day,

I am asking for assistance with my Kenwood TRC 80, I need to reset the unit back to factory defaults, but do not know how to do this.

If you have any information or if you can direct me in the correct direction I would appreciate it.

Thank you for your time and assistance.

Regards,

Chris - Pretoria, South Africa

244. Nebraska Hams Respond to Telephone Outage

Newsgroup: rec.radio.amateur.misc
Date: 2010-04-05 16:10:19 UTC
From: ARRL NE Section <memberlist@www.arrl.org>
Message-ID: <20100405132202.13A0D203A2@bmail.arrl.org>
Source record: 5963
Cross-posted to: rec.radio.amateur.moderated,rec.radio.amateur.misc,nebr.misc,rec.radio.info

At about 7:45 Thursday morning, April 1, Windstream Communications suffered a major landline telephone switch failure. The result was a loss of landline telephone service at least 12 counties and 36,000 customers in Nebraska. There was also spotty loss of cell phone service where cell sites were interconnected by Windstream. Emergency services, including 911 centers, in Lincoln and several other communities were left without landline telephone communications.

The Lancaster County Emergency Management Director, Doug Ahlberg, activated the amateur radio "Y2K" plan. This plan places hams at prominent intersections and, if need be, public emergency service locations throughout the city. Since there was, in effect, no 911 service in the city, the Lincoln-Lancaster Emergency Operations Center was activated and, under the direction of the ARRL Lancaster County Emergency Coordinator, Reynolds Davis, K&#65533;GND, hams were assigned to the EOC and 15 major intersections around the city. Emergency bulletins on television and radio stations carried information about where hams were stationed. Hams could help citizens obtain emergency services. They also watched out for vehicle accidents and obstructions to traffic.

This is the fourth time that the "Y2K" plan, originally established in anticipation of the loss of communications at the end of the last century, has been used. Earlier activations were due to localized loss of communications at dispatch centers.

By the time telephone service was restored, at 11:20 pm Thursday, 62 amateur radio operators had devoted a good part of the day to ensure the safety of the people of Lincoln. Their calls were: W&#65533;ADI, K&#65533;AIZ, N&#65533;AZN, N7AZN, W&#65533;BCL, KD&#65533;BCT, KD&#65533;BSA, KC&#65533;CDQ, N&#65533;CRL, KD&#65533;DEU, N&#65533;DEX, KD&#65533;DIU, N&#65533;DIZ, KB&#65533;DNP, KD&#65533;DVR, W&#65533;EMA, K&#65533;EPP, W&#65533;ERT, KD&#65533;EYM, W&#65533;EZ, KC&#65533;FDL, N&#65533;FYE, K&#65533;GND, KA&#65533;GON, KD&#65533;HYM, KD&#65533;HZM, KD7ITK, K&#65533;JIC, KI6JOJ, K&#65533;JSL, KE&#65533;JT, KB&#65533;KA, KC&#65533;KIE, AC&#65533;LN, N&#65533;LNK, N&#65533;LWL, NG&#65533;M, KD6MXE, K&#65533;NEB, KC&#65533;OZE, WA&#65533;QYI, N&#65533;QYM, N&#65533;RHL, WB&#65533;RJJ, KN&#65533;RKY, KC&#65533;RSU, KB&#65533;RZP, KB&#65533;SND, KC&#65533;SVX, KE&#65533;TAS, N&#65533;UJR, N&#65533;UXW, W&#65533;VDM, KC&#65533;VNJ, KC&#65533;VRL, W&#65533;WKP, KB&#65533;WZG, N&#65533;XLT, N&#65533;XY, KC&#65533;ZBB, KC&#65533;ZBD and N&#65533;ZXR.

There was significant press coverage with photographs, interviews, and video clips of hams "on duty" presented to the public. The public was reminded, once again, that when all else fails, there is ham radio.

Congratulations to everyone for a job well done.

ARRL Nebraska Section
Section Manager: Arthur I. Zygielbaum, K0AIZ

Posting-Frequency: posted monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:
```

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.swap (and currently archived at
http://www.faqs.org/faqs/radio/swap-guide/ ):

radio/swap-guide
Subject: Rec.radio.swap FAQ: A Guide to Buying and Selling on Usenet
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 6 Nov 2001 19:25:51 GMT
Posting-Frequency: Monthly

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

GB2RS NEWS

Sunday 11th April 2010

The news headlines

RSGB AGM in Bedford next weekend

QRP talk to be streamed live

WSPR beacon goes on air

The RSGB AGM will take place on Saturday 17 April at the Swan Hotel, The Embankment, Bedford MK40 1RW. The whole day is geared to bringing the RSGB to you and is an ideal opportunity for local clubs to socialise and meet with each other and meet with senior RSGB officers. VHF and UHF awards will be presented at 10am and Registration for the AGM begins at 11am. Formal AGM proceedings start at 12 noon. Talk-in will be by GB2AGM on S22 simplex plus Bedford repeaters GB3BF and GB3BL. If you can't attend the AGM in person, you can still see what is going on. The British Amateur Television Club will be streaming video and audio of the proceedings live via the internet. Anyone with a broadband connection can go to www.batc.tv and click on Live Events to watch the stream. It's completely free.

Today, 11 April, the British Amateur Television Club will webcast the Lough Erne Amateur Radio Club Rally, which includes a QRP talk by George Dobbs, G3RJV. The Rally webcast will start about 11.30am. The talk will be about 2pm and will last about an hour including discussion. George's talk is entitled QRP - Why and How. To watch this BATC webcast go to www.batc.org.uk.

The second WSPR beacon in Africa, 5X7JD, has gone into service. The beacon is hosted by Jack, 5X7JD who is located in Masaka, Uganda. The system has 1W output and cycles through 80, 40, 30, 20, 17, 15, 12 and 10m, so you can hear the WSPR signal returning every 16 minutes. The antenna is a HyGain Av 18VS multi-band vertical. The beacon hardware is an embedded system based on a PIC 18F2455 MCU, an Analog AD9851 DDS chip and a MOSFET PA with selectable filters. Time and location information are derived from an attached GPS receiver. You can read more about the station at www.hamradiosafari.com.

2010 marks the 70th anniversary of the development of the high-power cavity magnetron, a crucial technology for radar in World War 2. CAVMAG 2010 is a two-day conference sponsored by the IET, DEHS and the IEEE in the Allsebrook Lecture Theatre at the University of Bournemouth on 19

and 20 April. The registration fee includes lunches and tea/coffee breaks. There will be a pre-event visit to the Royal Signals Museum, Blandford on Sunday 18 April and a conference dinner on 19 April. Visit www.cavmag2010.org.uk.

The Bath Radio Classes will have a number of candidates sitting the Advanced Radio Communications Examination on 17 June. If any external candidates would like to sit alongside the Bath group they should contact Steve Hartley, G0FUW before 29 April. Potential candidates are reminded that they must have passed the Intermediate examination before sitting the Advanced. Steve can be contacted on 01225 464394 evenings 7 to 9pm or by e-mail to G0FUW@tiscali.co.uk.

The 23rd International Marconi Day will take place on 24 April. Although not a contest, awards can be obtained and full details will be found at www.gb4imd.org.uk. For a station to be counted towards an award by applicants, that station must be registered prior to the event by e-mail to webmaster@gb4imd.org.uk with full details of the station. In order to qualify as an Award Station, operations should take place from a site which either used Marconi equipment prior to his death in 1937 or from which Marconi carried out experiments during the same period.

The Mid Ulster Amateur radio Club will be running a Foundation course over a weekend in April. The registration for the course is on Wednesday 21 April at 7pm in the Place Initiative, Ardress Park, Portadown BT62 3TP. With limited places, attendance at the registration is essential. More details can be obtained by contacting Martin, MI0YMF on 02838 348451.

GB3RB, the Bolsover Repeater, will be 6 years old very soon. The repeater became active in April 2004 and since then has provided a useful service to amateurs and listeners in the area. The repeater keeper is Richard, G1SLE. To acknowledge GB3RB's six years of service, the members of Bolsover Amateur Radio Society will be holding their Sunday night net on the repeater from 8pm on 18 April. All amateurs are welcome to call in. The repeater information is 434.800MHz In, 433.200MHz out, CTCSS 71.9Hz. For a technical guide to the repeater, head over to www.g1sle.com.

And now for the details of rallies and events for the coming week

The Cambridgeshire Repeater Group Annual Rally will be held today, 11 April, at Foxton Village Hall, Hardman Road, Foxton, Cambridge CB22 6RN. There will be trade stands, a Bring & Buy as well as lectures. Entry is available from 10am and will cost ?2. Contact Laurence, M0LCM, 01223 654880.

Today, 11 April, the Lough Erne Amateur Radio Club Annual Rally will be held at The Share Holiday Village, Lisnaskea, Co. Fermanagh BT92 0EQ, Northern Ireland. Access is also available from Erne - Shannon Waterway. Doors open at 12 noon and there will be the usual trade stands and Bring & Buy. Details from Iain on 028 66326693.

Today, 11 April, is the country's largest one day rally, the NARSA rally in Blackpool. Alongside the rally, GB2NOR will be on the air on HF from the Norbreck Castle Hotel, just north of the North Pier at Blackpool. Join them on air if you cannot manage to visit the rally. The stand will be operated by a dedicated RAFARS RSARS team supported by the ATC. QSL via RAFARS 609 or RSGB Bureau.

On Sunday 18 April, the West London Radio & Electronics Show will take place at Kempton Park Racecourse, Staines Road East, Sunbury on Thames, Middlesex TW16 5AQ. Talk in is available and there's free car parking. The doors open at 9.50 for disabled guests and 10am for other visitors. There will be the usual trade stands, Bring & Buy, special interest groups as well as lectures. Details from Paul, M0CJX, on 0845 165 0351.

Now for the news of special events

As part of the Women on the Air 2010 activities, Anneke, PB7XYL, will activate the special callsign PB88XYL until 30 April. QSL via bureau or direct. For more information visit http://wotaclub2010.blogspot.com.

GB0BMT will be on the air on 17 April between 10am and 3pm from the Birkenhead Masonic Temple as part of their open day.

GB2AGM will be on the air from the RSGB AGM in Bedford on 17 April.

GB0GAF will be on the air from Warwickshire for the Great Alne Festival on 20 April.

GB4MBP and GB0MD will be on the air on 22 April as part of the International Marconi Day activities. The first will be on the air from the Lizard in Cornwall and the second station from Kent.

And now the HF DX news compiled from 425 DX News and other sources.

F4EGZ is active portable from Reunion Island. He will be there until 19 April operating on 20 through to 6 meters. He will accept 6m skeds via e-mail at f4egz@yahoo.fr. Please QSL via his home callsign.

Phil, F4EGS will be active once again from Chad for two months starting on 10 April. The callsign is not known at this moment but may be TT8PK, which he used in the past. Activity will be in his spare time from 40 through to 10m using SSB, CW and a little RTTY. QSL via F4EGS, direct or via the bureau.

SP2JMB will operate CW as either 3B8/SP2JMB or 3B8SC from Mauritius Island, which is IOTA reference AF-049, until 23 April. He will be joined by 3B8/SP2FUD, who will be operating SSB and RTTY.

Now the contest news

On 13 April, the 432MHz UK Activity Contest & Club Championship takes place between 1900 and 2130UTC. Using all modes, the exchange is signal report, serial number and location.

14 April sees the next leg of the 80m Club Championships take place between 1900 and 2030UTC. Using SSB, the exchange is signal report and

serial number.

The EU Spring Sprint takes place on 17 April on the 3.5 to 14MHz bands between 1600 and 2000UTC. Using SSB, the exchange is both callsigns, serial number and name.

The UHF UK Activity Contest & Club Championship takes place between 1900 and 2130UTC on 20 April. Using all modes on the 1.3 and 2.3GHz bands, the exchange is signal report, serial number and locator.

The OK1WC Memorial Contest will take place on 24 April from 0400 to 0700 on the 160, 80 and 40m bands. No logs are required and the results are sent via the internet. For more information go to www.hamradio.cz/ok1wc/ where the rules are available.

Now the solar factual data for the period from the 29thd of March to the 4th of April, compiled by Neil Clarke, G0CAS on the 5th of April.

The solar disc had spots visible every day. Up until the end of March there as only been six spotless days, comparing that for the same period last year there was 76. Solar activity remained at very low levels. However, a long duration B7 solar flare occurred on the 3rd and produced a coronal mass ejection that appeared to be Earth directed. Solar flux levels declined slightly from 83 units on the 29th to 76 by the 2nd. The average was 80 units. The 90 day solar flux average on the 4th was the same level as last week at 83 units. X-ray flux units varied little day to day and averaged A3.5. Geomagnetic activity started at quiet levels but on the 1st, 2nd and the 4th increased to slightly unsettled. The Ap index on the 4th was 13 units. The average was Ap 8 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase from 350 kilometres per second to 560 by the 3rd. Particle densities were mostly low but increased briefly to around 20 particles per cubic centimetre on the 29th to the 31st. Bz varied no more than plus and minus 8 nanoTeslas during the period.

Now the latest news on the Solar Dynamics Observatory. During the past week all nine doors were open and the CCDs are cold. For the next several weeks SDO scientists and engineers will work to check out and calibrate the instruments and to coordinate the spacecraft and instruments. SDO needs to point at the Sun very accurately while taking an image every ? of a second, which means rotating shutters and filters, rotating the high-gain antennas to keep them pointed towards New Mexico, and rotating the entire observatory once per orbit to keep it pointed at the Sun. Initial results will be released world-wide in mid-April.

And finally the solar forecast. This week solar activity is expected to be at very low to low. If the present state of the Sun continues then spots are expected to be visible most days. Solar flux levels should be in the 80's for most of the week. Geomagnetic activity should be quiet everyday. MUFs during daylight hours at equal latitudes are expected to be about 23MHz for the south and 20MHz for the north. Darkness hour lows should be around 10MHz. Paths this week to the east coast of North

America should have a maximum usable frequency with a 50 per cent success rate of about 20MHz. The optimum working frequency with a 90 per cent success rate will be around 16MHz. The best time to try this path will be between 1500 and 2000 hours.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including e-mail addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS

On Monday 12 April Gloucester Amateur Radio & Electronics Society is having a talk by the Mayor of Gloucester, Chris Witts. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 12 April South Birmingham Radio Society is having a contest meeting and rag chew. Contact Don, on 0121 458 1603.

On Monday 12 April Stratford Upon Avon District Radio Society is having a talk on measuring repeater coverage by G0CHO. Contact G0CHO, on 01608 664488.

On Tuesday 13 April Derby & District Amateur Radio Society is having a committee meeting. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 13 April Loughborough & District Amateur Radio Club is having a talk on knitting machines by Albert, G1KSC. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday 13 April Mid-Warwickshire Amateur Radio Society is having unprepared talks on randomly chosen amateur radio topics. Details from Don, G4CYG, on 019 2642 4465.

On Tuesday 13 April Telford & District Amateur Radio Society is having a hamfest committee meeting. Contact Mike, G3JKX, on 01952 299 677.

On Wednesday 14 April Bolsover Amateur Radio Society is having a quiz. For details, send an email to postmaster@g4rsb.org.uk.

On Wednesday 14 April Hinckley Amateur Radio Society is having a workshop evening on tuning VHF Yagis for performance by John Rogers, M0JAV. Details from John, M0JAV, on 07836 731544.

On Wednesday 14 April Lincoln Short-Wave Club is holding a surplus equipment sale at the Village Hall, Aisthorpe. For more information contact Pam Rose, G4STO, on 01427 788356.

On Wednesday 14 April Midland Amateur Radio Society is having a committee meting and holding training classes. Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 14 April South Notts Amateur Radio Club is having a talk on component theory by G4EDX. Details from Terry, M0RIA, via the web at www.radioclubs.net/snarc.

On Wednesday 14 April Telford & District Amateur Radio Society invites members to bring their 70cm handhelds for CTCSS checks. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 15 April RAF Waddington Amateur Radio Club is having a practical night. For more information contact Bob, G3VCA, by email to g3vca@pyewipe.co.uk.

On Thursday 15 April Salop Amateur Radio Society continues its Foundation course and is having a natter night. Details on the club website at www.salop-ars.org.uk.

On Friday 16 April Bromsgrove & District Amateur Radio Club is taking part in VHF Hills on the Air night Competition. Contact Chris, M0BQE on 01905 776 869.

On Friday 16 April Coventry Amateur Radio Society is taking part in the 2nd round of the 2m DF Trophy. Contact John, G8SEQ, on 07958 777363.

On Friday 16 April Melton Mowbray Amateur Radio Society is looking at Worked All Britain news. For more information contact Geoff, G3STG, on 01664 480 733.

On Friday 16 April Nunsfield House Amateur Radio Group is having a talk and demo on energy by Pete Walker. Details from Ken Frankcom, G3OCA, on 01332 720976.

On Friday 16 April South Birmingham Radio Society is having a construction evenings. Contact Don, on 0121 458 1603.

On Friday 16 April Spalding & District Amateur Radio Society is having a nostalgic look back at the origins of the club and rally, including a DVD, presented by Roy, G3VPR. For more information contact Graham Boor, G8NWC, on 07947 76448.

The only things buried in Mark Morgan's back yard are a few old tires and
some trash bags.

==> BPL: CITY OF MANASSAS TO END BPL SERVICE

Once touted as "the most successful BPL deployment in the nation,"
the City of Manassas has decided to get out of the BPL business, once
and for all. At a Special Meeting on Monday, April 5, the Manassas City
Council -- acting on a recommendation from the Manassas Utilities
Commission -- unanimously voted to discontinue Broadband over Powerline
(BPL <http://www.arrl.org/tis/info/HTML/plc/>) Internet service as of
July 1, 2010 to the approximately 520 residents and businesses who
currently subscribe to the service; these customers were told that they
have three months to find a new Internet service provider.

According to Manassas City Clerk Andrea Madden, there was no discussion
on the resolution to discontinue service and the motion was passed
"without incident."

With the motion made by Councilman Jonathan Way and seconded by Mark
Wolfe, the City Council cited three reasons for discontinuing BPL
service: a declining customer base, an annual income deficit of almost
$166,000 from providing Internet service, and a determination that AMI
<http://en.wikipedia.org/wiki/Advanced_Metering_Infrastructure>
[Advanced Metering Infrastructure] platforms don't require BPL. Way and
Wolfe favored shutting down the BPL system in November 2009
<http://www.arrl.org/news/stories/2009/11/19/11206/?nc=1>, the last
time this matter was brought to the Council's attention. "The City
needs to get out of BPL forthwith," Way said back in 2009. "It's not a
good product. The whole business is not financially sound and it never
has been."

Manassas residents pay $24.95 each month to receive Internet service
via BPL. In November 2009, the Utility Commission showed the Council
that little more than 500 residents and 46 businesses currently
subscribed to the service, which since 2008, has been run by the City

<http://www.arrl.org/news/stories/2008/10/16/10391/>. "It's costing a little more to maintain the system than we projected in the budget," Manassas Director of Utilities Michael Moon told the Council. "The original projections were that the customer base would be double this." In September 2008, the Manassas City Council voted to assume control of the BPL service from COMTek <http://www.comtekbroadband.com/>, the private company that served (back then) approximately 675 residents.

In January 2009, there were 637 residential and 51 commercial BPL subscribers in Manassas. In February 2010, those numbers had shrunk to 457 residential and 50 commercial subscribers. The Utilities Commission said that the total revenue brought in by BPL for FY2010 was almost $186,000, but the expense of keeping up the City-owned system was costing the ratepayers a little more than $351,000, resulting in a net loss of almost $166,000.

"In October 2003, the Manassas City Council was told that it could expect as much as $4.5 million in revenue from awarding a 10 year BPL franchise," said ARRL Chief Executive Officer David Sumner, K1ZZ. "Instead, six months later, BPL had turned into a money pit for the City of Manassas. Anyone thinking of investing in BPL would do well to learn from the Manassas experience."

In November 2009, Manassas' Assistant Utilities Director (Electric) Gregg Paulson told the ARRL that they had "every intention of putting BPL Internet service in the budget and the Council can decide its fate as they work through the budget process." Paulson also said that while Internet service to consumers would "probably" be the only thing that would be cut if the Council decided to forego BPL, he left the door open as to using the BPL infrastructure for other purposes: "We still own the BPL network, but we may or may not use this network for utility monitoring or other AMI purposes."

But according to the resolution passed by the Council, the Manassas Utilities Department will not be using BPL for AMI, but instead will use "a combination of fiber and wireless technology exclusive of the BPL." According to the Agenda Statement for the Special Meeting, the BPL equipment will be removed from the system and "inquiries will be made regarding the salvage value."

Sumner said that the ARRL's concern was not with the business plan -- that he termed "obviously flawed" -- but with "the interference to licensed radio services -- and in particular the Amateur Radio Service -- inevitably caused by putting radio frequency energy on unshielded, unbalanced conductors. Manassas was touted as 'the most successful BPL deployment in the nation' when FCC Chairman Michael Powell visited the site with much fanfare -- and, the ARRL maintains, in violation of the FCC's own rules -- on the eve of the FCC's vote to adopt inadequate protection for licensed radio services against interference from BPL systems. The taxpayers and ratepayers of Manassas are not the only ones who benefit from the end of this ill-considered foray into BPL. Radio amateurs in the Manassas area have good reason to celebrate, for they

have spent countless hours documenting the widespread interference caused by the system."

BPL technology uses the electricity grid in a city and the wiring in individual homes to provide direct "plug in" broadband access through electricity sockets, rather than over phone or cable TV lines. Because BPL wiring is physically large, is often overhead and extends across entire communities, these systems pose a significant interference potential to over-the-air radio services, including Amateur Radio.

==> FCC NEWS: ARRL RESPONDS TO FCC'S NPRM CALLING FOR NEW RULES ON VANITY AND CLUB CALL SIGNS

In November 2009, the FCC issued a Notice of Proposed Rule Making (NPRM) -- WT Docket No 09-209 -- seeking to amend the Commission's Amateur Radio Service rules in an attempt to clarify certain rules and codify existing procedures governing the vanity call sign system, as well as revise certain rules applicable to club stations. In March, the ARRL submitted comments and additional proposals to the FCC to update the Amateur Service's call sign assignment system and provide for continued growth of the Amateur Radio Service, as well as enhance the pride and satisfaction of licensees in their personal achievements in the radio art. The ARRL's positions were developed by the Executive Committee at its March 13 meeting. Read more here <http://www.arrl.org/news/stories/2010/04/07/11423/?nc=1>.

==> FCC NEWS: ARRL FILES COMMENTS IN RESPONSE TO HOSPITAL ASSOCIATION SEEKING BLANKET WAIVER REQUEST FOR AMATEUR RADIO DRILLS

In February 2010, the American Hospital Association (AHA) filed a request with the FCC for a blanket waiver of Section 97.113(a)(3) of the Commission's Rules "to permit hospitals seeking accreditation to use Amateur Radio operators who are hospital employees to transmit communications on behalf of the hospital as part of emergency preparedness drills." On March 3, the FCC issued a Public Notice -- WP Docket 10-54 -- asking whether the Commission "should grant AHA's request for a blanket waiver of Section 97.113(a)(3) to permit amateur operators who are hospital employees to participate in emergency drills that are conducted by hospitals for accreditation purposes and that are not government-sponsored."

Section 97.113(a)(3) specifically prohibits amateur stations from transmitting communications "in which the station licensee or control operator has a pecuniary interest, including communications on behalf of an employer." On April 2, the ARRL filed comments regarding the blanket waiver request. Read more here <http://www.arrl.org/news/stories/2010/04/07/11425/?nc=1>.

==> FCC NEWS: ARRL FILES PETITION FOR RECONSIDERATION OVER WAIVER FOR NON-AMATEUR DEVICE IN 70 CM BAND

In January 2008, a company called ReconRobotics filed a request with the FCC for a waiver of Part 90 of the Commission's Rules with respect

to the Recon Scout -- a remote-controlled, maneuverable surveillance robot designed for use in areas that may be too hazardous for human entry. A waiver is required to permit licensing of the Recon Scout because the device operates in the 430-448 MHz band, which is allocated to the Federal Government Radiolocation service on a primary basis, as well as the Amateur Radio Service and certain non-federal radiolocation systems on a secondary basis. More than two years later, the FCC granted the waiver request in the form of an Order (WP Docket No 08-63), subject to certain conditions. The ARRL had opposed the waiver on the grounds that the device has a significant potential to interfere with amateur stations and that the company is simply trying to avoid redesigning for the domestic market a device that was designed for military use overseas, and as such, filed a Petition of Reconsideration with the FCC in late March. Read more here <http://www.arrl.org/news/stories/2010/04/06/11422/?nc=1>.

==> PUBLIC SERVICE: TELEPHONE OUTAGE IN NEBRASKA WAS NO APRIL FOOL'S JOKE

Early on the morning of April 1, almost 40,000 people in Southeastern Nebraska -- including the City of Lincoln's government, business and emergency centers -- found that they had no landline telephone service, as well as spotty cell phone coverage, thanks to an equipment malfunction at a Lincoln switching facility owned by Windstream Communications. According to news reports, residents of 12 counties were unable to contact 911 and dispatch centers had rely on other communications services -- including Amateur Radio. Read more here <http://www.arrl.org/news/stories/2010/04/05/11421/?nc=1>.

==> ON THE AIR: THE FIRST ROOKIE ROUNDUP -- COMING APRIL 18!

The ARRL's newest contest -- the Rookie Roundup -- is getting a lot of buzz among newly-licensed amateurs. Designed as a modern equivalent to the ARRL Novice Roundup from a few decades ago, this new incarnation combines a competitive event with some on-the-air training. The first Rookie Roundup is scheduled for April 18 and will be an SSB contest. The Rookie Roundup is six hours of fun on a Sunday afternoon that is designed to give new hams a chance to get their feet wet on HF and 6 meters. Old-timers are encouraged to get on the air and work the Rookies, just as in they did in the Novice Roundups. The six hour event -- from 1800 UTC-2359 UTC -- will be held on the third Sunday of April, August, and December. SSB, RTTY, and CW will be featured in the different months. Read more here <http://www.arrl.org/news/stories/2010/04/08/11426/?nc=1>.

==> COMING UP IN QST : CHECK OUT WHAT'S IN THE MAY ISSUE

The May issue of QST is jam-packed with all sorts of things today's Amateur Radio operator needs. From product reviews to experiments to contesting -- including a breakdown of the Second ARRL Homebrew Challenge -- the upcoming issue of QST has something for just about everyone. You'll find an abundance of technical and general interest

articles, as well as monthly columns such as Happenings, How's DX, Hamspeak, Vintage Radio and more. Click here <http://www.arrl.org/news/stories/2010/04/07/11424/?nc=1> to discover what's in store for you in the May issue of QST, the official journal of the ARRL.

==> ON THE AIR: MOONBOUNCE FOR EVERYONE -- COURTESY OF THE ARECIBO RADIO TELESCOPE!

Sending Amateur Radio signals to the Moon and back has never been easy. After roundtrip journeys of nearly half a million miles, even the most powerful signals generated by hams are exquisitely weak on arrival. Because of the equipment and expertise necessary for successful "moonbounce" operating, this facet of Amateur Radio generally has been confined to a small audience. But for three days in April even hams with very modest stations will have the opportunity to experience the thrill of moonbounce, thanks to the giant radio telescope at the Arecibo Observatory in Puerto Rico. Read more here <http://www.arrl.org/news/stories/2010/04/07/11420/?nc=1>.

==> SOLAR UPDATE

Tad "Pay no worship to the garish Sun <http://shakespeare.mit.edu/romeo_juliet/romeo_juliet.3.2.html>" Cook, K7RA, reports: A strong solar wind blasted us on Monday and Tuesday, causing the biggest geomagnetic storm since 2006. On those days, the mid-latitude A index was 28 and 22 and the planetary A index was 49 and 46. A search for similar numbers over the past few years yields nothing. In 2009, the highest planetary A index was 19 on August 30, and in 2008 it was 37 on October 11. This is indicative of how quiet space weather has become in the past few years. In 2007, the planetary A index reached 30 on April 1, and we have to go back to 2006 to find any geomagnetic activity as strong, when the planetary A index reached 63 and 104 on December 14-15. It seems counter-intuitive, but average daily sunspot numbers rose by 3.5 points this week to 32.4, while the average daily solar flux dropped more than 7 points to 77.8. NOAA and USAF predict solar flux at 76 for April 8-9, 75 on April 10-14 and a jump to 80 on April 15. The same forecast predicts planetary A index settling down to 15, 8, and 5 for April 8-10. For some reason, despite the high geomagnetic activity, no reports have come in from 6 meter operators about auroral propagation. Perhaps we will hear from them before Friday when this week's bulletin is released. Look for more information on the ARRL Web site on Friday, April 9. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" brought to you by William Shakespeare's Romeo and Juliet <http://shakespeare.mit.edu/romeo_juliet/romeo_juliet.3.2.html> (Act III, Scene 2).

==> ARRL PUBLICATIONS: NEW EDITIONS OF THE ARRL HAM RADIO LICENSE MANUAL, TECH Q&A NOW AVAILABLE

Discover all the excitement of Amateur Radio when you get your Technician license -- your ticket to the unique mix of fun, public service, technology and experimenting with electronics. The ARRL Ham Radio License Manual and ARRL's Tech Q&A will guide you as you get started in Amateur Radio, helping you select your equipment, set up your first station and make your first (of many!) contacts. These manuals -- designed for Technician exams given after July 1, 2010 -- contain all of the information you need to study for and pass the 35 exam questions derived from the new

Technician class (Element 2) question pool. The questions in the pool provide for the new Technician licensee to be able to establish his or her station and operate it legally, courteously and safely. The new Technician pool contains approximately 400 questions, from which 35 are selected for an Element 2 examination; the exam will contain graphics and diagrams. When you use The ARRL Ham Radio License Manual and the ARRL's Tech Q&A to study for your first license exam, you'll be on the air in no time! Every page presents information you will need to pass the exam and become an effective operator, such as radio and electronics fundamentals, operating station equipment, communicating with other hams, licensing regulations, operating regulations and radio safety. Read more here <http://www.arrl.org/news/stories/2010/04/05/11419/?nc=1>.

==> THIS WEEK ON THE RADIO

<http://www.youtube.com/watch?v=6LsUNXPtObs> This week, the Montana QSO Party is April 9-11. The Japan International DX Contest, the QCWA Spring QSO and the Georgia QSO Party are April 10-11. Next week, the TARA Skirmish Digital Prefix Contest, the Holyland DX Contest and the EU Spring Sprint are April 17. The Michigan QSO Party, the Ontario QSO Party and the YU DX Contest are April 17-18. The Run for the Bacon QRP Contest is April 19. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/special-events>.

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

Registration remains open through Sunday, April 25, 2010, for these online course sessions <http://www.arrl.org/courses-training> beginning on Friday, May 7, 2010: Amateur Radio Emergency Communications Level 1; Antenna Modeling; Radio Frequency Interference; Antenna Design and Construction; Propagation; Analog Electronics, and Digital Electronics. To learn more, visit the CEP Course Listing page <http://www.arrl.org/online-courses> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members may subscribe at no cost or unsubscribe by editing their Member

Amateur Radio Newsline(tm) Report 1704 - April 9 2010

Amateur Radio Newsline report number 1704 with a release date of
Friday, April 9th, 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. 911 service fails in Lincoln Nebraska and
its ham radio to the rescue. Also, Southern California hams prove
that they can mobilize for an earthquake, a Kentucky radio club wants
to recycle old TV towers for emergency communications use and National
Public Radio says that ham radio is alive and growing. Find out the
details on Amateur Radio Newsline(tm) report number 1704 coming your
way right now.

RESCUE RADIO: LINCOLN NE 911 OUTAGE BRINGS OUT HAM RADIO Y2K PLAN

Its was no April Fools joke on Thursday, April 1st. Thats when the
local telecommunications provider Windstream lost its interconnect
ability and phones literally went out in South-Eastern Nebraska. It
also brought out a cadre of well trained ham radio operators to fill in
until service could be restored. Joe Eisenberg, K0NEB, lives in
Lincoln and explains what failed:

--

KONEB: "At about 7:45 a.m. the main switch which controls the Windstream
Inter-Exchange switching in Lincoln, Nebraska, and 12 surrounding counties
failed, and then the redundant switch failed as well causing phone calls
that would go between exchanges to be disrupted as well as all 911 service
in the multi-county area to cease to exist. So we hams have been out on
location throughout the city of Lincoln and areas of Lancaster County
stationed at major intersections in case somebody needs to contact 911."

--

According to the Nebraska Department of Health and Human Services, 911
service was out for all or part of Butler, Seward, Saunders, Clay, Adams,
northern Gage, Jefferson, Cass, Saline, Richardson and Fillmore counties,
as well as Lancaster county. Responding to the emergency were 68 hams
belonging to the Lincoln Amateur Radio Club and Lincoln ARES. They were
activated throughout the day to become the emergency communications
replacement for the 911 service. It was a callout that Lancaster Country
Emergency Coordinator Reynolds Davis, K0GND, says that area hams had spent

over a decade preparing for. Preparations that began because of dire predictions News Years Eve 2000:

--
K0GND: "We implemented our Y2K plan which we put together in late 1999 in anticipation of all the doom and gloom people had worried about. Although it was not necessary that night, since then we have implemented it four different times for massive telephone outages."

--

While the predicted computer failures of Y2K never occurred, it did place Lincoln area hams in a unique position to respond to communications emergencies that have occurred over the past decade. So nobody was surprised when the general call for assistance went out this time. Again, Reynolds Davis, K0GND:

--

K0GND: "On Y2K night the newspaper had a map of the city printed on the front page, and at major intersections -- each one of these within a half miles of residents of the city -- that's how they were selected. And we (hams) became a phone booth with flashing lights and a sign on the car and so forth -- should an emergency call be needed after midnight on that night. I think that plan covered some 60 intersections within the city

"This time it was a scaled back call-up but none-the-less it was the same plan and we ended up with 26 major intersections last Thursday when this all occurred. And they were staffed essentially from 8 in the morning until about 11:30 p.m. when we finally secured"

--

What may surprise some is that this entire operation only entailed the use of one repeater on the two meter band. Davis credits the self discipline and emergency service training of the regions ham radio community for making this possible. He also notes that the training never stops:

--

K0GND: "We have nightly nets on the same repeater. There are ARES nets every night of the week. We do lots of drills and a tremendous amount of public service. Last year almost 5000 volunteer hours of public service by the club. And all of those things keep your discipline up and your ability to listen out: - which is a key to running a large net with a lot of people.

--

K0GND tells Newsline that thankfully the ham radio communicators only had to handle a small number of 911 incidents. The worst of these was a house fire that they were requested to report. Another dealt with a police officer involved in tracking down a missing child. And it took the better part of a day before 911 service was restored cross the affected area and the ham radio operators could stand down and go home. (ARNewsline(tm))

**

RESCUE RADIO: SOCAL HAMS ACTIVATE FOR MEXICALI QUAKE

Hams in Los Angeles County activated briefly after shock waves from the 7.2 magnitude earthquake in Baja California. Mexico, were felt at about 03:50 PM Pacific time on Easter Sunday. The Los Angeles Section ARES immediately activated it's emergency net with hams from all over the area checking in.

But there were no reports of commercial communications outages, utility outages or even any damage in and around the local area and soon attention was turned to the South. That's when the nets Spanish speaking operators were asked to monitor the High Frequency bands for possible traffic from the quake area.

Dr. Armondo Montalvo, KI6TAA, in the Los Angeles suburb of Woodland Hills was able to contact Franscisco Menses, XE2FMS, in the city of Mexicali, Mexico, along with mobile operators XE2DZZ and XE2BRL . Initial reports said that most stations in and around the quakes epicenter were without electric power. Also, the major highway between Mexicali and Tijuana, Mexico suffered severe thrust fault damage. This information was forwarded to the United States Geologic Survey for it to act on.

In all, some three dozen stations were involved at one time or another during the call-up, but no large scale ham radio relief effort was needed on either side of the United States and Mexico border. Never the less, area ham radio emergency planners say it was definitely a good test of the ability of the regions hams to respond at a moments notice. (LAX ARES)

**

RESCUE RADIO: KY CLUB WANTS TO RECYCLE OLD TOWERS FOR EMCOMM WORK

A group of Bowling Green, Kentucky area ham radio operators want to give new life to old residential TV towers by incorporating them into an emergency communications system. The Kentucky Colonels Amateur Radio Club and the Kentucky 4th District Amateur Radio Emergency Services are seeking donations of the TV towers, which have become increasingly obsolete as more households have turned to cable, satellite and digital TV providers.

In an article in the Bowling Green Daily News, Bill Schlicht, KJ4DGW of the Kentucky Colonels Amateur Radio Club said members will remove the towers for free, recondition them and install them at numerous locations in the 10-county Barren River Area Development District. This, to support emergency communications among ham radio operators, hospitals, county emergency management directors, American Red Cross chapters and other emergency workers.

Schlicht told the paper that club members are covered by liability insurance during performance of club activities, and removing the TV towers will not cost the homeowner anything. He says that his ham radio association wants to set up at least 16 towers, mainly at area hospitals where ham radio operators can communicate with emergency workers during a

large-scale disaster. There are about 400 amateur radio operators in Warren County and the Bowling Green area.

You can read the rest of this article at: http://bgdailynews.com/articles/2010/03/31/news/news6.txt (BG News, eHam.net)

RESCUE RADIO: UK CLUB GETS 5000 POUND PUBLIC SERVICE GRANT

Meantime, over in the United Kingdom, the Itchen Valley Amateur Radio Club has been awarded nearly 5000 British Pounds in Lottery funding. This, to assist with providing community based radio projects that will include supporting the Radio Amateur Emergency Network in providing communications coverage for disaster and emergency exercises as well as real time responses.

The grant will primarily be used to equip a portable radio station with a 25 foot trailer tower with antennas, and a portable generator system to enable the station to provide communications services without mains power or the normal mobile phone networks. This stand alone capability will allow the club to contribute to the telecommunications infrastructure supporting long-distance events that involve communications and control in isolated places.

In addition, part of the grant will provide funds for working with local youth organizations such as Scouts and Guides, as well as other public projects to broaden awareness of amateur radio. 5000 British Pounds is the equivalent of about $7600 United States dollars.

HAM HAPPENINGS: NPR SAYS HAM RADIO IS GROWING

National Public Radio says that ham radio is alive and well, and its even produced a segment of its All Things Considered program to prove it. Amateur Radio Newsline's Norm Seeley, KI7UP, has more:

--

Ham radio is far from the dying hobby that the nay sayers claim it to be. One that only a few years ago was being touted by techno blogs alongside 35 mm film and home videotape as technologies slated to quickly disappear.

Well, National Public Radio says that the bloggers were wrong because there are now nearly 700,000 U-S citizens who have ham radio licenses. NPR says that number is up by some 60 percent since 1981. And Says NPR, that number is growing.

The NPR story quotes Allen Weiner. He is an analyst at the technology research firm Gartner and Associates. Weiner says that while ham radio will never have the sex appeal of the iPhone, it does have a certain level of what he terms as nerd appeal.

Weiner also explains growth in our specialized communications interest in this way. He says that if it creates its own experience, that's really what's key here. Conversely, if it just emulates an experience that you can get online, it's not going to grow.

The report concludes by noting that even the most die-hard hams admit that amateur radio will never be a mainstream hobby. But says National Public Radio, people are still discovering the joy of communicating with the technology of amateur radio. A technology that has existed for nearly a century.

Still enjoying ham radio from Scottsdale Arizona, I'm Norm Seeley, KI7UP, reporting for the Amateur Radio Newsline.

--

You can hear the NPR story on ham radios growth at the URL found at http://www.npr.org/templates/story/story.php?storyId5586086 (Adapted from NPR web post)

**

RADIO LAW: EVEN WHEN ITS WRONG THE FCC IS RIGHT

Parties relying on informal discussions with commission staff do so at their own risk. At least that's the lesson that's been learned KRNW- FM which has been ordered to pay a $5,000 fine for what amounts a simple clerical error based on information a Commission representative gave to the broadcaster.

According to the trade publication Radio World, KRNW FM is located in Chillicothe, Missouri, and is licensed to Northwest Missouri State University. Its case started with the expiration of the license in early 2005, The FCC says that the station didn't file properly until two weeks later, and it didn't seek an STA to continue to operate or give a reason for the failure to file on time.

When the fine was handed down the college, which also owns KXCV FM, appealed. It argued that the fine was unfair because it did in fact try to renew properly. It said FCC staff had told the station manager to file both station renewals on the same form, and the manager did so.

Now, in upholding the fine the commission said that while allows for some stations to file on the same form, the manager should have filed, as she did in the past, a separate renewal application for the KRNW. It added

that Commission precedent has established that parties relying on informal discussions with FCC staff do so at their own risk. The commission may still enforce its rules despite the public's reliance on allegedly erroneous staff advice. (RW)

**

RADIO LW: FCC LOSES COURT BATTLE OVER NET NEUTRALITY

A federal court in Washington D.C. has handed the FCC a major defeat and at the same time has thrown the future of Internet regulations and United States broadband expansion plans into doubt. It happened on Tuesday, April 6th when the U.S. Court of Appeals for the District of Columbia ruled that the Commission lacks authority to require broadband providers to give equal treatment to all Internet traffic flowing over their networks. Amateur Radio Newsline's Frank Haas, KB4T, has the details:

--

The unanimous ruling by the three-judge panel marks a serious setback for the FCC which is trying to adopt official net neutrality regulations. FCC Chairman Julius Genachowski believes that such rules
are needed to prevent phone and cable companies from using their control over Internet access to favor some kinds of online content and services over others.

On the other side, the court decision was a big victory for Comcast Corporation. Comcast is the nation's largest cable company and it had challenged the FCC's authority to impose network neutrality obligations on broadband providers. This following a 2008 Commission finding that centered on Comcast's actions in 2007 when it interfered with an online file-sharing service called BitTorrent.

In its decision, the court essentially held that it was not for the FCC to determine which of Comcast's customers was entitled to better levels of service than another. Rather that this is a business decision that Comcast was free to make.

Public advocacy groups have already reacted negatively to the court decision. They contend that the ramifications of the ruling are much broader. That's because it undercuts the FCC's ability to prevent broadband providers from becoming gatekeepers for many kinds of online services. This could include Internet-based phone services and even software that runs in a Web browser.

The decision also has serious implications for the FCC's national broadband plan released by the FCC last month. The Commission needs undisputed authority to regulate broadband in order to pursue some its
key recommendations. In a statement following the release of the decision, the FCC said it remains committed to promoting an open Internet and to policies that will bring the enormous benefits of
broadband to all Americans.

At this point the FCC has several options. It can do nothing and let the ruling stand. That's highly unlikely.

It could ask Congress to give it explicit authority to regulate broadband, but that could take years. Or, it could appeal the matter to the United States Supreme Court which could also take years.

Or as some observers believe, the Commission might simply reclassify broadband as a more heavily controlled telecommunications service. One which could be subjected to both intensive scrutiny and heavy regulation.

For the Amateur Radio Newsline, I'm Frank Haas, KB4T, in Holly Hill, Florida.

--

We should know what direction the Commission will take in a matter of weeks. (Published news reports)

HOT OFF THE PRESS: NEW DX BOOK AVAILABLE BY W9KNI

'A Year of DX' is a new book by noted author Bob Locher, W9KNI that follows him as he makes an all out effort to win the 2008 running of CQ Magazine's DX Marathon. The Marathon is a year long operating event during which a contestant works as many countries and CQ zones as possible, any band or any mode.

While the book chronicles Bob's efforts in the pileups and through the lonely watches of the night, it also contains other discussions of what DX'ing is all about. These include the possibilities of DX'ing in low sun spot periods contributed by Jim Henderson, KF7E, a chapter on optimizing your SSB transmit audio by Hall of Famer Chip Margelli, K7JA, a discussion of what is the ideal linear amplifier, and much more.

Anyone who read and enjoyed Bob's 'Compete DX'er' is sure to find this book equally worthwhile. Its publication date is scheduled for May 1st. More information is on-line at www.idiompress.com/yearofdx.php (Via e-mail)

**

HAMVENTION HAPPENINGS: SPEAKERS LIST RELEASED FOR DX FORUM

The SouthWest Ohio DX Association has started to announced its line-up for the DX Forum at this year's Dayton Hamvention. Guest speakers include Tom Harrell, N4XP, of the K4M Midway Island 2009 DXpedition, George Wallner, AA7JV who operated TX3A from Chesterfield Reef and Paul Ewing, N6PSE of the YI9PSE operation from Iraq. Don Dubob, N6JRL, will be this year's forum moderator and at the close of the session the SouthWest Ohio DX Association will be raffling off a Yaesu FT-2000 transceiver. (SWODXA)

**

PROMOTING HAM RADIO: FREE ARRL WEBINAR ON PUBLICIZING FIELD DAY APRIL 22

Hams involved in planning their clubs Field Day activities are invited to take part in free 90 minute webinar on April 22nd. Hosted by the ARRL's Atlantic Division in cooperation with the League's Public Relations Committee, this session will focus on how to publicize your groups Field Day outing so as to gain maximum recognition for the hobby.

Among the topics to be covered will be how to set up a Field Day publicity calendar. How to get audio and video Public Service Announcements on local radio and TV stations. How to get proclamations issued and even how to use social networks like Facebook and Twitter to draw people to your Field Day event.

Also covered will be the correct way to invite elected officials and dignitaries to your Field Day site. Depending on whom you get to show up, this can bring with it good local, regional or even national press coverage. And according to Allen Pitts, W1AGP, who is the ARRL's Public Relations Manager, the guest list reads like a whose who in ham radio media relations:

--

W1AGP: "You have got Walt Palmer recently of ABC News - television; Diana Eng will be working with Facebook and Twitter; Bill Morine on print journalism will be talking on how to schedule and set up things; Kevin O'Dell who until recently made television commercials will be talking about how to make up your own Public Service Announcements and videos. And then of coarse you have got me."

--

And I'll be on that panel too talking about media relations with broadcast radio.

Again, the date for this on-line seminar is Thursday, April 22nd beginning at 9:00 PM Eastern Daylight Time. To pre-register take your web browser to https://www1.gotomeeting.com/register/932645064 (ARRL)

RESTRUCTURING: BAHARAIN IMPROVES ITS AMATEUR SERVICE

Licensing of the amateur service in the Kingdom of Bahrain has taken a major step forward. This, with the release of new amateur service rules by the nations telecommunications regulatory authority.

New additions for the Bahrain General Class licensees include 135.7 to 137.8kHz with a power limit of 10 watts. Also, regulators have extended the 160 meter band changing the upper limit to 2000 kHz. They have also expanded 40 meters up to 7200 kHz and added access to the 30 meter band as well. Above 30 MHz new additions include 6 meters from 50 to 52MHz and improved access to bands at 430MHz and above.

Also, Bahrain now has a new Intermediate Class license that permits operation at 28 MHz and above with power output to the antenna of 100 watts. Aeronautical Mobile, Maritime Mobile, Mobile and Portable operations are also permitted within the terms of the new license.

It should be noted that with the exception of the segment 50 to 50.5MHz, which is primary, all new allocations have been granted on a secondary basis. Permitted power to the antenna on all bands except 136 kHz is 1500 watts. (GB2RS)

**

WORLDBEAT: WORLD AMATEUR RADIO DAY APRIL 19

"Amateur Radio: combining communication experience with modern digital techniques" is the theme of this years World Amateur Radio Day. Scheduled for April 18th, World Amateur Radio Day is an international celebration of the hobby sponsored by the International Amateur Radio Union and its member societies representing over 150 countries.

Since 1925, the IARU has been instrumental in coordinating and representing amateur radio on global matters. It says that in today's world that it is radio amateurs who are finding ways to use frequencies at the fringes of the radio spectrum while developing marriages of radio and the internet, and experimenting with digital and satellite communications.

For information about World Amateur Radio Day and the International Amateur Radio Union please take your web browser to www dot IARU dot org. (IARU)

**

HAM RADIO IN SPACE: DARA TO MATCH DONATIONS TO AMSAT

The Dayton Amateur Radio Association says that it will match one-for-one any donations made to AMSAT-NA between now and June 30th of 2010. This, up to a maximum of $5,000.

The matching funds will be earmarked in support of the "Getting AMSAT Back into Space" campaign and help us raise the funds needed for the next satellite project which is a cubesat that will provide a 2 meter-70 Centimeter FM transponder that will match the ground performance of AO-51.

More on this matching fund is on line at www.amsat.org. (ANS)

**

HAM RADIO IN SPACE: AMSAT SPACE SYMPOSIUM IN CHICAGO IN OCTOBER

The 2010 AMSAT Space Symposium will be held in Chicago, Illinois from October 8th through the 10th. This years venue is the Elk Grove Holiday Inn near O'Hare Airport. Topics to be covered include presentations on operating techniques along with other sessions covering plans for the future of ham radio in space. For more information please visit www.amsat.org on the World Wide Web. (ANS)

**

ON THE AIR: MOONBOUNCE USING THE 1000 FOOT ARECIBO DISH

The Arecibo Observatory Amateur Radio Club will be putting the 1000-foot radio telescope on the air for 432 MHz E-M-E contacts from April 16th to the 18th. The callsign used will be KP4AO with a transmit frequency of 432.045 MHz and receiving between 432.050 to 432.060 MHz. KP4AO will transmit with 400 watts out but the giant dish will give the signal about 60 db of gain. Translated it means that KP4AO should be able to be heard with a small hand-held yagi pointed at the moon and a good receiver. A 15 db gain antenna and 100 watts will be enough to KP4AO on CW. More is on-line www.southgatearc.org/news/april2010/arecibo_432_moonbounce.htm (Southgate, K1JT)

**

ON THE AIR: CELEBRATING MEXICO'S INDEPENDENCE

On the air, word that the Mexican Federal Telecommunications has authorized the use of the special 4 B prefix for Mexican stations throughout the year 2010. The use of this prefix is to celebrate the bicentennial of Mexico's independence and the centennial of the Mexican Revolution. (OPDX)

**

ON THE AIR: CV7G CELEBRATES THE FOUNDING OF MODERN URUGUAY

And CX7ABK, will be using the special callsign CV7G between April 17th and the 19th. This operation celebrates the landing of 33 Orientales on Agraciada Beach in Uruguay. This was a militant revolutionary group led by Juan Antonio Lavalleja against the Empire of Brazil. Their actions culminated in the foundation of modern Uruguay. And in celebration of this event CV7G will be on 40 and 20 meter SSB. A special QSL card will be issued. You send your QSL via CX7ABK. (OPDX)

**

PROPAGATION: SOLAR WINDSTORM HITS EARTH

In propagation news, what's described as a sharp gust of solar wind hit Earth's magnetosphere on Monday, April 5th, at approximately 0800 UTC. It also sparked the strongest geomagnetic storm of the year.

According to Spaceweather dot com, the event registered 7 on the 0-to-9 K index scale of magnetic disturbances. Although the storm was subsiding by

Wednesday morning, April 7th, it was not over and high-latitude sky watchers were told to remain alert for the possibility of aurora propagation. (Spaceweather)

**

DX

In DX, PG5M, has made available his story called the 'Pacific 2009 Ultra Light Solo DXpedition' in PDF format on the World Wide Web. Its 12 pages long and goes into detail about his activities and netting 13000 QSOs from Fiji, Tuvalu and Tarawa. You can downloaded it at www.dx.to

On the bands, word that S53A is now active from Zanzibar as 5-eye-one-S. This is his first holiday style trip with some radio operation as when time permits. He has been reported on 20. 15 and 10 meters mostly on CW. QSL via S53A, direct or via the bureau.

JI5RPT, will be active as JD1BLY from Chichijima Island between May 2nd and the 7th. His operation will be on 40 through 6 meters using CW, SSB, Digital and the Satellites. QSL via his home callsign JI5RPT.

Lastly, , EA8AY, will be active from the Canary Islands as EF8E. This during the CQWW
WPX CW Contest on May 29th and 30th. QSL via EA8AY.

(Above from various DX news sources)

**

THAT FINAL ITEM: ITS SPRING ARDF TIME

And finally this week, as the weather warms, it's time to start planning for outdoor radio fun this summer. Opportunities to win medals by finding hidden transmitters are coming, as Newsline's Joe Moell, K0OV, explains.

--

More and more hams every year are discovering the fun of tracking hidden radio transmitters in their cars or on foot. The on-foot variety of foxhunting has become an international sport, with names such as foxtailing, radio-orienteering and ARDF. USA is one of about 30 countries with an active ARDF program, including national championships and participation in the World Championships every two years.

To see the USA's best on-foot foxhunters in action, to learn from them, and to try it for yourself, make plans to come to Ohio this spring. The Tenth USA ARDF Championships will get under way on Friday, May 21. It's a three-day weekend of practice sessions, a big two-meter hunt, and another hunt on 80 meters. It's open to anyone at any foxhunting skill level, with or without a ham license. If you're a senior, don't worry about trying to compete against teenagers. Equal medals will be awarded in six separate age categories for OM's from under 18 to over 70. Five similar age categories divide up the YLs. To be even better prepared, attend the optional two-day

intensive training camp just before the championships.

What could you win? Possibly a medal and a place on our country's team going to the ARDF World Championships in Croatia this coming September. USA can only field a maximum of three people in each age and gender category, so our national championships determine who will go.

Will this be the year that you win a radio-orienteering medal? The registration deadline is coming soon. So for everything you need to know about the USA Championships, including schedules, registration forms and equipment ideas, point your Web browser to www.homingin.com. That's HomingIn, as one word, homingin.com. You can also learn about the World Championships in Croatia and the annual CQ Worldwide Foxhunting Weekend.

From southern California, this is Joe Moell Kay-Zero-Oscar-Victor for Amateur Radio Newsline.

--

Every year interest in Amateur Radio Direction Finding grows. Who knows. One of these days it could become popular enough that the ham radio community might petition for it to become an Olympic medal level sport. (K0OV)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

Before we go, a reminder that the nominating period for the 2010 Amateur Radio Newsline Young Ham of the Year Award is now open. Each year, we here at the Amateur Radio Newsline in association with Vertex Standard Corporation -- the makers of Yaesu brand ham radio gear -- and CQ Magazine combine to honor a ham radio operator age 18 or younger for his or her contributions to ham radio or to society itself through ham radio.

All nominations and materials required by the official rules must be received by Amateur Radio Newsline no later than midnight on May 30th. Both "mail-in" and electronic submissions are being accepted this year. Full rules and a downloadable nominating form are now on our website at www.arnewsline.org. Just scroll down until you see "2010 Young Ham of the Year Awards Now Being Accepted" and click on the word "here" to download the directions and the form. You can also leave questions and comments on the official Young Ham of the Year Award page on Facebook dot com.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Don Carlson, KQ6FM, saying 73 from Reno, Nevada, and we thank you for listening.

WIANEWS FOR WEEK COMMENCING APR 11 2010.

ALL UP AND COMING IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE OF
AUSTRALIA FOR WEEK COMMENCING APR 11 2010

NEXT WEEKEND IS DEEMED WORLD AMATEUR RADIO DAY

World Amateur Radio Day will be celebrated on Sunday 18 April 2010, the theme for
2010 is "Amateur Radio: Combining communication experience with modern digital
techniques." This Sunday can be a great opportunity for radio clubs to
demonstrate amateur radio to the public at a shopping centre or mall.

(SARL)

weekend after is ANZAC Day and that's when Amateur radio salutes the
servicemen and women in the many conflicts.

CW - Morse code - was used as a means of communication during
WW2, Korea, Malaysia and even early Vietnam.

Museum ships, including the HMAS Whyalla, will be utilised to
honour this event.

Whyalla Amateur Radio Club together with the Whyalla Maritime
Museum invite you to attend the HMAS Whyalla on ANZAC Day
from 12.30 pm (0300 UTC/GMT) to witness and share in the
experience of Morse Code communication.

For further information please contact either :
Whyalla Visitor Centre & Maritime Museum
Freecall 1800 088 589

WIA CENTENARY

Announcing a QRP contest for the Centenary

The VK QRP Club is sponsoring a new commemorative contest that should have
very wide appeal and be a lot of fun too.

The WIA Centenary QRP Contest is open to all radio amateurs whether they
be Foundation, Standard or Advance licensees with the aim of encouraging
interest in the use of low level transmit power.

For the entire UTC month of May the contest will be on the 80m and 40m bands
using either CW, AM or SSB.

It?s hoped that a lot of stations will be calling ?CQ WIA Centenary QRP Contest?.

The rules will be published in the April edition of Amateur Radio magazine
and on the WIA website.

(AUDIO ON SITE ROBERT)

Publicity support for all clubs

The 21 clubs rostered to use the special callsign VK100WIA in June and July
have received a comprehensive package of material to help them promote
amateur radio, their club and the WIA Centenary.

The material is ideal for any club that wants to promote an event or activity
and gain positive media publicity for amateur radio.

While clubs on the VK100WIA roster will automatically receive this material
eight weeks prior to their three-day rostered slot, any other WIA affiliated
club can request a copy from the WIA National Office.

In a covering letter the WIA President Michael Owen VK3KI explains that the
resources being provided include media liaison advice, a template media
release, background sheets and guides.

Clubs using this package will easily be able to create a 'Media Kit' to send
to their local news media.

Michael VK3KI said a number of clubs had asked him and other WIA directors at hamfests and meetings for this kind of support. We now look forward to seeing the results of club media campaigns.

Digital Amateur TV repeater with stereo sound

The latest on the VK3RTV repeater on Mt Dandenong which services the Melbourne and Geelong areas is that stereo sound is now available for both its digital and analogue inputs.

Peter Cossins VK3BFG advises that for analogue the sub-carrier frequencies at 6 and 6.5 MHz, and operators need to activate it by DTMF code Star Zero Three Hash (* 0 3 #).

About seven stations transmitting digital DVB-S uplink also have the capability to transmit stereo sound.

New 23 cm antenna arrays are yet to be completed and the system is currently running VK3RTV-1 on a temporary antenna.

Peter VK3BFG also advises that experiments are being made with Internet streaming via the British Amateur TV Club.

The VK3RTV repeater digitisation has been primarily funded by Amateur Radio Victoria with $1,000 also provided by the WIA Club Grants Program.

(Peter Cossins VK3BFG)

Chris Chapman VK3QB reminds all Gippsland Gate Radio & Electronics Club's 2010 Hamfest is 17 July 2010.

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

Congratulations to Hayden VK7HAY for being awarded the Best Electronics Project (North) and Jarrod VK7RJ for Best Soldering Project (North) as apprentices with the Tasmanian Skills Institute.

It's great to see our young amateurs getting a good grounding in the electronics trade.

Keep up the great work!

(VK7NEWS)

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

Bahrain

Licensing of the amateur services in the Kingdom of Bahrain has taken a major step forward with the release of new regulations by the Telecommunications Regulatory Authority.

New additions for General Class licensees include 135.7-137.8kHz with a power limit of 10W, an extension of the 160m band changing the upper limit of 1,850kHz to 2,000kHz, the inclusion of the 40m band extension up to 7,200kHz plus the 30m band. Above 30MHz new additions include 50-52MHz and improved access to bands at 430MHz and above.

With the exception of the segment 50-50.5MHz, which is Primary, all new allocations have been granted on a secondary basis. Permitted power to the antenna on all bands except 136kHz is 1500W.

A new Intermediate Class licence has also been introduced that permits operation at 28MHz and above with power output to the antenna of 100W. Aeronautical Mobile, Maritime Mobile, Mobile and Portable

operations are also permitted within the terms of the new licence. The IARU say that congratulations should be offered to those who negotiated these new regulations. Negotiations continue for the use of other bands in use within Region 1.

And Digital v Analogue TV is "in the news".

US Amateur Radio operators want old residential TV towers.

Bowling Green area ham radio operators want to give new life to residential TV towers by incorporating them into an emergency communications system.

The Kentucky Colonels Amateur Radio Club (who have come up with this 'finger lickin good' idea along with the Kentucky 4th District Amateur Radio Emergency Services are seeking donations of the TV towers, which have become increasingly obsolete as more households have turned to cable, satellite and digital TV providers.

Bill Schlicht of the KCARC said members will remove the towers for free, recondition them and install them at numerous locations in the 10-county Barren River Area Development District to support emergency communications among ham radio operators, hospitals, county emergency management directors, American Red Cross chapters and other emergency workers.

Now, "seirously' is the Ten Tower up for grabs here? or would the Nine one "still be the one".

****

WEIRD AND WONDERFUL

NEW MORE ISLAND IS NO MORE ISLAND

If you are thinking of sponsoring a DXpedition to New Moore Island in the Sunderbans you might as well forget it. This is because the disputed island in Bay of Bengal has disappeared into sea.

For nearly 30 years Bangladesh and India have argued over ownership of a tiny rock island in the Bay of Bengal. Now Mother Nature has resolved the dispute for them. Due to rising sea levels, as of March 24th the island's gone.

According to news reports, its disappearance below the waves has been confirmed by satellite imagery and sea patrols and one might now say that New Moore Island is, no more.

WIA Centenary QRP contest

The VK QRP club is sponsoring a low power contest during May to commemorate the Centenary of organised amateur radio in Australia.

All three grades of Australian licence can join this one, provided they limit their output power to five-watts CW and 10 Watts for AM and SSB.

The contest will be on the 40m and 80m bands. Operate each evening in May between 1000 to 1300 UTC and then submit an entry for your best 20 days.

More details and the contest rules can be found on the WIA website.

Winter VHF-UHF Field Day

John Martin VK3KM WIA Contests Manager lets the vk7news guys know last week that the rules for the Winter Field Day, which is held on the 19 and 20 June, are now available and can be found on Australia's only official contest pages when you click the link that just WON'T go away, wia.org.au

Via the 7 news team we learn there HAS been a major rule change: the introduction of a separate section for rover stations.

This new section will allow portable and rover stations to compete against other stations that have similar scoring potential. The rover section will apply to all stations that operate from more than two grids, or change location more than twice.

This allows stations in the regular Portable sections to change location once, and return to the original grid square, without being required to enter the Rover section.

2010 International Museums Weekends

The 2010 International Museums Weekend special event will again be a double-weekend and will take place on 19th and 20th June plus 26th and 27th June.

Radio amateurs are encouraged to participate in this event by setting up stations in their local museums. Harry, M1BYT, who is organising the event, asks that all those intending to take part should register their museum via e-mail to harry.m1byt@tiscali.co.uk

Full details of the event can be found on the International Museums Weekend website at www.ukradioamateur.co.uk/imw

(rsgb)

All shapes and sizes

We have the very tall, some are broad while others stout. Most are white, some black, blue or even red in colour.

Looking at them in wonder takes you back in time. Many will blink back at you?

What am I? Uuuummmmm?

With all those clues clearly the answer is a 'lighthouse', and this a reminder that the International Lighthouse and Lightship Weekend run by Scotland's Ayr Radio Group GM0AYR is only four months away on the 21st and 22nd of August.

So far 135 registrations from 23 countries have been received from radio clubs and individual radio amateurs for this popular and friendly on air weekend.

An interesting trend in VK this year is the number of lighthouses that will be put on air for the very first time.

These include VK4DMC Archer Point Lighthouse, VK5PBZ Port Germein, VK6FLAM Guilderton and VK7ZM Rocky Cape Lighthouse.

Each lighthouse has an interesting history.

For example the Guilderton Lighthouse in Western Australia is one of our youngest, a red brick structure built in 1983 at the place where guilder coins were found from a Dutch ship Vergulde Draeck (Guilded Dragon).

The sailing ship came to grief in 1656.

To see where Australian lighthouses are located you can download a Google Earth file - the URL can be found on the text edition of this broadcast (http://illw.net/australia_lights.kmz) or from the website illw.net

The International Lighthouse and Lightship Weekend, 21st and 22nd of August will again be a lot of fun.

THE QNEWS WORK BENCH - the nuts and volts report -
(Measure twice - Cut once!)

NEW FORMAT OF HARD DRIVE STORAGE COMING IN 2011

Hard drives are about to undergo one of the biggest format shifts in 30

years. Amateur Radio Newslines Norm Seeley, KI7UP, in a recent report said that By early 2011 all magnetic hard drives will use an advanced format that

changes how they go about saving the data people store on them. The move to the advanced format will make it easier for hard drive makers to produce bigger drives that use less power and are more reliable. However, it might also mean problems for Windows XP users who swap an old drive for one using the changed format.

According to Science On-Line, since the days of the original DOS operating system, the space on a hard drive has been formatted into blocks 512 bytes in size based on the floppy disks of that era. Each 512 byte sector has a marker showing where it begins and an area dedicated to storing error correction codes. In addition a tiny gap has to be left between each sector.

While 512 bytes made sense hard drives were only a few megabytes in size, its of less significance when drives can hold a terabyte or more of data. As a result, in large drives this wasted space where data cannot be stored can take up a significant proportion of the drive.

Drive makers say that moving to an advanced format of 4 kilobyte sectors means about eight times less wasted space. This will allow drives to devote twice as much space per block to error correction technology.

Through the International Disk Drive Equipment and Materials Association all hard drive makers have committed to adopting the 4 Kilobyte advanced format by the end of January 2011.

Operating Amateur Radio while skydiving is an aspect of the hobby that has been attracting interest as a YouTube video shows.

The YouTube description reads:

Skydive Monterey Bay at Marina Airport in Marina, CA. These are "parachute mobile" jumps which skydivers are amateur radio (ham) operators that make radio contacts while under canopy (this is impractical in freefall, at 120 mph airspeed noise is extremely loud and duration of jump is too short for numerous contacts*).

These jumps are hop and pops at exit altitude to provide maximum canopy hang time to make radio calls.

Watch Parachute Mobile at Skydive Monterey Bay Marina Airport just search out youtube.com

ARRL and Red Cross Sign Memorandum of Understanding

ARRL President Kay Craigie, N3KN, HAS signed a new Memorandum of Understanding (MoU)
with the American Red Cross, the MoU, which replaces an earlier Statement of Understanding that expired in 2007, provides a "broad framework for cooperation" between the ARRL and the ARC "in preparing for and responding to disaster relief situations at all levels in rendering assistance and service to victims of disaster,
as well as other services for which cooperation may be mutually beneficial."

When one Sunday recently John Oakberg, NK4N, of Tennessee, went hiking in the Great Smoky Mountains National Park he was about 1 mile up from Alum Cave Bluff, and came across Judy Potter, 57, of Atlanta who had broken her ankle while on the trail.

Oakberg reached for his cell phone to call 911, but there was no coverage available.

He then reached for his handheld transceiver and put out a call to any Amateur Radio
operators who may be listening via some nearby VHF 2 meter repeaters, back they came
and AGAIN Ham Radio saved the day! Congrats John.

(arrl)

GAREC-2010 date and venue announced

The Global Amateur Radio Emergency Communications Conference, GAREC, will be held in Curacao, Netherland Antilles on the 11th and 12th October.

The annual conference for those engaged in providing emergency communications will this year be organised by the Dutch Amateur Radio Emergency Service (DARES) and the IARU radio society VERONA (Vereniging voor Experimenteel Radio Onderzoek in de Nederlandse Antillen).

The conference theme this year is "Learning through practicing". The program is yet to be finalised however the organisers are keen to include first-hand accounts of emergency communications following the devastating Haiti and Chile earthquakes.

The purpose of GAREC is to exchange information and experiences between all radio amateurs and groups interested in emergency communications.

Presentations to previous conferences can be found at www.garec.net

(Jim Linton VK3PC)

REWIND - A LOOK BACK IN HISTORY

Rewind a look back at our history through the serialised written history by WIA Centenary Committee member Peter Wolfenden VK3RV with assistance of others, that is being published in the WIA journal Amateur Radio magazine.

Struggle to get back on the air

With the moves to re-start experimental wireless after World War I, as reported by Sea, Land and Air magazine in September 1919, a national effort was being made to represent all experimenters and private users of wireless apparatus.

Prior to the Navy issuing receiving licences in November 1919, many experimenters quietly re-built their stations and commenced tuning into the ether again

The Wireless Institute of Victoria contacted other states requesting they appoint proxies to represent them on a possible Federal Council, which would approach authorities to re-issue transmitting licences.

However progress did not occur overnight. Most war-time restrictions were not removed by the Government in late 1920 and the Postmaster General

regained control of operator examinations.

But transmitting licences were not generally made available until late 1922.

The new Controller of Wireless was Jim Malone, generally sympathetic to experimenters and he issued a number of special transmitting licences, ahead of time.

One was for the Wireless Institute of Victoria from May 1921 that granted permission to transmit nightly. Another for the South Australian Institute enabling it to operate from September of that year. There were a few others.

The authority wanted one experimenter or amateur voice to deal with, and the WIA provided that representation.

no audio from BARC..

"from Brisbane Amateur Radio Club

Could you please add to Q news that the Brisbane Amateur Radio Club will
be holding their annual "Barcfest" on Saturday 8th May 2010.
It will be at the Mt Gravatt show grounds commencing at 9,30am
Les Parker VK4SO barcfest organiser"

Redcliffe and District Radio Club
www.redclifferadioclub.org.au/

Lets see if we get the daily double THIS TIME! From Redcliffe YES Script AND Audio

I'm Ray VK4CF back with news from the Redcliffe AR Club.

At last Monday night's meeting, Padre John, VK4BZ, arrived back for the Easter
weekend from Townsville. John is an Australia Army padre now based in Townsville
and was talking to the army signals people who were very impressed with his 7 metre
squid pole that he has for his portable station. He said that the signals unit will
be trailing its use as a temporary mast on their next field exercise.

John will advise us of how it performed the next few weeks.

Talking about squid poles, David, VK4PDR, brought his 10 metre squid pole and set up
his portable rig including his Icom 730, manual tuner and vertical antenna. He was
able to work the Pacific region on 40 metres last Sunday night working into the US,
Canada, and other Pacific rim countries. David's squid pole was held into the ground
with plastic water pipe and attached to 6 ground radials and worked a treat with
about 10 to 15 minutes to set the station up.

Club President David, VK4DC, brought his completed K2, down the club as well. He
finally finished the radio with about 3 initial mistakes. His advice to potential

kit builders is read the instructions, then read them again and do exactly as they say.

David now has a beautiful rig with his auto tuner with the satisfaction that he built it himself. Well Done to both Davids.

Peter, VK4EA, will be leading a group of club members to the Redcliffe repeater site this Sunday afternoon to replace the 70 cm repeater and diplexer with new ones bought with one of the grants received by the club. This should improve the quality of the 70 cm signal from the repeater.

Ken, VK4FKEN, wanted me to remind you that the Redcliffe club conducts a game of Trivia each Wednesday night using the club's 70 cm repeater. The game starts at 7.30 and concludes about an hour later just in time for the Spicks and Specks fans. Numbers have decreased slightly and there is a need for some fresh contestants to beat the current champions. So come and join us each Wednesday night at 7.30 pm.

Next Monday night is a club meeting night with the meeting starting just before 8 pm at the club rooms at Kippa Ring. Charlie VK4YZ will have the final tallies for the John Moyle competition. Initial results have revealed that the number of contacts on all bands were better than last year's results.

So until next week, for Redcliffe club I'm Ray VK4CF and you are listening to QNEWS from VK4WIA.

GB2RS NEWS

Sunday 11th April 2010

The news headlines

* RSGB AGM in Bedford next weekend

* QRP talk to be streamed live

* WSPR beacon goes on air

The RSGB AGM will take place on Saturday 17 April at the Swan Hotel, The Embankment, Bedford MK40 1RW. The whole day is geared to bringing the RSGB to you and is an ideal opportunity for local clubs to socialise and meet with each other and meet with senior RSGB officers. VHF and UHF awards will be presented at 10am and Registration for the AGM begins at 11am. Formal AGM proceedings start at 12 noon. Talk-in will be by GB2AGM on S22 simplex plus Bedford repeaters GB3BF and GB3BL. If you can't attend the AGM in person, you can still see what is going on. The British Amateur Television Club will be streaming video and audio of the proceedings live via the internet. Anyone with a broadband connection can go to www.batc.tv and click on Live Events to watch the stream. It's completely free.

Today, 11 April, the British Amateur Television Club will webcast the Lough Erne Amateur Radio Club Rally, which includes a QRP talk by George Dobbs, G3RJV. The Rally webcast will start about 11.30am. The talk will be about 2pm and will last about an hour including discussion. George's talk is entitled QRP - Why and How. To watch this BATC webcast go to www.batc.org.uk.

The second WSPR beacon in Africa, 5X7JD, has gone into service. The beacon is hosted by Jack, 5X7JD who is located in Masaka, Uganda. The system has 1W output and cycles through 80, 40, 30, 20, 17, 15, 12 and 10m, so you can hear the WSPR signal returning every 16 minutes. The antenna is a HyGain Av 18VS multi-band vertical. The beacon hardware is an embedded system based on a PIC 18F2455 MCU, an Analog AD9851 DDS chip and a MOSFET PA with selectable filters. Time and location information are derived from an attached GPS receiver. You can read more about the station at www.hamradiosafari.com.

2010 marks the 70th anniversary of the development of the high-power cavity magnetron, a crucial technology for radar in World War 2. CAVMAG 2010 is a two-day conference sponsored by the IET, DEHS and the IEEE in the Allsebrook Lecture Theatre at the University of Bournemouth on 19

and 20 April. The registration fee includes lunches and tea/coffee breaks. There will be a pre-event visit to the Royal Signals Museum, Blandford on Sunday 18 April and a conference dinner on 19 April. Visit www.cavmag2010.org.uk.

The Bath Radio Classes will have a number of candidates sitting the Advanced Radio Communications Examination on 17 June. If any external candidates would like to sit alongside the Bath group they should contact Steve Hartley, G0FUW before 29 April. Potential candidates are reminded that they must have passed the Intermediate examination before sitting the Advanced. Steve can be contacted on 01225 464394 evenings 7 to 9pm or by e-mail to G0FUW@tiscali.co.uk.

The 23rd International Marconi Day will take place on 24 April. Although not a contest, awards can be obtained and full details will be found at www.gb4imd.org.uk. For a station to be counted towards an award by applicants, that station must be registered prior to the event by e-mail to webmaster@gb4imd.org.uk with full details of the station. In order to qualify as an Award Station, operations should take place from a site which either used Marconi equipment prior to his death in 1937 or from which Marconi carried out experiments during the same period.

The Mid Ulster Amateur radio Club will be running a Foundation course over a weekend in April. The registration for the course is on Wednesday 21 April at 7pm in the Place Initiative, Ardress Park, Portadown BT62 3TP. With limited places, attendance at the registration is essential. More details can be obtained by contacting Martin, MI0YMF on 02838 348451.

GB3RB, the Bolsover Repeater, will be 6 years old very soon. The repeater became active in April 2004 and since then has provided a useful service to amateurs and listeners in the area. The repeater keeper is Richard, G1SLE. To acknowledge GB3RB's six years of service, the members of Bolsover Amateur Radio Society will be holding their Sunday night net on the repeater from 8pm on 18 April. All amateurs are welcome to call in. The repeater information is 434.800MHz In, 433.200MHz out, CTCSS 71.9Hz. For a technical guide to the repeater, head over to www.g1sle.com.

And now for the details of rallies and events for the coming week

The Cambridgeshire Repeater Group Annual Rally will be held today, 11 April, at Foxton Village Hall, Hardman Road, Foxton, Cambridge CB22 6RN. There will be trade stands, a Bring & Buy as well as lectures. Entry is available from 10am and will cost £2. Contact Laurence, M0LCM, 01223 654880.

Today, 11 April, the Lough Erne Amateur Radio Club Annual Rally will be held at The Share Holiday Village, Lisnaskea, Co. Fermanagh BT92 0EQ, Northern Ireland. Access is also available from Erne - Shannon Waterway. Doors open at 12 noon and there will be the usual trade

stands and Bring & Buy. Details from Iain on 028 66326693.

Today, 11 April, is the country's largest one day rally, the NARSA rally in Blackpool. Alongside the rally, GB2NOR will be on the air on HF from the Norbreck Castle Hotel, just north of the North Pier at Blackpool. Join them on air if you cannot manage to visit the rally. The stand will be operated by a dedicated RAFARS RSARS team supported by the ATC. QSL via RAFARS 609 or RSGB Bureau.

On Sunday 18 April, the West London Radio & Electronics Show will take place at Kempton Park Racecourse, Staines Road East, Sunbury on Thames, Middlesex TW16 5AQ. Talk in is available and there's free car parking. The doors open at 9.50 for disabled guests and 10am for other visitors. There will be the usual trade stands, Bring & Buy, special interest groups as well as lectures. Details from Paul, M0CJX, on 0845 165 0351. Now for the news of special events

As part of the Women on the Air 2010 activities, Anneke, PB7XYL, will activate the special callsign PB88XYL until 30 April. QSL via bureau or direct. For more information visit http://wotaclub2010.blogspot.com.

GB0BMT will be on the air on 17 April between 10am and 3pm from the Birkenhead Masonic Temple as part of their open day.

GB2AGM will be on the air from the RSGB AGM in Bedford on 17 April.

GB0GAF will be on the air from Warwickshire for the Great Alne Festival on 20 April.

GB4MBP and GB0MD will be on the air on 22 April as part of the International Marconi Day activities. The first will be on the air from the Lizard in Cornwall and the second station from Kent.

And now the HF DX news compiled from 425 DX News and other sources.

F4EGZ is active portable from Reunion Island. He will be there until 19 April operating on 20 through to 6 meters. He will accept 6m skeds via e-mail at f4egz@yahoo.fr. Please QSL via his home callsign.

Phil, F4EGS will be active once again from Chad for two months starting on 10 April. The callsign is not known at this moment but may be TT8PK, which he used in the past. Activity will be in his spare time from 40 through to 10m using SSB, CW and a little RTTY. QSL via F4EGS, direct or via the bureau.

SP2JMB will operate CW as either 3B8/SP2JMB or 3B8SC from Mauritius Island, which is IOTA reference AF-049, until 23 April. He will be joined by 3B8/SP2FUD, who will be operating SSB and RTTY.

Now the contest news

On 13 April, the 432MHz UK Activity Contest & Club Championship takes place between 1900 and 2130UTC. Using all modes, the exchange is signal report, serial number and location.

14 April sees the next leg of the 80m Club Championships take place between 1900 and 2030UTC. Using SSB, the exchange is signal report and serial number.

The EU Spring Sprint takes place on 17 April on the 3.5 to 14MHz bands between 1600 and 2000UTC. Using SSB, the exchange is both callsigns, serial number and name.

The UHF UK Activity Contest & Club Championship takes place between 1900 and 2130UTC on 20 April. Using all modes on the 1.3 and 2.3GHz bands, the exchange is signal report, serial number and locator.

The OK1WC Memorial Contest will take place on 24 April from 0400 to 0700 on the 160, 80 and 40m bands. No logs are required and the results are sent via the internet. For more information go to www.hamradio.cz/ok1wc/ where the rules are available. Now the solar factual data for the period from the 29thd of March to the 4th of April, compiled by Neil Clarke, G0CAS on the 5th of April.

The solar disc had spots visible every day. Up until the end of March there as only been six spotless days, comparing that for the same period last year there was 76. Solar activity remained at very low levels. However, a long duration B7 solar flare occurred on the 3rd and produced a coronal mass ejection that appeared to be Earth directed. Solar flux levels declined slightly from 83 units on the 29th to 76 by the 2nd. The average was 80 units. The 90 day solar flux average on the 4th was the same level as last week at 83 units. X-ray flux units varied little day to day and averaged A3.5. Geomagnetic activity started at quiet levels but on the 1st, 2nd and the 4th increased to slightly unsettled. The Ap index on the 4th was 13 units. The average was Ap 8 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase from 350 kilometres per second to 560 by the 3rd. Particle densities were mostly low but increased briefly to around 20 particles per cubic centimetre on the 29th to the 31st. Bz varied no more than plus and minus 8 nanoTeslas during the period.

Now the latest news on the Solar Dynamics Observatory. During the past week all nine doors were open and the CCDs are cold. For the next several weeks SDO scientists and engineers will work to check out and calibrate the instruments and to coordinate the spacecraft and instruments. SDO needs to point at the Sun very accurately while taking an image every of a second, which means rotating shutters and filters, rotating the high-gain antennas to keep them pointed towards New Mexico, and rotating the entire observatory once per orbit to keep it pointed at the Sun. Initial results will be released world-wide in mid- April.

And finally the solar forecast. This week solar activity is expected to be at very low to low. If the present state of the Sun continues then spots are expected to be visible most days. Solar flux levels should be in the 80's for most of the week. Geomagnetic activity should be quiet everyday. MUFs during daylight hours at equal latitudes are expected to be about 23MHz for the south and 20MHz for the north. Darkness hour

lows should be around 10MHz. Paths this week to the east coast of North America should have a maximum usable frequency with a 50 per cent success rate of about 20MHz. The optimum working frequency with a 90 per cent success rate will be around 16MHz. The best time to try this path will be between 1500 and 2000 hours.

And that's all for this week from the propagation team.

!!! 144 MHz MOST WANTED SURVEY - PLEASE UPDATE NOW !!!

As always since the early 90ï¿½s, we want to remind you to be PLEASE
so kind and update YOUR MOST WANTED SQUARES / DXCC for the 144 MHz
segment - SURVEY will run during the next 2 weeks! PLEASE DO UPDATE
FOLLOWING LISTS: e M W S - List - http://www.mmmonvhf.de/emws.php
e M W D X C C - List - http://www.mmmonvhf.de/dxcc.php
We will spread around the results at the weekend 24th/25th of April
2010, early enough to plan trips for the summer MS showers.
Happy Easter Time - Guy, DL8EBW, on behalf of the Team of MMMonVHF

** NEWS ABOUT ROS (3.3.0 beta) By Jose Alberto Nieto Ros **
http://rosmodem.wordpress.com/2010/04/06/ros-3-2-1-beta/#comments

ROS is a software with two new digital modes: ROS HF (for HF) and
EME (for EME). ROS HF is a baseband system into a standard channel
of HF (less than 3 khz), aplied to MIC input. ROS EME is another
baseband system, in this case a FSK of 16 tones at 1 baud with a
shift between tones of 4 Hz. In a few days (or perhaps today) will
appear a Complete Guide... SOURCE: Jose Alberto Nieto Ros 8 April

Lets test the new BETA version via Moon!! Next Sunday April 11,
Japanese Hams are going to do a EME test with ROS EME on 23cm and
as well 2m! (DETAILS: http://rosmodem.wordpress.com/) BE CAREFULL
THESE SPREADED 2m QRGS ARE INSIDE EUROPEAN BEACON SEGMENT - PLEASE
NOT TX THERE!!! (ed. 8EBW). The first ever 2m ROS QSO done at Febr.
21st, 2010. Spiros, SV8CS and Guido, DL8EBW did make the 1st qso
with the new ROS mode by Jose - details http://sv8cs.blogspot.com/

** Sunspot 1061 (Tuesday 6th / 8th april 2010) **

Geomagnetic Storm coming to end -The first true geomagnetic storm of Cycle 24 which was caused by an incoming CME and Solar Wind + Southward Bz combo is finally starting to taper off. Minor to Severe storming reaching the G3 level (K-Index=7) took place over the past few days. Many aurora contacts were made on VHF, both in northern Europe and northern parts of North America. The timing of the initial impact was very early in the morning Monday in North America, and because of this the Aurora conditions were not as strong as they could have been. It was a nice treat however.

Sunspot Update - The face of the sun is nearly blank as only Sun-spot 1061 remains. Solar activity should remain at very low levels Region 1060 which is now a plage, did produce a small CME on Thur.

** Hans, DJ0VZ, Silent Key **

Dear Friends, we did get the sad news that our good friend Hans, DJ0VZ, did leave us at easter saturday. Hans was one of the fighters for all kind of DARC & DIG club evolution and as well a famous HF and VHF/UHF contester. As well he was one of the pioneer of the VHF-DX-Group DL-West in the early 80s and fight for the 144 MHz segment and the beacon scene... The Team of MMMonVHF will pass our deep sympathy and condolences to his family. R I P

HS0ZIL - the new 144 MHz Activity from HS0ZIL in OK16BQ ongoing... Karsten did setup a MMMonVHF DXBlog to spread his latest News: http://www.mmmonvhf.de/showblog.php?ca=HS0ZIL - LATEST NEWS from Karsten, DL2LAH, dated 2010-04-09: Last bigger activity was end of march - Karsten did work several stations (see his DXBlog). As well Condx was sometimes very good he could complete his first 2Y-2Y QSO and again some "FIRST". Nowadays he has very poor WX condx at HS (sometimes up to 45 degrees) and so Karsten will concentrate on his

movement to the new home. He will try to be more qrv from the new QTH after april, 18th. At the weekend 24/25th he will have visitors (HS0ZFZ) - dont be surprised to hear a new call than via Moon... By the way bcse of questions - 70cm is NOT allowed! NO LICENS!

The next DL1YMK EME Event will take place from Thursday, 13.05.2010 until Sund., 23.05.2010 - LATEST NEWS from the Team, dated 2010-04-03 Gents, as announced earlier, we plan to activate a ï¿½wanted DXCCï¿½ via EME on 70, 23 and 13 cm from Thursday, 13th May ending on Sunday, 23rd May with the DUBUS Contest. Due to the Activity Time Period (ATP) for 70 cm on Sunday,16.5. and the close sun on 14.5. we changed our schedule for the 3 bands. So this is the new schedule, all random on

these days: Thursday 13.5. on 23 cm (bank holiday in parts of Europe) Friday 14.5. on 13 cm (probably activity possible despite of the close sun for some hours) Saturday 15.5. on 23 cm Sunday 16.5. on 70 cm (including ATP 7-9 and 17-19 UT) Monday 17.5. again on 13 cm, as this band will suffer from solar noise on Friday Depending on possible internet access on site or perhaps in a town nearby (our qth will be on a farmhouse in plain country side), we are open for skeds during the week on all 3 bands for smaller stations or those, who couldnï¿½t make it over the weekend. A detailed band plan for the week will be published later. On the 2nd weekend, during the DUBUS contest (22.5. to 23.5.) we will be qrv on 23 cm, but with poor windows to US from our position (to US west coast only 1 hour on Saturday, even less on Sunday). UA9YAB, Alex, plans to arrive in Mongolia on May 25th and will be operating as JT9YAB from a car using simple antennas until June 2nd. While there he will also put an emphasis on 50 MHz. If all works out as planned he will be find a location for a second trip for the coming autumn for a focused 160 and 80 meter operation. QSL via UA9YAB direct or via LOTW. No bureau requests. Information from DailyDX (tnx Bernie)... SOURCE: Rys SP5EWY via UKSMG Announce

BIG DISH Station KP4AO (Amateur Radio Club - FK68OI) qrv on 70cm EME
If you have a 70 cm rig and a small 70 cm yagi antenna, here's your chance for an EME QSO with the Areceibo Observatory in Puerto Rico:
In less that two weeks the Arecibo Observatory Amateur Radio Club will again put the 1000-foot radio telescope on the air for 432 MHz EME.
73 from Joe, K1JT, on behalf of all the gang at KP4AO

A group of operators will be active as 3W6C from Con Co Island (AS-185) Vietnam, between 10th and 18th April 2010. Operators mentioned as of today: Team Leader Hans-Peter HB9BXE, Jan DJ8NK, Hansruedi HB9BHW, Rene HB9BQI, Christine HB9BQW, Hansjurg HB9DKZ, Paul HB9DST/AA1MI, Friedhelm HB9JBI, Matthias HB9JCI, Peter HB9PJT, Rolf HB9TVR, Casimir HB9WBU, Eddy XV1X and Michal XV9DX. The team is looking for sponsors. Complete details are available at: http.//www.3w6c.qrv.ch/
At this time we are not planning any specific radio operation on the 50-MHz band. Instead, we will set up a beacon on 50.038 MHz!

267. GPS signal disappears

Newsgroup: rec.radio.amateur.misc
Date: 2010-04-10 04:30:09 UTC
From: Gary Smith <vkthree@gmail.com>
Message-ID: <4bbffecd$0$8785$c3e8da3@news.astraweb.com>
Source record: 5986

Hi all, i have a problem in my car with 2 gps units losing signal.

!. Tomtom v3 mounted on windscreen, power lead runs down to cig lighter socket.
2. Kenwood TM-D700 mounted under passenger seat front, head mounted between cig lighter socket and tomtom.
3. Alinco DR-635 mounted under passenger seat next to Kenwood, head mounted under d700 head.

Now, the problem is when i turn on the DR635 and put it on 70cm, BOTH the tomtom and d700 lose GPS signal even without transmitting on the DR-635.

This first happened when i had only the DR-635 and tomtom installed so we can rule out the d700. I just noticed it affected BOTH gps's after instaling d700.

If i put the DR-635 on UHF CB (477MHz) it all works fine, so it's something about 70cm Frequencies that they don't like.

Sounds like some wierd mixing or something is happening but not sure what or how to eradicate it

I would love to hear any tips to try. I want to use everything the way it is currently set up but might not have an option.

Thanks

Gary

If I had to guess, I'd guess that you've got a harmonic coming out of the local oscillator in the radios, which is getting into, and saturating the RF front end of the GPS receiver. The GPS signal is quite weak, and normally requires some significant preamplification (sometimes done in the "active" GPS antenna, sometimes done in the receiver itself). The GPS low-noise-amplifier circuits I've seen described, usually seem to have 25-30 dB of gain.

It's possible that you have a local-oscillator-generated "birdie" harmonic which falls quite close to the GPS frequency (around 1.5 GHz) and is directly interfering with it. Another possiblity is that the birdie isn't directly on top of the GPS signal, but is close enough that it's getting past the filters in the GPS receiver and is saturating the LNA, thus desensitizing the LNA to the desired GPS signal.

If you know anybody who has a microwave spectrum analyzer, it might be worth sticking a short wire-stub probe on the end of a coax cable, setting the S.A. to cover 1.3-1.7 GHz, and wave the probe around your radios. You might be able to see the unwanted signal.

There's a rather notorious case on record which occurred not far from where I live... it was down in Moss Landing, in the Monterey Bay area. GPS reception was knocked out throughout the harbor for some time by an interfering signal. Turned out to be a cheap TV preamplifier (or "active antenna") on a boat in the harbor... it was breaking into spurious oscillations, radiating back out the antenna, and overwhelming the GPS signal for quite some distance. Since that's a fog-prone area, and boats in the harbor sometimes have to rely on GPS for decent position fixes, it was a pretty serious issue.

How to eradicate it? Might not be easy. Adding some ferrites to the power lines for the radios and GPS might help. You might need to add

some sort of low-pass filter to the radios' RF feedlines, choking back
the oscillator harmonics without blocking operation below 500 MHz.
If you don't already have dedicated power feeds for the radios which
go right back to the vehicle battery, consider adding them - keep the
radio power as well separate from the under-dash utility circuits
(e.g. cigarette lighter) as you can.

DXNL 1670 - Apr 7, 2010
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

FR - REUNION, AF-016
Stephane,F5UOW, will stay on Reunion (AF-016) between Apr 9 and May 2.
He will be active only on 20m signing FR/F5UOW until Apr 17. He will
change his QTH on the island and his callsign then and will show up as
TO2R mostly in CW on 80-10m.
QSL cards should be sent direct or via bureau to his homecall.

GJ - JERSEY, EU-013
David,ON4DN, is QRV as MJ/ON4DN/p from Jersey (EU-013) from Apr 6-9.
He also plans to activate several lighthouses.
QSL cards via bureau or direct to his homecall.

TF - ICELAND, EU-021
Dervin,TF/PD9DX, will be active in SSB on 80m-10m from Iceland (EU-021)
from Apr 8-17. QSLs direct or via bureau to his homecall.

TT - CHAD
Phil,F4EGS, is staying in the Chad for the next two months starting
from Apr 10. It is most likely that he will use his old callsign TT8PK
again which he has used for four times before. He is using a FT-850,
an old R7 and another vertical. Activities will take place in SSB, CW
and some RTTY on 40m-10m during his limited spare time.
QSLs via F4EGS, direct (see QRZ.com) or via the REF bureau.

V3 - BELIZE
Dave,N4QS, is active as V31QS from the rental QTH of V31MD in
Placencia working in CW, SSB and RTTY on 80m-10m until Apr 11.
QSL via homecall or LoTW.

V6 - FEDERATED STATES OF MICRONESIA, OC-010
Sho,JA7HMZ (V63DX), Koh,JA1ADT (V63DQ), and Keiichiro,JA7GYP (V63T),
will be QRV in all modes and bands from Pohnpei (OC-010) from Apr 11-17
QSLs via their homecalls.

VQ9 - CHAGOS ARCHIPELAGO, AF-006
Jim,ND9M, is active again as VQ9JC from Diego Garcia (AF-006) for the next four months. Jim prefers mainly CW but also works in SSB and digital modes. He hopes to get the special call VQ90JC by the end of May and beginning of June not only for the CW part of the WPX Contest. QSLs direct or via bureau via ND9M.

3B8 - MAURITIUS, AF-049
Slavo,SP2JMB, has been spotted only in CW signing 3B8SC from Apr 7-21. He is accompanied by Bogdan,SP2FUD, in SSB and RTTY. QSLs via SP2JMB.

3W - VIETNAM, AS-185
3W6C is the callsign of a multi national group formed around the team leader Hans-Peter,HB9BXE, sowie Jan,DJ8NK, Hans,HB9BHW, Rene,HB9BQI, Christine,HB9BQW, Paul,HB9DST/AA1MI, Thomas,HB9BSH, Friedhelm,HB9JBI, Matthias,HB9JCI, Hans-Jurg,HB9DKZ, Peter,HB9PJT, Rolf,HB9TVR,Bob,K4UEE, Eddy,XV1X, Bac,XV2A, Quang,XV2B, Michal,XV9DX, and Torsten,XV9TH. Their plans are to make 60.000 QSOs from Con Co (AS-185, WLOTA 2557) from Apr 10-18 running with four stations on following frequencies:
CW: 1831, 3502, 7002, 10115, 14002, 18072, 21002, 24902,28002,50102 kHz
SSB: 3810, 7070, 14220, 18140, 21220, 24940, 28420, 50120 kHz
RTTY: 7035, 10118, 14080, 18100, 21080, 24920, 28080 kHz.
They will also put up a beacon 50038 kHz and promise operation via the satellites AO-07, AO-51, HO-68, SO-50 and SO-67. QSLs via HB9BXE. More information including an online log can be found at:
http://www.3w6c.qrv.ch

CZECH REPUBLICH, SPECIAL EVENT STATION
The former Czech radio officers OK1DNJ, OK1DX, OK1FCA and OK1FCJ are activating the special event callsign OL35OLP until the end of April. Their call remembers the former HF coast radio station Praharadio (callsign OLP) which operated from 1975 until 2000. QSLs via OK1DRQ.

FRANCE, SPECIAL EVENT STATION
F5LON, F6CNM, F8FKD and F9OE will be QRV as TM4FFU on 160m/80m/40m/ 20m/15m/10m during the Radio Maritime Day on Apr 10/11. QSL via F8FKD.

ITALY, SPECIAL EVENT STATION
Members of the ARI section San Remo will activate IQ1SM/p and I1UWF/p in SSB/CW/RTTY on 40m-10m from the botanic garden in Hanbury on Apr 11. QSLs via bureau.

MEXICO, SPECIAL EVENT STATIONS
Mexican amateurs may use the prefix 4B (instead of XE) until the end of this year to remember the Mexican revolution.

SARL News - SUNDAY 11 APRIL 2010

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a webstream, visit www.sarl.org.za, click on ARMI and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and subscribe to receive future bulletins by email.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 10,130, 7,066 and 3,695 MHz SSB.

In the news today:

PRESIDENT'S NET TO DISCUSS CHANGES TO SARL CONSTITUTION

NATIONAL CONVENTION - DON'T DELAY BOOKING

CELEBRATE YOUR HOBBY ON 18 APRIL

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

PRESIDENT'S NET TO DISCUSS CHANGES TO SARL CONSTITUTION

The President's Net, on the air tonight at 19:30, will review changes to the constitution which are on the AGM agenda. Here is an opportunity to get clarification about the proposed changes and the reasons behind Council's proposal. Join the discussion on a repeater near you. The proposed revised constitution is available on the member section of the SARL web.

NATIONAL CONVENTION - DON'T DELAY BOOKING

Time is running out to book for the various events presented at the SARL National Convention which will be held in Port Elizabeth from 23 to 25 April. The Convention warms up on Friday evening with a spit braai at the Italian Sporting Club where the Annual Dinner will also be hosted on Saturday evening.

The AGM starts on Saturday morning at the Nelson Mandela Metropolitan University. During the afternoon there are a number of activities to choose from, from a forum on Contesting and DXing, to a visit to a game

farm or sportscar manufacturing. The popular PIC course, learning PIC programming in 4 hours, is also presented on Saturday afternoon. The cost of the PIC course includes a gift pack of useful programs and products valued at more than the registration fee. See all the details on the web. Participants also receive a certificate from Microchip, which underwrites the course. The convention concludes with a breakfast at Port Elizabeth's famous beachfront.

If you cannot attend the AGM, please nominate someone to represent you. Complete the proxy form and return as soon as possible. To book, get a form from the web, make a bank transfer or pay by credit card. It can all be found on www.sarl.org.za. Why not do it today?

SA AMSAT SPACE SYMPOSIUM NEXT WEEK

Next Saturday the SA AMSAT Space Symposium will be held at the University of KwaZulu-Natal, another event not to be missed. SARL and SA AMSAT members can still make use of the early bird special booking up to Monday, close of business. Get the details from www.amsatsa.org.za. Learn more about the ins and outs of SumbandilaSat, South Africa's two new CubeSat projects and the around the world balloon project called Lalea. There are plenty more interesting presentations. Get the full programme from the web. There is a link from www.sarl.org.za.

CELEBRATE YOUR HOBBY ON 18 APRIL

World Amateur Radio Day will be celebrated on Sunday 18 April. The theme this year is "Amateur Radio: combining communication experience with modern digital techniques". What is your club doing to celebrate the day? Drop a line to armi@sarl.org.za and we will share your ideas on the SARL web.

SARL CONTEST MANUAL

Radio clubs and individual radio amateurs are invited to use the 2010 SARL Contest Manual as basis to start the process of creating the 2011 edition. Ideas, comments and suggestions must be submitted to the Contest Manager/Committee by 31 August 2010. From this, a draft 2011 Contest Manual will be created and this document will be circulated for comment. It is planned to have the 2011 SARL Contest Manual ready for publication by 15 December 2010.

CONTEST NEWS

The Autumn QRP Sprint will be run from 12:00 to 14:00 UTC on Sunday 18 April. Stations can participate as portable or fixed stations using CW only, phone only or mixed. There are three power levels to choose from: 5 watt, 1 watt or 100 milliwatt. The exchange is RS(T) and year first licensed (e.g. 59 89). Activity is on 7,000 to 7,025 MHz and 7,060 to 7,100 MHz. Two points are scored per QSO and 2 points per prefix worked. Logs must be submitted by 3 May to the West Rand ARC, PO Box 5344, Weltevreden Park, 1725 or by e-mail to glevey@gmail.com.

SARL NATIONAL FIELD DAY RESULTS

Seventeen logs were received for the February leg of the SARL National Field Day. The results for the three categories are as follows:

Single Operator Field Station:

1st Jan Botha, ZS4JAN, 96 120 points 2nd Christo Kriek, ZR6LJK, 13 995 points 3rd Bryan King, ZS2SS, 8 400 points

Multi-operator Field Station

1st West Rand ARC, ZS6WR, 57 970 points 2nd Pretoria ARC, ZS6PTA, 50 750 points 3rd Hibiscus Coast ARC, 34 500 points

General Stations

1st World Cup Soccer, ZS10WCS, 110 160 points 2nd Philip Esterhuizen, ZS4PJ, 40 812 points 3rd Johan Esterhuizen, ZS4PP, 18 630 points

SARL 80 m Digital Club Contest. Four logs were received for the second Club Contest. The results are:

1st West Rand ARC, 9 points 2nd ZS Contesting Group, 3 points

The full results will be published in HF Happenings.

MAY RAE

The closing date for entries for the May 2010 Radio Amateur Examination is 12:00 CAT on Friday 23 April 2010. Please note that no late entries will be accepted at all. Any queries can be directed to Mariska at the SARL office. Please visit the SARL home page for contact details and the application forms.

CLUB NEWS

ZS6JVT, the Amateur Radio Club at the Technological High School John Vorster, will be hosting a flea market on Saturday 8 May from 08:30 at the ZS6JVT Radio Training Centre. The young members are proud of their radio room and look forward to showing visitors around.

The flea market is an opportunity for acquiring or disposing of any electronic or radio equipment. Tables, stands or boot sales cost R20. Tasty eats, cold drinks and coffee will be available. Ample, safe parking will be provided in the school grounds.

The High School John Vorster is situated at 1072 Meyer Street, Rietfontein, Pretoria. For further information Johann, ZS6PSS, can be contacted on 082 446 1581.

The West Rand Amateur Radio Club is hosting its next flea market at 12:00 on Saturday 24 April 2010 at the clubhouse in Kroton Street, Weltevredenpark, Roodepoort. Everyone is very welcome. For more information, contact Joop, ZS6C, at 082 342 3280.

The Kempton Amateur Radio Technical Society held their AGM on 13 March 2010. At this meeting a new committee was elected.

Chairman: Stephen Stuttard, ZS6SKY Vice-chairman: Vivian Dold, ZS6VD Secretary: Clive Reeks, ZS6BT Treasurer: Barry Els, ZSL470 Additional member: Nico van Rensburg, ZR6QL

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at low levels. The face of the sun is nearly blank as only Sunspot 1 061 remains. The effective sunspot number is expected to decline to levels less than 10 for the coming week.

20 and 15 m will provide the best opportunities for DX. Conditions to India will be good from the afternoon onwards. During the late afternoons and early evenings conditions will be good towards Europe. Contacts with the USA are once again becoming challenging. Contacts with Australia and New Zealand will be challenging. During the afternoons and evenings good 20 and 15 m contacts may also be possible with Brazil.

17 m is open most afternoons to many parts of the world. Most of the activity is concentrated on Friday afternoons and also over the weekends.

Local conditions are going to be good on 40 m during the daytime. 80 m may perform well during the early mornings and late afternoons over the shorter distances. 30 m will perform well during the middle of the day. 20 m is very useful for contacts over the longer distances during most of the day.

80 m is the frequency of choice in the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

17 April - 2010 SA AMSAT Space Symposium. 18 April - Autumn QRP Sprint competition. 18 April - World Amateur Radio Day. 23 April - Entries close for the May RAE. 23-25 April - SARL National Convention, Port Elizabeth. 24 April - West Rand Amateur Radio Club Flea Market. 3 May - Logs for the Autumn QRP Sprint competition must be in at the West Rand ARC. 7 May - Closing date for stage 2 of the Construction Competition. 8 May - Technological High School John Vorster Amateur Radio Club flea market. 31 August - Comments to be in on new SARL Contest Manual.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items, if possible, in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the

Pretoria area, with relays on 7 082, 7 205 and 17 570 kHz. There is also a podcast by ZS6RO. For a webstream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 21:00 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League compiled by Leon, ZS4V, and edited by Hester van der Walt.

Thank you for listening, 73.
/EX

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 11th April 2010

Silent Key EI6CP

It is with regret that we inform you of the death of Paddy Daly EI6CP. Paddy died in the Mater Hospital in Dublin on Thursday last where he had been ill for the past few months. Paddy was in his early nineties and has been a long standing supporter and member of the Society. Those who have been licensed for some time will remember the sterling service that Paddy gave to the Society both as a Committee menber and for many many years he carried out the onerous task of both the incoming and outgoing QSL Manager.

Paddy was a founder member of the Fingal Radio Club and was instrumental in obtaining their first premises in the scout hall on Ballygall Road Paddy was technically very competent and was a keen home constructor and adapter of equipment. He restored many old communications receivers to full working order one of which he donated to the RAF Museum.

In his working life Paddy was a member of An garda Sioch�na and on his retirement held the rank of Inspector in the Garda Motor Workshops.
Paddy was predeceased by his wife Evelyn a few years ago At the time of writing we do not have the funeral arrangements.

To Paddys sons Michael, Martin and Patrick and to their families we extend our sincerest sympathy.

May he rest in peace.

Information Request Relating to the 2300-2400 MHz Band

We have been asked by ComReg to notify you that a letter in the following terms will be issuing to all radio amateurs shortly. This is simply a survey in the context of the release of spectrum in this band to assist in a spectrum monitoring exercise as a preparation for licensing following the recent consultation on this matter.

The Commission for Communications Regulation (ComReg) is preparing to open the 2300 - 2400 MHz Band for the provision of additional licensed services on a nationwide basis. Radio Amateur users have designated use of the 2300 - 2400 MHz band on a secondary basis and there is currently

no plan to alter this allocation. Further information on ComReg's plans is available on our website1.

As part of the preparation for the licensing of the 2300 - 2400 MHz band, ComReg is conducting a spectrum monitoring campaign. In order not to inadvertently affect the legitimate operations of Radio Amateurs, ComReg is seeking a once-off notification of the use of transmitter equipment in this band.

Equipment operating in any part of the band may be notified by filling in the enclosed form and sending it back to ComReg at Patrick Mulvey, ComReg, Abbey Court, Irish Life Centre, Lower Abbey Street, Dublin 1, or, alternatively the form can be downloaded from the 2.3GHz Website1

Your assistance in this matter is appreciated and if you have any queries please do not hesitate to email me at 2.3ghzinfo /at/ comreg.ie

---

IRTS Annual Dinner AV Presentations

One of the audio visual presentations being prepared for the Annual Dinner in Dundalk will feature the Islands on the Air Contest.

Individuals or Groups who have still photos or video of last year's contest, or indeed any amateur radio related activity, and who would like them to be considered for inclusion should forward them to Seamus EI8BP. In particular, Seamus is anxious to feature all the Island expeditions.

Seamus may be contacted on 087 259 0691 or at smccague /at/ eircom.net

---

IRTS 78th AGM

The 78th AGM of Irish Radio Transmitters Society will be hosted by the Dundalk Amateur Radio Society, over the weekend of the 24 /25th April 2010.The venue will be Fairways Hotel Dundalk Co Louth.

Tickets for the Dinner on Saturday night at 8.30PM are selling well at 35 Euro each and are available from Peter Grant EI4HX Peter's email address is secretary /at/ ei7dar.com or by Telephone 087 7944779..

The Rally will be held on Sunday 25th of April in the Fairways Hotel, Dundalk Co Louth. Doors opening at 11.00 AM, all the usual traders will be represented plus some new ones. Tables will also be available for sole traders without charge.

Fore more info on the AGM weekend, Dinner & Rally please check www.irts.ie or www.ei7dar.com

---

Theory Examination

The next theory examination for the Amateur Station Licence will be held on Wednesday, 7th July at 2pm in the ComReg Offices in Dublin and at other centre's if warranted by the numbers.

Information on examination fees and other details please see 'Theory Examination' in the 'Information' section of the IRTS website at www.irts.ie

Intending candidates are also referred to 'Studying for the Amateur Radio Examination' in the 'Downloads' section of the website.

The latest date for receipt of applications to sit the examination is Wednesday, 23 June next but it is important to note that places at the exam are allocated on a first come first served basis.

Lough Erne Rally and QRP talk to be streamed live

Today's Lough Erne Amateur Radio Club Rally will be webcast from about 11.30.am. A talk entitled QRP - Why and How by George Dobbs, G3RJV will be webcast about 14.00 for about an hour including discussion.

To watch these webcasts go to www.batc.org.uk

Limerick Radio Club

Members of Limerick Radio Club, took part in last weekend's 2M Spring Counties Contest and while the WX was far from ideal, a good day out was had by all and we would like to thank all stations that contacted uson the day.

The next club meeting will take place next Thursday evening April 15th at 19.30 at the Limerick Institute of Technology and members are reminded that club subscriptions are now due for renewal and can be paid on the night .

North Dublin Radio Club

The North Dublin Radio Club held its AGM on 27th March. Chairman Tony (EI6BQB) and Secretary Tony (EI5EM) were re-elected and Nick (EI7GOB) was elected as treasurer. Liam (EI8HY) the outgoing treasurer, indicated that he did not want to go forward again for election.

In recognition of Liam's many years of loyal service in that post, the club presented him with the Willie Barron (EI6BUB) Memorial Trophy. This trophy was designed and presented to the club in 1998 by Ray (EI7AHB) to be awarded annually in recognition of service to the club or to amateur radio in general. Willie Barron, now a silent key, had served in the past as chairman of NDR and also as President of the IRTS.

On Easter Monday, members of NDR had the pleasure of attending Liam's (EI8HY) wedding in Balally Church and celebrating afterwards at the

reception in the Summerhill House Hotel, Enniskerry. We wish Liam and his new wife Grace many years of happiness together

---

International Marconi Day

On Saturday 24 April, the Howth Martello Radio Group and the North Dublin Radio Club will be celebrating International Marconi Day by operating an IMD award station from the Martello Tower in Howth using the call-sign EI0MAR.

The Martello tower houses the vintage radio museum. The museum web site is www.ei0mar.org. It is hoped to be active from 9am until 11pm on phone and CW. Visitors are very welcome.

The Cornish Radio Amateur Club organises this annual event and details of the awards and a list of award stations is available on www.gb4imd.org.uk.

West Tyrone Amateur Radio Club

West Tyrone Amateur Radio Club AGM, will take place at 8pm on Tuesday 13th April in the Technology Education Centre, 2 Spillers Place, Omagh, BT78 1FA New members welcome.

Wicklow Radio Club

The Next meeting of the Club is confirmed for wed 14th of April at 19:30, in the Glebe National School, Wicklow Town. All are welcome to attend.

Rallies

Dundalk Amateur Radio Society

The Rally will held on Sunday 25th of April in the Fairways Hotel, Dundalk Co Louth. Doors opening at 11.00 AM, all the usual traders will be represented plus some new ones. Tables will also be available for sole traders without charge.

Bookings for Traders tables to Thos EI2JD email chairman /at/ ei7dar.com or Peter EI4HX chairman /at/ ei7dar.com

For further Rally info and contact details please check out the IRTS Website.

http://www.irts.ie/cgi/rallies.cgi

History this week

1833 Gauss & Weber, Germany, demonstrate electromagnetic telegraph.

1852 Word 'Telegram' first used. Albany Evening Journal, England.

Items for inclusion in next weeks Radio News should be forwarded to Charlie EI8JB, preferably via e-mail to "charlie dot carolan at gmail dot com" Or by phone to 087-6265418 News can also be submitted via e-mail to "newsteam at irts dot ie" for automatic forwarding to both the radio and printed news services.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 4th-April, through Sunday, 11th-April there were 221 countries active. Countries available: 3A, 3B8, 3DA, 3V, 3W, 3X, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5U, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9Y, A2, A3, A4, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P4, PA, PJ2, PJ7, PY, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T32, T7, T8, TA, TF, TG, TI, TK, TL, TN, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VP2E, VP2V, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XX9, YA, YB, YI, YJ, YK, YL,YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3W, VIETNAM (VERY RARE IOTA #2). An international group of operators are now active as 3W6C from Con Co Island (AS-185) until April 18th. This multi-national project, being coordinated by Swiss ham-radio operators, consists of roughly 20 individuals including one woman and members not

only from Switzerland but also from Vietnam, Germany, USA and Japan. During their stay they plan to have 4 stations on the air. Their goal is to make contacts on as many different frequencies as possible, even on the 80 meter and 160 meter bands which makes this DXpedition very special. The team will also be on the satellites. The following satellite will be used: AO-07*, AO-51*, HO-68*, SO-50 and SO-67 (*first priority - not all overflights and sats will be used). Please note that only AO-07 will be activated in the SBB/CW-mode. All other satellites are in the FM-mode. The main areas in the footprint are: East-Asia, Japan, China, India, Australia and eastern part of Russia. Suggested frequencies are available at: http://www.3w6c.qrv.ch/frequencies
Complete details about the 3W6C operation are available at: http://www.3w6c.qrv.ch
ADDED NOTES: Alex, AI2Q, will serve as East Coast pilot station and Steve, W7QC, will be the West Coast pilot. Alex informs OPDX readers that "Con Co Island is one of Vietnam's 14 islands and is located 32 km from the main-land of Quang Tri Province in the southern part of the Gulf of Tonkin. In the IOTA (Islands on the Air) program, it belongs to the group AS-185, which among all Asian islands is the second-most sought after group. The island also has a lighthouse that qualifies for the 'World Lighthouse On The Air' program (WLOTA #2557). In the past the island was a top secret military base in the Vietnam War. The island continues to have a military base. The SSB and CW stations will use former above-ground military bunkers. The RTTY station will be a small wooden bungalow which will also serve as the headquarters and general meeting point for the team who will sleep in the island's only guest house. The CW, SSB and RTTY sites are set far apart to minimize interference among them. From a practical standpoint this means that team members must travel 1 to 2 km to get from the headquarters to their assigned station when it is time to operate."

6V7, SENEGAL. Luc, F5RAV, will once again be active from La Somone between October 25th and November 1st. He will be operating from Jean-Francois, 6W7RV, QTH as 6V7T. Activity will be on SSB and PSK31, and on 160-10 meters (including 17 and 12m with a dipole only). He is planning to be in the CQWW DX SSB Contest (October 30-31st). QSL via only direct to his home callsign. See details on QRZ.com. Also, visit his BLOG page at: http://f5rav.free.fr

9Y, TRINIDAD AND TOBAGO. Rolf, DL2DBE, is now active as 9Y/DL2DBE from San Fernando, Trinidad. He will be in Trinidad until the end of the month of April working the 30-10 meter bands in the evening (East Coast time). Rolf will also keep an ear on six meters. QSL via DJ5BWD.

CY0, SABLE ISLAND (Update). Randy, N0TG, informs OPDX readers: "As we work toward a mid-October operation, details with regard to personnel transportation as well as partial equipment shipment a few weeks in advance is being planned. As is the case for many Dxpeditions, finances become a challenge. Individual donations to assist the Dxpedition will be appreciated. The HOME Page of the website includes a PAYPAL Donate button with several country currency choices. All individual donors'

callsigns will be listed in order received on the website. The 'team' thanks you for your consideration. WEBSITE: http://www.CY0dxpedition.com E-mail/questions directed toward N0TG okay (E-mail address listed on QRZ.com).... 73, Randy, N0TG"

FR, REUNION ISLAND (Reminder). By the time you read this, Stephane, F5UOW, will once again be on holiday and active from Reunion Island (AF-016) between now and May 2nd. He will also be using the same callsign as last time, FR/F5UOW, but only until April 17th, and activity will be only on 20 meters. He will then move to another QTH were he will use the callsign TO2R and will be active on 80-10 meters, mostly on CW. QSL via his home callsign, direct or by the Bureau.

FW, WALLIS AND FUTUNA (Also 3D2). Operators Mini/JA2NQG, Yuji/JH2BNL and Shige/JI2UAY will be active as FW/homecall between July 14-21st. Activity will be on 160-10 meters using all modes. QSL via their home callsigns.
ADDED NOTE: On their way back to Japan, the trio will then be active from the Fiji Islands between July 21&#65533;24th. Currently, callsigns are unkown as of yet.
Also, QSL via their home callsigns.

GB4, SCOTLAND (A First! Dawn to Dusk Challenge in June). Bob, GM0DEQ, informs OPDX that he will be activating up to 15 Scottish islands within 24 hours in June using a sea plane as transport. His callsign will be GB4DTD [Dawn To Dusk]. Activity will be on the HF bands, 40-10 meters. QSL via GM0DEQ. The island list is subject to change due to a few factors governing their sea plane transport. More details will be published on the following Web site, when available, at: http://www.gdram.com
In addition, there will be a specially commissioned trophy available to win for this probable first? To celebrate the challenge, an Orkney Crystal Glass Trophy will be awarded to one lucky amateur radio station. This specially commissioned trophy will be awarded to the first station that has worked Bob on all the islands that he activates or the first to work the most islands activated [All he asks is that the recipient funds the appropriate post & packaging]. The departure date will be subject to WX too, and will be from Monday, June 14th, onwards as close to the longest day to maximize daylight flying. The latitude of the Orkney Islands will also assist in maximizing daylight flying.

HG0, HUNGARY (WFF Op). Members of the Regionalis Radios Sportklub Puspok-ladany (HA0KHW) will once again activate another Hungarian National Park as HG0WFF. This time from the Bihari-Sik Natural Reserves (HAFF-012) between April 16-18th. Activity will be on all HF bands using CW and SSB. The rigs and the equipment are: FT-840, IC-706 MKII, MOS FET vegfok, kb. 300 W output, 2x22 m doublet with 450 ohmos ladder line, Monoband Gp's for 40/30/20 meters and a big battery with generator. Operators mentioned are: Pisti/HA0ANA, Laci/HA0HW, Toni/HA0LG and Viktor/HG0NAZ. QSL via HA0HW, by the HA Bureau.

IOTA NEWS.....
AF-086. Michel, HB9BOI, will be active as D44TOI from the north of Sal Island (WLOTA LH-0610) between July 1-13th. Activity will

be on all HF bands. QSL via his home callsign, direct or by the Bureau.

AS-125. Members from the Radio Amateur Society of Thailand are now active as E20AS from Chang Island (Ko Chang in Thai) in the Gulf of Thailand, for a mini DXpedition until April 16th. They will have 2 element beams for both 20 and 15 meters and a multi-band vertical for the other bands. Their operation site is on the north end of the Island and should give them a fairly decent path to EU and NA when the bands are open. Their vertical antenna will be near the water and that should help their signals. Planned modes are CW and SSB. Operators mentioned include: John/W2YR(HS0ZDJ), Sam/SM3DYU(HS0ZDY), Winit/HS1CKC, Cy/HS0GBI and Swen/DB3KT(HS0ZFZ). QSL via HS1CKC

EU-038. Roland, DL1EAL, will be active as PA/DL1EAL from the Island of Texel, The Netherlands, during his upcoming vacation between May 23rd and June 10th. Activity will be holiday style with 100 watts into dipole antennas on all bands from 80-10 meters, including the 30/17/12 meter bands. His activity will also include the IARU CW Field Day and in the CQWW WPX CW Contest. QSL via his home callsign, by the Bureau, direct, eQSL and the LoTW.

EU-039. Operators Charlotte/ON3CO, Ann/ON5ANN, Jacques/ON5OO, Pascal/ ON5RA, Bart/ON7BT, Jean-Jacques/ON7EQ, Carine/ON7LX and Claude/ ON7TK will be active as F/homecall and TM7T from Grande Ile (DIFM MA-004, DDFM 50, DPF 04), Chausey Islands, between July 23-26th. Activity will be on 80-10 meters using CW and SSB. They will also participate in the RSGB IOTA Contest (July 24-25th) as TM7T, as a Multi-Op/CW-SSB/24-hrs entry. All QSOs with TM7T or/and F/homecalls will be valid for WLOTA LH-0424. QSL via ON7EQ, direct (w/SAE or SASE and sufficient postage) or by the Bureau. For more info, see: http://www.qrz.com/db/TM7T

EU-114. Kevan, 2E0WMG, will be active from Herm Island between June 11-17th. Activity will be on 80/40/20/17 meters SSB using low power. WAB reference numbers are: North East WV48, North West WV38, South East WV47 and South West WV37. QSL via his home callsign, direct or by the Bureau.

EU-125. Tom, DL4VM, will be active as OZ/DL4VM from Fano Island (DIA NS-002) between May 29th and June 12th. Activity will be on 40-15 meters CW using 20 watts and a dipole. QSL via his home callsign, by the Bureau or direct.

EU-172. After their very sucsessful trip in 2009, operators Harry/PA1H and Nico/PA7PA will once again be active as OZ/homecall from Lango Island (FY-025 Danish Island Award), Denmark, between May 15-24th. Activity will be on 80-10 meters, including the 30/17/12 meter bands. Lango Island belongs to the Langeland

Island group, but it is off Langeland, and there is only 1 house on the island, so it is a unique location situated in "The Lindelse Nor". Lat. 54.52.47.16N, Long. 10.41.27.23E. QTH Locator: JO54IV. Harry informs OPDX that "This time we will activate also 30 meters band and use more digi-modes. When propagation allows, we will also activate 2 and 6 meter bands." QSL via their home callsign, by the bureau or direct (QRZ.com addresses).

EU-187. Members of the Radio Amateur Society of Crete (RASC) DX Team will be active as J49A from Gavdos Island during this year's RSGB IOTA Contest (July 24-25th). Operators mentioned are: Manos/SV9JI, Apostolakis/SV9LM, Manos/SV9ANJ, Antonakos/SV9BMJ, Kostas/SV9BKZ, Dimitris/SV9COL, John/SV9CJO, George/SV9DJO, Fragiskos/SV9DJR, Giannis/SV9FBG, Yiannis/SV9FBK, George/SV9GPV, Michael/SV9GPY and Manolis/SV9IOI. QSL via SV9GPV.

NA-182. (Update) John, VE8EV, is expected to be active from Greens Island in the Northwest Territories (NWT) in the Inuvik Region East Group between April 15-20th. Remember, he will be using a very rare prefix and will sign CK8G. On his blog page he states, "Despite the big geomagnetic storm this past week, the forecast for the duration of the operation is for quiet conditions. The operating schedule will be Asia from 0000-0400z, Europe from 0400-0700z and 1400-1700z, North America from 1800-2300z. That's generally where I'll have the antenna pointed but will still happily take callers from anyone that is hearing me. I'll be operating almost exclusively 20m SSB, but I will bring a 40m dipole antenna as a backup. My plane doesn't land in Paulatuk until 4:00 pm on Wednesday, so I probably won't be on the air until late that evening (early morning 15th April UTC). I'll be using my satellite phone to post status updates during the trip, so watch this space for the latest information." Updated information can be found at: http://ve8ev.blogspot.com/search/label/IOTA

NA-213. Lindy, WW5AA, will be active as WW5AA/4 from Dauphin Island during the month of May as follows:
May 9th - At 1100z, starting on 1850 kHz followed by 3805 kHz, 7153 kHz, 14260 kHz, 18135 kHz and 21260 kHz, all +/- QRM, and 12-10 meters as propagation/time permits.
May 10th - At 0100z, starting on 1850 kHz followed by 7153 kHz. Other times and frequencies as time permits.
QSL via the home callsign with SASE and postage.

SA-084. Pedro, HK3JJH, will be active as 5K4T from Playa Blanca, Colombia, between April 16-19th. Activity will be on 40 and 20 meters SSB only. Suggested frequencies are 7150 and 14260 kHz. QSL via his home callsign.

JT, MONGOLIA. Vasiliy, RW9YW, will be active as JT9YW between May 25th
and June 2nd. Activity will be on the HF bands (modes were not provided).
QSL via his home callsign.

KH6BZF PROPAGATION FORECAST/REPORT (For April 12-18th)....
Apr 12 AN SOLAR REFERENCE KEYS
Apr 13 AN --------------------
Apr 14 AN BN - Below Normal
Apr 15 AN AN - Above Normal/Geomagnetic Level is QUIET
Apr 16 AN LN - Low Normal
Apr 17 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Apr 18 AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

KP3, PUERTO RICO (Special Event). Members of the "Radio Operadores del Este"
will activate KP3RE as a special event station on April 18th, to commemorate
the life of their first Puerto Rican governor. Activity will be from the
Jesus T. Pinero house-museum in Canovanas, Puerto Rico. They will be on
the air from 40-10 meters between 1300-1900z on PSK31, SSB and possibly
on CW, and also locally on 2 meters via the NP3EF-R on 147.310 MHz. They
will also be commemorating "World Amateur Radio Day 2010". Jesus T. Pineiro,
who was the first governor of Puerto Rican origin in 1946, had as one of
his hobbies Amateur Radio, having the callsign 4KT and co-founder of the
Porto Rico Radio Club in 1918 with friend Joaquin Agusty-4JE, founder of
WKAQ-AM, one of the first radio stations of the Americas. QSL via KP3RE.

N8, UNITED STATES (Update/USI Activity). Activity from North Bass Island
will be sponsored by the Massillon Amateur Radio Club and will be active
between 1200z Saturday, July 23rd and 1600z Sunday, July 24th. Callsign
will be N8B or maybe N8B/P. Suggested frequencies (on or near) are:
SSB - 7250, 14250-260 and 28450
CW - 3530, 7025, 14040, 18098 and 21040 kHz.
There will be some 6 meters after they are officially recognized as
OH006L after 25 QSOs and two countries. Listen for QSL information
by the operator. They now have a Web page for this operation at:
http://www.north-bass-island.com

OFFICERS FOR 2010-2011. On Monday, April 5th, the members of Northern
Ohio DX Association (NODXA) re-elected the following to serve as officers
between May 2010 and April 2011:
President: Tedd Mirgliotta, KB8NW
Vice President: Dwaine Modock, K8ME
Secretary: Al Moriarty, N8CX
Treasurer: Mary Michaelis, N8DMM
Newsletter Editor: David Autry, WD8IOU
For more information about NODXA, check out the club's Web site at:

http://www.papays.com/nodxa.html

OG0, ALAND ISLAND. Timo, OH6GLE, will be active as OG0Z during the CQWW WPX CW Contest (May 29-30th) as a Single-Op/Single-Band (20 or 15m) entry. QSL via W0MM.

OH0, ALAND ISLANDS. Jouko, OH1RX, will be active as OH0J during the CQWW WPX CW Contest (May 29-30th) as a Single-Op/Single-Band (10m) entry. QSL via OH1RX.

OY, FAROE ISLAND (60m Activity). Jan, OY3JE, reported that he has received his 60 meters license. License is for 5.250 to 5.450 MHz and 100W, and valid for 1 year. He is using a Flex-5000 radio, and his antenna is a SteppIR (with 60/80m option).

P29,PAPUA NEW GUINEA. Three members of Yamato Amateur Club will be active from New Britain Island (OC-008) between April 15-23rd. Operators mentioned are: Mat/JA1JQY (P29VJY), Sasi/JA1KJW (P29VKJ) and Kuni/JA8VE (P29VEK). They plan to set up two stations and operate on all bands 160-10 meters using CW, SSB and RTTY. QSL via the operator's home callsign. Address are:
JA1JQY - Shigeo Matsui, 2-31-10 Shimoseya, Seya, Yokohama 246-0035, Japan
JA1KJW - Hisashi Nakayama, 1-17-8 Sibuya, Yamato, 242-0023, Japan
JA8VE - Kunio Saito, 2-26-5-554 Nishitsuruma, Yamato, 242-0005, Japan

QSL INFO AND NEWS.....
NEW QSL ROUTE. Phil, G3SWH (AD5YS), informs that he has been recently appointed the QSL Manager for Alain, 5R8AL. For complete details on how to QSL, please see: http://www.g3swh.org.uk/5r8al.html

QSL CR6A via CT1GFK. There was activity by the Algarve STAR DX Team from "Odeleite DAM Island #7" for the first time. It is valid for DIA AI-39 (Algarve Island Award) and also valid for the PIP (reference number not provided). For more info on activities by the Algarve STAR DX Team and the DIA Award, please visit: http://algarvedx.com
--or--
http://algarvedx.com/dia

QSL CT1EHX/p via CT1EHX. There was activity by the Algarve STAR DX Team from SAGRES in the south of Portugal during the Easter weekend. It is valid for the DPRN FF-12(Portuguese Natural PArks Award); WFF CTFF-12 and DMHP FR-037. Logs and pictures available at: http://algarvedx.com

QSLS VIA LoTW: 3B9WR, 5W0YA, 9A8W, CT1BNW, CT1DSV, CU3BL, DC1RS, DF6TC, DL1EJA, DL1EAL, DL1SWN, EA1AHY, EA1AUS, EA5KA, EB8AH, EW1KP, F5RJM, F6KHM, FO8RZ, G0BLB, G0UGO, G3BJ, H2T, HB9AAQ, HQ2T, HR2/NP3D, HR2DMR, I5YDO, I7LGM, IF9ZWA, IK8NIJ, IT9AJP, IV3KVC, IW8CGX, IZ1JLN, IZ4AIK, IZ4NRF, IZ5FSA, J39BS, JA3YBK, JH7VHZ, JM1VWQ, JO1WKO, KH4IFF, KL2R, KL7RA, KP2/NE1RD, LU5OM, LX1CW, LY3W, LZ132GO, M0VPE, MC1MD, OH2BF, OK2PAY, OM1ZL, OM5TX, PJ2T, RA3CQ, RA6ALS, RN3OK, RV3LO, RV9DC, S79GM, SM2GCQ, SP2GUV, SP5IT, SP6CZ, SP8HXN, SP8IIS, SV1EBV, SV2ASP/A, TF8GX, TG9IRP, TR8CA, UA1WA, UA3AIO, UA3TCJ, UA4HBW, UA6GR, UR2MZ, UR4CWQ,

US5CB, US7IB, UT3UY, UT5EL, UT7UW, UU2JQ, UU9CW, UW7LL, V63MY, VE3BSJ, VP5H, YS3CW, YV5ER, YV5JBI, VX3JFF, XE1J, YT40E, Z21BB, Z36W, ZK3YA, ZP6CW, ZS2I, ZS3Y, ZX3S and ZZ6Z

QSLS RECEIVED VIA MAIL: 6V7S, 8P9RY, 9Q5BQ, A65DLH, E51WWA, E51WWB, EF8M, ER4DX, HR2/NP3D, J7N, J79SB, JD1BMM, JI1FGX/DU9, K4M, KG4JB, OX/EA4NA, SM4OTI, T6AG, TX3A, TX4T, WP4L, XE2/N7DD, XR0ZA, ZF2AH and ZF2UL

QSLS RECEIVED VIA THE BUREAU: 5R8FL, 6V7O, 6V7P, 7L1WII, 9A0COAST, 9A0W, 9A3JB, 9A4W, 9A5BS, 9A6R, 9A8M, 9Y4W, C56YK, CX4AAJ, CX4ACH, CX7BBR, CY2ZT/2, DL4JS/6W, E74EBL, GB5FI, HB0/HB9AON, HG3DX, HK3W, JA1FJP, JA6GCE, JE1CPB, JH1OCC, JM1XCW, JR1NHD, JY3ZH, LY5W, OO5Z, RFX4CF, SE5X, SV8/DL8MCA, TA1DX, TS7C, UA6GP, UW2ZM, V31BG, VE8EV, VK7GK, VP8LP and YV7IAL/7

SILENT KEY. The members of the Northern Ohio DX Association (NODXA) are deeply saddend to report that a great friend, DXer and mentor/elmer recently became a "Silent Key" (SK). Stanley Haase, K8VI (ex-K8YVI), at the age 85, became a "SK" on March 29th. Stan, who grew up in Canada, served in the Royal Air Force, move to Michigan and then to Ohio, was a very interesting and knowledgeable ham. He was a founding member (1965) of the Hazel Park Amateur Radio Club in Hazel Park, MI. In the Cleveland, Ohio, area, Stan will be remembered as the manager of the Heathkit in Parma Hts., working there between 1963-1979. He will surely be missed by many of his friends. OPDX and its readers would like to send out our deepest sympathy to the family and friends of K8VI.

T32, EASTERN KIRIBATI (Update). By the time you read this, the Southern Line Islands operators should be active as T32SI from Starbuck Island (IOTA OC-280 and the last island out of the four uninhabited islands to be activated). The team thinks they may be able to operate for at least 4 days. Activity will be 80-10 meters using CW and SSB. For more details and updates, visit the T32 Southern Line Islands DXpedition's Web page at: http://t32line.webnode.com

TB90/TC1/TC57, TURKEY (TCSWAT Activities). Members of the Turkish group called TCSWAT (Special Wireless Activity Team) will be activating the following special event during the month of April:
TB90MM - Between April 17-25th. Activity to celebrate the 90th anniversary of "The Grand National Assembly of Turkey". This will be the first time TCSWAT will be operating with a "TB" prefix. It is used because TB stands for Turkiye Buyuk and the number as 90th year and MM stands for "Millet Meclisi" which translates as "Grand National Assembly of Turkiye". With the new regulations changes, it might be your only chance to work a "TB" prefix as a special callsign. For more information, see: http://www.ta0u.com/2010/eng/PDF/TB90MM.PDF

TC1GLH - Between April 20-23rd. Will be the activation of the 6th station for the MLOTA (Marmara Lighthouse On The Air) Award; Gelibolu Lighthouse (TUR 023). This is the first activation

of this lighthouse. Activity will be as usual on the HF bands,
mainly on 20 and 40m SSB. For more information, see:
http://www.ta0u.com/2010/eng/PDF/TC1GLH.PDF

TC57A - Between April 23-25th. Activity is once again for remembering
the 57th Regiment Martyrs who lost their lives during the WWI
campaign in Dardanelles. This year the station will be located
at Kocacimen Hill overlooking the battlefields. Operations
will be on CW, SSB and BPSK31 modes and on all HF bands, with
a special try on 2m SSB. For more information, see:
http://www.ta0u.com/2010/eng/PDF/TC57A.PDF

ADDED REMINDERS: Look for the following activity by TCSWAT stations
for the "Istanbul 2010 European Capitol of Culture Award" during the
year 2010. Stations still to be activated are: TC2010CCA, TC2010CCE
and TC2010CCI. The Award rules and the event catalogue is on the
following link: http://www.ta0u.com/2010/eng/pdf/2010AWARDCatalogue.pdf

The next special event for the "2010 European Capitol of Culture Award"
by TCSWAT will be TC2010RKM from the KOC MUSEUM. For more information,
see: http://www.ta0u.com/2010/eng/pdf/TC2010RKM.PDF

TC150, TURKEY (LH Activity). Look for special event station TC150SLH to
be active to celebrate the 150th anniversary of the Sile Lighthouse
between May 1-9th, July 24-25th and August 21-22nd (Lighthouse weekend).
A special Sile Lighthouse award will be available. Details will be
announced soon.

TK, CORSICA. Operators Alex/IW5ELA and Marco/I5KOV will be active as
TK/homecall from the city of Calvi (Grid JN42JN) between May 12-16th.
Activity will be holiday style on 40&#65533;12 meters using CW and SSB. They
plan to use verticals antennas and one loop antenna for 15 meters. QSL
via their home callsign, direct or by the Bureau.

V3, BELIZE. Operators San/K5YY (V31YY), Bill/W5SJ (V31SJ) and Bob/W5UQ
(V31UQ) will be active from Placencia (Grid EK56) in south Belize between
July 12-19th. Activity will be on the HF bands, but also focused on the
CQ VHF Contest. They plan to look for EU and AS during the week of
operation, but also for USA stations that might need a new band country.
They will also be listening on 60m after their sunset, top of hour. QSL
V31YY via K5YY at the QRZ.com address. QSL V31UQ and V31SJ via W5JAY.

VQ9, CHAGOS ISLANDS. After a successful stateside tour activating some
85 grids on the satellites, Jim, ND9M, is once again active as VQ9JC
from Diego Garcia (AF-006) for 4 months. Activity will be on CW, SSB
and the Digital modes. Look for Jim to use the callsign VQ90JC at the
end of May through the beginning of June. He is also planning to be
in the CQWW WPX CW Contest (May 29-30th). QSL via ND9M, direct or by
the Bureau.

YI, IRAQ. By the time you read this, a group of multi-national operators
should be winding down their activities as YI9PSE from Northern Iraq
(Kurdistan) and are expected to go QRT, April 12th. Their Twitter page

states (around 1300z): "YI9PSE is starting the tear down process. We will have one CW and one SSB station active during the tear down. QRT is very soon." As of print time, the team has made about 45k QSO (April 11th at 0522z). QSL via N6NKT. For more details and updates, visit: http://www.yi9pse.com
Also, you can now follow their activities (as well as regular updates) via Twitter at: http://www.twitter.com/yi9pse

VE3, CANADA (CISA Activity). Team VE3ZF will be active from Twilight Island (CISA ON-018), Manitoulin Island district, between April 17-18th, during the "Ontario QSO Party". The team will consist of Val/VE3VO, Max/VE3CCN, Evgeny/VA3ATT and Igor/VE3ZF. QSL via the home callsign, direct or by the Bureau. Details for rules on the "Ontario QSO Party" contest are available at: http://cco.ve3xd.com/oqp/rules.htm

ZF, CAYMAN ISLANDS. Eden, ZF1EJ, reported they have 60m authorizations now in the Cayman Islands. It became effective March 29, 2010, and he has been very active this past week.

DXNL 1671 - Apr 14, 2010
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

BV - TAIWAN, AS-020
Steve,BW1/K8QKY, will be active in CW on 160m-6m from Apr 14-19.
QSL via his homecall K8QKY.

HA - HUNGARY
Pisti,HA0ANA, Laci,HA0HW, Toni,HA0LG, and Viktor,HG0NAZ, will show up
as HG0WFF from the Bihari nature park working in CW and SSB on all
HF bands from Apr 16-18. QSL via bureau to HA0HW.

HS - THAILAND, AS-125
E20AS is the callsign of a group of the Radio Amateur Society of
Thailand (RAST) which is momentarily activating the island Koh Chang
(AS-125). The team including John,W2YR (HS0ZDJ), Sam,SM3DYU (HS0ZDY),
Winit,HS1CKC, Cy,HS0GBI, and Swen,DB3KT (HS0ZFZ), is working in CW/SSB
and will stay on the island until Apr 16. Their QSL manager is HS1CKC.

JW - SVALBARD, EU-026
After the accidental death of JW5NM his widow Inger,JW8KT, is prepared
to continue making the JW5E-hut available for guests of the club- and
contest station JW5E. The new managing director of Telenor on Svalbard
is Harald,JW7XM. Inger plans to remain on the island for the next six
years, until she retires. The hut is primitive with no running water or
toilets. Inger will provide water for basic hygiene and cooking. There
is an electric stove and a refrigerator so you can prepare simple meals
WC is available at the nearest hotel (SAS Radisson). Three to four
people can sleep in the hut but you must bring your own sleeping bags.
The station is equipped with a TS870 transceiver, an old ICOM 2KL (not
working on 30m), a 3 ele Fritzel tribander, dipoles for 160m, 80m, 40m
and 30m. If you are interested to rent the hut and station you can
contact Inger via e-mail (ibjerr@online.no). Donations in form of new
equipment are welcome. Perfect would be a new automatic amplifier and
a new beam covering 10-40 meters! Harald,JW7XM, is also willing to make

himself available for visiting hams. His e-mail is harald@fagermoen.com

P2 - PAPUA NEW GUINEA, OC-008
Mat,JA1JQY, Sasi,JA1KJW, and Kuni,JA8VE, are members of the "Yamato Amateur Club" and will activate New Britain Island (OC-008) with two stations in CW and SSB on 160m-10m from Apr 15-23.
If you want to send your QSL direct please use following addresses:
P29VJY: QSL via JA1JQY, Shigeo Matsui, 2-31-10 Shimoseya, Seya, Yokohama 246-0035, Japan;
P29VKJ: QSL via JA1KJW, Hisashi Nakayama, 1-17-8 Sibuya, Yamato, 242-0023, Japan;
P29VEK: QSL via JA8VE, Kunio Saito, 2-26-5-554 Nishitsuruma, Yamato, 242-0005, Japan.

SV - GREECE
A Greek team will activate the Prespa nature park signing SX2WFF in CW and SSB on 10m-80m on Apr 17/18. QSLs via bureau or direct to SV2GWY. More information is available at: http://www.j42aret.gr

YV - VENEZUELA
Several members of the "Grupo DX Caracas" and the "Amateur Radio Association of Venezuela" will show up as YW6R working in SSB/CW on 40m, 20m, 17m and 15m from the 2.810m high Mount Roraima from Apr 16-18. Mount Roraima marks the border between Venezuela, Brasil and Guyana. Their QSL manager is W4SO.

ZA - ALBANIA
Franck,ZA/F4DTO, and Patrick,ZA/F4GFE, will be QRV from Elbasan/Albania in SSB on 40m-10m from Apr 15-24. They will run 100 watts into Monoband dipoles. QSLs direct or via the French bureau to their homecalls.
For more information check their website http://monsite.orange.fr/f4dto

9Y - TRINIDAD AND TOBAGO, SA-011
Rolf,9Y/DL2DBE, is active from San Fernando on Trinidad (SA-011). He is working on 30m-6m during his evening hours until the end of April. QSLs via DJ5BWD, bureau ok.

PUERTO RICO, SPECIAL EVENT STATION
As part of the activities to commemorate the life of the first Puerto Rican governor, the Radio Operadores del Este will activate the special event station KP3RE on Apr 18 from the Jesus T. Pinero house museum in Canovanas/Puerto Rico (NA-099). They will be on the air from 10m-40m from 1300-1900 UTC in PSK31, SSB and possibly on CW. They will also be commemorating the World Amateur Radio Day 2010. Jesus T. Pineiro was the first governor of Puerto Rican origin in 1946. One of his hobbies was Amateur Radio using the call 4KT and he was also co-founder of the Porto Rico Radio Club in 1918. QSLs direct or via bureau to KP3RE.

UKRAINE, SPECIAL EVENT STATION
The Radio Club Stakhanov (UR4MWN) will activate the nature reserve Luhanskyi signing EM0MFF in CW and SSB on 80m-10m from Apr 16-18.
QSLs direct or via bureau to UX7MA.

URUGUAY, SPECIAL EVENT STATION
Ricardo,CX7ABK, will use the special callsign CV7G in SSB on 20m/40m
from Apr 17-19. This activity remembers the "33 Orientals" which was
a small group of revolutionaries who induced the founding of the state
Uruguay. See also: http://en.wikipedia.org/wiki/Juan_Antonio_Lavalleja
Special QSLs are available from CX7ABK.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Apr 16/17: Holyland Contest
Apr 17/18: YU DX Contest, CW
Apr 17: European Sprint Contest
Apr 17: ES Open Championship
Apr 17: TARA Digital Prefix Contest

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:
AF-006, VQ9, Diego Garcia Island: Jim,ND9M (VQ9JC), is active as VQ90JC
from Diego Garcia for the next four months. QSL via homecall.

NA-182, VE8, NWT (Inuvik Region) East Group: John,VE8EV, plans an activity
from Greens Island (CisA-new) signing CK8G from Apr 15-20. QSL via HC.

SA-084, HK4, Choco Division South Group: Pedro,HK3JJH, will be QRV as 5K4T
from Playa Blance Island (only in SSB on 7150 or 14260 kHz) from
Apr 16-19. QSL via homecall (direct/bureau).

278. Re: GPS signal disappears

Newsgroup: rec.radio.amateur.misc
Date: 2010-04-13 23:46:42 UTC
From: Gary Smith <vkthree@gmail.com>
Message-ID: <4bc50266$0$8836$c3e8da3@news.astraweb.com>
Source record: 5997

Thanks Dave, that's an interesting story aboout the harbour interference.
I'll be getting some clipon ferrites soon hopefully and putting them on some
leads. I will move the head unit and see what happens there as well. Thanks
for your input, i will post back some results.

Gary

The ARRL Contest Update

Published by the American Radio Relay League
**********************************************

April 14, 2010

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- Take A Rookie To Bat - the ARRL Rookie Roundup
- VHF and EU Spring Sprint Contests
- FLONNEMI QSO Party (FL, VE3, NE, and MI)
- WRTC2010 - New Competitors and Referees Announced
- WA7BNM Online Contest Calendar - Major Upgrade
- Cruise the Polar Path For Yourself
- ARRL Sweepstakes Results Packages Online
- Stubbing Out Hardline Remnants
- SDR Tutorial Web Site
- A Cornerstone Is Laid

NEW HF OPERATORS - THINGS TO DO

If you've only been licensed for a short time, why not give the ARRL
Rookie Roundup a try? Even if you don't qualify as a Rookie, you
grizzled veteran you, get on and hand out some contacts to help new
operators enjoy the bands, just as you did, way back when! And don't
forget to give six meters a try in this contest, too.

BULLETINS

There are no bulletins in this issue.

BUSTED QSOS

My understanding of pipe and tubing sizes was cross-threaded (don't
hire me to do your plumbing) and corrected by Rick N6RK and Cullen
K5HAE. The real story can be found on-line in many places, such as the
Wikipedia entry on pipe sizes
<http://en.wikipedia.org/wiki/Nominal_Pipe_Size>. And that QST story by
W6ISQ, its title is "Planning Ahead" as K8DD gently pointed out. Maybe
there is a message in that mixup!

CONTEST SUMMARY
```

Complete information for all contests follows the Conversation section

Apr 17-18

- ARRL Rookie Roundup--Phone
- CWops Test
- Holyland DX Contest
- EU Spring Sprints--Phone
- EU EME Contest (2.3 GHz)
- TARA Skirmish Digital Prefix Contest
- ES Open HF Championship
- Michigan QSO Party
- EA QRP Contest--CW
- Ontario QSO Party
- YU DX Contest--CW
- VHF Spring Sprints (222 MHz, Apr 20)

Apr 24-25

- John Rollins Memorial DX--CW
- EU EME Contest (432 MHz, 5.7 GHz)
- Ten-Ten Spring CW Contest
- SP DX RTTY Contest
- Helvetia Contest
- QRP To The Field--CW
- Florida QSO Party
- Nebraska QSO Party
- WSJT Sprint

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

With the July event dates coming soon, the WRTC-2010 <http://www.wrtc2010.ru/> committee has made a few announcements. First, Don G3XTT has been added to the WRTC Judging Committee. Don's long experience with the IOTA Contest makes him a natural choice. Stefano, IK2QEI has been named Team Leader for Team EU#1, replacing Matteo IZ3EYZ who resigned for personal reasons. Other personal circumstances have led to new teammates: N6AA is the new partner of K7RL, HA6PX is now paired with HA3OV, and HI3TEJ is looking for a new teammate. Replacing VE7AHA and ZS4TX as Referees, N2GA and RA9USU have been selected from the list of back-ups. It was also learned that corporate sponsor Samsung Russia will be providing 100 LCD monitors for use in the WRTC stations - thank you, Samsung! Look for the WRTC2010 booth at Dayton - committee member Andy UA3AB and North American representative Krassy K1LZ will be there. Complete information on these WRTC2010 updates is available on the event's Web site.

Rookie Roundup Update - more information about how to use the Getscores reporting tools is being added to the Rookie Roundup blog <http://rookieroundup.wordpress.com/> every day. PDF copies of a paper log sheet (often the best way to get a new contester started) and a worksheet for calculating scores and checking off multipliers (Remember how much fun that was on the Sweepstakes summary sheet?) are also

available on the blog. The registration process will be ready shortly and the Getscores Universal Score Uploader is ready right now, with complete installation instruction on the blog.

Two new free Webinars in the Potomac Valley Radio Club's <http://www.pvrc.org/> popular series have been announced. On April 14, Tim Duffy K3LR hosts "Contesting Activities at Dayton 2010 <https://www2.gotomeeting.com/register/910952307>" An overview of contest-related activities including HARA, the flea market, dinners, suites, photos, hotels, CTU, pile up contest, pizza parties and other points of interest. On May 25, Veteran VHF contester and QST's The World Above 50 MHz column editor Gene Zimmerman W3ZZ shares the secrets of successful VHF Contesting in "VHF Contesting - What to Do and How To Win <https://www2.gotomeeting.com/register/978706411>". Registration is also available on the PVRC home page by and clicking on Upcoming Webinars. Previous Webinars are archived under the Recorded Webinars link. (Thanks, Ken K4ZW)

Thursday Night Contesting resumes Thursday evening with the fast and furious ten weeks of the NCCC Sprint Ladder <http://www.ncccsprint.com/> (NSL), now in its seventh year. The contest's controversial dupe rule is history due to higher participation. This Spring '10 edition of NSL will be a four-band CW affair on 20-160 meters from 0230-0300Z (Friday). For those who wish to learn the sprint format, or who may be wary of the 30-40 wpm speeds that are typical of NSL, Mike W9RE, sponsors the Slow NS (SNS) starting at 0200Z, on the same bands and format but with code speed at 18-25 wpm. (Thanks, Bill N6ZFO)

Joe W4TV writes to announce micro2R <http://www.microham-usa.com/Products/micro2R.html>, the newest two-radio controller for SO2R operation from microHAM <http://www.microham-usa.com/>. The controller is designed for any amateur with two transceivers and any control interface. It provides automatic or manual control of headphone audio and transmitter selection, and is compatible with the automatic modes of the most popular contest logging programs. micro2R uses either USB or LPT control, includes a proven WinKey 2 CW keyer, support for ether electret or dynamic microphones, a UART compatible FSK port for each radio, and built-in support for the voice keyer capabilities of the most popular contesting software.

Bob Locher W9KNI has a new book published by Idiom Press <http://www.idiompress.com/>, entitled "A Year of DX <http://www.idiompress.com/yearofdx.php>" The story follows Bob as he makes an all-out effort to win the 2008 running of CQ Magazine's DX Marathon <http://dxmarathon.com/> -- a one-year event during which a contestant works as many countries and CQ zones as possible on any band or mode. The chase is like telescoping a career of DX'ing into a single year. While the 280-page book chronicles Bob's efforts in the pileups and through the lonely watches of the night, it also contains

discussions of what DX'ing is all about, the possibilities of DX'ing in low sunspot periods by Jim Henderson KF7E, a chapter on optimizing SSB transmit audio by Hall of Famer Chip Margelli K7JA, a discussion of the ideal linear amplifier, and much more. If you enjoyed Bob's "Compete DX'er", you'll find this book equally worthwhile.

The MicroHams Amateur Radio Club <http://www.microhams.com> is announcing the new date and time of its annual Ham Radio Digital Conference. Now in its 4th year, the MicroHams Digital Conference is moving from March to September 18, 2010. The event will be ARRL-sanctioned and include speakers covering a diverse range of topics in the digital realm of Amateur Radio. The Digital Conference will be held on the Microsoft Campus in Redmond, Washington. To keep track of the conference announcements, follow the Digital Conference Blog <http://www.microhams.com/digitalconference>. (Thanks, Kenny KU7M)

It's so hard to keep up with all the reflectors and interest groups in ham radio, so when a time management tool like the fi-ni report's cq-contest reflector schedule <http://fi-ni-report.blogspot.com/2010/03/cq-contest-schedule.html> comes along, I jump right on it! Glad to be of service!

Hams love a good map and a map-making tool attracts them (well, your editor, anyway) like flies to honey. Tom K5RC found a link to NS6T's azimuth mapmaking Web site <http://ns6t.net/azimuth/azimuth.html> - it's easy to use and the price is right! Enter your location, tell it how far to extend the map's outer reaches and back comes a PDF map that will look great right above the rotator control box! The map's coverage can be all the way to the antipode (great for HF DXing) or a smaller radius for local or regional coverage.

I had no idea that there were such coffee experts reading the Contest Update! Another suggestion for making it through a long contest night is to switch to Russian Tea. You can find this sort of tea in various gourmet food stores. Actually, just switching beverages can provide an additional bit of novelty to keep one's brain engaged. (Thanks, Jim W1EQO)

CW Skimmer v1.6 <http://groups.yahoo.com/group/dxatlas_group/message/1848> has been released! The upgrade improves the management of call signs and the ability to distinguish between stations calling CQ and those responding. (Thanks, Alex VE3NEA)

Getting a 1-by-1 call sign is a popular way of combining a special event with contesting, but these assignments are temporary. How can you find out who is responsible for a specific call in past operations? John K1ER points us to the 1x1 Special Event Call Signs online database <http://www.1x1callsigns.org/>. Click the hyperlink "One by One Database", enter the call and click the Search button. You'll get a complete history of that call sign with a "details" link leading to the responsible individual or organization's contact information.

Listening for Pacific AM radio stations might be a good way to to check propagation in the hours before sunrise, depending on where you live. Nick VE7DXR suggests the Pacific Asian Log <http://www.radioheritage.net/PAL.asp>. You can either check it out online or download a PDF file. The Radioheritage Foundation appreciates a donation, but it's not required. Medium wave listening clubs such as the International Radio Club of America <http://www.ircaonline.org/> or National Radio Club <http://www.nrcdxas.org/> may also provide pointers.

The editors of Finnish contesting magazine PileUP! are asking for your contest-oriented articles, stories, opinions, and photos, including humor! Send your contribution by May 10, 2010, to Ilkka OH1WZ <oh1wz@sral.fi>, Esa OH7WV <oh7wv@sral.fi>, or Kim OH6KZP <kim.ostman@tut.fi>.

>From the Amateur Radio Newsline <http://www.arnewsline.org/> for 1 April, we learn that the Consumer Electronics Association says many consumers are unaware of local options for recycling unused consumer electronics products. The CEA maintains a Web site <http://www.mygreenelectronics.org/> to find electronics recycling opportunities in a specific area and other information as well. This is a great way to find out where to properly dispose of that old analog TV set, used up household batteries, broken electronic devices, etc.

The 2010 Dayton Hamvention RTTY Forum (May 15 at noon in Room 3) will feature a program on RTTY From the Stanford University Amateur Radio Club Station W6YX. Stanford alumnus and club member Mark K6UFO, will discuss how the changes occurred and how the lessons learned can help individuals, and other school and club stations, increase their enjoyment of RTTY and RTTY contesting. (Thanks, Shelby K4WW)

Web Site of the Week - Bruce WA7BNM has performed a major upgrade to his online Contest Calendar <http://www.hornucopia.com/contestcal/index.html>. There are more ways of viewing contests, such as the very useful 8-day contest chart and graphic of when the contests run. Clicking the '+' to the left of a contest listing displays the rules for each contest! You can also customize the site for the contests you want to follow and there is historical information as well as RSS feeds and an iCal format output for your personal calendars. A tip of the Contest Update cap to 'BNM for another useful contesting tool.

WORD TO THE WISE

"The reason lightning doesn't strike twice in the same place is that the same place isn't there the second time." - Willie Tyler (Thanks, Ray ND8L)

==> SIGHTS AND SOUNDS

What does a signal see as it travels the polar path? Thanks to the astronauts aboard the International Space Station, you can find out! They have been taking a lot of pictures

<http://www.universetoday.com/2010/04/05/amazing-pic-iss-flys-through-aurora/>
lately and the recent solar storm caused some photographic aurora.

Why should you trade in that comfy old lineman's belt for a
full-body harness. Dave N4ZKF sent a link to a Gravitec video
<http://www.gravitec.com/about-us/GRAVITEC-VIDEOS.html> showing falls
into a waist belt and into a harness. Just click on the button that
says "Articulated Mannequin Drop Tests." Put your mouse over the lower
left of the screen and click on the arrow to start the interesting
video. Food for thought.

SO2R operators, take heart! Automation is just a stepper motor or two
away as shown in this microcontroller project video
<http://www.projectblah.info/propetcher>. Maybe these methods could be
adapted to the CW Skimmer? (Thanks, Rick KU0W and John KE7HCA)

Jean Shepherd K2ORS <http://en.wikipedia.org/wiki/Jean_Shepherd> was a
nationally-known radio host and screenwriter during the latter half of
the 20th century and you can hear Jean talking about his ham radio
hobby in a two-part interview In Part 1
<http://www.youtube.com/watch?v=22fl5JtoZXU&feature=related>, he talks
about getting his Class A license and Part 2
<http://www.youtube.com/watch?v=uR46E_WV6vc&feature=related> continues
the story. Greatly told and fun to listen! (Thanks, Barry W6YE)

==> RESULTS AND RECORDS

The full Web versions of the 2009 Sweepstakes CW and SSB writeups by
VE4XT and N2IC are now available at the ARRL's temporary Contest Branch
Web site <http://aptos.arrl.org/contests>. Each is a downloadable PDF
that contains an expanded writeup and all scoring tables. Printable
Line Scores and a PDF version of the QST article are also available.
When the new ARRL site is online, the scores database and LCR's will be
uploaded ASAP. Sweepstakes mugs and pins began shipping last week and
are being received. (Thanks, ARRL Contest Branch Manager, Sean KX9X)

The results for the 2009 WPX CW Contest
<http://www.cqwpx.com/results.htm> are now available and the online
score database and score records pages have also been updated. Contest
Director, Randy K5ZD notes that, "Log checking reports for the contest
are available by sending me an email <k5zd@cqwpx.com> with your call
and specifying CW or SSB."

For the first New York QSO Party <http://www.nyqp.org/> since the
mid-1980's, the final results for the 2009 edition are online. Contest
managers Paul K2DB/K2NNY and Rick W1TY are appreciative for the support
of the Rochester DX Association (RDXA) and the Western New York DX
Association (WNYDXA) in making the NYQP a reality.

OPERATING TIP

Late spring - early summer contests open a window of 20 meter
propagation (and 30 and 17 meters, too, on occasion) in the evenings

across northern polar paths. (Similar southern path enhancement occurs in late fall for our Southern Hemisphere friends.) Later in the season, increased absorption reduces signal levels on this path. With the rapidly improving solar flux levels, don't assume the higher bands are dead after dark as they have been over the past couple of years.

==> TECHNICAL TOPICS AND INFORMATION

Let's say you have some scraps of surplus CATV hardline - not long enough for antenna feed lines, but what ham could throw them away? David K1TTT suggests making stub filters <http://www.k1ttt.net/technote/techref.html#filters> out of them. Assume a velocity factor of 0.81 to 0.83 (or measure it with an antenna analyzer) and create your own set of high-Q RF filters. The lower loss of hardline, compared to flexible coax, will result in better cancellation of the undesired signal.

If you have a preferred or favorite graphic showing the state of the ionosphere, it is surely somewhere on this new and exhaustive compilation thereof, EA4FSI-28T1 HF Panel <http://www.ipellejero.es/hf/hfpanel.html#Estado_Ionosfera>. Enjoy! (Thanks, Diane NH6HE)

Beginning circuit designers need all the tutorial information they can get, such as the recent Electronic Design News (EDN) article "MOSFET Design Basics You Need to Know, Part 1 <http://electronicdesign.com/article/power/mosfet_design_basics_you_need_to_know_part_1.aspx>"
by Schimel. You can also find the article by browsing to the EDN home page <http://www.edn.com/> and searching for 'mosfet design basics'.

Solar cell technology continues to make incremental improvements on many fronts. The latest is somewhat counterintuitive - a new and cheaper way of turning the cell surface black. The Technology Review story "Black Silicon Makes Solar Cells Cheaper <http://www.technologyreview.com/energy/24968/>" describes the process and why the black surface improves cell efficiency.

Residents of rural areas and Field Day antenna planners might be interested in using the ARRL's online QST archive to read the Aug 1956 article, "Multiple V Beams - High Gain In All Directions With Only Four Wires". The clever design uses some relays and one unusual V beam to cover the globe sans rotator. Old-timers will be surprised to learn the author's name and, especially, his call sign! (Thanks, Chuck W0DLE)

Why buy the fancy "lawn staples" to hold down radials (or sod or hose or anything else, for that matter)? Armed with a stout wire cutter, you can make hundreds from roll of galvanized or aluminum fence wire at a fraction of a cent per staple. Or use the even more inexpensive iron rebar tie wire that will rust quickly away without a trace. Regular hair bobby pins can also work in firm soil. (Thanks to the denizens of the Towertalk <http://lists.contesting.com/mailman/listinfo/towertalk>

email reflector)

Daniel K7DGL notes a new iPhone app, "Allocations <http://itunes.apple.com/us/app/allocations/id345185320?mt=8>", that places the FCC frequency allocation reference database at your fingertips. The iPhone could be an emerging platform for all sorts of wireless-over-wireless applications.

Two interesting articles at Physorg <http://www.physorg.com/> sparked my interest this week. The first is "Magnetic 'ropes' tie down solar eruptions <http://www.physorg.com/news190273764.html>" including an interesting video. With Cycle 24 heating up, we can expect more hiccups from the Sun. The second is a boon to QRPers everywhere - "Record measurement of extremely small magnetic fields <http://www.physorg.com/news190312262.html>".

It's that time of year again! Every sporting goods store across the land is running sales on outdoor items and that includes such ham-friendly items as tackle boxes (great for small tools and parts), fishing poles and line that can hold up an antenna, coolers and "stuff sacks" for lightweight tool and equipment storage, and the list goes on. Why not take a trip through the aisles with an eye towards the ham shack?

If you live near an airport, putting up a tower takes on additional requirements for avoiding interference with air traffic. Here's your first stop, the FCC TOWAIR <http://wireless2.fcc.gov/UlsApp/AsrSearch/towairSearch.jsp> Web page. You can get your exact geographic coordinates from Geocoder <http://geocoder.us/> and your elevation from Veloroutes <http://veloroutes.org/elevation/>, for example. Should the results indicate a conflict (or a near conflict), the airport manager can put you in touch with additional resources. Obstruction evaluation can be done on-line with the FAA <https://oeaaa.faa.gov/oeaaa/external/portal.jsp>, as well. The applicable rules about who needs to file information about their towers is stated in CFR Title 14 Part 77.13 <http://www.access.gpo.gov/nara/cfr/waisidx_04/14cfr77_04.html>. (Thanks to the Towertalk Reflector <http://www.contesting.com/FAQ/towertalk> inhabitants)

With North American weather improving and the open road calling, can mobile operation be far behind? Of course not! The second question after "How do I get the power leads through the firewall?" is "How can I improve my antenna system?" For the seasoned improviser, this presents an attractive challenge as addressed by Cecil W5DXP in this eham.net article, "A Junkbox Bugstick for 20m-10m <http://www.eham.net/articles/23617>". I'm humming "On The Road Again"...how about you?

Technical Web Site of the Week - Here's a straightforward, nicely-illustrated introduction to Software-Defined Radio

<http://www.dh1tw.de/understanding-the-sdr-concept> by Tobias DH1TW. It makes for a good introduction to the subject and more advanced treatments of the subject, including some of the other SDR articles on the site. (from AMSAT <http://amsat.org/> bulletin ANS-094)

==> CONVERSATION

A Cornerstone Is Laid

Back in the early 1960's, DXing and DX-peditioning were in the process of taking the modern form that we know today. Building from Bob Denniston W0DX's "Gone-Waki" expeditions in the late-1940's, the sophistication of the operations and the difficulty of travel began to increase. It was clear that word-of-mouth and volunteer funding of these activities would soon be insufficient. As a result, hams formed non-profit foundations such as the Northern California DX Foundation <http://www.ncdxf.org/> (NCDXF) and the International DX Association <http://www.indexa.org/> (INDEXA) to assist DX-peditioners with funding, equipment, sponsorship, and materials. Over the past forty years, this model has proven to be quite successful and dozens of foundations now exist.

While there has always been some overlap between DXing and contesting, radiosport as it is now conducted has grown to become a major segment of ham radio in its own right. At one time, contests drew a few hundred participants, but it is now routine for the call signs of more than 10,000 different stations to appear in the contacts of major events. Paper log sheets have given way to electronically-filed logs that are automatically scanned and compiled into databases for sophisticated log-checking. Sponsors of these competitions rely on volunteers for much of the adjudication and administrative functions, volunteers that are often hard-pressed to keep up with the demands of the job. In addition, radio and operating technologies are advancing rapidly, placing even more demands on the sponsors to insure equitable treatment and judging of all participants and to accelerate the publication of results. In many ways, the worlds of radiosport today and early DXing yesterday share elements in common.

Just as in the world of DX, the power of independent organizations is coming to contesting with the welcome news of a new organization - the World Wide Radio Operators Foundation <http://www.wwrof.org/> (WWROF). Its founding members are leading operators you've worked many times if you're an active contester. These are the hams who have done a lot of the heavy lifting to create modern log processing and adjudication. The WWROF Board of Directors consists of:

- Doug Grant, K1DG - Chair
- John Dorr, K1AR - Vice-Chair
- Tom Lee, K8AZ - Secretary
- Ralph "Gator" Bowen, N5RZ - Treasurer
- Mark Beckwith, N5OT
- Bob Cox, K3EST

- Tim Duffy, K3LR

They are supported by an advisory committee consisting of:

- Ken Wolff, K1EA
- George Fremin, K5TR
- Randy Thompson, K5ZD
- Trey Garlough, N5KO
- Larry "Tree" Tyree, N6TR

The WWROF is dedicated to improving the skills of amateur radio operators around the world, utilizing education, competition, advancement of technology and scientific research, promoting international friendship and goodwill, and preparing them to better serve society in times of communication need. The means by which these goals are to be pursued? It's contesting!

Just as foundations to support DXing and other amateur radio activities operate, the WWROF has been created to assist contesting and contest-related activities. So that contributions by US-based supporters are tax-deductable the WWROF has applied for 501(c)3 status as an Ohio non-profit corporation I encourage readers to visit the WWROF Web site and learn more about the organization's mission and goals. Should you choose to make a donation of any amount, look for the PayPal button on the site's Donate <http://www.wwrof.org/content/donate> page.

As an example of technology needs the WWROF was formed to address, the CQ WW 160 Meter contest committee recorded the entire 2009 contest using five wide-band software-defined receivers located in several countries around the world. The cost to obtain the disc drives and ship the packages was approximately $500, using on-hand receivers. This experiment was successful but imagine extending the concept to a full six-band contest! Even with commercial and organizational sponsors, similar needs outstrip the limited budgets of even the largest contest organizers.

In the training area, many Contest Update readers have attended a Contest University session, either here in the United States or in Europe at the English and Italian versions of CTU. The Potomac Valley Radio Club's series of training videos has proven to be popular, too. Some of the expense of putting on these high-quality programs is borne by volunteers or through donations by event sponsors. As the events attract more attendance, expenses can outstrip these funds and donation-raising abilities. Helping to defray venue costs, video server costs, even printing costs - all are within the WWROF's mission. The goal is to train more operators to be better operators, making them better contesters, certainly, but better amateurs, in general.

The WWROF will support outside projects that further the WWROF's goals and mission, but may also initiate and conduct projects on its own. For example, the WWROF could act as a repository for training materials and

records that are re-used by a sequence of training event sponsors. The WWROF could develop operator-tracking databases and event rules or standards to be used by independent event sponsors. Much as the DX foundations do, equipment or software could be loaned to various contest and training efforts or donors could be matched with recipients. Following in the footsteps of the DX foundations, a parallel model for radiosport and contesters could be equally successful.

The Contest Update applauds the directors of this new organization for stepping up to the many challenges facing ham radio contests and event sponsors. However, its success can only be realized by your participation and support. Please take a look at the WWROF Web site and pass along this information to your friends and clubs. Get involved today!

73, Ward N0AX

==> CONTESTS

13 April through 26 April 2010

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

ARRL Rookie Roundup--Phone, from Apr 18, 1800Z to Apr 18, 2359Z. Bands (MHz): 3.5-28, 50. Exchange: Both calls, name, check, S/P XE# or "DX". Logs due: See Web. Rules <http://www.arrl.org/contests>

CWops Test--CW, from Apr 14, 1100Z to Apr 14, 2000Z and Apr 15, 0300Z to Apr 15, 0400Z. Bands (MHz): 3.5-14. Frequencies (MHz): 18 to 28 kHz above band edge. Exchange: Name, member number or S/P/C. Logs due: 2 days. Rules <http://cwops.org>

Holyland DX Contest--Phone,CW,Digital, from Apr 16, 2100Z to Apr 17, 2100Z. Bands (MHz): 1.8-28. Exchange: RS(T), serial or Israel district. Logs due: May 31. Rules <http://www.iarc.org>

EU Spring Sprints--Phone, from Apr 17, 1600Z to Apr 17, 1959Z . Bands (MHz): 3.5-14. Frequencies (MHz): 3.730, 7.050, 14.250. Exchange: Both call signs, serial, name. Logs due: 15 days. Rules <http://www.eusprint.com>

TARA Skirmish Digital Prefix Contest--Digital, from Apr 17, 0000Z to Apr 17, 2400Z . Bands (MHz): 1.8-28, 50. Exchange: Name, prefix. Logs due: May 17. Rules <http://www.n2ty.org/seasons/tara_dpx_rules.html>

ES Open HF Championship--Phone,CW, from Apr 17, 0500Z to Apr 17, 0859Z . Bands (MHz): 3.5,7. Exchange: RS(T), serial, dupes OK once/hour. Logs due: May 20. Rules <http://www.erau.ee/index.php?newlang=eng>

Michigan QSO Party--Phone,CW, from Apr 17, 1600Z to Apr 18, 0400Z . Bands (MHz): 3.5-28. Frequencies (MHz): CW 45 kHz from band edge,Phone 3.825,7.200,14.250,21.300,28.450. Exchange: Serial and MI county or S/P/C. Logs due: 30 days. Rules <http://www.miqp.org>

EA QRP Contest--CW, from Apr 17, 1700Z to Apr 18, 1300Z . Bands (MHz): 3.5-28. Exchange: RST, category, M if EA QRP member. Logs due: 30 days. Rules <http://www.eaqrp.com>

Ontario QSO Party--Phone,CW, from Apr 17, 1800Z to Apr 18, 0500Z and Apr 18, 1200Z to Apr 18, 1800Z . Bands (MHz): 1.8-28, 50,144, Frequencies (MHz): CW 30 kHz above band edge; Phone 1.870,3.735,3.860,7.070,7.260,14.130,14.265,21.260,28.360; VHF-SSB: 50.130,52.540,144.205,146.550. Exchange: RS(T), S/P/C or Ontario QTH. Logs due: May 19. Rules <http://cco.ve3xd.com/oqp>

YU DX Contest--CW, from Apr 17, 2100Z to Apr 18, 0500Z and Apr 18, 0900Z to Apr 18, 2100Z. Bands (MHz): 1.8-28. Exchange: RST and ITU zone. Logs due: 30 days. Rules <http://www.yu1srs.org.rs/dl/yudx/yudxmain.html>

John Rollins Memorial DX--CW, from Apr 21, 2300Z to Apr 22, 2300Z and Apr 24, 2300Z to Apr 25, 2300Z. Bands (MHz): 7,14. Exchange: RST, name, and S/P/C. Logs due: 30 days. Rules <http://www.antiquewireless.org%20>

Ten-Ten Spring CW Contest--CW, from Apr 24, 0001Z to Apr 25, 2359Z. Bands (MHz): 28. Exchange: Call, name, county & S/P/C, 10-10 number. Logs due: May 10. Rules <http://www.ten-ten.org>

SP DX RTTY Contest--Digital, from Apr 24, 1200Z to Apr 25, 1200Z . Bands (MHz): 3.5-28. Exchange: RST, serial, SP province. Logs due: May 25. Rules <http://www.pkrvg.org/zbior.html>

Helvetia Contest--Phone,CW,Digital, from Apr 24, 1300Z to Apr 25, 1259Z . Bands (MHz): 1.8-28. Exchange: RS(T), serial or Swiss canton. Logs due: 15 days. Rules <http://www.uska.ch>

QRP To The Field--CW, from Apr 24, 1500Z to Apr 25, 0300Z. Bands (MHz): 7-28. Exchange: RST, S/P/C. Logs due: Jun 1. Rules <http://www.zianet.com/QRP>

Florida QSO Party--Phone,CW, from Apr 24, 1600Z to Apr 25, 0159Z and Apr 25, 1200Z to Apr 25, 2159Z . Bands (MHz): 7-28. Frequencies (MHz): CW 7.025-7.035, 14.040-14.050, 21.040-21.050, 28.040-28.050; Phone 7.18-7.19,14.265-14.275, 21.340-21.350, 28.480-28.490. Exchange: RS(T), FL county or S/P/C. Logs due: 30 days. Rules <http://www.floridaqsoparty.org>

Nebraska QSO Party--Phone,CW,Digital, from Apr 24, 1700Z to Apr 25, 1700Z . Bands (MHz): 1.8-28, 50,144, Frequencies (MHz): CW: 1.805 and 35 kHz above band edge, Nov/Tech--10 kHz above band edge; Phone--1.915,3.865,7.265,14.265,21.365,28.465,146.460. Exchange: RS(T), NE county or S/P/C. Logs due: May 31. Rules <http://www.hdxa.net>

VHF+ CONTESTS

ARRL Rookie Roundup--Phone, from Apr 18, 1800Z to Apr 18, 2359Z. Bands (MHz): 3.5-28, 50. Exchange: Both calls, name, check, S/P XE♯ or "DX". Logs due: See Web. Rules <http://www.arrl.org/contests>

VHF Spring Sprints--Phone,CW,Digital, from Apr 20, 7 PM to Apr 20, 11 PM. Bands (MHz): 222. Exchange: Grid Square (6-character preferred). Logs due: 14 days. Rules <http://tinyurl.com/springsprints>

EU EME Contest--Phone,CW, from Apr 17, 0000Z to Apr 18, 2400Z. Bands (MHz): 2.3G. Exchange: TMO/RS(T) and "R". Logs due: Jun 12. Rules <http://www.dubus.org>

EU EME Contest--Phone,CW, from Apr 24, 0000Z to Apr 25, 2400Z. Bands (MHz): 432, 5.7G. Exchange: TMO/RS(T) and "R". Logs due: June 12. Rules <http://www.dubus.org>

WSJT Sprint--Digital, from Apr 24, see Web to Apr 24, see Web. Bands (MHz): 50,144. Exchange: NA report or NA grid. Logs due: Next Sat. Rules <http://www.ykc.com/wa5ufh/%20>

TARA Skirmish Digital Prefix Contest--Digital, from Apr 17, 0000Z to Apr 17, 2400Z . Bands (MHz): 1.8-28, 50. Exchange: Name, prefix. Logs due: May 17. Rules <http://www.n2ty.org/seasons/tara_dpx_rules.html>

Ontario QSO Party--Phone,CW, from Apr 17, 1800Z to Apr 18, 0500Z and Apr 18, 1200Z to Apr 18, 1800Z . Bands (MHz): 1.8-28, 50,144, Frequencies (MHz): CW 30 kHz above band edge; Phone 1.870,3.735,3.860,7.070,7.260,14.130,14.265,21.260,28.360; VHF-SSB: 50.130,52.540,144.205,146.550. Exchange: RS(T), S/P/C or Ontario QTH. Logs due: May 19. Rules <http://cco.ve3xd.com/oqp>

Nebraska QSO Party--Phone,CW,Digital, from Apr 24, 1700Z to Apr 25, 1700Z . Bands (MHz): 1.8-28, 50,144, Frequencies (MHz): CW: 1.805 and 35 kHz above band edge, Nov/Tech--10 kHz above band edge; Phone--1.915,3.865,7.265,14.265,21.365,28.465,146.460. Exchange: RS(T), NE county or S/P/C. Logs due: May 31. Rules <http://www.hdxa.net/>

==> LOG DUE DATES

13 April through 26 April 2010

April 13 - ARCI HF Grid Square Sprint, email logs to: contest@qrparci.org, paper logs and diskettes to: ARCI Spring QSO Party, c/o Jeff Hetherington, VA3JFF, 139 Elizabeth St. W., Welland, Ontario L3C 4M3, Canada. Rules <http://www.qrparci.org/content/view/8346/118/>

April 13 - Idaho QSO Party, email logs to: idqplogs@msn.com, paper logs and diskettes to: Edward Campbell, NX7TT, 157 N 3300 E, Rigby, ID 83442, USA. Rules <http://www.nx7tt.com/main_page_link/rules.htm>

April 13 - LZ Open 40m Sprint Contest, email logs to: LZ1GL@yahoo.com, paper logs and diskettes to: LZ Open 40m Sprint Contest, P.O. Box 830,

Sofia 1000, Bulgaria. Rules <http://www.lzopen.com/lzocc40/indexF.htm>

April 14 - NSARA Contest, email logs to: ve1pjs@rac.ca, paper logs and diskettes to: Peter J. Surette, VE1PJS, 55 Edgewood Drive, Truro, Nova Scotia B2N 1P1, Canada. Rules <http://nsara.ve1cfy.net/nsaracst.htm>

April 14 - RSGB Commonwealth Contest, Upload log at http://www.rsgbcc.org/cgi-bin/hfenter.pl, paper logs and diskettes to: RSGB-G3UFY, 77 Bensham Manor Road, Thornton Heath, Surrey CR7 7AF, England. Rules <http://www.rsgbcc.org/hf/rules/2010/rberu.shtml>

April 14 - Wisconsin QSO Party, email logs to: k9kr@tds.net, paper logs and diskettes to: Wisconsin QSO Party, West Allis Radio Amateur Club, P. O. Box 1072, Milwaukee, WI 53201, USA. Rules <http://www.warac.org/wqp/2010/wiqp_rules.htm>

April 15 - Classic Exchange, CW, email logs to: WQ8U@NC.RR.COM, paper logs and diskettes to: WQ8U, 104 W. Queen St., Hillsborough, NC 27278, USA. Rules <http://qsl.asti.com/CX/>

April 15 - Classic Exchange, Phone, email logs to: WQ8U@nc.rr.com, paper logs and diskettes to: WQ8U, 104 W. Queen St., Hillsborough, NC 27278, USA. Rules <http://qsl.asti.com/CX/feb10announcement.html>

April 15 - CLARA HF Contest, email logs to: va1yl@ns.sympatico.ca, paper logs and diskettes to: Helen Archibald, VA1YL, 25 Canard Street RR#1, Port Williams, NS V0P 1T0, Canada. Rules <http://groups.google.ca/group/clara-clarion/web/clara-contest>

April 15 - Virginia QSO Party, email logs to: vqp@verizon.net, paper logs and diskettes to: VA QSO Party, Call Box 599, Sterling, VA 20167, USA. Rules <http://www.qsl.net/sterling/VA_QSO_Party/2010_VQP/2010_VQP_Rules.html>

April 16 - SARL 80m QSO Party, email logs to: glevey@gmail.com, paper logs and diskettes to: West Rand Amateur Radio Club, PO Box 562, Roodepoort 1725, South Africa. Rules <http://www.sarl.org.za/public/contests/SARL20Contest%20Manual.pdf>

April 16 - SKCC Weekend Sprint, Post log summary at http://www.skccgroup.com/sprint/wes/wes-submit.html, paper logs and diskettes to: (none). Rules <http://www.skccgroup.com/sprint/wes/>

April 18 - UBA Spring Contest, 2m, email logs to: ubaspring@uba.be, paper logs and diskettes to: Michel Gerits, ON4CAQ, Mommestraat 69, B-3550 Heusden Zolder, Belgium. Rules <http://www.uba.be/sites/default/files/uploads/hf_contests/uba_spring_en.pdf>

April 20 - 9K 15-Meter Contest, email logs to: 9k2rr@9kcc.com, paper logs and diskettes to: Faisal N. Al-Ajmi, 9K2RR, P.O.Box 1124, Alfarwanya 80000, Kuwait. Rules <http://www.9k2hn.com/9kcc/9KCCRule.htm>

April 20 - RSGB RoPoCo 1, Upload log at
http://www.rsgbcc.org/cgi-bin/hfenter.pl, paper logs and diskettes to:
RSGB G3UFY, 77 Bensham Manor Road, Thornton Heath, Surrey CR7 7AF,
England. Rules <http://www.rsgbcc.org/hf/rules/2010/rropoco.shtml>

April 20 - QRP Homebrewer Sprint, email logs to: w2lj@verizon.net,
paper logs and diskettes to: Larry Makoski, W2LJ, 327 Clinton Place,
South Plainfield, NJ 07080, USA. Rules
<http://www.njqrp.org/data/qrphomebrewersprint.html>

April 24 - EA RTTY Contest, email logs to: rttycontest@ure.es, paper
logs and diskettes to: (none). Rules
<http://www.ure.es/contest/430-ea-rtty-contest.html>

April 25 - CQ WW WPX Contest, SSB, email logs to: ssb@cqwpx.com, paper
logs and diskettes to: SSB WPX Contest, CQ Magazine, 25 Newbridge Rd,
Suite 405, Hicksville NY 11801, USA. Rules
<http://www.cqwpx.com/rules.htm>

April 25 - EU Spring Sprint, CW, email logs to: eusprint@kkn.net, paper
logs and diskettes to: Dave Lawley, G4BUO, Carramore, Coldharbour Road,
Penshurst, Kent TN11 8EX, England. Rules
<http://www.eusprint.com/index.php?page=140%E2%8C%A9=g>

April 26 - Hungarian Straight Key Contest, email logs to:
hskc@ha8kux.com, paper logs and diskettes to: Provics Ferenc, P.O. Box
620, Szeged-1 H-6701, Hungary. Rules
<http://hskc.ha8kux.com/data/2010/Hungarian%20Straight%20Key%20Contest%202010.pdf>

==> ACKNOWLEDGEMENTS

ARRL Contest Update wishes to acknowledge information from WA7BNM's
Contest Calendar <http://www.hornucopia.com/contestcal> and SM3CER's
Contest Calendar <http://www.sk3bg.se/contest>.

The ARRL Contest Update is published every other Wednesday (26 times
each year). ARRL members may subscribe at no cost or unsubscribe by
editing their Member Data Page as described at

RAC Bulletin 2010-11E - RAC requests Industry Canada for 60m Spot frequency assignments.
2010-04-13

A formal request has been sent to the Director, Spectrum and Radio Policy, Industry Canada for consideration in authorizing for the Canadian Amateur Service the same five 5 MHz frequencies that are now authorized in the USA.

In addition, two spot frequencies are also requested for exclusive Canadian Amateur use. The ground work for this was established at previous meetings of the Canadian Amateur Radio Advisory Board (CARAB).

RAC anticipates this request will go through a lengthy due process of analysis and review at Industry Canada before being published as a Canada Gazette Notice for public comment. If all goes well, we may see authorization within a year.

Norm Rashleigh, VE3LC
RAC Vice-President Industrial Laison

==> COME EXPLORE THE NEW ARRL WEB SITE!

We'd like to welcome you to come and delve into the new ARRL Web
site <http://www.arrl.org/>. After more than two years of work, the
staff, officers and Board of Directors are excited to show you what's
in store.

As you peruse the site, you'll notice it's set up a bit differently
than the previous site. With the new site, we chose to focus on how you
use Amateur Radio, instead of by departments here at HQ. For instance,
in the "On the Air <http://www.arrl.org/on-the-air>" section, you'll
find information on contesting, awards, Logbook of The World,
international operating, special events, the QSL Bureau (both Incoming
and Outgoing) and more. And in the "Public Service
<http://www.arrl.org/public-service>" section, you will find
information on emergency communication, as well as served agencies and
involvement opportunities. We are aware that some parts of the site are
not yet available. We ask that you be patient while we try to bring
```

everything over to the new site.

<http://www.arrl.org> So go ahead -- take a look around! Make yourself at home on the Web site. We invite you to go ahead and set up your member profile while you're here. Once you log in, click on "Edit Your Profile <http://www.arrl.org/myarrl-account-management>" -- it's located right under the log-in area. Let us know what Amateur Radio activities you enjoy (and once you do, you'll see information about your chosen activities on our home page, personalized just for you). This is also the place where members can sign up to receive The ARRL Letter <http://www.arrl.org/arrlletter> and other e-newsletters, W1AW bulletins, license renewal notices, messages from your Section Manager and Director and more. You can join groups, add friends and even add a picture of yourself!

If you ever need help finding anything or if you encounter any problems, look for the "Having Trouble? <http://www.arrl.org/support>" link at the bottom of each page. Click it and report your problem; you will be contacted shortly with a solution. We hope you will enjoy this new Web site as much as we do here at ARRL Headquarters. Remember -- this is your Web site. Have some fun with it!

==> MIKE COREY, W5MPC, JOINS ARRL STAFF AS EMERGENCY PREPAREDNESS AND RESPONSE MANAGER

The ARRL is pleased to welcome Emergency Preparedness and Response Manager Mike Corey, W5MPC, to the Headquarters staff in Newington. Corey's major responsibilities include addressing the development and implementation of an organizational disaster response plan as well as an operational continuity plan, complete with supporting procedures and training. Corey also will play an integral part in the management of ARESï¿½, and in future negotiations with served agencies with whom ARRL shares or creates Memoranda of Understanding. An Extra class licensee and an ARRL Life Member, Corey comes to the ARRL with almost 20 years of experience with emergency communications. Licensed since 1988, he has been involved with SKYWARN since 1991 and has attended basic and advanced SKYWARN training. He is the co-author of the ARRL Storm Spotter's Handbook, which is due out next month. Read more here <http://www.arrl.org/news/mike-corey-w5mpc-joins-arrl-staff-as-emergency-preparedness-and-response-manager>.

==> FCC NEWS: FCC LOOKS TO LOWER FEES FOR VANITY CALL SIGNS

The FCC released a Notice of Proposed Rulemaking and Order (NPRM) on April 13 seeking to lower the fee for Amateur Radio vanity call signs. Currently, a vanity call sign costs $13.40 and is good for 10 years; the new fee, if the FCC plan goes through, will go down to $13.30 for 10 years, an decrease of 10 cents. The FCC is authorized by the Communications Act of 1934 (as amended) to collect vanity call sign fees to recover the costs associated with that program. The vanity call sign regulatory fee is payable not only when applying for a new vanity call sign, but also upon renewing a vanity call sign for a new term.

The vanity call sign fee has fluctuated over the 13 years of the current program -- from a low of $11.70 in 2007 to a high of $70 (as first proposed in the FCC's 1994 Report and Order). In 2007, the Commission lowered the fee from $20.80 to $11.70. The FCC said it anticipates some 14,800 Amateur Radio vanity call sign "payment units" or applications during the next fiscal year, collecting $196,840 in fees from the program. Read more here <http://www.arrl.org/news/fcc-looks-to-lower-fees-for-vanity-call-signs>.

==> SECTION NEWS: NOMINATIONS OPEN FOR KNIGHT DISTINGUISHED SERVICE AWARD

Each year, the ARRL offers an award to recognize someone who has served admirably as an ARRL Section Manager. The Knight Distinguished Service Award recognizes exceptionally notable contributions by a Section Manager to the health and vitality of the League. The first such award was presented to Joe T. Knight, W5PDY (now SK) in 2003 -- for whom the award was named -- in recognition of his exemplary service not only as the ARRL Section New Mexico Section Manager for more than a quarter century, but also for his willingness to share his knowledge and skills. For information on selection criteria and how to nominate a deserving Section Manager, click here <http://www.arrl.org/news/nominations-open-for-knight-distinguished-service-award>.

==> W1AW NEWS: HELP KEEP THE W1AW DREAM ALIVE

W1AW. It is the most famous call sign in the century-long history of Amateur Radio. To hundreds of thousands of radio amateurs, W1AW is synonymous with Hiram Percy Maxim -- the visionary who first recognized a need for a national network of Amateur Radio operators in North America, and who just a few years later saw a similar need for the worldwide federation that we now know as the International Amateur Radio Union (IARU). Amateur Radio without Hiram Percy Maxim would be like automobiles without Henry Ford or electricity without Thomas Edison. Without Mr Maxim, Amateur Radio probably would not exist today -- and if it did, it would be a pale shadow of the enriching endeavor we now enjoy.

The W1AW Endowment was established to provide a reliable source of funds for the operation and maintenance of the Maxim Memorial Station. "When we begin the budget cycle every year, it is a relief to know that some portion of the expenses related to W1AW will not have to compete for scarce budget dollars with other important ARRL programs," said ARRL Chief Executive Officer David Sumner, K1ZZ. "Thanks to generous members and supporters, the W1AW Endowment and the income it generates have grown." To help ensure that Hiram Percy Maxim's memory lives on to inspire future generations of radio amateurs, please consider making a donation to the W1AW Endowment. By doing so, you will help build a solid financial future for W1AW so that it can continue to fulfill its mission as Amateur Radio's flagship station. "When you visit ARRL and tour W1AW, you will see your generosity at work," Sumner said. "And

every time you hear 'Whiskey-One-Alfa-Whiskey' on the air, you'll know that you had a part in keeping the dream alive." For information on how you can help keep the W1AW dream alive, click here <http://www.arrl.org/news/help-keep-the-w1aw-dream-alive>.

==> ARRL FIELD DAY : ARRL PUBLIC RELATIONS COMMITTEE TO HOST FIELD DAY WEBINAR

The ARRL Public Relations Committee -- in conjunction with the ARRL's Atlantic Division -- will host a "webinar" -- an interactive Web-based seminar, designed to facilitate communication between a small number of presenters and a large remote audience using the Internet. On Thursday, April 22 at 9 PM EDT, join ARRL Media and Public Relations Manager Allen Pitts, W1AGP, along with ARRL Field Day Manager and members of the League's Public Relations Committee as they explain how to use ARRL Field Day to bring attention to Amateur Radio in your area. Learn how to set up a Field Day publicity calendar, invite elected officials and dignitaries, get proclamations issued, post your Field Day event on local media outlets and community bulletin boards, get audio and video PSAs on local radio and TV stations, how to use newer social networks like Facebook and Twitter and more to draw people to your Field Day event. Click here <https://www1.gotomeeting.com/register/932645064> to register for this informative, interactive Internet meeting.

==> ON THE AIR: MOONBOUNCE FOR EVERYONE -- COURTESY OF THE ARECIBO RADIO TELESCOPE!

Sending Amateur Radio signals to the Moon and back has never been easy. After roundtrip journeys of nearly half a million miles, even the most powerful signals generated by hams are exquisitely weak on arrival. Because of the equipment and expertise necessary for successful "moonbounce" operating, this facet of Amateur Radio generally has been confined to a small audience. But this coming weekend, even hams with very modest stations will have the opportunity to experience the thrill of moonbounce, thanks to the giant radio telescope at the Arecibo Observatory in Puerto Rico. Read more here <http://www.arrl.org/news/moonbounce-for-everyone-courtesy-of-the-arecibo-radio-telescope>.

==> SOLAR UPDATE

Tad "Though the Earth was cold and wet, the sky was clear and the Sun rose bright, placid and beautiful <http://www.literature.org/authors/dickens-charles/two-cities/book-01/chapter-03.html>"
Cook, K7RA, reports: Weakened sunspots faded away this week and we were buffeted with more geomagnetic instability, but without the dramatic geomagnetic storms of the previous week. The average daily sunspot numbers fell more than 20 points to 12.1, and the average solar flux dropped nearly three points to 75.1. April 11 saw no sunspots -- with group 1061 appearing April 5-10 -- and sunspot group 1062 showing April

12-14. By today, group 1062 should be gone and we may still see more days without sunspots. The predicted solar flux for April 15-18 is 75, 77, 78 and 79, then hitting 80 on April 19-24. The predicted planetary A index for April 15-19 is 5, 5, 12, 8 and 5. Look for more information on the ARRL Web site on Friday, April 16. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" brought to you by Charles Dickens' A Tale of Two Cities <http://www.literature.org/authors/dickens-charles/two-cities/index.html> (Chapter 3).

==> THIS WEEK ON THE RADIO

This week, the ARRL Rookie Roundup (SSB) <http://www.arrl.org/rookie-roundup> is April 18. The TARA Skirmish Digital Prefix Contest, the Holyland DX Contest and the EU Spring Sprint are April 17. The Michigan QSO Party, the Ontario QSO Party and the YU DX Contest are April 17-18. The Run for the Bacon QRP Contest is April 19. Next week, the 10-10 International Spring Contest, the SP DX RTTY Contest, QRP to the Field, the Florida QSO Party and the Nebraska QSO Party are April 24-25. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/special-events>.

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

Registration remains open through Sunday, April 25, 2010, for these online course sessions <http://www.arrl.org/courses-training> beginning on Friday, May 7, 2010: Amateur Radio Emergency Communications Level 1; Antenna Modeling; Radio Frequency Interference; Antenna Design and Construction; Propagation; Analog Electronics, and Digital Electronics. To learn more, visit the CEP Course Listing page <http://www.arrl.org/online-courses> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/arrlletter/.

```
RAC Bulletin 2010-012E Quinghai province earthquake Report #1
2010-04-15

The Chinese Radio Sports Association (CRSA) has asked that the
frequencies 7050 and 7060 KHz be kept clear for emergency traffic
following a devastating earthquake in Yu Shu district, Quinghai Province.

A number of Amateurs are already active in supporting the rescue and
recovery efforts including BG9UA, BG9UP and BG9UO. An emergency
communications team led by BG6CEV is flying to Quinghai today.

Your cooperation during this difficult time is very much appreciated.

73

Doug Mercer VO1DTM CEC
Vice President Field Services

Amateur Radio Newsline(tm) Report 1705 - April 16 2010

Amateur Radio Newsline report number 1705 with a release date of
Friday, April 16th, 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio responds to a devastating
earthquake in China, more on the ham radio activation following the
Mexicali earthquake, the FCC headquarters in Washington is evacuated
due to an alleged bomb scare, GAREC 2010 to be held in Curacao and s
mid-West radio club receives accolades for its work in public service
and emergency response work Find out which club it is on Amateur
Radio Newsline(tm) report number 1705 coming your way right now.

RESCUE RADIO: HAMS RESPOND TO CHINA EARTHQUAKE

Ham radio is responding to the China's Qinghai province earthquake.
The Chinese Radio Sports Association has asked that the frequencies of
7.050 and 7.060 MHz on 40 meters be kept clear for emergency ham radio
communications following a devastating shaker that hit the provinces Yu
Shudistrict.

The earthquake measuring 7.1 on the Ritcher scale occurred on the
morning of Tuesday, April 13th. It left 589 people dead, nearly
10,000 injured and 10,000 families needing to be resettled due to 99%
of houses in the area having sustained severe structural damage.

A number of radio amateurs are already active in supporting the rescue
and recovery efforts including BG9UA, BG9UP and BG9UO. The emergency
communication team of Anhui Amateur Radio Society, led by BG6CEV was
flying to Qinghai on April 15th to bring in much needed communication
equipment.

The Yu Shu diastrict is located in a plateau with temperatures fall to
-5 degrees Celcius making conditions bad for those without shelter as
well as hampering rescue efforts.

(BA1RB - CRSA Coordinator of the IARU Region 3 Disaster Communications
Conmmittee via Jim Linton VK3PC)

RESCUE RADIO: HAM RESPONSE TO MEXICALI QUAKE FOLLOW-UP

A follow-up to last weeks story regarding ham radio involvement in the Easter Sunday earthquake that rattled the city of Mexicali as well as the Imperial County, California, area. Bill Pasternak, WA6ITF, is in the newsroom with the latest:

--

According to Dennis Ambrose, WB6CGJ, hams in Imperial County immediately activated an emergency net on the San Diego Amateur Radio Association's 147.15 Mhz Mt. Laguna repeater. Ambrose, who is ARRL Assistant Section Manager for Imperial County says that landline and cellular telephone phone communications were not dependable and that electrical power was out in many locations.

Ambrose says that ARES and RACES members were among the first to arrive at the Imperial Emergency Operations Center. They handeled traffic regarding damage to buildings, bridges, roads, water treatment plants, and businesses. All of this was passed via amateur radio to the county Fire Chief and the director of the county's Office of Emergency Services.

SATERN, the Salvation Army Team Emergency Network, sent in operators from the San Diego, San Bernardino and Riverside counties to assist in communications for the shelter and mobile feeding units. It activated its SATERN Net using generator power and operated from one emergency shelter were twenty seven people stayed Sunday evening. This, due to extensive earthquake damage to their apartment complex.

Ambrose says that ham radio operators remained at their duty stations through Wednesday, April 7th when the county shifted to recovery status.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the newsroom, in Los Angeles.

--

Amateur radio operators, from ARES, RACES, SATERN, the American Red Cross, the Imperial County Irrigation District as well as individual hams not affiliated with any group took part over the three and a half days of emergency activation. There's s till no word from south of the border as to whether hams in Mexico were called out in response to this quake. (AD6VI, ARNewsline(tm))

**

RADIO THREAT: FCC EVACUATED DUE TO BOMB THREAT

A threat leads to the evacuation of the FCC's Washington headquarters. Norm Seeley, KI7UP, has the details:

--

The Federal Communications Commission was evacuated Wednesday, April 7th. This after what news sources report as an apparent bomb threat that forced staffers to outside the building in 90 degree heat for over two hours.

The building known as The Portals is located in Southwest Washington. It was evacuated around 9:30 a.m., according to FCC spokesman David Fiske. He said employees returned to the building around 11:30 a.m.

Throughout the afternoon, speculation in the media mounted that the FCC headquarters was evacuated because of a bomb threat. Details about the nature and timing of the threat were unavailable, though one source said staff was out for about two hours and that bomb-sniffing dogs were dispatched.

Fiske did not confirm that a bomb threat was the cause of the evacuation and referred inquiries to the Federal Protective Service. E-mail releases from the commission resumed mid-afternoon.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

According to the newsletter T V Business, bomb threats in Washington, D.C. are something of a regular occurrence. It notes a WTOP report that the Pentagon City Metro station was shut down briefly April 3rd for such a threat. Another was reported at World Bank headquarters in January. (RW, The Hill)

**

RESCUE RADIO: GAREC-2010 DATES ANNOUNCED

The Global Amateur Radio Emergency Communications Conference, or GAREC, will be held in Curacao, in the Netherlands Antilles on the 11th and 12th of October. The annual conference is for those engaged in providing emergency communications with this years theme being "Learning Through Practicing.".

The overall purpose of Global Amateur Radio Emergency Communications Conference is to exchange information and experiences between radio amateurs and groups interested in emergency communications. This years is gathering is being organized by the Dutch Amateur Radio Emergency Service and the IARU Netherlands Antilles national radio society VERONA.

The program is yet to be finalized however the organizers are keen to include first-hand accounts of emergency communications following the devastating Haiti and Chile earthquakes. More is on line at www.garec.net (VK3PC)

**

RADIO HONORS: LINCOLN CLUB HONORED

The Lincoln Amateur Radio Club has received the Nebraska Volunteer Group of the Year Award. This, at the Nebraska Impact Awards Luncheon in Omaha on, Friday, April 9th.

The award to the Lincoln Amateur Radio Club comes only about two weeks after it responded to a major telephone outage that affected south east

Nebraska. That story also was well covered by local, statewide and national press as wel as here on Amateur Radio Newsline.

The Lincoln Amateur Radio Club's Jeff Bennet, W&#65533;WKP, and ARRL Lancaster County Emergency Coordinator, Reynolds Davis, K&#65533;GND, were present to accept
the award. (K0AIZ)

**

RADIO LAW: FCC WANTS AUTHORITY TO LOWER VANITY FEE BY 10 CENTS

Still with FCC news, word that the regulatory agency has released a Notice of Proposed Rulemaking and Order seeking to lower the fee for Amateur Radio vanity call signs by 10 cents. Currently, a vanity call sign costs $13.40 and is good for 10 years. If the FCC's new fee structure is approved the new fee will go down to $13.30 for 10 years.

According to the ARRL, over the 13 years of the current program, the vanity call sign fee has fluctuated from a low of $11.70 in 2007 to a high of $70. The latter as first proposed in the FCC's 1994 Report and Order. In 2007, the Commission lowered the fee from $20.80 to $11.70 but its slowly been creeping upward ever since

The vanity call sign fee is payable both when applying for a new vanity call and also when renewing it for a new term. The FCC said it expects to receive some 14,800 amateur radio vanity call sign applications during the next fiscal year and collecting $196,840 in fees under the program.

MD Docket 10 dash 87 carries a commentary cutoff date of May 4th. Reply comments are due no later than May 11th. Instructions on how to comment on this or any other FCC action is available on the FCC Web site at http://www.fcc.gov/cgb/consumerfacts/howtocomment.html (FCC, ARRL)

**

RADIO LAW: FCC GRANTS DALLAS TEXAS AREA 97.113 WAIVER REQUEST

The Federal Communications Commission has granted a Part 97.113 waiver request by Mark Fulmer, KE5PHU, who is Preparedness Coordinator the Tarrant County Public Health Department in Dallas, Texas. This, to use hams employed by the agency in several upcoming bio-terrorism preparedness drills.

Scot Stone is the Deputy Chief, of the Mobility Division of the FCC's Wireless Telecommunications Bureau. In granting the request Stone wrote that the public interest is served in facilitating the April 16, May 21, June 18, July 16, August 20, September 17, October 15, November 19, and December 17 public safety exercises and thus warrants this limited waiver of Section 97.113(a)(3). The waiver permits Fulmer and a dozen other named hams to take part in these monthly drills. (FCC)

THE BPL WAR: MANASSAS VA TO END BPL SERVICE JULY 1

It's a big victory over QRN. This with word that the once highly touted Broadband over Powerline experimental project in Manassas. Virginia, will soon be no more as the Manassas City Council votes to discontinue the service as of July 1st. Amateur Radio Newsline's Bruce Tennant, K6PZW, reports:

--

The Manassas City Council's action came soon after the Manassas Utilities Commission recommended it do so. Even with all of the pre-publicity it had received, BPL in Manassas proved to be what is best described as a flawed business plan. While the basic concept of using existing utility lines to also transmit broadband data seemed good at the outset, it never really gained a favorable level of subscribership. By the time the vote to discontinue the service came, BPL in Manassas was only serving about 560 residents and businesses.

In its report to the City Council, the Manassas Utilities Commission said that the total revenue brought in by BPL for the current Fiscal Year was only about $186,000. On the other hand, the expense of keeping up the city owned system was costing the ratepayers more than $351,000. This resulted in a net loss of almost $166,000 to keep the system in operation.

The July 1st termination date was chosen to give current BPL subscribers about three months to switch to other Internet Service Providers. Since its inception, the BPL system has been a thorn in the side of hams and SWL's in Manassas by raising the overall noise floor of most of the high frequency bands, and making all but the strongest radio signals impossible to hear.

For the Amateur Radio Newsline, Im Bruce Tennant, K6PZW, in Los Angeles.

--

The Manassas decision to shut down its BPL system tends to prove once again what critics in the financial world have been saying for years. That being Broadband Over Powerline may look good on paper but in the world of finance it really is a flawed business plan. (ARRL)

**

RADIO POLICY: FCC CITES IPAD AS ANOTHER REASON FOR BROADBAND SPECTRUM

The FCC is using the high level public response over the release of Apple's iPad to put in a plug for finding more spectrum for wireless broadband use. In a blog posting on April 2nd, the FCC's chief spectrum policy analyst, Phil Bellaria teamed with deputy Wireless Bureau Chief John Leibovitz to pointed to the long lines at Apple stores as evidence that broadband is going mobile fast and in a big way.

According to Belllaria and Leibovitz, more and more Americans seemingly do not want to be tethered to a desktop computer or even a laptop. They want a light mobile device they with which they can curl up on the sofa with to watch an online movie, stow in a backpack for subway reading, or pass around the office with the latest vacation pictures. Belllaria and Leibovitz say that the broadband connections that enable this flexibility are wireless and points out the need for more spectrum for mobile broadband that the FCC has identified in the National Broadband Plan.

They point out that many of the iPads currently rely solely on WiFi to connect to the Internet. They said that the FCC should know before long what the impact of the iPad will have on spectrum use. (Published Reports)

**

RADIO LAW: RAC FILES FOR 60 METER CANADIAN ALLOCATION

Radio Amateurs of Canada has filed a request with telecommunications regulator Industry Canada for some 60 meter spot frequency assignments. The formal request was sent to the Director, Spectrum and Radio Policy, for consideration in authorizing for the Canadian Amateur Service the same five 5 MHz frequencies that are now authorized in the United States. In addition, two spot frequencies are also requested for exclusive Canadian amateur use.

The ground work for this was established at previous meetings of the Canadian Amateur Radio Advisory Board Radio Amateurs of Canada anticipates this request will go through a lengthy due process of analysis and review at Industry Canada before being published as a Canada Gazette Notice for public comment. If all goes well, Canadian hams could see an authorization to this spectrum within a year. (VE3LC)

**

ON-LINE EDUCATION: TYCO OFFERS FREE ELECTRONICS COURSES

Tyco Electronics has launched a free web-based training program aimed at designers of electronic and electrical equipment. From electrical basics to detailed descriptions of circuit protection strategies, Circuit Protection University provides a suite of practical, self-paced tutorials.

The site launch has been nick-named CPU and includes an overview of circuit protection devices and tutorials on overcurrent and overvoltage protection techniques. Additional courses in coordinated circuit protection and I/O port protection are now also available. Most important the training program also includes real world examples of circuit protection solutions for consumer electronic devices. More can be found at

http://go.bluevolt.com/CoBrandTemplate/home.aspx?brand&#65533;co (PSD)

**

ON THE NET: ARRL LAUNCHES NEW WEBSITE

The newly redesigned ARRL website is up and running and those visiting it have given it a big thumbs up. Still located in cyberspace at www.arrl.org, the new look makes navigating the site a breeze while at the same time striking what appears to be an almost perfect balance between content and advertising.

Among the most welcome changes are the click-to buttons at the very top of the page. A single mouse click navigates the user to such topics as Licensing, Technology, a Membership area and much more. In all there are eleven instant access buttons including one to bring you back to the suites home page.

A welcome carry over from the old ARRL web design was the decision to keep the latest news right on the home page as headlines. To read more you just click on the story and the full text appears almost instantly.

The new website was more than two years in the masking. Rather than our trying to describe it, you really need to visit it yourself. Just take your web browser to www.arrl.org and then click around. (ARRL)

**

ON THE NET: APRIL EME NEWSLETTER NOW AVAILABLE FOR DOWNLOAD

The latest issue of the 144 MHz EME Newsletter is now available for download. Articles in this edition include coverage of operations from the Maldives, upcoming and current DXpeditions including Earth-Moon-Earth communications and the April Moon Graph. It and past issues are available on line at www dot df2zc dot de slash newsletter. (VHF Reflector)

**

HAM RADIO ON THE NET: UPDATED ARECUIBO INFO NOW ON LINE

And Russ Pillsbury, K2TXB reports over the VHF Reflector that he has now finished upgrading the Arecibo E-M-E coverage web pages. Russ says that the added information will hopefully answer most questions abut the upcoming operation using the 1000 foot dish on April 16, 17, and 18. The information is on line at www dot k2txb dot com. (K2TXB)

**

HAM HAPPENINGS: INTERNATIONAL MUSEUMS WEEKENDS IN JUNE
The 2010 International Museums Weekend special event will again be split between two weekends. The first half of the event is slated for the 19th and 20th June while part two takes place on June 26th and 27th. M1BYT, who is organizing this world-wide event is asking that all those intending to take part should register their museum via e-mail to harry.m1byt (at) tiscali (dot co (dot) uk. Full details of the event can be found on the

International Museums Weekend can be found on-line
at www.ukradioamateur.co.uk/imw.
(GB2RS)

**

THE SOCIAL SCENE: OH-KY-IN ARS CELEBRATES ITS 50th YEAR

And a happy 50th anniversary to one of Newsline's long time support groups. The OH-KY-IN Amateur Radio Society celebrates its 50th year of existence in 2010. We know that you join with us in congratulating them on reaching this very important milestone. The name OH-KY-IN is an acronym derived from the sates of Ohio, Kentucky and Indiana which are the served by this group. (ARNewsline(tm))

**

THE SOCIAL SCENE: EMCOMMWEST PRE REGISTRATION CLOSES APRIL 23

And there's only a few days left to pre-register for the west's annual ham radio emergency communications event. Don Carlson, KQ6FM, is in Reno Nevada with the details:

--

Advance registration for EmcommWest in Reno is now in the final days, closing on April 23. The ARRL Emergency Communications specialty convention will be held at the Grand Sierra Resort Hotel in Reno Friday April 30 through Sunday May 2.

Some of the topics this year will include Simplex exercises, VOIP, Digital networks, effective communications between CERT and ARES, incident responses, public relations and setting up training classes. There will also be a full day devoted to classroom teaching of the latest ICS courses in addition to the Saturday night banquet, featuring ARRL CEO Dave Sumner, K1ZZ.

All of the information and registration is available online at www.emcommwest.org.

For the Amateur Radio Newsline, I'm Don Carlson, KQ6FM, in Reno.

--

Again, that website is www.emcommwest.org. (EmcommWest)

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

EMERGING TECHNOLOGY: FIRST SOLAR ONLY POWERED D-STAR SYSTEM ON THE AIR

What's believed to be the worlds first and only D-Star solar powered repeater has come on the air from Belgium. According to the Royal Union of Belgian Radio Amateurs the ON0CPS system was recently put into operation by ON4BK and is designed to operate entirely on solar energy.

The new D-Star repeater operates with an input channel of 431.9625 MHz with its output on 439.5625 MHz. According to the society, during the day there is usually enough sunlight to keep the machine in operation while simultaneously charging its two 120 Amp Hour batteries which power it at night. So far the repeater has been running over a month on this solar power alone with no failures or complaints.

More is at the ON4BK website located at http://tinyurl.com/yyajoxx (UBA)

**

WORLDBEAT: VK AND ZL ANZAC DAY

Hams in Australian and New Zealand will be operating on ANZAC Day on Sunday April 25. This is an amateur radio salute to the servicemen and women in the many conflicts worldwide. Several museum ships, including the H-M-A-S Whyalla will be taking part in this event. More about ANZAC Day can be found at
http://www.wia.org.au/newsevents/news/2010/20100406-1/documents/WARC_%20ANZAC%20DAY_7.pdf
or http://tinyurl.com/y4z28kq (WIA News)

**

WORLDBEAT: AUSTRALIA ANNOUNCES DTV REPEATER WITH STEREO AUDIO

Australia now has a Digital Amateur Television repeater that has full stereo audio. The VK3RTV repeater on Mt Dandenong which services the Melbourne and Geelong areas now has dual channel sound on both its digital and analog inputs. About seven stations transmitting digital DVB-S uplink have the capability to transmit stereo sound through the machine. Peter Cossins VK3BFG advises that experiments are also being conducted with Internet streaming with the British Amateur TV Club in the UK. (VK3BFG)

**

WORLDBEAT: SECOND AFRICAN WSPR BEACON TAKES TOM THE AIR

The second beacon using the new WSPR mode has gone on the air in Africa. Using the callsign 5X7JD the system is located in Masaka, Uganda and outputs 1 watt while cycling through 80, 40, 30, 20, 17, 15, 12 and 10 meters. This gives an overall cycle between WSPR transmissions returning every 16 minutes to a given band.

The beacon is composed of an embedded system based on a PIC microprocessor, a Direct Digital Synthesis chip and a MOSFET Power Amplifier with selectable filters all feeding a HyGain Av 18VS multi-band vertical

antenna. Time and location information are derived from an attached GPS receiver. You can read more about the station at www.hamradiosafari.com. (GB2RS)

**

HAM RADIO IN SPACE: AO-51 GOES SEMI-CTCSS

In ham radio space related news, Amsat Oscar 51's transmitter on 435.150 has been turned off and the 435.300 transmitter power output has been raised to near 2 watts output. Also, on Saturday, April, 10th the new continuous tone access routine was turned on. This cycle will turn the downlink on with an unsquelched uplink when it hears a 67 hz tone. The plan is to leave a squelch tail of several minutes, so the transmitter will stay on without hearing a tone for an interval of several minutes.

What does this mean for the average satellite user? First, if would be advisable to program in a 67 hz CTCSS tone if your radio supports tone access, but not absolutely required as long as someone else in the footprint does. It also means if you are the first person in the footprint you might not hear the satellite until after it hears 67hz for a few seconds. Reports from when the downlink turns on or off would be appreciated and go to ko4ma@amsat.org. (KO4MA)

**

HAM RADIO IN SPACE: ESTONIA TO LAUNCH HAM RADIO CUBE-SAT

The University of Tartu, in Estonia, has submitted a frequency coordination application to the IARU for an Amateur Radio CubeSat. Called ESTCube-1, the tiny bird would be a Low Earth Orbit satellite with UHF downlinks and a VHF telecommand uplink. It would also carry a camera to acquire images of Estonia for and will deploy a 10 meter conductive tether as a part of the development work of an electric solar wind sail. The projected launch for ESTCube-1 would be in 2012 although no launch opportunity has yet been confirmed. More on this Estonian ham radio in space project is on-line at http://tinyurl.com/yk66s2o. (ANS)

**

ON THE AIR: WIA CENTERIARY QRP CONTEST

Turning to the world of radiosports, the VK QRP Club will sponsoring a low power contest during May, This, to commemorate the Centenary of organized amateur radio in Australia.

All three grades of Australian license holders can join this one, provided they limit their output power to five watts CW and 10 Watts for AM and SSB. The contest will be on the 80 and 40 meter bands.

More details and the contest rules can be found on the Wireless Institute of Australia's website. Its in cyberspace at www.wia.org.au. (WIA)

**

ON THE AIR: CELEBRATING MORSE ARGENTINA

And members of the Grupo Argentina de CW will be active from Morse in Buenos Aires Province to commemorate the town's foundation birthday. The operation will take place from 1500 UTC on May 7th to 2000 UTC on May 9th. More details are on line at gacw.no-ip.org (LU1DZ)

**

DX

In DX, word that F5UOW, will stay on Reunion island through May 2nd. He will be active only on 20 meters signing portable FR until April 17th. He will then change his location and will show up as TO2R mostly in CW on 80 through 10 meters. QSL cards should be sent direct or via bureau to his home callsign.

ND9M is active as VQ9JC from Diego Garcia for the next four months. He reportedly prefers CW but also works in SSB and some of the digital modes. He also hopes to get the special call VQ90JC by the end of May in time for the CW portion of the WPX Contest. QSLs go to ND9M either direct or via the bureau.

SP2JMB is reportedly on Maritius signing 3B8SC. His operation is Morse only and he's expected to be operational through April 21st. QSLs via SP2JMB.

UA9YAB says that he plans to arrive in Mongolia on May 25th and will be operating all band mobile until June 2nd as JT9YAB using simple antennas and an emphasis on 50 MHz. If all works out as planned he will be find a location for a second trip for this fall focused 160 and 80 meter operation. QSL via UA9YAB direct only.

Lastly, here's one of those of you who hunt DX only on the bands above 50 MHz. I-2-S-V-A says that he will be active in late April and early May portable I-S-0 from Sardinia's grid square J N 40 U U using 2 meter weak signal modes. Hi operation will focus Meteor Scatter on April 24th and 25th. SSB and CW will take place on May 1st and 2nd. QSL I2SVA at his call book address.

(Above from various DX news sources)

**

THAT FINAL ITEM: PRODUCER DAVE BELL W6AQ LOOKING FOR FILM COPY OF "THE HAMS WIDE WORLD"

If you are old enough to remember back to when movies in school classrooms and on television were shown on film, then you also may remember that most non theatrical movies were shot and distributed on 16 millimeter film. Almost all of the early movies about ham radio were photographed on 16 millimeter including the 1969 Dave Bell, W6AQ, classic titled "The Hams Wide World."

Well Dave would like to restore that move and several others but so far no really decent prints of "The Hams Wide World" have been found. The only projectable one located so far is very faded. A video transfer done some 25 years ago used a film print that was severely scratched. A few months ago the ARRL was contacted to see if they might have a viewable print but none could be found.

Well, when "The Hams Wide World" went into distribution back about 40 years ago, it was a loan out program from what was then the ARRL Film Library. Its estimated that there were two to three dozen copies of "The Hams Wide World" in circulation, and in the off chance that one or two never got returned to League headquarters, we are turning to all of you. Especially any old timers who were responsible for getting programs for radio club meetings back in the early to mid 1970's. .

Perhaps you borrowed a copy of "The Hams Wide World" and forgot to send it back. Maybe its still sitting in your attic, closet or basement. If you do happen to have such a film print, Dave would love to borrow it for the restoration process.

You can contact Dave Bell, W6AQ, by e-mail to dbamovies@aol.com. He says that he would sincerely appreciate your help. (ARNewsline(tm))

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

Before we go, a reminder that the nominating period for the 2010 Amateur Radio Newsline Young Ham of the Year Award is now open. Each year, we here at the Amateur Radio Newsline in association with Vertex Standard Corporation -- the makers of Yaesu brand ham radio gear -- and CQ Magazine combine to honor a ham radio operator age 18 or younger for his or her contributions to ham radio or to society itself through ham radio.

All nominations and materials required by the official rules must be received by Amateur Radio Newsline no later than midnight on May 30th. Both "mail-in" and electronic submissions are being accepted this year. Full rules and a downloadable nominating form are now on our website at www.arnewsline.org. Just scroll down until you see "2010 Young Ham of the Year Awards Now Being Accepted" and click on the word "here" to download the directions and the form. You can also leave questions and comments on the official Young Ham of the Year Award page on Facebook dot com.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Don Wilbanks, AE5DW, saying 73 and we thank you for listening.

** Iceland (TF) Volcanic Activity any effect on 144 MHz ? **

>From noon today, all non emergency flights were grounded in the
United Kingdom due to ash that come from Iceland volcano eruption
have caused travel chaos. As a result, there are thousands of
travellers still stranded at home and abroad. Independent.co.uk
reported that ash from Iceland volcanic activity 2010 also hit North
European and Irish airspace. Beside own travel inconvenience we are
wondering if this cloud will have some effect on the propagation.
There might be enhanced scattering on heights of 5 to 6 kilometers.
Are there any experiences from those who might have tried?
SOURCE: Frank PA4EME, Team of MMMonVHF

** Memorial CT1WW (VHF-UHF-SHF)-Contest **

The Portuguese radio amateur club "Tertï¿½lia Radiomadorï¿½stica Douriense" organizes next 24 and 25 of April (from 14h00 UTC/Saturday to 14h00 UTC/Sunday) the V/UHF Contest "Memorial CT1WW" in memory of Tiago - CT1WW. The contest will be held in 50MHz, 144MHz, 432MHz and 1296MHz. The logs should be received, in EDI format, before 02 of May via email log"at"trd.qrmzero.com . Now that 6 m. E-Sporadic season just started this may be a good opportunity to do some VHF QSO's. The contest rules can be found in the club webpage http://trd.qrmzero.com, directly and in detail in english at http://trd.qrmzero.com/Regulamento_memorial_CT1WW_2010_ENG.pdf . Best regards,Carlos, CT1HSN on behalf of Tertï¿½lia Radioa. Douriense

UPDATE DXCC Jersey Activity by DH7FB & DF2ZC: It is less than two weeks time until Frank and Bernd will become QRV from Jersey DXCC on 20 April late afternoon UTC. The schedule is that we meet at DF2ZCï¿½s site on 19 April evening with Frank coming by car from Berlin (and Bernd from a family event in Flensburg JO44ST). After loading the car with all equipment we plan to leave around 2000Z via Belgium to Saint Malo from where the ferry goes to St. Helier/Jersey the next morning at 0600 Z. GS3PYE/p qrv from IO67NT during may 2010 - LATEST BLOG UPDATE: After a very successful Dxï¿½peditions in 2008 to the Island of Mull and in 2009 to the Island of Harris the Camb-Hams have decided return to Harris for another DXï¿½Pedition for 2010. First off this is going to be a 2 week dxï¿½pedition and this year we are going to concentrate on the bands which we found worked well from that location in 2009. We have decided on operating 2 voice stations on HF from the start, one HF data mode station, 6m and 4m SSB/data (JT6m) and 2m, 70cm and 23cm satellites. We will have limited tropo capability on 2m, 70cm and 23cm but will try and work anyone interested. There will be some portable operation around the islands (possible interest to WAB chasers) but for the first time we have

limited SOTA activity. A few operators are planning to operate
from the Monach Islands EU-111 for a few nights, this is weather
permitting but only has 33% claimed by IOTA participants. The call-
sign for the trip will be the CRG (Cambridgeshire Repeater Group)
callsign G3PYE, as the activation is in Scotland the prefix becomes
GM3PYE/P but we mainly use GS3PYE/P. We will be active from the
1st May till May 14th +- setup and teardown. If you would like to
make a sked with us, for any band or mode (voice or data) please
email skeds"at"camb-hams.com

Activating Grid EM87 April 22 & 25, Sites
Hi Folks, In a couple of weeks, the Southeast VHF Conference is being held in Morehead , KY ,EM88. That's only 15 miles north of the Semi-Rare Grid , EM87 that is mostly in Eastern Kentucky, and much smaller areas in Southwestern West Virginia, and in Southwestern Virginia. I'm driving down to the conference. So, if there is any, even a slight propagation enhancement, I'll be going there to operate before & after the conference. Does any one know any good sites in EM87? Sites near Morehead, KY would be the best for Thursday, but on the way out on Sunday, I'll have a chance to go to most any area of the grid, if the site is good. The site quality is more important than the location within EM87. I plan to operate Thurdays, Apri1 22 AM, and Sunday April 25, midafternoon-evening depending on what site I end up going to. If things look really good for Monday AM, I could possibly stay over and operate on Mon, April 26. Bands: At least 144 (at least 100w & small beam), 432 (at least 50w & small beam) & 10GHz (3w & 22" dish). Maybe 1296, and maybe more bands. Please send along any information on sites in EM87. Thank-You - SOURCE: Mark Casey, K1MAP, via VHF-REFLECTOR

Members of the "Radio Operadores del Este" will activate KP3RE as a special event station on April 18th, to commemorate the life of their first Puerto Rican governor. Activity will be from the Jesus T. Pinero house-museum in Canovanas, Puerto Rico. They will be on the air from 40-10 meters between 1300-1900z on PSK31, SSB and possibly on CW, and also locally on 2 meters via the NP3EF-R on 147.310 MHz. They will also be commemorating "World Amateur Radio Day 2010". Jesus T. Pineiro, who was the first governor of Puerto Rican origin in 1946, had as one of his hobbies Amateur Radio, having the callsign 4KT and co-founder of the Porto Rico Radio Club in 1918 with friend Joaquin Agusty-4JE,

founder of WKAQ-AM, one of the first radio stations of the Americas.

SB QNEWS @ WW $QNEWS100418
QNEWS - Apr 18 - VK4 ON AIR

DID YOU TELL ANYONE ABOUT AMATEUR RADIO THIS WEEK?
---

april 18

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP and I've been thinking.

Today is World Amateur Radio Day, as we learned from WIA National News last week. Every year this seems to be an event which comes like a Jack-in-the-Box with announcements just before the event.

It would be great if we could use this international recognition to promote our club, our hobby in our local communities.

As has been announced in WIA National News, last week, the Institute has made available a press release kit to those clubs hosting VK100WIA operations This kit is also available to other clubs on request.

We may have missed the boat, a little, on this year's World Amateur Radio Day but we should have no reason not to make a public splash next year.

In keeping with the spirit of digital developments in amateur radio, this broadcast has been prepared, collated and edited on many digital devices, my home PC included.

I'm Geoff Emery and that's what I think.....what about you?

CLUBBING -

GYMPIE
www.gceginc.org.au
Trevor Taege, VK4BAT

I'm Trevor Taege, VK4BAT with the news from the Gympie Communications & Electronics Group:

Two new members have been accepted into the Club so we extend a warm welcome from all the Gympie Group members to Graeme VK4SG and Nathan. We look forward to having you both along to meetings and other Club activities.

Work is continuing on the relocation of the 2m repeater with the first of two 80 watt solar panels being delivered. The second panel and the regulator are on order. Also completed is the APRS unit that will report the battery

voltage and shack temperature of the repeater installation. The ident will change from VK4RCM to VK4RGY as it moves to Mt. Boulder. We anticipate this to happen within about a month unless a problem is encountered with the solar power testing phase.

Do you remember Jeff Johnson VK4XJJ who walked across Australia from south to north, Gulf to Gulf? He had a daily sked with Roger VK4BNQ on 40m and made several sat-phone radio interviews with ABC radio and our own WIA news producer Graham VK4BB. Well Jeff has another little walk planned but this time it is from east to west, right across Australia! The Royal Flying Doctor Service has approached Jeff to complete this huge fund-raising walk on their behalf. They will be providing support along the way and the Gympie Communications & Electronics Group will be Jeff's official East Coast Amateur Radio contact station. The walk is being planned to commence early April 2011. With anticipated radio and TV coverage, 'Jeff's Walk' will once again raise money and awareness for a good cause and help to promote and demonstrate Amateur Radio. More information to follow in our next club news segment.

For Gympie Area News, I'm Trevor Taege, VK4BAT.

Redcliffe and District Radio Club
www.redclifferadioclub.org.au/

I'm Ray VK4CF back with news from the Redcliffe AR Club".

Club members worked at the repeater site last Sunday and carried out the following work, Removing the faulty 2m/70cm dual band vertical antenna, Fitting a new RFI high gain UHF antenna, a new RFI diplexer for the 2m repeater, new LDF4-50 feedlines, new 2 metre and 70cm repeaters and undertook general maintenance around the site.

This work was carried out with thunderstorms in the distance and very persistence rain at the site. Thanks to Mrs Hufnagle who provided (warm) muffins for the workers on the hill and to Charlie(VK4YZ) and John (VK4YJV) for spending time in the harnesses up the tower once again.

Please note, to all those who use the Redcliffe repeater that the repeater tail is now 0.5 of a second long. This is intentional.

The new repeater equipment has been funded by the Gaming Commission Grants. Soon work will commence on the fabrication of a working platform on the tower that will also be used to hold solar panels.

Tech Talks are held at the club house on the third Monday of the month with David VK4DC on homebrew Antenna Tuner next Monday night. In August, Kevin VK4UH to talk on the Expedition Trip to Norfolk Island that is a feature article in this month's AR magazine.

On May 17th, there is to be a visit by club members to Air Services Australia at Brisbane Airport Control tower. Numbers for this event are limited to a maximum of 24 persons. So please ensure you advise Scottie, VK4FLAE, as soon as possible your intention to attend.

WIA Club Grant 2009 will be used to purchase VK3YNG sniffers and Charlie VK4YZ is to head up the antenna construction team. The club will also apply for the 2010 WIA Club Grant to purchase a 23cm ATV transmitter kit from Minikits. The ATV transmitter would be used to broadcast tech talks live to the Oceanview ATV repeater and to develop a mini-studio at the clubhouse.

The club will apply to the WIA to use the callsign VK100WIA, from Aug 30 to Sept 1. The call sign will be operated from the clubhouse during this period.

John VK4WX and XYL Beryl will be absent from the club for about 2 years or until the money runs out on his trip around Australia. John will be on or about 7.070 MHz at nominally 1630 on Saturdays to keep in contact with absent friends.

So until next week, for Redcliffe club I'm Ray VK4CF.

WIANEWS FOR WEEK COMMENCING APR 18 2010.

ALL UP AND COMING IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE OF AUSTRALIA FOR WEEK COMMENCING APR 18 2010

International Marconi Day

Next Saturday 24 April, Hornsby and District AR Club will be one of the select few world clubs officially celebrating a VERY significant event!

Over the sea to Ireland and the Howth Martello Radio Group and the North Dublin Radio Club will join in.

All these stations plus others will be celebrating International Marconi Day.

The IMD award station from the Martello Tower in Howth will use the call-sign EI0MAR. The Martello tower houses the vintage radio museum.

The Cornish Radio Amateur Club organises this annual event and details of the awards and a list of award stations is available on their web site.

www.gb4imd.org.uk

GB4MBP and GB0MD will be on the air on 22nd April as part of International Marconi Day activities. The first will be on the air from the Lizard in

Cornwall and the second station from Kent.

But to VK, thanks to Hornsby's Julian Shortland Paul Latter VK2CPL joins WIA National news.

"Next Saturday, 24th April is International Marconi Day. Members of the Hornsby & Districts Amateur Radio Club will be operating VK2IMD on a range of HF bands. Operation commences at 10:00 am eastern time, this being the beginning of the UTC day, and continues for 24 hours. HADARC takes part due to their proximity to the Fisk House in Wahroonga where the first direct radio message from Britain was received. It was sent by Marconi from his station near Caernarfon [then spelled using the anglicised "Carnarvon"] in north-west Wales, on behalf of Australian Prime Minister Billy Hughes. Further information is available on the GB4IMD website.

For VK1WIA News this is Paul Latter VK2CPL.

GB4IMD Homepage: http://www.gb4imd.org.uk/
List of station: http://www.gb4imd.org.uk/awardstns2010.htm
HADARC homepage: http://www.hadarc.org.au/

QSL to: PO Box 362, HORNSBY NSW 1630

(Julian, VK2YJS and others.)

WIA CENTENARY

Clubs supporting the Centenary

The WIA Centenary Committee has inducted three more events which are now officially WIA Supported Centenary Activities.

The Gippsland Gate Radio & Electronics Club south-east of Melbourne in association with the Koo-Wee-Rup Historical Society, will from the 16-18 June re-enact the first wireless press messages between the United Kingdom and Australia in 1921.

GGREC President Chris Chapman VK3QB tells us this event will also recognise the contribution that the local community made to these early days of pioneering and advancement of our country delivered by wireless telegraphy.

Another event is the 35th annual Oxley Region Amateur Radio Club Field Day at Port Macquarie New South Wales 12-13 June.

Club President Henry Lundell VK2ZHE has also advised that this year it?s the club?s 40th anniversary year.

The third event is the RadioActive Amateur Radio Award for Scouts in July.

Scouts Australia JOTA-JOTI Coordinator Bob Bristow VK6POP said it's recognised that the WIA played a key enabling role to deliver the new era of amateur radio including the Foundation Licence ? which has resulted in a substantial increase in the number of amateur radio scouts.

In appreciation the scouts will actively support the WIA Centenary with the RadioActive Amateur Radio Award.

The aim is to make contact with other scouts and also to seek out contacts with the special centenary callsign VK100WIA.

(Jim Linton VK3PC)

HAMS ACROSS AUSTRALIA AND ONE HAM WHO HAS "WALKED" ACROSS AUSTRALIA IS Jeff Johnson VK4XJJ who walked across Australia from south to north, Gulf to Gulf

VK4BAT Trevor Tage has more on Jeff Johnson.

"He had a daily sked with Roger VK4BNQ on 40m and made several sat-phone radio interviews with ABC radio and our own WIA news producer Graham VK4BB.

Well Jeff has another little walk planned but this time it is from east to west! right across Australia!!

The Royal Flying Doctor Service has approached Jeff to complete this huge fund-raising walk on their behalf. They will be providing support along the way and the Gympie Communications & Electronics Group will be Jeff's official East Coast Amateur Radio contact station.

The walk is being planned to commence early April 2011. With anticipated radio and TV coverage, 'Jeff's Walk' will once again raise money and awareness for a good cause and help to promote and demonstrate Amateur Radio.

VKG Roundup http://www.police.nsw.gov.au/news

Port Stephens Amateur Radio Club members will be operating a portable station under the club call VK2AOJ at Fort Scratchley, Newcastle Anzac Day 25 April, between 12.30pm and 3.30pm local VK2 Time.

Fort Scratchley has a long and rich history. It was reopened to the public in 2008 after being restored to its former glory, and now attracts thousands of visitors each year. A team of dedicated volunteers maintain the site's many exhibits and provide guided tours of the fort.

The fort has guarded the entrance to Newcastle Harbour for nearly 200 years and is famous for becoming the only coastal fortification to fire on an enemy naval vessel.

On the night of 7-8 June 1942 the Battery's 6-inch guns fired two salvos at a Japanese submarine that bombarded Newcastle with about two dozen shells.

The Port Stephens Amateur Radio Club group will be taking the opportunity to promote amateur radio and the fort to the visiting public.

THEY have produced a QSL card for the occasion and this will be exchanged with all contacts, well probably more than 1 card so they don't keep exchanging the same card hihi.

VK5

The 40 Metre relay from South Australia will shift from 7.140 to 7.135 KiloHertz Lower Sideband. The VK5 40 metre relay commences at 9.00 am Central Standard Time, which is 9.30 Eastern Standard Time on Sunday morning on 7.135 Lower Sideband.

This is Trevor VK5ATQ for One WIA.

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

Save Analogue Radio campaign

A UK National Campaign to maintain traditional analogue broadcast radio for everyday listening and for use in times of national emergencies is trying to spring up.

The pressure is on to replace traditional analogue radio broadcasting with Digital Audio Broadcasting (DAB) radio.
Indeed, the UK Government has provisionally set 2015 as the date when the world wide standard frequency modulation (f.m.) services are to disappear from 87.5 to 108MHz (v.h.f. f.m. band), to be replaced with DAB radio transmissions

Eventually, the analogue services on long waves (198kHz) and medium waves (500kHz to 1.6MHz) will also be replaced by digital transmissions.

But one would wonder at this backward step to save thin sounding FM and at worse crackly 4khz AM.

NEXT SOME ONE WILL COME UP WITH WANTING TO USE cw OR EVEN THE USE OF 500KC HIHI

But if you DO want to know more you can contact Rob G3XFD, oh and Rob is actually DOCTOR Rob B Mannion the Editor of Practical Wireless magazine.

IRTS 78th AGM

The 78th AGM of Irish Radio Transmitters Society will be hosted by the Dundalk Amateur Radio Society, over the weekend of the 24 /25th April.

If you are lucky enough to be visiting the "Emerald Isle" the venue will be Fairways Hotel Dundalk Co Louth.

USA - BPL

Once touted as "the most successful BPL deployment in the nation," the City of Manassas has decided to get out of the BPL business, once and for all. At a Special Meeting on Monday, April 5, the Manassas City Council -- acting on a recommendation from the Manassas Utilities Commission -- unanimously voted to discontinue Broadband over Powerline Internet service as of July 1, 2010 to the approximately 520 residents and businesses who subscribe to the service; these customers were told that they have three months to find a new Internet service provider.

According to Manassas City Clerk Andrea Madden, there was no discussion on the resolution to discontinue service and the motion was passed "without incident."

NEWS FROM ARNEWSLINE

HAM HAPPENINGS: NPR SAYS HAM RADIO IS GROWING

National Public Radio says that ham radio is alive and well, and its even produced a segment of its All Things Considered program to prove it. Amateur Radio Newsline's Norm Seeley, KI7UP, has more:

Ham radio is far from the dying hobby that the nay sayers claim it to be. One that only a few years ago was being touted by techno blogs alongside 35 mm film and home videotape as technologies slated to quickly disappear.

Well, National Public Radio says that the bloggers were wrong because there are now nearly 700,000 U-S citizens who have ham radio licenses. NPR says that number is up by some 60 percent since 1981. And Says NPR, that number is growing.

The NPR story quotes Allen Weiner. He is an analyst at the technology research firm Gartner and Associates. Weiner says that while ham radio

will never have the sex appeal of the iPhone, it does have a certain level of what he terms as nerd appeal.

Weiner also explains growth in our specialized communications interest in this way. He says that if it creates its own experience, that's really

what's key here. Conversely, if it just emulates an experience that you can get online, it's not going to grow.

The report concludes by noting that even the most die-hard hams admit that amateur radio will never be a mainstream hobby. But says National Public Radio, people are still discovering the joy of communicating with the technology of amateur radio. A technology that has existed for nearly a century.

Still enjoying ham radio from Scottsdale Arizona, I'm Norm Seeley, KI7UP, reporting for the Amateur Radio Newsline.

You can hear the NPR story on ham radios growth at the URL found at http://www.npr.org/templates/story/story.php?storyId5586086

WEIRD AND WONDERFUL

Low-energy light bulbs that take control of your TV

Some feared it must have been a problem with their remote. Others suspected ghostly goings-on.

But when TV viewers complained their sets were changing channel by themselves, few could have guessed the real culprit - their light bulbs.

Low-energy bulbs can make your television turn over the station at random, according to customers.

Among the first to spot the problem were UK cable customers Alistair and Emma Clements.

They rang their supplier, Virgin Media, and were told the problem could be because of the Philips low-energy light bulb fitted nearby.

But while changing it helped, the couple say the channel still flips from time to time even though the nearest low- energy bulb is now in another room.

Experts say infra-red light from modern fluorescent bulbs can be 'mistaken' by electrical equipment for commands from its remote.

They warn that while moving or changing the offending device usually solves the problem, the proliferation of gadgets in homes increases the likelihood of such interference.

Traditional bulbs produce infra-red too, but because they don't 'flicker' like some fluorescent bulbs there is no danger of interference with electrical equipment.

(SouthGate)

This weird and wonderful occurence is akin to a problem my next door neighbour had soon after he had a pace maker installed. Every time I changed TV stations he would do cartwheels in his lounge!

WIRELESS WEATHER

PROPAGATION: SOLAR WINDSTORM HITS EARTH

In propagation news, what's described as a sharp gust of solar wind hit

Earth's magnetosphere on Monday, April 5th, at approximately 0800 UTC. It also sparked the strongest geomagnetic storm of the year.

According to Spaceweather dot com, the event registered 7 on the 0-to-9 K index scale of magnetic disturbances. Although the storm was subsiding by Wednesday morning, April 7th, it was not over and high-latitude sky watchers were told to remain alert for the possibility of aurora propagation.

INTRUDER WATCH - ENFORCEMENT ZONE

Region III IARUMS Coordinator Peter Young VK3MV

VK IARUMS reflector email to subscribe intruders@wia.org.au

INTRUDER NETS
Friday 0730 UTC 7.065.5 with VK4CEU David.

Amateur exclusive frequencies where any non-amateur signal is definitely an intruder.

Amateur HF Spectrum world wide
7.050 to 7.100
14.000 to 14.250
14.250 to 14.350 No broadcasters
21.000 to 21.450
24.890 to 24.990
28.000 to 29.700

The RSGB say "German cable operators have been encouraged to improve systems."

The Cologne Administrative Court has rejected an action brought by a German cable company against the auction of 800MHz for wireless networks, saying that if the cable operator was afraid of interference they could take action to improve their cable system.

The Deutscher Amateur Radio Club views the ruling positively since it will encourage cable operators to upgrade leaky cable systems. As well as stopping the pickup of any 800MHz transmissions it should also reduce the interference that leaky cable systems cause to radio amateurs.

>From Maryborough in Queensland to Victoria and the Arctic, WIA news is disseminated through the non-licence EQSO / PMR system, relayed from transmission on Channel 14 UHF CB.

Ray VK4TPT, Van VK4VAN and Bob VK4FNBL of Maryborough Electronics and Radio Group Inc have put their heads together over a quick sketch by Ray with soldering irons in hand, creating a number of homebrew interfaces (which also can be used to provide service on EchoLink).

A cross section of call-ins achieved over the past 12 months demonstrates the wide spread popularity of the service and includes RF links in Nova Scotia, Ottawa, Osaka, Patris in Greece, Bunbury WA, London, Mudgee NSW, Bendigo & the Latrobe Valley in Victoria; with listeners on their PCs in locations including Spitzbergen in the Arctic, New York, Germany and Ireland.

If you are interested yourself or know anyone becoming interested in Amateur Radio who would like to hear the WIA news follow these easy steps.

Enter AU6PER into the favoured search engine and download client software.

Those handy with a soldering iron might then go on to make a PC/Radio interface for use with the gateway software also available on this site.

MERG has Ray, Van and Bob working toward an article containing information on the interface in use for publication in AR magazine.

>From the Maryborough Electronics and Radio Group this is Kathy VK4KJ, back to the news room.

N6LDJ IRLP: 7712

No matter where in the world you are, if you can't make it to the fair grounds, please get on the air and talk to these Scouts for their 100th anniversary.

REWIND - A LOOK BACK IN HISTORY

Sixty-two Years of The Transistor

"Where a calculator on the ENIAC is equipped with 18,000 vacuum tubes and weighs 30 tons, computers in the future may have 1,000 vacuum tubes and perhaps weigh 1.5 tons."

So said Popular Mechanics, March 1949.

But we all know don't we that just 2 years prior to that article in 1947, John Bardeen and Walter Brattain at AT&T's Bell Labs in the United States noted that the output power was larger than the input power when electrical contacts were applied to a crystal of germanium.

Another worker at the AT&T's Bell Labs, William Shockley, saw the "potential" in this and developed the transistor.

In an item in this weeks "on line" from the NZART, they remind us that the term 'transistor', was coined by John R. Pierce from the words 'transfer' and 'resistance'.

The first silicon transistor was produced by Texas Instruments in 1954. This was the work of Gordon Teal, an expert in growing crystals of high purity, who had previously worked at Bell Labs. The first MOS transistor actually built was by Kahng and Atalla also at Bell Labs, but Fast forward to 1960.

The transistor is the key active component in practically all modern electronics.

Although several companies each produce over a billion individually-packaged (known as discrete) transistors every year, the vast majority of transistors now produced are in integrated circuits (IC). Complete electronic circuits are made by combining integrated circuits with diodes, resistors, capacitors and other electronic components.

In 2010, a microprocessor, the heart of your home computer, could have up to 820 million transistors with a speed of over 3 GHz.

Do you remember the XT or '286' computer? That computer, from 1982, had a microprocessor that had 134 000 transistors in it and a speed of 6 MHz!

About 60 million transistors were built in 2002 for each man, woman, and child on Earth.

The transistor's low cost, flexibility, and reliability have made it a universal device. Transistorised mechatronic circuits have replaced electromechanical devices in controlling appliances and machinery. It is often easier and cheaper to use a standard microcontroller (a microprocessor with input and output circuits), and write a computer program to carry out a control function than to design an equivalent mechanical device.

(nzart)

Rewind a look back at our history through the serialised written history by WIA Centenary Committee member Peter Wolfenden VK3RV with assistance of others, that is being published in the WIA journal Amateur Radio magazine.

Interference threatens experimenters

By the end of 1921 there were sufficient stations using regenerative receivers, that interference was being experienced by all users of the spectrum in some parts of the country.

An improperly adjusted receiver actually transmitted a signal. The earlier fears of the South Australian Division that this would occur had become a reality.

Newspaper reports in July 1922 proclaimed that experimenter?s licences were in jeopardy.

Again the co-operation of all state WIA bodies was obtained to protect the rights of experimenters. At this time a reduction in high licence fees was also on the agenda.

The delay in making transmitting licences readily available generated a deal of impatience from experimenters and those wishing to open up the commercial possibilities of wireless.

Basically the only stations that could be received at the time were the coastal stations, ships at sea, a few land stations including those operated by the WIA, and the occasional official telephony experiment.

A number of experimenters keyed their oscillating valve receiver operating it as a low powered transmitter - all highly illegal!

SARL News - SUNDAY 18 APRIL 2010

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a webstream, visit www.sarl.org.za, click on ARMI and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and subscribe to receive future bulletins by email.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 10,130, 7,066 and 3,695 MHz SSB.

Silent key

It is with deep regret that the passing of John Andrew Friend, ZS6FJ, on Friday 09 April 2010 at the age of 54, is announced. Sincere condolences go to his family and friends.

(PAUSE)

In the news today:

CELEBRATE YOUR HOBBY TODAY, 18 APRIL

SA AMSAT ANNOUNCES NEW CUBESAT

HAVE YOU BOOKED FOR THE SARL NATIONAL CONVENTION?

RADIO AMATEUR AWARDS

RADIO TECHNOLOGY IN ACTION SYMPOSIUMS

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

CELEBRATE YOUR HOBBY TODAY

It is World Amateur Radio Day today. The theme this year is "Amateur Radio: combining communication experience with modern digital techniques".

SA AMSAT ANNOUNCES NEW CUBESAT

SA AMSAT announced at the Space Symposium held at the University of KwaZulu-Natal that it would be building its own CubeSat. The project

will involve radio amateurs, students and learners. The proposed payload will include a FM transponder with a 30 kHz bandwidth, a telemetry beacon and science projects. The project will start with inviting input from radio amateurs before the final payload is decided on, and project teams will then be set up. If you are interested in becoming involved, you are invited to send an email with your contact details and areas of expertise to saamsat@intekom.co.za.

HAVE YOU BOOKED FOR THE SARL NATIONAL CONVENTION?

Registration for the various activities at the SARL National Convention which will be held next weekend in Port Elizabeth will close on Tuesday 20 April. As numbers for the various events have to be finalised and booked, it will not be possible to accept late bookings after Tuesday. This does not apply to attendance at the AGM as those registrations and acceptance of proxies will close at the venue at the start of the meeting.

The SARL office will be closed on Friday 23 April and no emails or telephone calls will be attended to. All proxies by fax or email must be sent by Wednesday 21 April or handed in at the AGM venue on Saturday morning.

Bookings for the PIC Course will also close on Tuesday. Please ensure that the correct form is used where you are able to select the two free PC project boards. No PIC course bookings can be accepted after Tuesday.

For information, bookings forms and venue details visit www.sarl.org.za.

RADIO AMATEUR AWARDS

The South African Amateur Radio Development Trust annually recognises amateur radio stars. The awards are sponsored by Nokia Siemens Networks and nominations close on 30 April. There are three awards:

GARTH MILNE TECHNICAL INNOVATION AWARD

The award is made for the support, development and application of technological innovation in amateur radio in South Africa. The recipient will be a person who has promoted the use of technology in amateur radio at club level, nationally, at schools or tertiary education institutions.

RADIO AMATEUR OF THE YEAR AWARD

The award is made for the support and development of the amateur radio service in South Africa, not for individual achievements such as DXCC and other operational awards or contests. The recipient will be a person who has given of his or her expertise and time to the promotion of amateur radio in South Africa.

AMATEUR RADIO COMMUNITY SERVICE AWARD

The Community Service Award goes to a radio amateur or a group of radio amateurs for service to the community. Community service can be assistance to a handicapped radio amateur, communications support during a sporting event or a disaster situation like a road accident or a natural disaster like a flood, veld fires, or an earthquake. Nominations are invited for an individual or a group of people like a radio club, or an association.

More details and the nomination form are available on www.amateurradio.org.za.

RADIO TECHNOLOGY IN ACTION SYMPOSIUMS

The dates for the 2010 Radio Technology in Action Symposiums have been finalised. Make a note in your diary now as the RTA is another SARL event not to be missed. Programme details will be announced at the SARL National Convention and thereafter will be available on the web.

A new feature of this year's RTA is that three kits will be available. Although the kits may be pre-booked and paid for in advance, they will only be available at the RTA venues and not before or after the event. In other words, to buy a kit you have to attend the RTA. The three kits are:

- DSSS kit complete with common cables 100 mW on 40 m.
- TDR 1GHz sampling scope, runs on a USB port on PC or laptop.
- DSP Kit - digital signal processing speaker kit.

Full details and kit pre-order forms will be available on the SARL web pages after the SARL National Convention.

The RTA dates to diarise are: Durban: 29 May 2010 Cape Town: 24 July 2010 Port Elizabeth: 21 August 2010 Gauteng: 18 September 2010

Stay tuned for more information.

CONTEST NEWS

The Autumn QRP Sprint will be run from 12:00 to 14:00 UTC today, Sunday 18 April. Please take note that items 5, 7 and 9 of the rules previously announced have been amended.

1. Aim This is a fun activity to promote QRP contacts between radio amateurs in Southern African countries (General Rules paragraph 1.b).

2. Date and Time World Amateur Radio Day, today 18 April 2010, 12:00 to 14:00 UTC (14:00 to 16:00 CAT).

3. Categories and Power Portable or fixed station. CW or phone or mixed. Power - 5 W, 1 W or 100 mW.

4. Exchange The exchange is RS(T) and year first licensed (e.g. 59 89). . 5. Frequency and modes 40 meter band (contest-preferred segments). Modes permissible are SSB and CW. A station may be worked once on CW

and once on phone per band. Cross-band or cross-mode operation is not permitted.

6. Antennas Only wire antennas may be used.

7. Scoring Each contact counts 2 points. Each prefix worked counts 2 points. Power multiplier: 1 for 5 W; 5 for 1 W; 10 for 100 mW.

Score = [(no. of QSOs x 2) x (no.of prefixes x 2) x (power multiplier)]

8. Log sheets Log sheets to be submitted by 3 May 2010 and can be sent by to West Rand Amateur Radio Club, P.O. Box 5344, Weltevredenpark, 1725, or emailed to glevey@gmail.com.

9. Results and awards All the logs are evaluated as one group, regardless of the station's category status, mode or power used. A list of call signs with their scores and placements will be made available within a week of the closing date. The 1st, 2nd and 3rd place positions will receive a certificate for their achievement.

HAMNET WESTERN CAPE WEEKLY BULLETIN

It has been decided to change the transmission time of the Western Cape Hamnet bulletin on Wednesday evenings to 19:30, from the 20:30 time in summer. This is because the 80m band relay on 3 760 kHz now dies out before the bulletin is over. This bulletin is relayed on 3 760 MHz by ZS1DDK, on 70 2625 MHz in the 4 m band by ZS1BSD, and on Echolink, via ZS1TX-R on the South African list. You can also access the Echolink node 4 043 using DTMF tones. We look forward to hearing you call in if you listened.

MAY RAE

The closing date for entries for the May 2010 Radio Amateur Examination is Friday 23 April 2010 at 12:00 CAT. Please note that no late entries will be accepted at all.

Any queries can be directed to Mariska at the SARL office. Please visit the SARL home page for contact details and the application forms.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is declining. Sunspot 1 062 has faded and the visible disk of the sun is currently blank of any sunspots. The effective sunspot number is expected to be less than 10 for the coming week.

15 m will provide the best opportunities for DX followed by 17 and 20 m. Conditions to India will be good from the afternoon onwards. During the late afternoons and early evenings contacts will be good towards Europe. Contacts with the USA are once again becoming challenging. Contacts with Australia are possible at around 08:00 while contacts with New Zealand will be challenging. During the afternoons and evenings good 15 m contacts may also be possible with Brazil.

Local conditions are going to be good on 40 m during the daytime. 80 m may perform well during the early mornings and late afternoons over the shorter distances. 30 m will perform well during the middle of the day. 20 m is very useful for contacts over the longer distances during most of the day.

80 m is the frequency of choice in the evenings. With the change of season the noise levels are also decreasing and some top band activity will once again become possible.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

18 April - World Amateur Radio and the Autumn QRP Sprint contest. 23 April - SARL office is closed. 23 April - Entries close for the May RAE. 23-25 April - SARL National Convention, Port Elizabeth. 24 April - West Rand Amateur Radio Club flea market. 7 May - Closing date for stage 2 of the Construction Competition. 8 May - Technological High School John Vorster Amateur Radio Club flea market. 29 May - RTA symposium in Durban. 24 July - RTA symposium in Cape Town. 21 August - RTA symposium in Port Elizabeth. 31 August - Closing date for submission of proposals for the 2011 SARL Contest Manual. 18 September - RTA symposium in Gauteng.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items, if possible, in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 860 kHz. There is also a podcast by ZS6RO. For a webstream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 21:00 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League compiled by Leon, ZS4V, and edited by Hester van der Walt.

Thank you for listening, 73.
/EX

*Attachment(s) for Branches: NZART Headquarters Infoline 205.doc

****
Remit 4 Procedure at the NZART Annual General Meeting
The voting on Remit 4 does not give council a mandate re entry level licence. If passed it merely instructs Council to seek a mandate:
REMIT 4 Hastings Branch 13 Non - Transmitting
"That Council seek a mandate from the full membership before proceeding with the implementation of an entry level licence"
What I propose to do at the AGM is as follows:
1. Have the remit discussed and voted on.
2. After the remit is voted on I will then call for a poll from all branches as to whether they want an entry level licence or not.
This should settle the matter once and for all.
By polling all branches at the AGM - and counting how many votes they record

which way - the matter of an entry level licence should be settled.
When discussing Remit 4 at branch meetings, could all branches please decide whether they want an entry level licence or not - and instruct their delegates accordingly.
The article about an entry level licence that appeared on page 14 of the March/April 2010 Break-In is intended as a discussion document and may not necessarily be the final version should an entry level licence be wanted.

Roy Symon ZL2KH
NZART (Inc) President
April 2010

****
Opportunity

NZART Transmitting Members are invited by NZART Council to provide guidance and assistance with a matter that is under consideration: The Future of NZART.
You are invited to enter,

starting at the TOP LINE on a single A4 sheet "Submission on The Future of NZART" followed by your name, callsign, postal address, and date,

OR,

in the address line of your email: "Submission on The Future of NZART from" and in the TOP LINE in the body of your email text, again: "Submission on The Future of NZART from" followed by your name, callsign, postal address, and date.

Add your NZART Membership Number too - or a statement that you are a current TRANSMITTING Member.
Constructive comments are wanted. Consider the present NZART circumstances and financial position as your start point. You are referred to March/April 2010 "Break-In". Previous history is not required.
A single A4 sheet, or if submitting electronically as an email or attachment, not more than one page with this required heading information and your constructive comments will be appreciated.
Submissions that do not meet these rules or which are in excess of these rules will impede the processing in the short time available so will be rejected unconsidered.
Submissions close at midday on Thursday 27 May, at NZART Headquarters, nine days before the AGM.
Please post A4 sheet submissions to: "SUBMISSIONS", NZART Headquarters, P.O. Box 40-525, UPPER HUTT 5140, and in adequate time to reach the destination before the closing time.
Please send emails to nzart.hq@clear.net.nz before the same closing time.
The A4 sheets and email submissions received become NZART Council working documents and the property of NZART Council. No acknowledgements will be given.
Submissions will be considered by Council at its face-to-face meeting on the day before the NZART AGM. The identity of originators of documents will not

be disclosed outside NZART Council.
The release of results, statistical information, extracts from the texts received, and any further use of information received, is at the discretion of, and will be decided solely by, the NZART President.
Notes:

a.. A single-sheet hard copy submission or a one page email submission has been deliberately requested to ensure fast processing and to study in the short time available before Conference. Your cooperation is requested.
b.. NZART's principal concerns are the interests of its Transmitting Members.
****
>From The Business Manager ZL2TDM
Debby says....
Your Feedback Would be Appreciated
I have now been working a three full day week since December 2009. (Tuesday, Wednesday and Thursday 9 - 4pm). Essentially this was a trial to assist me in the event I move away from Upper Hutt, (at this stage I am still in Upper Hutt) AND also to see what effect, if any it would have on day to day operations and workload of NZART.
I am now seeking your feedback as to whether you feel it is worthwhile. Or perhaps other times may be more beneficial. Keeping in mind that a minimum of 20 hours per week is necessary to cover operational requirements.
If you have a view on how NZART headquarters could best serve you and the members at large, I encourage you to let me know and we can consider all options.

NZART headquarters will be closed on Wednesday 21st April
News From Further A Field
A Salute by Amateur Radio to our ex and serving servicemen and servicewomen, from both Australia and New Zealand, on ANZAC DAY afternoon - as ANZAC links both our countries.
If you know any Radio Clubs /Groups or individual amateurs in close proximity to any of these museums could you please ask them if they would be interested in seeing if they can get permission to operate from them to the mutual benefit of both.
The Whyalla Amateur Radio Club have produced a great A4 flyer, see the WIA site that will be spread around to give the public knowledge about the event locally and maybe if we contact the media and put a similar flyer on public notice boards as well as contacting the local RSL, RSA and Service Clubs it will gain more publicity and more visitors.
http://www.wia.org.au/newsevents/news/2010/20100406-1/index.php
http://home.st.net.au/~dunn/museums/militarymuseums.htm
http://www.tourism.net.nz/new-zealand/nz/military-museums/
The aim is to come on air during the afternoon using AM and CW - the modes that were used during World War 2, Korea, Malaysia, and early Vietnam.
Mike "banjo" Patterson vk4mik
Taiwan 100th Anniversary Special Call Sign Used in Pirate Operation
It is spreading in the world of amateur radio that a special events station with the new style call sign 3T07W 3H100TW 3T100TW has been registered for the 100th anniversary of the ROC (Taiwan).

Although the call sign is within Taiwan's call sign structure, the National Communications Commission (NCC) of Taiwan has never issued this call sign to any operator, and as such the station should be considered a pirate station. Please kindly help to inform society members of the above in order to avoid confusion. We would also be grateful if QRZ magazine is able to remove the appropriate information from their website.
Thanks
BorLong Lin, M.D. (BV5AF)

****
ADIF to KML Converter
Andrew ZL3DW built an application which converts ADIF to Excel and then Excel to KML file. This plots your worked Callsigns (if the Maidenhead grid or field is known) on to Google Earth.
In Google Earth, you get a yellow pin showing the callsign. If you click on the pin you get QSO details and zoom into the grid square.
License: GNU GPL
The code is free. If you want to use the code in your project it should be free as well.
What the Program Does
What it does is take a ham radio log in standard ADIF (Amateur Data Interchange Format) that most electronic logs support and turns it into a Microsoft Excel File. Then it turns the Excel file into a Google Earth .kml file. When you load the KML by double clicking the file, it will automatically start Google Earth. The KML file will display all log entries that include a Maidenhead Grid reference as a yellow pin on the Earth. Each yellow pin displays the callsign of the station and is centred in the centre of the grid square. If you click the yellow pin, you get a text box showing the QSO details. A double click zooms in so that the grid square fills the screen view. If you are very lucky you might even spot the station's Yagi antenna!
The Excel file can also be used for analysing your log using Excel's math and chart functions. For example a plot of the beam heading for each QSO. The program calculates the latitude and longitude of each station that has a Maidenhead grid square listed in the log entry.
Harald DL1HW wrote the original ADIF to Excel code but I modified it a lot. He was very pleased with my additions and listed the resulting program on his club website. He is happy for me to list it on my club website as well. If you list the software my only request is that you include a note on the download page crediting myself (Andrew Barron ZL3DW) and Harald DL1HW for

the work. Please also state "License: GNU GPL The code is free. If you want to use the code in your project it should be free as well".
Notes

a.. You must have MS Excel to use the program. It has not been tested using any other spreadsheets.
b.. You need to have or download Google Earth (It is free)
c.. Your log must support ADIF format (or you could enter the data into Excel by hand)
d.. Your log must have Maidenhead grid squares in 2, 4 or 6 digit format. eg, RE or RE66 or RE66hm (preferably 6 digits). Again these can be looked up on QRZ.com or the Internet and added manually to the Excel file.
e.. QSOs without grid references are ignored as there is no way to calculate the location.

HARTS Trial Operation of 70 MHz Beacon
Hong Kong Amateur Radio Transmitting Society (HARTS)
Information From IARU Region 3 Beacon Project Coordinator Peter Norden, ZL2SJ
(**ZL2SJ AT NZART.ORG.NZ**)
Dear Peter,
HARTS 70MHz Beacon Temporary Amateur Station License was received from our Radio authority OFTA. VR2UEK would be in Hong Kong in February 2010 to set up the beacon with call-sign VR2FOUR which is expected to be operational by end Feb 2010 for a trial period of up to 6 months duration.
We will further advise you with the actual operating frequency closer to the starting date.

ZL2SEA-L HF Connected Internet Link
Node Number 200195
This HF Link is used in conjunction with the K1RFD EchoLinkï¿½ and
EchoProducer Program.
It can be selected to operate on 160 m, 80 m, 40 m and 20 m and is open for
all licensed Radio Amateurs using the EchoLink system and who are licensed
to used the selected frequencies for the type of licence that you hold. It
is important that you operate within the regulations and guidelines for your
country so please check before using the system.
Using The Link
Using the link is very easy as simple to use as the commands to change the
frequency is done via the text box. For help type into the text box AA? and
click on the send button and the list of 4 letter instruction codes will
appear and frequencies available.
Allow the system time when you send your text commands. When the frequency
has changed you will be given a verbal and text indication that the system
is ready to use. As you would normally do before calling CQ Listen Listen
Listen Just in case the frequency is in use.
Access to Connect Required
Due to the possibility of some Amateur Radio Connecting to the ZL2SEA HF
Link and operating outside their Amateur Radio Licence, Access to use the
ZL2SEA Link is by application. Please read the "What License do I need to
Operate the ZL2SEA HF Link?"
Web Page and E-mail Address
To apply to operate the ZL2SEA HF Link, please email your request, by
applying you confirm that your Licence meets the requirements.
E-mail Nigel at zl2sea at qsl dot net
Please Note
1. Your Audio level controls the ALC of the HF radio.
2. Audio level MUST be strong in Blue and JUST TOUCH YELLOW on PEAKS.

New VHF-SHF Radio Group Formed
Dear VHF-SHF Colleague,
We would like to inform you of a new group that we recently formed to
support the Pacific VHF-SHF Operator.
What are our aims?
We aim to:

a.. Provide a focal point for all Pacific region amateurs interested in
any area of VHF-SHF Operating.
b.. Share knowledge and information to promote and support VHF-SHF
activities in the Pacific zones.
c.. Establish strong ties with all national societies and VHF-SHF
orientated groups/organisations in all Pacific nations to provide a strong
united voice.
d.. Create events that support our aims of promoting VHF - SHF amateur

radio in the Pacific region.
e.. Distribute a regular electronic newsletter providing a platform to share VHF-SHF news, technical information, activity reports, contest and propagation news etc.
How do I join and how much does it cost?
Membership is open to anyone interested in any area of VHF-SHF radio. We are not just a weak signal group but also promote and support beacons, repeaters, ATV, digital modes etc
There is no fee to join. All we ask in return is that you participate in a positive manner and share our love the VHF-SHF bands and play an active role in our forums and newsletters.
We will be launching a new website shortly, until then we would like you to register on our new electronic forum. Again membership is free, and no details will be shared outside of the forum for any purpose
. http://www.pacscatter.org/forum/index.php
We look forward to meeting you online soon.
Kind regards
Simon ZL4PLM, Steve ZL1TPH, Kevin ZL1UJG
Founding members - Pacific VHF-SHF Radio Group

****
WIA Centenary Award
A limited issue amateur radio operating award is available to celebrate the 100th year of the Wireless Institute of Australia (WIA), the world's oldest national radio society.
To Qualify For an Award Certificate
To qualify for an award certificate contact is required with the Centenary of Organised Amateur Radio in Australia special event station VK100WIA which has a distinctive QSL card.
The WIA, through its affiliated radio clubs, will operate this unique and callsign from 1 May to 31 October 2010. The callsign will also be used in Australia's capital city, Canberra, where the WIA Annual General Meeting and associated events will be held 28-30 May.

It will be on all amateur bands available to VK radio amateurs including the popular HF bands and the WIA Centenary Award is expected to be well sought after.
The award rules are:
Those radio amateurs outside Australia need to achieve 50 points while VK hams require 100 points.
A contact with VK100WIA operated by the WIA or operated by a Club is worth 10 points (only one contact with VK100WIA operated by the WIA and only one contact with each Club) and there must be a minimum of 2 contacts with VK100WIA.
Contacting any WIA Member between 1st May 2010 and 31st October 2010 is worth 5 points. (Example: working VK100WIA at 10 different Clubs would be eligible for the award. Working 16 WIA members gives 80 points but then two contacts must be made with VK100WIA)
Any mode may be used; cross-mode and cross-band contacts are permitted. Satellite may be used but contacts via terrestrial repeaters are not eligible for the award. Send $AUD5 or 3 IRC and a list of contacts (QSL's not required), to the Awards Manager WIA Centenary Award, PO Box 2042, BAYSWATER VIC 3153 AUSTRALIA.
Listen around the bands or visit the WIA website:
http://www.wia.org.au
for frequent updates of the operator club's roster.

****
Web Update
A Possible Problem
While I was inspecting the NZART website statistics page I noticed many 404 "NOT FOUND" errors. Many of these errors seem to be caused by the use of upper case (capitals) characters in the URL (Uniform Resource Locator) being used. Also some errors are being caused by the use of spaces in the URL.
If you are having trouble with your links, or bookmarks, please see the following for a possible cause of your problem.
On the 14-March-2010 NZART Web and E-mail services changed to a New Zealand ISP (Internet Service Provider).
The new ISP
The new ISP uses a Linux based server, while the previous ISP used a Windows 2003 based server. There is a difference between these two operating systems, and the webserver software they are running, when treating the filenames used in the URL, for example the Linux system is upper and lower case sensitive, while the Windows system is NOT upper and lower case sensitive.
The Decision
To overcome the difference, a decision was made with the new ISP, that lower case would be used throughout for the naming of files and folders and that a '-' (hyphen) would be substituted for a space.
Please Check
So if you are receiving a 404 "NOT FOUND" error when linking from your site to the NZART website, or when using your bookmarks, check the capitalisation and for spaces in the URL being used. Hopefully this information can resolve some problems with linking to the relocated NZART Web server.

Jock White Field Day 2010 Report
http://www.nzart.org.nz/contests/2010/jwfd-report.html
Thanks to you all for getting out and getting active again.
Great weather over the whole country was nearly spoiled for some this year
by the Chilean Tsunami alert.
There seemed to be three responses to this that I am aware of:

a.. The Christchurch team had the civil defense vehicle with them so had
no choice but to shift, they ended up operating from the top of Mt Pleasant
in the open air.
b.. South Canterbury was right on the coast at sea level and tossed a
coin, the result being they stayed put.
c.. Marlborough (also at sea level near the coast) listened to the
national radio coverage and decided that since the Chathams were not hit,
decided to stay put.

Activity was up this year, the number of field stations was similar to the last few years but the number of total branch points for field stations was was up to 103, the highest for a few years.
Forty Metres
There has been significant interest in the single station 80/40 section, two stations have been attracted over from the 80 metres only section, and one other has returned after an absence, so there has been a contribution to the increased 40m activity. The other two stations have shifted from open regional sections.
Several new stations also appeared this year and operated on 40m in other sections, this with much improved propagation resulted in the most lively Field Day 40m activity for several years.
Invalid Branch Points
A few teams did not meet the 50 phone or 25 CW contact criteria. That is why your branch point numbers will have been reduced in most cases. Please plan in advance your operating resources to meet the above criteria. Don't 'just give out a few numbers', all that happens is that I will have to adjust the scores. Perhaps there is a need to relax these criteria a little for 40 metres?
Check Logs
This year I was sent a couple of check logs from teams that felt their logs were not up to scratch to enter. They were, and I scored them, one team has done very well as a result. Again, if you are having difficulty with your scoring effort etc, contact me! I am only too happy to call you at my expense and discuss things and give advice.
Logs Not Submitted
Logs were not received from Hutt Valley (18) and Te Awamutu (40). Also, ZL1LC appeared again giving out contacts for Auckland (02) yet no log has been received. See my comments above, contact me if you are having problems with scoring. It makes my job easier to have all logs submitted. Hutt Valley is a repeat offender here.
Brickbats!
Please please use the summary sheets available on line in the contest section on the NZART webpage. I have asked this every year since I took over in 2006. This is not me being pedantic; the rules are there to make the scoring job easier. Too many teams do ad-hoc printouts which make life difficult for me to check scoring.
http://www.nzart.org.nz/contests/2006/summary-2006.pdf or .xls
Next year score sheets will be returned for proper completion if they deviate excessively from what is required in the rules.
This year some teams will have their sheets sent back with the correct version done by me enclosed. I know there were not shredders around in Jock Whites day but I be he would have put one to use if he were managing field day now!
If you are not sure how to tote up using the summary sheets then contact me by e-mail and I will happily phone you and go over things.
Also, please (as required in the rules) highlight or underline contacts claimed for branch points.
Still some splatter and awful signals persist. Once again, turn the wick down, AND CHECK YOUR ALC METER!

Another problem is low DC supply voltage; this could be heard on several signals as distorted audio. Your modern solid state radio just will not operate properly much below 12 volts at the set. Long DC leads or tired batteries will cause this. Check the voltage at the radio. If its low, run a generator to charge the battery and make sure the DC leads are up to scratch
Replies to a few comments
A few have suggested that we have the event on the same weekend as the VK John Moyle field day. Unfortunately the two events are totally incompatible; the VK event works on three hour periods.
Electronic logging: see my previous reports re this, but in a nutshell field day has the full spectrum from hardened experienced electronic logging operations through to a not inconsiderable number of once a year paper based teams. Electronic logging is perfectly OK, but electronic submission of logs will not work until everyone logs this way.
Surely it is not too much work to manually transpose branch point callsigns on to the summary sheets and to fill out the main score sheet? After 18 hours of contesting and the set up and dismantling time, half an hour doing the paper work is not too much to ask?
Why have you allowed the power increase to 150 watts? Good question. Many new transceivers operate at a higher power level than 100 watts hence the change. I will think this one over; I can see merit to a return to the 100 watt level.
Can we staple our log sheets? Yes you can.
Valid Branch Points (Multipliers)
There were a total of 103 available for field stations, 107 for home stations: (four less for field stations, as they cannot claim their own branch number)
80 Phone (39) 01 02 03 04 05 10 12 13 17 18 19 20 22 23 24 25 27 28 29 30 34 37 40 41 47 51 53 63 64 65 68 69 77 79 83 84 86 87 88
80 CW (23) 01 04 05 10 12 17 19 22 24 25 27 28 29 30 47 51 65 69 77 83 84 87 88
40 Phone (28) 01 02 03 05 10 12 13 19 20 22 25 27 28 29 30 34 37 40 51 53 64 65 66 68 77 84 86 87
40 CW (17) 01 05 10 12 19 22 25 27 28 30 37 51 65 68 77 84 87
Statistics
There were 202 operators at 38 field stations, up from the last two years.
branch 20, Manawatu had 19 operators, and Whangarei branch 20 had 16.
Only three home station logs were received this year.
Team Comments/Observations
Band conditions and promotion of 40m activity helped
Good to see the Western Suburbs guys travel south and put Inglewood on.
Pleasing operating standards and a good weekend.
Tauranga Emergency Communications branch 88 was interrupted by a SAR callout.
Eighty metres here (far north) during the middle of the day was a waste of time - hey but that's contesting.
Not as well organized as we should be, but we tried.
Nice weather for a change
Overall good band conditions and a busy contest until 40m faded out mid morning. Thanks for a great contest again: VK2ACD

Excellent weather, 40 metres much better this year, ZL2xx scorched the table with the BBQ!
A home station: I was disappointed that I could not get the branch to take part in field day.
Good weather and propagation, 30 degrees with a swimming pool nearby but 80 metres feedline broken by a wandering bull!!
Brilliant weekend in all respects: weather, turnout and companionship.
The use of single letter calls is to be deplored; this branch avoided working such stations.
Why does ZL2QF send at 20+ wpm each year?
Propagation on 40 metres was very good (better than last year) but 80meter contacts were scarce (North Otago)
Lack of operators to run a field station so I went on as a single operator to put another branch multiplierï¿½
Frequency stealing went on quite a bit.
Stuart Watchman ZL2TW

KIWI DX GROUP DIGITAL MODES CONTESTS
40M - 24 April 2010
Times - 1000 UTC until 1100 UTC in evenings
Contest Rules and Other Operating Information available from the Group's Website http://www.qsl.net/zl2sky/new_page_1.htm

2010 NZART SANGSTER SHIELD QRP CW CONTEST
When :- Saturday, 15 May 2010 and Sunday, 16 May 2010
Times :- 2000 NZST until 2300 NZST each evening
Band :- 80m
Mode :- CW only.
The contest was established in 1927 at the time the late Mr. Ralph Sangster presented to the radio Amateurs of NZ the trophy, known as the Sangster Shield, for annual competition to be won by the most efficient station. It is pertinent to note not only did the efficiency of the station be taken into account, but also the efficiency of the operator concerned The terms of the gift of the trophy were that the competition was to be conducted on the 80 metre band using input power of not more than 5 watts and to be solely restricted to Morse operation.

2010 NZART MEMORIAL CONTEST
When :- 3 & 4 July 2010
Times :- 2000 NZST until 2300 NZST both evenings
Band :- 80m
Modes :- CW and Phone
The Memorial Contest was established soon after the end of World War 2 to commemorate those who lost their lives in the service of their country. It is a fitting way to honour those Hams and others who selflessly served their country so that we, today, may enjoy the freedoms that we do.
The Contest is split into a number of categories catering for all HF interests so please spare an hour, or two to honour those who paid the ultimate price that we now enjoy in our present lifestyles.
Contest Rules and Other Operating Information is available from the NZART Website :- http://www.nzart.org.nz/contests/index.html

Contest Rules and other Operating Information is available from the NZART website - http://www.nzart.org.nz/contests/index.html

For the contests below please see the latest "Contest Manager's Report" This can be found on the NZART Web Contest page at:

General Information For Break-In and HQ Infoline

Break-In - From the Break-In Editor John ZL3IB

1. Closing Date Reminder: Copy for the MAY/JUNE issue of Break-In closes on 10-MAY-2010.

2. Document File Format: Please do not send copy for publication as Word 2007.docx files; they cannot be processed. Please send in Word 2003 (or earlier).doc or *.rtf file format.

3. Early receipt of copy is much appreciated.

4. Break-In Contents Index from 1947 can be found at:
http://www.nzart.org.nz/breakin/index/index.html

5. To search the COMPLETE CONTENTS from 1947, use the page menu entry of: "Search all index pages up to Jan 2010 HTML 435 kB" Found on the "Index for Break-In Volumes 20 to 82" page. All the yearly pages have been combined into one page for your convenience.
http://www.nzart.org.nz/breakin/index/all-bi-index.html 433 kB

6. Copy for the AREC Break-In Column - From Geoff ZL3QR: The close-of-copy date is the 03-MAY-2010 for articles for publication in the AREC COLUMN OF BREAK-IN. Photos, if available, to be on a separate floppy or CD (with captions), posted DIRECTLY TO US Call Book address. All other material can go to e-mail:
zl3qr@nzart.org.nz or zl3ov@nzart.org.nz.

This is SPAM.
I don't know how newsline got the idea these courses are free.

I went to the URL go.bluevolt.com/CoBrandTemplate/home.aspx?brandï¿½co
that was cited.

These courses are NOT free.
They seem to individually cost about what a Community College would
charge for continuing education courses.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, N1DG, NJ1Q, NG3K & ADXO, N4AA & QRZ DX, W5KNE, KH6BZF, K7VL, K8GI, K8YSE, W8GEX (60m News), K9AU, N0RC, Algarve STAR DX Team, AT International, DK0ZAB, DL7MAE & The DX News Letter, DX World.Net, EA3RKR, F5NQL & UFT, F6AJA & Les Nouvelles DX, G3SWH, I1JQJ/IK1ADH & 425 DX News, IZ2LSC, OE1ZKC, OZ6OM & 50 MHz DX News, Pete's-DX-Newsdesk, PT7WA, RSGB IOTA Web Site, SP2QCW, UT5UY, VA3RJ & ICPO, VE2EBK, VE8EV, VHF-DX-Portal (MMMonVHF) and VK2HV for the following DX information.

** SPECIAL NOTE: The Chinese Radio Sports Association (CRSA) has asked that the frequencies 7050 and 7060 kHz be kept clear for emergency traffic following a devastating earthquake in the Yu Shu district, Quinghai Province.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 11-April, through Sunday, 18th-April there were 222 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3V, 3W, 3X, 4J, 4L, 4O, 4S, 4X, 5B, 5N, 5R, 5T, 5U, 5V, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9U, 9V, 9Y, A4, A6, A7, A9, AP, BV, BY, C2, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J5, J6, J7, JA, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, R1FJ, S5, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T2, T32, T7, T8, TA, TF, TG, TI, TK, TL, TN, TR, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V5, V6, V7, V8, VE, VK, VP2V, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK2, ZL, ZL8, ZL9, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

4U10, AUSTRIA (Special Event). The Vienna International Amateur Radio Club (4U1VIC) will activate special event callsign 4U10NPT between May 1-31st. Activity is to promote the "2010 Review Conference of the Treaty on the Non-Proliferation of Nuclear Weapons" (NPT). QSL via OE1ZKC. For DXCC or other award purposes, it shall be counted as the same as 4U1VIC. For the detail of the conference, please refer to the following URL address: http://www.un.org/en/conf/npt/2010/

9H, MALTA. Russell, G5XW, is to be active as 9H3XW from Malta (IOTA EU-023, MIA MM-001, WLOTA LH-1113) between June 12-19th. Activity will be on the HF bands using SSB (no set times or frequencies). QSL via his home callsign, direct only (QRZ.com).

9M8, WEST MALAYSIA (IOTA Op). After his activity from Kuching, East Malaysia (QRT April 20th), look for Mirek, VK6DXI, to be active as 9M8DX/2 from Kuala Lumpur between April 20-23rd and 26-29th, and then from Tioman Island (AS-046) between April 24-26th. Activity will be focused on 30/17/12 meters CW. QSL via SP5UAF, by the Bureau or direct.

AO, SPAIN (Special Event - Europe Day). Look for special event stations AO1EU, AO2EU, AO3EU, AO4EU, AO5EU, AO6EU, AO7EU, AO8EU, and AO0EU to be active from May 1-20th. Activity is to celebrate the 60th anniversary of Robert Schuman proposal (on May 9, 1950) for the creation of an organized Europe, under peace and harmony. In addition, this year coincides with the Spanish Presidency of the EU. The EA Digital Federation, a member of the European Organization for Amateur Radio (EURAO), wants to help to contribute in the spreading of this common area of coexistence called Europe. All contacts with the above stations are good for the EANET Diploma. Details available at: http://www.fediea.org/eanet

DK, GERMANY (WFF Op!). Members of the DARC in Dessau (DK0ZAB) will be active as DK0ZAB/p from the Nature Reserve/Biosphere "Flusslandschaft Elbe" (DLFF-024) between 0900z April 24th, and 1800z April 25th. They will operate mainly CW and SSB on the HF bands using 100 watts and wire and vertical antennas. Look for them on the WFF frequencies. QSL via DK0ZAB, by the Bureau or direct.

DVD VIDEO REVIEWED BY EDITOR TEDD MIRGLIOTTA, KB8NW (K4M - Midway Atoll: "Stepping Stone of the Pacific"). ***** Five Star Rating - If you are big fan of James Brooks, 9V1YC, DXpedition videos, than you are going to want to add this one to your collection. This video is probably his best video yet. As in all of his videos, James provides you with great cinematography of the island and a story of the DXpedition. The video starts with the K4M DXpedition team waiting to leave the Hawaiian Islands, but was delayed due to mechanical problems with their chartered aircraft. However, after a few days, the team was able to leave for Midway and only lost a few days of their operating time. During the DXpedition antenna setup, you will see the K4M team taking great care and extreme measures in protecting the birds on the island. No Yagis were used. Only verticals were used under the request/advisement of the U.S. Forest and Wildlife Service. Naturally, the video shows the K4M operating during the DXpedition, but the video also provides interesting details on the history of Midway Atoll and how the U.S. Forest and Wildlife Service was able to take

control and make it into a reserve in 1988 to protect the wildlife on the island. Interviews with the members of the K4M team and individuals from U.S. Forest and Wildlife Service also provided interesting details about Midway. Operating/living conditions on the island - air conditioning, a bar, three meals a day from a cafeteria, scenic views from the window, InterNet access, cable TV -- WHAT! Are they staying at the Hilton? James also provides video from many different views/loctaions on the island (old air force base and hangers, old ham shack, interesting stuff/junk left behind by the military, beaches, abandoned buildings..etc). I do not want to spoil it with any more details. Buy the video! It is 44 minutes of great PBS quality video that you will enjoy, and it is now available for 25.00 USDs. To order yours today, go to: http://www.dxvideos.com/k4mvideo.htm

EF8, CANARY ISLANDS. Val, RD3AF, will be active as EF8M from Santa Maria de Guia, Las Palmas Gran Canaria (AF-004, DIE S-005, WLOTA L 0969), during the CQWW WPX CW Contest (May 29-30th) as a Single-Op/All-Band/ High-Power entry. QSL via UA3DX.

HB0, LIECHTENSTEIN (QRP Op!). Alberto, IW1PRT, will be active as HB0/IW1PRT/QRP between April 30th and May 1st. He usually operates on 160-10 meters including 30/17/12 meters. QSL via his Manager IZ1MKR by EURAO Bureau.

HF2010, POLAND (Special Event). Piotr, SP2QCW, is now active as HF2010WECK (prefix first time used) until June 30th. Activity is to celebrate the "World Enduro Championship in Kwidzyn (June 2010)". Operations will be on all bands and all modes. QSNs show activity this past weekend was on 30/20/17 meters using RTTY and PSK. QSL via SP2QCW (See info on QRZ.com).

IOTA NEWS.....
AS-008. Members of the Tokyo Dental College will be active as JA1YUC/1 from Nii Island between May 1&#65533;4th. Activity will be on all bands and modes. Operators mentioned are: Kanichi/JE1SCF, JG4IQC and JF1QQR. QSL via JA1YUC, by the Bureau is preferred.

EU-042. Operators Jens/DK8MIL, Thomas/DK9BTX, Mathias/DJ9MD and Jan/ DK7JAN will be active as DF0TM from Amrum Island (GIA N-018, WLOTA LH-2464) between April 23-26th. Activity will be on the HF bands using CW and SSB. QSL via the DARC bureau. If you need a direct QSL, please send a SAE and the right postage (the equivalent of 1.70 EUR or two IRCs [preferred]) to: Jens Sasse, Muhlenfeldstr. 8, D-28832 Achim, Germany.

EU-110. A team of Italian operators will be active as 9A/homecall from St. Nikola Island, Croatia, between May 28th and June 2nd. Operators mentioned are: Giovanni/I2OGV, Ivano/I2RFJ, Giuseppe/I2ZBX, Diego/IZ2AMV and Andrea/IZ2LSC. The team has chosen to activate this island because, according to the RSGB IOTA statistics, only 51% of ham participants to the program have received the accreditation for EU-110. Their goal is to contact as many operators as possible. They will be active on

the HF band (80-6m) using CW, SSB and RTTY, with 3 or 4 stations on the air. Their plans will try to keep 1 station active 24 hours. They will try to stay around IOTA frequencies. Suggested frequencies are:
CW - 3530, 7030, 10114, 14040, 18098, 21040, 24920 and 28040
SSB - 3765, 7055/7155, 14260, 18128, 21260, 24950 and 28560/28460
QSL via the operators home callsign, by the Bureau or direct (send to the QRZ.com address). For direct cards, please include a SAE and sufficient return postage [Europe 1 USD, Outside Europe
2 USDs]. Please DO NOT send IRCs. QSL cards not compliant with this policy will be returned via Bureau. For more info and online logs, go to: http://www.timpy.it/eu110

EU-114. Kevan, 2E0WMG, will be active as 2U0WMG/P from Herm Island, Guernsey, between June 1-17th. Activity will be on 80/40/20/17/15 meters SSB. Herm is quite interesting as there are no less than four WAB squares on the Island (North East WV48, North West WV38, South East WV47 and South West WV37). Kevan like everyone who visits this island, may have restrictions as to where he can operate from but is hoping to try and activate all the WAB areas on the island. This trip is ahead of a possible larger scale trip next year with a few operators. QSL via his home callsign 2E0WMG.

EU-120. Kevan, 2E0WMG, will be active from Lundy Island between June 5-8th. Activity will be on 80/40/20/17/15 meters SSB. QSL via his home callsign 2E0WMG.

EU-129. Helmut, DL7VOX, will be active as DL7VOX/p from Usedom Island (GIA O-13) and its lighthouse (Admiralty C2867.1, ARLHS FED-359, WLOTA LH-1640) between April 22nd and May 11th. Activity will be mainly CW on the HF bands, using 100 watts and wire antennas. QSL via DL7VOX, direct or by the Bureau.

EU-141. Operators Helmut/DL5DSM and Bernhard/DL9UBF will be active as LA/homecall from Vardo Island (WLOTA LH-0106) between May 5-10th. Activity will be on the HF bands using SSB, 100 watts and vertical antennas. QSL via their home callsigns, direct or by the Bureau.

EU-172. A group of the Belgian UBA Section Diest operators will be active from Langeland Island, Denmark, between May 12-18th. Activity will be on all HF bands. QSL via ON4AMM. Operators mentioned are: Dominic/ON4AZP, Michel/ON4CAQ, Francois/ON6VP, Herman/ON7FH and Maurice/ON7KS.

NA-128. Members of the NA-128 Contest Group will activate the special callsign XL2I from Isle-aux-Coudres (CISA QC-009, Grid FN47, ARLHS CAN 234), Quebec, to commemorate the 475th anniversary of the arrival of the explorer Jacques Cartier between July

23-25th. Look for many stations to be active at the same time. Activity will be on all bands 80-6 meters using CW, SSB and RTTY/PSK31. During the IOTA Contest, a station will be dedicated to the contest exclusively on SSB and CW. QSL via VE2CQ, direct or by the Bureau. SPECIAL ISLAND NOTE: NA-128 is made up of more than 45 islands, rocks and smaller reefs and more than half of them are accessible for future NA-128 expeditions.

NA-182. (Update) John, VE8EV, is expected to be active from Greens Island in the Northwest Territories (NWT) in the Inuvik Region East Group until April 20th. Remember, he is using a very rare prefix and is signing CK8G. Activity has been mainly on 20 meters SSB. Updated information can be found at: http://ve8ev.blogspot.com/search/label/IOTA

OC-130. Maarten "Moj", PA3GZU, will be active as DU9/PA3GZU from Mindanao Island (WLOTA LH-2803), Philippines, between July 11th and August 7th. Activity will be holiday style with operations mainly on 20 meters and possibly 40/15/10 meters depending on the conditions using CW, SSB and BPSK31. QSL via his home callsign, by the Bureau is preferred. There will be a delay but received QSL cards will get answered. DO NOT use surface mail without return postage coverage.

OC-164. Members of the Hills Amateur Radio Group (VK6AHR) will be active from Rottnest Island (WLOTA LH-2197) during the RSGB IOTA Contest (July 24-25th). Operators mentioned are: Marty/ VK6FDX, Heath/VK6TWO and Martin/VK6ZMS. Activity will be on all HF bands. QSL VK6AHR by the Bureau, or direct (QRZ.com).

SA-023. If you worked PY6RT/p this past weekend, the operations were from Itaparica Island. QSL via the home callsign.

KH6BZF PROPAGATION FORECAST/REPORT (For April 19-25th)....
Apr 19 AN SOLAR REFERENCE KEYS
Apr 20 AN --------------------
Apr 21 AN BN - Below Normal
Apr 22 AN AN - Above Normal/Geomagnetic Level is QUIET
Apr 23 AN LN - Low Normal
Apr 24 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Apr 25 AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

OX, GREENLAND (Update to OPDX.951). Reid, N0RC, now active as OX/K0KU from Thule, Greenland (NA-018), announnced this past week on the AMSAT

mail list that he will be changing his QTH. He states, "Although I am scheduled to be in Thule until April 23rd, there is a chance I could leave as early as April 21st. I will be going to Wallops Island, VA, to put our radar equipment on a P-3 aircraft and do flight tests. I will be returning to Greenland on May 1st (although there is talk that it will be pushed back to May 4th). I will be in Sondrestrom, grid GP47pa, for two weeks before returning to Thule for two more weeks around May 18th. Thanks to everyone that has tried to work me. You've made this trip a lot of fun!" Reid operates the HF bands, including 10m if it is open. If 10m is open, Reid will be giving out his 10-10 number upon request. Also, Reid operates on the satellites, activating grid FQ56 during his time on Thule. He will be limited to FM birds with a VHF uplink. Satellite operation is also dependent on the BMEWS radar system not interfering with the UHF downlink. Reid will upload his log to ClubLog.org, LoTW and Eqsl. QSL direct or by the Bureau via N0RC. ADDED NOTE BY REID: "Since I will be operating in my spare time, I cannot give a predictable schedule. I plan on sending out an announcement before I go on the air through a google group page with planned times, bands and modes of operation for that day. People can sign up by going to: http://groups.google.com/group/ox-thule-2010

PACIFIC ODYSSEY 2010 TOUR (Update). Members of the Ukrainian DXpeditioners Team (UDXT) have announced their new project "PACIFIC ODYSSEY 2010" to take place between mid-May and early June. Alex, UT5UY, informs OPDX that "preparations for the forthcoming Pacific Odyssey DXpedition are going fine." The UDXT members include the following: Sergey/UX0HX (Team Leader), Oleg/RK3FA, Alex/UT5UY, Yuriy/UT1HF, Oleg/US7UX, Leo/UR3HR and Yuriy Grushevskiy/SWL. Activity will take place from the following islands on all bands and modes as:
Samoa (5W) - Between May 18-19th; callsign 5W0OX; Reference numbers are: CQ&#65533;32, ITU&#65533;62 and IOTA OC&#65533;097.

Central Kiribati (T31) - Between May 22nd and June 1st; callsigns are T31X and T31UR; Reference numbers are: CQ&#65533;31, ITU&#65533;62 and IOTA OC&#65533;043.

Tokelau (ZK3) - Between June 2-6th; callsign ZK3X; Reference numbers are: CQ&#65533;31, ITU&#65533;62 and IOTA OC&#65533;048.

The UDXT members state (edited), "The running of the DXpedition to a remote Pacific Islands is always very expensive. We invite organizations and individuals to make the donation towards the cost of this unique operation." For more information please visit the DXpedition's Web site at: http://www.uz1hz.com/pacificodyssey.html

QSL INFO AND NEWS.....
A6WAD via IZ8CLM. Activity was by the Emirates Amateur Radio Society (A62ER) in U.A.E. to celebrate "World Amateur Radio Day" on April 18th.

Algarve STAR DX Team reports that the logs for the recent CR6A Odeleite DAM Island are now available online at: http://algarvedx.com
CR6A valid for DIA AI-36.

Phil, G3SWH/AD5YS, reports that he has replied to all the direct QSL requests for VK9X/G6AY received to date and they have now been mailed.

QSLS VIA LoTW: 7Z1CQ, 9V1SV, CQ35MD, CX6VM, F6HRP, FO8RZ, HK1NK, JA1BOQ, OE6MDF, PA3T, PY2HL, S79GM, UA6BRD, VE7UQ, YV5ANF and ZY7C

QSLS RECEIVED VIA MAIL: 5Z0H, 8P9NX, 9X0LX, A25NW, D44TXP, FG8AR, GJ0KYZ, H40FN, HV0A, J6/N7UN, LU5FC, LX30AL, OD5/DL6SN, P49V, ST2AR, SV2CXI, T77C, TX3A, VP5/W5CW, VP5/W5SL, VP9400HW, VU2PAI and YN2NW

QSLS RECEIVED VIA THE BUREAU: None reported this week!!

S7, SEYCHELLES (IOTA Op!). Vlad, RA9LR, will be active as S79LR from Desroches Island (AF-033) between May 1-7th, and from Mahe Island (AF-024) between May 8-10th. Activity will be mainly on the low bands using 100 watts into DX-88 vertical, operating CW, RTTY, PSK63 and some SSB. He plans to possibly be in the ARI International DX Contest (May 1-2nd), Alessandro Volta RTTY DX Contest (May 8-9th) and CQ-M International DX Contest (May 8-9th). Listen for operator to announce QSL route.

ST2, SUDAN. Robert, S53R, will be active as ST2AR from Khartoum during the CQWW WPX CW Contest (May 29-30th) as a Single-Op/All-Band entry. QSL via S53R.

T2, TONGA (Update/Pacific Tour Continues). Hugh, K6HFA, is on his third leg of his South Pacific tour (see OPDX.948/950) and is now active as T2A until April 21st. Activity will be on CW, SSB and possibly RTTY using 100 watts into a multi-band vertical antenna (for 80-15m). Look for him on the IOTA frequencies or possibly other frequencies. Hugh plans to call by areas (EU, NA, SA, ASIA... etc..) per propagation. QSL via K6HFA. His next stop will be Fiji (3D2) between April 23-26th, activating IOTA OC-016 or OC-156.

T32, EASTERN KIRIBATI (Update). The Southern Line Islands operators were active as T32SI from Starbuck Island (IOTA OC-280) for three days and are now headed to Christmas Island. For more details and updates, visit the T32 Southern Line Islands DXpedition's Web page at: http://t32line.webnode.com

T8, PALAU (OC-009). Mike, KM9D (ex-V63MY), has received the callsign T88CF for operating. No activity has been reported yet. Length of stay is unknown. QSL via OM2SA.

V2, ANTIGUA. Leslie, W2LPL, will be active as V26LPL between April 26-30th. Activity will be on 20 meters using 100 watts. He states, "Rig is a FT-857 using a vertical antenna as I watch the waves crashing on the beach." QSL via W2LPL.

VP8/O, SOUTH ORKNEY ISLANDS. Members of the "Micro-lite Penguins DXpedition Team" are expected to be active from here next year between January 27th and February 8th, 2011. The full official announcement is expected during the 2010 International DX Convention at Visalia, CA. The current announced team members are: Ralph/K9ZO, Tom/ND2T, James/9V1YC, Ralph/K0IR, Don/N1DG, Wes/W3WL, Mike/N6MZ, Max/I8NHJ, George/N4GRN, Jerry/WB9Z, Lew/W7EW,

Ward/N0AX and John/VE3EJ. QSL Manager is Garry, VE3XN. For details about the South Orkney Islands, bios on all the operators and possible updates, visit the DXpedition's Web page at: http://www.vp8o.com
LAST MINUTE UPDATE: Official Announcement Dated 17 April, 2010, from the Visalia International DX Convention --
"The Microlite Penguins DXpedition team will be activating the South Orkney Islands (DXCC VP8/O, IOTA AN-008) from January 27 to February 8, 2011. Safe and reliable Antarctic transportation has been secured by the experienced RV Braveheart, and activity will be on all HF bands 160m-10m using SSB, CW and RTTY.
Operators will be K9ZO, ND2T, 9V1YC, K0IR, N1DG, N0AX, W3WL, N6MZ, I8NHJ, N4GRN, WB9Z, W7EW and VE3EJ. This will be the team's fourth time activating an entity in the Antarctic region and fifth DXpedition overall. You may recognize most of the callsigns from the group's past operations, but we've also added several new members to the team, all of whom have been on DXpeditions to some of the world's rarest entities.
Those who have enjoyed our operations over the last 8 years may recall that our methods and philosophy are somewhat different from other DX-peditions. Though our overall goal is still to provide a new DXCC entity on as many bands and modes as possible, we also strive to increase the fun factor by focusing on operational simplicity and radio skill.
In the past we kept the Microlite Penguins DXpeditions non-commercial and confined the financial burden to ourselves and a single sponsor, the NCDXF. But today, with the astronomical cost of Antarctic travel and a budget approaching US$300,000, this single-sponsor approach is no longer a reality. To make this DXpedition happen, we must break our tradition and ask for support of the entire amateur radio community. All financial support, no matter what the amount will be welcome. We have even set up a website where DXers, clubs and foundations can donate online: http://www.vp8o.com
It is the support and encouragement of the DX community that will make this exciting Antarctic adventure a success. We hope that you, personally, can be a part of this adventure, share the excitement with us, and help bring the Microlite Penguins to the airwaves once again.
73 and see you on the bands.
The Microlite Penguins DXpedition Team"

YI, IRAQ. The YI9PSE is now QRT with a total of 50401 QSOs with 19396 unique callsigns in the log. They made 22763/SSB, 24181/CW and 3457/RTTY QSOs. QSL via N6NKT. For more details, see: http://www.yi9pse.com

ZD8, ASCENSION ISLAND. Bob, G4DBW, will be active as ZD8RH until April 20th. Activity is mostly CW on 80-10 meters. QSL via LoTW or to G4DBW.

ZF, CAYMAN ISLANDS. Sam, W5CU, will be active as ZF2CU between May 1-8th. Activity will be on 40/30/20 meters using mostly CW. QSL via his home callsign.

ZL8, KERMADEC ISLANDS (Update). It was announced this past week that due to business commitments, Joerg, DL8WPX, had to cancel his participation in the upcoming ZL8X DXpedition. The DXpedition has added a new team

member - Andree, DL8LAS. For information about this DXpedition, visit the ZL8X Web page at: http://www.kermadec.de

ZS, SOUTH AFRICA. Bernie, ZS4TX, will be active as ZS9X during the CQWW WPX CW Contest (May 29-30th as a Single-Op/Single-Band (??) entry. QSL via LoTW.

ZS8M, MARION ISLAND (Update). By the time you read this Pierre, ZS1HF, will be on Marion Island (AF-021). The supply ship's ("SA Agulha") is located here: http://www.sailwx.info/shiptrack/shipposition.phtml?call=AF
Please remember that Pierre will not be active for a few weeks as ZS8M (not until the ship leaves for Cape Town -- He states, "I hope to be established & operational by the 5th of May). Pierre will be on the island for one year and activity will be mainly SSB and Digital (He states, "Sorry, no CW".). A Web page is now online, but is still under construction. Pierre told OPDX a few weeks ago that he will have access to the InterNet on the island. Watch the following Web page for updates: http://www.zs8m.com
UPDATE: Pierre, ZS1HF/ZS8M, reports (edited): "I arrived on Marion Island on April 15th, but will be operating as ZS1HF/P until the ship leaves for Cape Town. I have too much work to complete in the field before the ship leaves and operating ZS8M just places too much pressure on me. I will try and monitor 14.240 during the day, if and when I am in the base. Keep watching this site (QRZ.com)! 73 Pierre ZS1HF/ZS8M"

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 18th April 2010

IRTS 78th AGM

The 78th AGM of Irish Radio Transmitters Society will be hosted by the Dundalk Amateur Radio Society, over the next Weekend the 24 / 25th April 2010.The venue will be Fairways Hotel Dundalk Co Louth.

Tickets for the Dinner on Saturday night at 8.30PM are selling well at 35 Euro each and are available from Peter Grant EI4HX Peter's email address is secretary /at/ ei7dar.com or by Telephone 087 7944779..

The Rally will be held on Sunday 25th of April in the Fairways Hotel, Dundalk Co Louth. Doors opening at 11.00 AM, all the usual traders will be represented plus some new ones. Tables will also be available for sole traders without charge.

Fore more info on the AGM weekend, Dinner & Rally please check www.irts.ie or www.ei7dar.com

---

EI2RCR back on the air

South Eastern Amateur Radio Group's 2m repeater EI2RCR at the Ridge of Capard is back on air many thanks to Neil EI3JE, Andy EI3HG and John EI8JA who were responsible for getting it back on air.

Lough Erne Rally

Many thanks from Lough Erne Amateur Radio Club to the 300 who attended last Sunday's rally at SHARE - visitors, club members helping, folk there to trade or display, and friends. This rally was among the Club's biggest and best since its first back in April 1982.

On a hot summer day, the crack in SHARE's big arena was mighty. An array of trade and display stands suited every experimenter's interest and pocket, from Ireland, north and south, and Britain. The ORP talk upstairs was inspiring. On the lake, the boat cruise was a delight. Refreshing ice cream cones were on sale, as well as a hot lunch, coffee and bar service.

Raffle winner, Daniel Cullen EI1615 from Crossakeil Amateur Radio Association got the Kenwood TH-F7 hand held. Congratulations also to the crowd of new Foundation licensees who got 'welcome to amateur radio certificates' by Billy Pollock GI3NVW, himself fifty years and fifty days licensed.

Fermanagh Repeater, GB3CP, was busy all morning, as Gi0LEC guided and welcomed the crowd travelling to the rally. It was happy with chat again during the afternoon's homeward journey.

Peter Grant EI4HX with the IRTS stand was particularly welcome. Next weekend, the place-to-be is Dundalk for the IRTS AGM and Rally, sure to be another great event.

Thanks again to all and See you next April

>From Michael Mi5mtc Chairman, Lough Erne ARC, Northern Ireland's Amateur Radio Club of the Year.

KP4AO, Arecibo Observatory Amateur Radio Club on432-EME

The Arecibo Observatory Amateur Radio Club will again put the 1000-foot radio telescope on the air for 432 MHz EME.

The scheduled times of operation are: April 18: 1840- 2125 UTC

Callsign: KP4AO

Tx Frequency: 432.045 MHz Rx Frequency: 432.050 to 432.060+ Tx power: 400 W Antenna gain: 60 dBi System noise temp: 120 K (cold sky) System noise temp: 330 K (when pointed at moon)

KP4AO can be heard with a small hand-held yagi pointed at the moon, and a good receiver.

AO-51 CTCSS experiment

>From Sunday April 11 the Amateur Radio satellite AO-51 will be using a new experimental 67Hz CTCSS (PL) routine.

For AO-51 users it would be helpful to program in a 67Hz PL tone, but not absolutely required as long as someone else in the footprint does.

It also means if you are the first person in the footprint you might not hear the satellite until after it hears 67Hz for a few seconds.

International Marconi Day

On Saturday 24 April, the Howth Martello Radio Group and the North Dublin Radio Club will be celebrating International Marconi Day by operating an IMD award station from the Martello Tower in Howth using the call-sign EI0MAR.

The Martello tower houses the vintage radio museum. The museum web site is www.ei0mar.org. It is hoped to be active from 9am until 11pm on phone and CW. Visitors are very welcome.

The Cornish Radio Amateur Club organises this annual event and details of the awards and a list of award stations is available on www.gb4imd.org.uk.

IRTS Region 4 News

Students currently attending classes for the Amateur Radio Examination in the Limerick Institute of Technology, will be taking part in World Amateur Radio Day today at the QTH of Class Tutor Ger McNamara EI4GXB.

Students will be under the supervision of Ger, and 20M will be the band of choice. Students will gain practical experience on HF operating techniques, station setup, logging etc. This practical experience is complemented by their previous 11 weeks of classroom lectures.

Dawn to Dusk - 24-Hour Scottish Islands Amateur Radio Challenge

Bob, GM0DEQ, will be initiating the Dawn to Dusk Amateur Radio Challenge in June, when he will be activating up to 15 Scottish islands within 24 hours, using a sea plane as transport. His callsign will be GB4DTD [Dawn to Dusk].

Activity will be on the HF bands, 40-10 meters. QSLvia GM0DEQ.

The island list is subject to change due to a few factors governing their sea plane transport. More details will be published on the following Web site, when available, at: http://www.gdram.com

---

RAC requests Industry Canada for 60m Spot frequencyassignments

A formal request has been sent to the Director, Spectrum and Radio Policy, Industry Canada for consideration in authorizing for the Canadian Amateur Radio Service the same five 5 MHz frequencies that are now authorized in the USA, some of which are also across Europe.

In addition, two spot frequencies are also requested for exclusive Canadian Amateur use.

Rallies

Dundalk Amateur Radio Society

The Rally will held on Sunday 25th of April in the Fairways Hotel, Dundalk Co Louth. Doors opening at 11.00 AM, all the usual traders will be represented plus some new ones. Tables will also be available for sole traders without charge.

Bookings for Traders tables to Thos EI2JD email chairman /at/ ei7dar.com or Peter EI4HX secretary /at/ ei7dar.com

For further Rally info and contact details please check out the IRTS Website.

http://www.irts.ie/cgi/rallies.cgi

Items for inclusion in next weeks Radio News should be forwarded to Charlie EI8JB, preferably via e-mail to "charlie dot carolan at gmail dot com" Or by phone to 087-6265418 News can also be submitted via e-mail to "newsteam at irts dot ie" for automatic forwarding to both the radio and printed news services.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

DXNL 1672 - Apr 21, 2010
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

A5 - BHUTAN
Steve,W7VOA, will be active as A52SW from Thimphu working in CW and SSB
on 80m-10m from Apr 23 until May 1. Steve will run 100 watts into a
G5RV antenna. This is a business trip and only little activity can be
expected during his evening hours and the weekend.
His QSL manager is K2AU. The QSO data will be uploaded to the LoTW.

DL - GERMANY
The crew of DK0ZAB will show up as DK0ZAB/p from the Middle Elbe bio-
sphere reserve (DLFF-024) from Apr 24,0900 UTC, until Apr 25, 1800 UTC.
They will be QRV mainly in CW/SSB on the HF WFF frequencies (+/-QRM)
with 100 watts, wires and verticals. QSL via buro or direct to DK0ZAB.

FM - MARTINIQUE, NA-107
Nicolas,FM/F5TGR, announced to work "holiday style" in CW and SSB on
40m-10m between Apr 25 and May 6. QSLs direct or via bureau to F5TGR.

KH0 - NORTHERN MARIANA ISLANDS, OC-086
Kazuhiko Kuroi,AL5A (JH0MGJ), will show up from Saipan (OC-086) working
as AL5A/WH0 with 100 watts in CW and SSB on 80m-10m from Apr 24-26.
Emphasis will be put on working Europe.
QSLs via JA7JEC (direct) or JH0MGJ (bureau).

T8 - PALAU, OC-009
Kazumasa,JA4CZM, will be QRV from Palau (OC-009) signing T88NY on
all HF bands from Apr 27-29. QSLs via his homecall or via LoTW.

V2 - ANTIGUA AND BARBUDA, NA-100
Randy,WD8MGZ, is expected to show up as V25WV from Barbuda (NA-100)
between Apr 24 and May 1. QSL cards should be sent via his homecall.
See also: http://home.comcast.net/~randylwilliams/site

Leslie,W2LPL, will be QRV as V26LPL working with 100 watts mostly on

20m from Apr 26-30. He will use a FT-857 and a vertical antenna.
More information about QSLing can be found at:
http://www.ezcontactform.com/fid.php?formid=394042

ZL7 - CHATHAM ISLANDS, OC-038
Kaz,JH1HRJ (ZL3JP), is going to hit the airwaves as ZL7J from the
Chatham Islands (OC-038) working in SSB and CW on 160m-10m between
Apr 27 and May 3. QSL via JH1HRJ, direct or via bureau or eQSL.

3V - TUNISIA
A group of Italian HAMs led by Alfredo,IK7JWX, plans to activate the
island of Djerba (AF-083, ARLHS TUN-022, WLOTA L-1394) as TS8P and
TS8P/p starting around Apr 27. The team includes Leo,I8LWL, Raul,IC8ATA
YL Titti,IK8GQY, Armando,IK8BPY, Simon,IZ7ATN, Ampelio,IS0AGY,
Antonello,IK2DUW, YL Rosy,IW2NLC, Michele,IK2GPQ, Ruggero,IK2PZC, and
Stanislav,IZ2GRG. After that they will work also from the island of
Kuriat (AF-092, ARLHS TUN-002, WLOTA L-0974). Activities will take
place in CW, SSB, RTTY and PSK31 on all HF bands and 6m until May 4.
QSL via IK7JWY, direct or via bureau.

9H - MALTA, EU-023
Alfons,DJ8VC, Walter,DL8JS, and Ulla,DF6QP, are working as 9H3VC from
Malta (EU-023) until Apr 23. They can be found around 14277 kHz due
to limited antenna options. QSLs direct or via bureau to DJ8VC.

AUSTRIA, SPECIAL EVENT STATION
The amateur radio section of the Austrian Broadcasting (ORF) and the
Documentary Archive Radio Communications (QSL Collection) will activate
the special event station OE10M for only 72 hours on the weekend of
Apr 23-25 (0000-2400 UTC). On Saturday, Apr 24, 2010, which is the
"International Marconi Day" OE10M counts for the IMD award as well as
25 other IMD stations around the world.
QSLs via OE-bureau or direct via OE1WHC. QSL cards without SAE and
return postage (new IRC or US-$) will be confirmed via bureau.

POLAND, SPECIAL EVENT STATION
Piotr,SP2QCW, is working as HF2010WECK in all modes on all bands during
the "World Enduro Championships" (which is an offroad motorbike race)
until Jun 30. The suffix stands for World Enduro Championship Kwidzyn.
QSLs direct or via bureau to SP2QCW.

RUSSIA, SPECIAL EVENT STATION
The special event callsign R140L is active until Apr 25. This station
remembers the 140th birthday of Vladimir Ilyich Uljanov aka Lenin.
QSL via RW4HO.

UKRAINE, SPECIAL EVENT STATION
Irina,UY2RY, and Vitaly,UT7RW, are working as EN5R from Redkovka from
Apr 20-27. Redkovka is small uninhabited village which was evacuated
after the nuclear accident of Chernobyl in 1986.
QSL cards should be sent direct or via the UR bureau to UY2RA.

SILENT KEYS: These DXers put away their keys forever:
Hans Pollak (DJ0VZ), Mike Docking (M0JMD), Stanley Haase (K8VI),
Leonard H. Elster (VE3LA), Wilbur William Lightbourne (VP9WL),
Wilson A. Brooks (VE3OQI) and Allen T. Rothschadl (W9WAQ).

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de
---
We will inform you about two major upcoming DXpeditions when the time
has come. Some information in advance can be found online at:
http://www.uz1hz.com/pacificodyssey.html (May/June 2010) and at
http://www.vp8o.com (taking place in the beginning of 2011).

Gerben,PG5M, writes about his South Pacific trip at: http://www.dx.to
---
Seppo,OH1VR, is celebrating the 50th anniversary of his amateur radio
license with twelve mini DXpeditions - one every month. If you work him
from at least eight destinations you will participate in a drawing of
three small gifts in January 2011. Check also: http://www.oh1vr.net

UPCOMING CONTESTS

Apr 24/25: SP DX RTTY Contest
Apr 24/25: Helvetia Contest

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:
EU-008, GM/MM, Inner Hebrides: Graham,MM0GHM, Gordon,MM0GOR, and Mark,M0UTD,
will sign GW6TW/p from the Isle of Eigg from Apr 24-27. QSL via G0UZP.

EU-042, DL, Schleswig-Holstein State NW: DJ9MD, DK7JAN, DK8MIL and DK9BTX
will be QRV as DF0TM from Amrum from Apr 23-26.4.
Direct QSLs via DK8MIL, all others via bureau.

EU-129, DL/SP1, Usedom (Uznam) Island: Helmut,DL7VOX/p, will activate the
island of Usedom and its lighthouses from Apr 22 until May 11.
QSL via homecall (direct/bureau).

NA-076, W4, FL State North Group: A group of the "South Georgia United
Methodist ARS" intends to show up as WG4UM from Way Key on Apr 24.
QSLs via homecall (direct/bureau).

OC-008, P2, Bismarck Archipelago: Mat,JA1JQY (P29VJY), Sasi,JA1KJW (P29VKJ),
and Kuni,JA8VE (P29VEK), is working from New Britain until Apr 23.
QSLs via homecall (direct/bureau).

OC-088, 9M/V8/YB7, Borneo (main): Mirek,VK6DXI, is active as 9M8DX/2 from
Kuala Lumpur from Apr 20-23 and Apr 26-29. He also plans a short trip
to Tioman Island (AS-046) from Apr 24-26. QSL via SP5UAF (d/B).

Lighthouse activities (WLOTA/ARLHS/ILLW)

DF0TM LH 2464 Amrum Apr 23-26
DL7VOX/p LH 1640 Usedom Apr 22-May 11
TS8P LH 1394 Djerba Apr 27-May 4
TS8P/p LH 0974 Kuria Apr 27-May 4
YC9GV LH 2637 Lombok resident
9A2HQ LH 1342 Krk resident
9M8DX/2 LH 0119 Borneo Apr 20-23
9M8DX/2 LH 0119 Borneo Apr 26-29

Emergency communications in the 40m band

The Chinese Radio Sports Association (CRSA) asks everybody to keep the
frequencies 7050 kHz and 7060 kHz clear for emergency communications. After
the earthquake in the Yu Shu district (province Qinghai) radio amateurs
are helping there using these frequencies.

International Marconi Day 2010

The International Marconi Day (IMD) will take place on Apr 24, 2010. Many
stations will join the activities and a list of all announced special event
stations can be found at: http://www.gb4imd.org.uk/awardstns2010.htm

April Fools' Day

OM Sergio Matias,CT1HMN, writes that the news published under the title
"60m band allocated to amateur radio in Portugal" is fake. It was an April
Fools' Day prank by Tony,CT1FFU/CR5A, which rapidly disseminated through
the internet...

GB2RS NEWS

Sunday 18th April 2010

The news headlines

KP4AO works EME with the Arecibo radio telescope

Youth Net on GB3LC

Problems on the Central Scotland Repeaters being dealt with

The Arecibo Observatory Amateur Radio Club will put the 1000-foot radio telescope on the air for three days for 432MHz EME. The scheduled times of operation for the final day today, 18 April, are 1840 - 2125UTC. Using the callsign KP4AO and 400W the transmit frequency is 432.045MHz and receive frequency is 432.050 to 432.060MHz. KP4AO can be heard with a small hand-held Yagi pointed at the moon and a good receiver. A 15dBi antenna and 100 watts will be enough to work them on CW. Operators at KP4AO will do their best to work as many stations as possible. Each session will start with a brief announcement and CQ in SSB. SSB QSOs may continue for 30 minutes to an hour if the QSO rate remains high. The mode will be shifted to CW as soon as it is judged that higher QSO rates would result. They will listen for calls at frequencies 5-15kHz higher than the transmit frequency and even higher if QRM warrants. The operators ask that if you've already worked them in any mode, please do not call again to give others a chance. On 18 April, if they reach a condition where most calling stations have been worked and they judge that operating in the digital mode JT65B would produce a higher QSO rate, they will switch to JT65B.

Friskney & East Lincolnshire Communications Club Youth Net for Under 16s will take place on 12 May, 9 June and 14 July, starting at 1930BST on 433.225MHz, the GB3LC repeater. All young people in the area are welcome to join in.

Following the ongoing jamming and abuse problems on a number of Central Scotland FM Group repeaters, a meeting has taken place between Ofcom, the repeater group and the RSGB to discuss options to address the problem. Ofcom has indicated that the problem is under active investigation and as a result enforcement action has been taken against one individual resulting in the forfeiture of equipment and a number of others being warned of their conduct. The investigations are still ongoing and Ofcom has asked that any evidence of abuse is in the first instance forwarded to GM8HBY to co-ordinate information rather than create duplicate reports. This should be done by e-mail at

info@csfmg.com or by post to GM8HBY who is QTHR. Ofcom have also reminded repeater users not to respond to any abuse of jamming heard on the repeaters.

The Amateur Radio Section of the Austrian Broadcasting Corporation and the Documentary Archives Radio Communications and QSL Collection will operate OE10M during the weekend 23 to 25 April. OE10M is an official International Marconi Day station and contacts made on Saturday, 24 April are valid for the IMD Award. QSL via OE-Bureau or direct to OE1WHC. Cards without an SAE & new IRC or 1 US dollar to cover postage will be processed via Bureau.

The Easter Harlaxton amateur radio get-together and field day had to be postponed due to bad weather. Organiser Jim, M0JHW has now re-arranged the event for 22 and 23 May. It's at the same venue, the Sports and Social Club, Harlaxton, near Grantham, which is postcode NG32 1HX. There will be amateur radio operations that visitors can join as well as plenty of tea and coffee. A barbecue is planned for the Saturday afternoon.�More details nearer the time.

Over the weekend 24 and 25 April, The Radio Society of Harrow are demonstrating radio communications using the club call GX3EFX and displaying 1940s radio equipment at the Family Forties Experience Weekend event, 1940s House Bushey, Hertfordshire. The site was the former wartime HQ of 8th USAAF Fighter Command. Further information from the Society's website at www.g3efx.org.uk.

Every year, amateur radio operators all over the world celebrate 18 April as World Amateur Radio Day. This marks the anniversary of the formation of the International Amateur Radio Union formation in 1925. The WARD Award is available from the Polish Radio Amateurs' Journal QTC. Details available on the QTC website, www.pga.pzk.pl.

The 23rd International Marconi Day will take place on 24 April. Although not a contest, awards can be obtained and full details will be found at www.gb4imd.org.uk. For a station to be counted towards an award by applicants, that station must be registered by contacting the webmaster by e-mail to webmaster@gb4imd.org.uk prior to the event with full details of the station. In order to qualify as an Award Station, operations should take place from a site which either used Marconi equipment prior to his death in 1937 or from which Marconi carried out experiments during the same period.

The IEEE have organised a lecture by Dr Eli Brooker on Amazing Breakthroughs in Radar and Phased Arrays in the Sir David Davies Lecture Theatre, Roberts Building, Torrington Place, University College London at 1800 on Wednesday 21 April. Dr. Brookner is a distinguished lecturer of the IEEE Aerospace and Electronic Systems Society and has been involved in many aspects of radar technology. He was awarded the IEEE Dennis J. Picard medal in 2006 for outstanding accomplishments in advancing the fields of radar technologies and has received many other awards.

The Great Lumley Amateur Radio and Electronics Society has changed its name to the Durham and District Amateur Radio Society. The club meets at the Finchale Training College, Durham DH1 5RX every Wednesday from 7 - 9pm. Contact David, M0BPM on 0191 3888113 or Malcolm, M1CKU on 0191 4401792 for more details.

The Verulam Amateur Radio Club still has a few places left on their evening class Foundation course that starts on Thursday 22 April. As a direct result of a generous Grassroots Grant, the total cost (including the exam fee) is just ?25. Please contact Brian, G3YKB on 01923 228121 for more details or to book a place.

The G-QRP club's first Valve Day of the year takes place today, Sunday 18 April, from 2pm until 10pm on all phone or CW QRP frequencies. Just use a low power valve or tube transmitter, AT5, KW, homebrew or commercial, crystal or VFO and maybe a valve receiver, if you have one. It's not a contest, just an activity period and a chance to celebrate the contribution of valves to the world of radio. It's a good time to find World War 2 B2s, Spy and Parasets on the air. All comments and photographs should be sent by e-mail to g3vtt@aol.com by 30 April.

Bury Radio Society have places on the Intermediate Course starting Tuesday 18 May at 7.30pm. If you would like to book a place or require further details, please contact Norman, G1HHU on 07525 932729 or by e-mail to g1hhu.norman@googlemail.com.

And now for the details of rallies and events for the coming week

Today, Sunday 18 April, the West London Radio & Electronics Show will take place at Kempton Park Racecourse, Staines Road East, Sunbury on Thames, Middlesex TW16 5AQ. Talk in is available and there's free car parking. The doors open at 9.50am for disabled guests and 10am for other visitors. There will be the usual trade stands, Bring & Buy, special interest groups as well as lectures. Details from Paul, M0CJX, on 0845 165 0351.

The Andover Radio Amateur Club Boot Sale takes place on 25 April at Wildhern Village Hall and Playing Field, SP11 0JE, north of Andover just off the A343. Talk in will be on S22. There is plenty of car parking and the entry fee is ?1.50. For sellers it is ?6 per boot/table, ?8 inside the hall. Details from Martin, M0MWS, 01980 612070.

On 25 April, the 26th Yeovil QRP Convention takes place at Digby Hall, Hound St, Sherborne, Dorset. Digby Hall adjoins the central shopping car parking. Talk in will be on S22. There is ample car parking and the doors open at 9.30am. There will be lectures as well as trade stands and a Bring & Buy. Details from Robert on 01935 706715.

Now for the news of special events

GB0GAF will be on the air from the Great Alne Festival in Warwickshire on 20 April.

GB4MBP and GB0MD will be on the air on 22 April as part of the International Marconi Day activities. The first will be on the air from the Lizard in Cornwall and the second station from Kent.

Three stations will be on the air on 23 April. GB4MIW will be on the air from the Isle of Wight for Marconi Day. The GB0VVV will be on the air from Newark for Vulcan, Victor, Valient. Finally on 23 April, GB8MD will be on the air from Towyn in North Wales for Marconi Day.

Aberdare and District ARS will be running special event station GBOGMD for Marconi Day on 24 April. The station hopes to be active between 23 and 25 April on most HF bands at various times depending on conditions. SSB and PSK/RTTY will be used.

The Mid Ulster Amateur Radio Club will be transmitting from the Navan Centre, Armagh as part of the International Marconi Weekend on 24 and 25 April. This will also be the club's first annual social field day of the year with a barbecue on 24th and over night camp on the site. Visitors welcome.

>From 24 to 27 April there will be an IOTA activation from The Isle of Eigg on the west coast of Scotland. This is a joint activation by members of Kilmarnock and Loudoun ARC and South Cheshire ARS. The call will be GM6TW/P, the club call of SCARS info at QRZ.com. QSL via Paul, G0UZP.

On 24 April, GB5FHC will be on the air from the Fraserburgh Heritage Centre. GB8IMD is on the air for international Marconi Day from Netheravon Camp in Wiltshire. On the same day, GB0MGT is on the air from old Harlow in Essex, MGY was the callsign of the Titanic. Finally on 24 April, GB5LT will be on the air from Luttrells Tower in Southampton.

And now the HF DX news compiled from 425 DX News and other sources.

Helmut, DL7VOX will be active as DL7VOX/P from Usedom Island and lighthouse, which is IOTA reference EU-129, between 22 April and 11 May. He will operate mainly CW on the HF bands, using 100 watts and wire antennas. QSL via DL7VOX, direct or bureau.

Three members of the Yamato Amateur Club, Mat, JA1JQY, Sasi, JA1KJW and Kuni, JA8VE will be QRV from New Britain Island, which is IOTA reference OC-008, until 23 April. They will set up two stations and operate all bands from 160 to 10m using CW and SSB. P29VJY, QSL via JA1JQY, P29VKJ, QSL via JA1KJW and P29VEK QSL via JA8VE.

Now the contest news

The UHF UK Activity Contest & Club Championship takes place between 1900 and 2130UTC on 20 April. Using all modes on the 1.3 and 2.3GHz bands, the exchange is signal report, serial number and locator.

The data leg of the 80m Club Championships takes place on 22 April between 1900 and 2030UTC. The exchange is signal report and serial number.

The OK1WC Memorial Contest will take place on 24 April from 0400 to 0700 on the 160, 80 and 40m bands. No logs are required and the results are sent via the internet. For more information go to www.hamradio.cz/ok1wc/ where the rules are available.

The SP DX RTTY contest takes place over 24 and 25 April between 1200 and 1200UTC. Using the 3.5 to 28MHz bands, the exchange is signal report and serial number. SP stations send their Province code too.

On 27 April, the 50MHz UK Activity Contest & Club Championship takes place between 1900 and 2130UTC. Using all modes, the exchange is signal report, serial report and locator.

Now the solar factual data for the period from the 5th to the 11th of April, compiled by Neil Clarke, G0CAS on the 13th of April.

At the start of the period there were three spotted regions on the solar disc, by the end there was none. All the groups were small and produced no solar flares. Solar flux levels declined from 79 units on the 5th to 75 by the 10th. The average was 75. The 90 day solar flux average on the 11th was 83, the same level as last week. X-ray flux levels varied little day to day and averaged A3.6 units. Normally geomagnetic activity around sunspot minimum is relatively straight forward to forecast but on occasions a coronal mass ejection can take place and head directly towards Earth. Mention was made in last weeks report about a coronal mass ejection that was heading in our direction which had originated from the B7 solar flare on the 3rd. The size of the magnetic storm that followed surprised most forecasters. The Ap index on the 5th and the 6th was 49 and 46 units respectively. This was the result of the Bz remaining negative for long periods, particularly on the 5th. On the 7th a coronal hole disturbance arrived to keep the magnetic disturbance continuing. Eventually by the 10th the magnetic field had returned to quiet levels with an Ap index of 3 units. The average was Ap 21 units, making it the most disturbed week since December 2006. Solar wind data from the ACE spacecraft saw solar wind speeds increase dramatically 500 kilometres per second to around 760 in less than 30 minutes. Speeds peaked at 817 kilometres per second later in the day. Speeds then gradually declined to around 360 kilometres per second by the 10th. Particle densities remained low throughout. Bz on the 5th fluctuated between minus 16 and plus 20 nanoTeslas, and between minus 2 and plus 3 nanoTeslas on the quietest day.

Auroral propagation at 50, 70 and 144MHz occurred on the 5th, 6th and 7th. As usual, high latitude stations were most favoured, but contacts were reported at least as far south as central England. Meanwhile, HF MUFs were depressed by several MHz. East-west paths were the most affected, with normal values not fully restored until the 10th. However, during the early phase of the disturbance, conditions to the south benefited from some pre auroral enhancement towards Africa and South America. Just a quick note on the Solar Dynamics Observatory, everything is still progressing well.

And finally the solar forecast. This week solar activity is expected to be very low to low. Solar flux levels should be around the 80 mark for most of the week. Geomagnetic activity is expected to be quiet all week. MUFs during daylight hours at equal latitudes are expected to be about 22MHz for the south and 19MHz for the north. Darkness hour lows should be around 10MHz. Paths this week to the Middle East should have a maximum usable frequency with a 50 per cent success rate of around 21MHz. The optimum working frequency with a 90 per cent success rate will be about 16MHz. The best time to try this path will be between 1000 and 1700 hours. Following a good winter Sporadic-E season and openings over the last week, further openings could take place over the coming we as we approach the start of the summer season.

And that's all for this week from the propagation team.

NEWS FOR THE MIDLANDS

On Sunday 18 April Bolsover Amateur Radio Society is holding its 8pm Sunday night net on Bolsover 70cm repeater to celebrate the 6th birthday of GB3RB. For details, send an email to postmaster@g4rsb.org.uk.

On Monday 19 April Gloucester Amateur Radio & Electronics Society is operating club equipment. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 19 April South Birmingham Radio Society is having a committee meeting. Contact Don, on 0121 458 1603.

On Monday 19 April Welland Valley Amateur Radio Society is holding its AGM. For more information contact Peter D Rivers, G4XEX, on 01858 432105.

On Tuesday 20 April Derby & District Amateur Radio Society is having a video show. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 20 April Loughborough & District Amateur Radio Club is having a talk about WAB by Dave, G4IAR. More information from Chris, G1ETZ, on 01509 504 319.

On Wednesday 21 April Bolsover Amateur Radio Society is looking at fox hunting. For details, send an email to postmaster@g4rsb.org.uk.

On Wednesday 21 April Hinckley Amateur Radio Society is on the air. Details from John, M0JAV, on 07836 731544.

On Wednesday 21 April Lincoln Short-Wave Club is putting G5FZ on the air and having a natter night. For more information contact Pam Rose, G4STO, on 01427 788356.

On Wednesday 21 April Midland Amateur Radio Society is having a field day planning evening and holding training classes. Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 21 April South Notts Amateur Radio Club is on the air and practicing Morse. Details from Terry, M0RIA, via the web at www.radioclubs.net/snarc.

On Wednesday 21 April Telford & District Amateur Radio Society is discussing the club equipment and book stock, including what can be borrowed and lending rules. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 22 April RAF Waddington Amateur Radio Club is having a chat night with radio and antenna play, plus taking part in the 80m Club Contest. Details from Judy Rowlands, M6LQO, on 0754 445 6422.

On Thursday 22 April Salop Amateur Radio Society is having a talk by Pat McAlistair, G3YFK, on receivers. Details on the club website at www.salop-ars.org.uk.

On Friday 23 April Bromsgrove & District Amateur Radio Club is having a committee meeting. Contact Chris, M0BQE on 01905 776 869.

On Friday 23 April Coventry Amateur Radio Society is having a quiz night. Contact John, G8SEQ, on 07958 777363.

On Friday 23 April Nunsfield House Amateur Radio Group is having a magical mystery talk by Adrian Price. Details from Ken Frankcom, G3OCA, on 01332 720976.

On Friday 23 April South Birmingham Radio Society is having a construction evening. Contact Don, on 0121 458 1603.

On Saturday 24 April RAF Waddington Amateur Radio Club commences its weekend event of the V Force Re-union at Newark Air Museum, operating GB0VVV. Details from Judy Rowlands, M6LQO, on 0754 445 6422.

On Saturday 24 April South Notts Amateur Radio Club commences its Foundation and Intermediate theory weekend and Exam. Details from Terry, M0RIA, via the web at www.radioclubs.net/snarc.

On Saturday 24 April Telford & District Amateur Radio Society is taking part in the International Marconi Day from Tywyn, Cardigan Bay, Wales. Contact Mike, G3JKX, on 01952 299 677.

NEWS FOR THE NORTH OF ENGLAND

On Monday 19 April Angel of the North Amateur Radio Club is on the air and preparing for the exam. Contact Nancy Bone, G7UUR, on 0191 477 0036.

On Monday 19 April Sheffield Amateur Radio Club is having a talk on DIY radar by G8AGN. For more information contact Trevor Wood, M0TWS, by

email to trevorwood6@yahoo.co.uk.

On Southport & District Amateur Radio Club is having a talk on bicycle mobile operation by G4AKC and G7LPW. More information from Derek Hughes, G7LFC, on 01695 573870.

On Monday 19 April Thornton Cleveleys Amateur Radio Society is having a talk by G8RDP entitled who'd have a shack like this? Details from John Foster, 2E0EZY, on 01253 399377.

On Tuesday 20 April Chester & District Amateur Radio Society is holding a surplus sale. Details from Barbara Green on 07957 870770.

On Tuesday 20 April Halifax & District Amateur Radio Society is having a talk on software defined radio by Martin, M0GQB. Contact Anthony Vinters, on 01422 822636.

On Tuesday 20 April Otley Amateur Radio Society is having a member's presentation. Contact Paul, 2E0PAK, on 07768 996370.

On Wednesday 21 April Angel of the North Amateur Radio Club is holding an Advanced licence exam. Contact Nancy Bone, G7UUR, on 0191 477 0036.

On Wednesday 21 April Denby Dale Radio Club is having a talk on waterways by Geoff, G0PFH. Contact Gerald, G3SDY, on 01484 602905.

On Wednesday 21 April Hornsea Amateur Radio Club is holding its first foxhunt with G4YTV and G3RMX. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Wednesday 21 April Mid-Cheshire Amateur Radio Society is having a talk by G8ATB, asking how good are your dummy load and SWR meter? Contact Peter Paul Fox, G8HAV, on 01606 553401.

On Thursday 22 April Hornsea Amateur Radio Club is taking part in the 80m CC data, home stations. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Thursday 22 April South Manchester Radio and Computer Club is having a bring your microphone and Morse key night. Details from Ron, G3SVW, on 0161 969 3999.

On Thursday 22 April Wakefield & District Radio Society is having a talk by Dave, G4CLI, on the W&DRS node. Contact Ken, 2E0SSQ, on 07900 563117.

On Thursday 22 April York Radio Club is holding Foundation lessons. Details from Tony Skaife, G4XIV, on 01904 330502.

On Friday 23 April East Cleveland Amateur Radio Club is on the air. For more information contact Alistair, G4OLK, on 01642 475 671.

On Saturday 24 April Otley Amateur Radio Society commences 24 hours of operation for Marconi Day. Contact Paul, 2E0PAK, on 07768 996370.

On Saturday 24 April Wakefield & District Radio Society continues its Foundation Licence course. Contact Ken, 2E0SSQ, on 07900 563117.

NEWS FOR NORTHERN IRELAND

Over the weekend of 24 and 25 April the Mid Ulster Amateur Radio Club will be transmitting from the Navan Centre, Armagh as part of the International Marconi Weekend. This will also be the club's first annual social field day of the year with a barbecue on 24th and over night camp on the site. Visitors are welcome.

NEWS FOR SCOTLAND

On Tuesday 20 April Livingston & District Amateur Radio Society is having a club evening. For more information contact Norman, on 07740 946192.

On Wednesday 21 April Paisley YMCA Amateur Radio Club is holding an Advanced Licence exam. Contact Bill Anderson, 2M0BZZ, on 01505 613633.

On Thursday 22 April Aberdeen Amateur Radio Society is having a talk on 50 years of QRM by Kit, GM4EMX. More information from Lewis, GM4AJR, on 01224 575 663.

NEWS FOR THE SOUTH-EAST

and EAST ANGLIA

On Monday 19 April Braintree & District Amateur Radio Society is holding its construction contest. For more information contact John, M5AJB, on 01787 460 947.

On Monday 19 April Burnham Beeches Radio Club is having an equipment testing evening. Contact Dave, G4XDU, on 01628 625 720.

On Monday 19 April Felixstowe & District Amateur Radio Society is having a visit by RadCom editor Elaine Richards, G4LFM. It's a different venue this week, the talk takes place at 8pm at the Kesgrave Conference Centre, Ipswich, IP5 1JF. More information from Paul, G4YQC, by email to pjw@btinternet.com.

On Tuesday 20 April Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720815.

On Tuesday 20 April Bromley & District Amateur Radio Society is having a talk on transistors by Ruth, M0UYR. Details from Andy, G4WGZ, on 01689 878089.

On Tuesday 20 April Chelmsford Amateur Radio Society is having a club net night. Contact Martyn, G1EFL, on 01245 469 008.

On Tuesday 20 April Verulam Amateur Radio Club is having a talk on SOTA by M0TAZ. Details from Ralph, on 01923 265572.

On Tuesday 20 April Waterlooville Amateur Radio Club is running an exam course. Details from Rich, G4IBW, on 02392 680852.

On Wednesday 21 April Chesham & District Amateur Radio Society is on the air and holding a CW training session. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday 21 April Dover Radio Club is holding an Advanced Examination and having a natter and operating night. For more information contact Brian, G4SAU, by email to g4sau@darc.org.uk.

On Wednesday 21 April Norfolk Amateur Radio Club is having a talk on operating from the K3LR super station by Mark Haynes, M0DXR. Details from Chris Danby, G0DWV, on 01603 419204.

On Wednesday 21 April Worthing & District Amateur Radio Club is having a talk on fixing things, including adhesives, solders and brazing by Norman Billingham, M0EBI. For more information contact Roy, G4GPX, on 01903 753 893.

On Thursday 22 April Echelford Amateur Radio Society is having a natter night, bring & buy and CW practice evening. Contact John, G4GSC, on 01784 451898.

On Thursday 22 April Edgware & District Radio Society is looking at simple contesting. More information from Mike, G4RNW, on 0208 950 0658.

On Thursday 22 April King's Lynn Amateur Radio Club is having a club night and 2m club net. Contact Ray, G3RSV, by email to ral-g3rsv@supanet.com.

On Thursday 22 April Lowestoft & District PYE Amateur Radio Club is at the shack. Details from Phil, G0JSG, on 01502 585448.

On Thursday 22 April Reading & District Amateur Radio Club is visiting the Martin Lynch Emporium at Chertsey. Details from Pete, G8FRC, on 01189 695 697.

On Thursday 22 April Shefford & District Amateur Radio Society is having a talk on GB4FUN by Carlos, G0AKI. Details from David, G8UOD, on 01234 742 757.

On Friday 23 April Itchen Valley Amateur Radio Club is having an introduction to internet telephony by Geoff Morgan, G3ROG. Contact Charlie, M0WYM, on 02380 439560.

On Friday 23 April Mid-Sussex Amateur Radio Society is having a fox hunt instead of the usual meeting at Cyprus Hall. Contact Peter, G4AKG, on 01444 239371.

On Friday 23 April Radio Society of Harrow is having a long weekend at the 1940s House at Bushey. More information from Linda, G7RJL, on 0208 386 8586.

On Saturday 24 April Chelmsford Amateur Radio Society is operating GX0MWT for International Marconi Day from Sandford Mill. Contact Martyn, G1EFL, on 01245 469 008.

On Saturday 24 April Gorleston Amateur Radio Society is holding its lunch time meeting at the Short Blue Hotel, Gorleston. Contact David, G3OEP, on 01493 662 323.

On Saturday 24 April Hastings Electronics and Radio Club is having a spring auction of used & surplus equipment. Details from Gordon, on 01424 431 909.

On Sunday 25 April Andover Radio Amateurs Club is holding its boot sale. Details from Martin, M0MWS, on 07776 181646.

On Sunday 25 April Newbury & District Amateur Radio Society is attending the Andover Radio Club boot sale. Details from Richard, G3ZGC, on 01635 46241.

NEWS FOR THE SOUTH WEST

On Tuesday 20 April Blackmoor Vale Amateur Radio Society is having an HF evening in the club shack. Contact Tony, G0GFL, on 01258 860741.

On Tuesday 20 April West Devon Radio Club is discussing its summer trip. All are welcome. Further information from Jules Cuddy, M1AGY, on 01752 291588.

On Wednesday 21 April Thornbury & South Gloucestershire Amateur Radio Club is having a video night. Contact Tony, G0WMB, on 01454 417048.

On Wednesday 21 April Trowbridge & District Amateur Radio Club is having a natter night. Details from Ian, G0GRI, on 01225 864 698, evenings and weekends.

On Thursday 22 April South Bristol Amateur Radio Club is holding a surplus equipment sale conducted by Fred, G7LPP. Contact Len, G4RZY, on 01275 834 282.

On Thursday 22 April Swindon & District Amateur Radio Club is having a natter night. Contact Den, M0ACM, on 07810 317750.

On Friday 23 April Cornish Radio Amateur Club is setting up for International Marconi Day. Details from Steve, G7VOH, on 01209 844939.

On Friday 23 April North Bristol Amateur Radio Club is having a talk on silicon wafer technology by David Eastlake, M6DJE. Details from Dick on 01454 218362.

On Friday 23 April Torbay Amateur Radio Society is having an operating night. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

On Saturday 24 April Cornish Radio Amateur Club is taking part in International Marconi Day. Details from Steve, G7VOH, on 01209 844939.

On Sunday 25 April Blackmoor Vale Amateur Radio Society is attending the Yeovil QRP Rally at Sherborne. Contact Tony, G0GFL, on 01258 860741.

NEWS FOR WALES

On Monday 19 April Dragon Amateur Radio Club is preparing for International Marconi Day. More information from Stewart Rolfe, GW0ETF, on 01248 362229.

On Monday 19 April Llanelli Amateur Radio Society is holding its AGM. Contact Craig, MW0MXT, on 01269 840292.

On Tuesday 20 April Carmarthan Amateur Radio Society is preparing for the radio communication exams. Contact Alastair Underwood, GW0AJU, on 01267 290822.

On Tuesday 20 April Wrexham Amateur Radio Society is having a visit by RSGB President Dave Wilson. For more information contact Glyn, MW0BNB, via the web at www.qsl.net/wars.

On Saturday 24 April Aberdare & District Amateur Radio Society is operating GBOGMD for International Marconi Day. Details at www.radioclubs.net/aadars.

April 21, 2010

Editor: Rick Palm, K1CE <k1ce@arrl.net>

==> THE VIEW FROM FLAGLER COUNTY

The ground-breaking first meeting of the new Flagler ARESï¿½ organization is tonight at the Flagler county EOC. Emergency Services staff, and perhaps even Emergency Management Chief Troy Harper are expected to attend, as they are excited about having the ARESï¿½ resource back in the county. Local emcomm group members are also expected. Agenda items include a review of the new ARESï¿½ Code of Conduct, and training.

Interviewing of EC candidates has been slow. East Coast DEC Michael Lee, WB6RTH, said "the new EC will have to be strong-willed, fearless and with a bias toward action, not just empty talk. We don't need a chair-warmer for an EC, but a team builder, a change agent, a customer and volunteer-focused individual who will lead in positive change. Being a prior EC has no bearing on this decision - only a passion for service and a service-oriented attitude will be considered."

Flagler County ARESï¿½ has installed a new ICOM ID-880H D-STAR radio in the EOC's Radio Room. ARESï¿½ volunteers also revamped the Radio Room: All radios and power supplies were re-rigged with PowerPole <http://www.andersonpower.com/products/singlepole-connectors.html> connectors; antennas and feed lines were re-worked; and general clean-up was done. Eddie Cail, KJ4LRB, Phil McElrath, K5BBC, and Charlie Kunz, AA5QJ, joined with other EOC volunteers and staff members Frank Sanita, AA4FS, Bob Pickering, KB4RSY, and Harper for the work party. In the end, both Pickering and Harper were impressed with the efficiency and quality of the work. All work was documented and sent to EOC staff and management as a baseline for future perforï¿½mance measurements.

Our neighbors to the north, St. Augustine and St. Johns County ARESï¿½ are working hard to advance D-STAR hardware/software and capability in the county with the purchase of D-STAR radios for their EOC. The new equipment will close the gap with capability in all EOCs from Duval

(Jacksonville), through St. Johns, Flagler and down to Volusia county (Daytona Beach), enabling all of them to be part of a seamless network of D-STAR voice and data operations in the northern I-95 corridor.

Southeastern D-STAR Weather Net

On Sunday night, the local ARESï¿½ D-STAR repeater was connected to the Southeastern D-STAR Weather Net <http://www.dstarinfo.com/Nets/SEWXNet.html>. More than a half-dozen members checked into the net, joining a hundred others from 35 repeaters across eight states in the network. The net meets Sunday nights at 2100 local time, and EOCs are welcome to send representatives. The net also meets during severe weather call-ups.

==> ARRL SIGNS MOU WITH RED CROSS

On Thursday, March 25 ARRL President Kay Craigie, N3KN, signed a new Memorandum of Understanding (MoU) with the American Red Cross (ARC) at ARC National Headquarters in Washington, DC. The MoU, which replaces an earlier Statement of Understanding that expired in 2007, provides a "broad framework for cooperation" between the ARRL and the ARC "in preparing for and responding to disaster relief situations at all levels in rendering assistance and service to victims of disaster, as well as other services for which cooperation may be mutually beneficial." Details here <http://www.arrl.org/news/arrl-red-cross-sign-memorandum-of-understanding>.

==> AMATEUR RADIO WELL-REPRESENTED AT THE NATIONAL HURRICANE CONFERENCE

The 2010 National Hurricane Conference was held March 29 - April 2 at the Orlando Hilton in Orlando, Florida. This conference is the nation's premier forum for education and professional training in order to improve hurricane preparedness, response, recovery and mitigation to save lives and property in the United States and the tropical islands of the Caribbean and Pacific. Hundreds of federal, state and local officials were there to learn, exchange ideas and recommend new policies to improve Emergency Management.

The National Hurricane Conference (NHC) Amateur Radio Committee requested and received two Amateur Radio sessions this year. The first session was held over the course of the entire afternoon on Tuesday and boasted attendance of more than one hundred. The forum, titled "Amateur Radio: Disaster Communications Before, During and After Hurricanes," required no entrance fee and was open to all hams.

The conference presenters at the session were WX4NHC Amateur Radio Assistant Coordinator Julio Ripoll, WD4R; the National Hurricane Center's John McHugh, K4AG; Director of Operations for the VoIP Hurricane Net and Eastern Massachusetts Section Emergency Coordinator Rob Macedo, KD1CY; and ARRL Southeastern Division Director Greg Sarratt, W4OZK. During this session, attendees learned about operations of the Amateur Radio station at the National Hurricane

Center, WX4NHC, which is now entering its 30th year of service, and assisted the University of Miami Hospital (UMH) Project Medishare <http://www.projectmedishare.org/> with operations at their field hospital in Port-au-Prince, Haiti in the wake of the recent earthquake. The WX4NHC Group coordinated and teamed up with MARS, the Maritime Mobile Net, the Intercontinental Net and the VoIP Hurricane Net to provide long distance HF communications between UMH Miami and Haiti. They also provided extensive interoperable local communications (VHF, UHF, Marine, MARS) among the UMH Field Hospital, USNS Comfort Hospital Ship, other Medical Missions, Airport Terminal, Medical Supplies Logistics support and critical patient transfers.

Those in attendance also learned about the VoIP Hurricane Net, which uses Echolink and IRLP technology to provide surface reports to WX4NHC and provides interoperability and pathways into the affected area of hurricanes for EOCs and Non-Governmental Organizations (NGOs) at the local, regional and national level and also serves as a liaison with D-STAR nets when active. Hams in attendance were also provided an ARRL update.

On Wednesday morning an Amateur Radio session designed for Emergency Management professionals titled "Amateur Radio: The Emergency Manager's Hidden Resource" was held. Macedo and Sarratt conducted this session for 40 emergency management officials of which half were Amateur Radio operators. Good questions and interchange occurred with the managers from all over the U.S. This rap session concept was started at last year's Hurricane Conference in Austin, Texas, where Dennis Dura, K2DCD and Sarratt found this concept worthwhile in exposing the ARRL's role at section, regional/division and national levels for Emergency

Management and other served agencies. This interaction proved very valuable to emergency management and Amateur Radio.

On Wednesday evening, the Orange County (Florida) EMA hosted a meeting for ARESï¿½ and all amateurs interested in emergency radio communications who were unable to attend the Hurricane Conference. Macedo and Sarratt gave a recap and answered emergency communication questions. Emergency Manager Keith Kotch and more than 35 attended the meeting, toured the EOC/911 operations center and wrapped up by enjoying a special and tasty Hurricane Katrina cake, baked by Linda Kotch.

Jim Palmer, KB1KQW, a professional videographer and ARRL Eastern Massachusetts ARESï¿½ Assistant Section Emergency Coordinator, provided video and audio coverage for all three events. Videos will be available online by mid-June. Watch prior conferences from 2008 and 2009 here <http://video.nsradio.org/>.

Sarratt said "It was another great conference for ARESï¿½. Many Amateur Radio operators enhanced their skills, knowledge and relationships, which will help us to be more successful in providing emergency communications for the future." More information on the National Hurricane Conference here <http://www.hurricanemeeting.com/>. - from a report by ARRL Southeastern Division Director Greg Sarratt, W4OZK

==> 2010 HURRICANE SEASON FORECAST GRIM

Colorado State University's Research Scientist Philip J. Klotzbach and Professor Emeritus William M. Gray reported that information obtained through March 2010 indicates that the 2010 Atlantic hurricane season will have significantly more activity than the average 1950-2000 season: "We estimate that 2010 will have about eight hurricanes (average is 5.9), 15 named storms (average is 9.6), 75 named storm days (average is 49.1), 35 hurricane days (average is 24.5), four major (Category 3-4-5) hurricanes (average is 2.3) and ten major hurricane days (average is 5.0). The probability of U.S. major hurricane landfall is estimated to be about 130 percent of the long-period average. We expect Atlantic basin Net Tropical Cyclone (NTC) activity in 2010 to be approximately 160 percent of the long-term average. We have increased our seasonal forecast from the mid-point of our early December forecast."

"We expect current moderate El Niï¿½o conditions to transition to neutral conditions by this year's hurricane season. The predicted weakening of El Niï¿½o conditions combined with a very strong anomalous warming of the tropical Atlantic are the primary reasons why we are increasing our forecast. We believe that these two features will lead to favorable dynamic and thermodynamic conditions for hurricane formation and intensification." More info here <http://hurricane.atmos.colostate.edu/Forecasts>. -- Department of Atmospheric Science, Colorado State University

==> CHINA'S QINGHAI PROVINCE EARTHQUAKE

The Chinese Radio Sports Association <http://crsa.org.cn/english.php> (CRSA) has asked that the frequencies of 7050 KHz and 7060 kHz be kept clear for emergency communications following a devastating earthquake in Yu Shu district, Qinghai province. A number of radio amateurs are active in supporting the rescue and recovery efforts including BG9UA, BG9UP and BG9UO.

The emergency communication team of the Anhui Amateur Radio Society, led by Mr. Du, BG6CEV, was flying to Qinghai on April15 to bring communication equipment.

The earthquake measuring 7.1 on the Richter scale has left 589 people dead, nearly 10,000 injured and 10,000 families needing to be resettled due to 99% of houses being damaged. Yu Shu is located on a plateau with temperatures falling to -5 degrees Celsius making conditions difficult for those without shelter as well as hampering rescue efforts. Water, electricity and other facilities are also cut off. - from a report by G0DUB, Region 1 Emergency Communications Coordinator; and Fan Bin, BA1RB, CRSA Coordinator of the IARU Region 3 Disaster Communications Committee via Jim Linton, VK3PC

==> ARESï¿½ DIGEST

March 1 -- Kentucky has a new ARES Emergency Communications Plan <http://www.kyham.net/downloads/ares/KYARES_SECP.pdf> as of March 1, 2010. The Kentucky Amateur Radio Emergency Service (KY ARES) is comprised of Kentucky operators who have voluntarily registered their capabilities and equipment for public service communications and disaster/emergency communications duty. The ARRL Kentucky Section consists of five regions, 13 districts and 120 counties.

March 28 -- Amateur Radio Assists with Rescue in Great Smoky Mountains <http://www.arrl.org/news/amateur-radio-assists-with-rescue-in-great-smoky-mountains>

April 1 -- Telephone Outage in Nebraska Was No April Fool's Joke <http://www.arrl.org/news/telephone-outage-in-nebraska-no-april-fool-s-joke>

April 24 -- Sacramento Valley (CA) Emergency Communications Leadership Conference this Saturday <http://www.yoloares.org/>. The third annual seminar for Emergency Communications Leadership in the ARRL Sacramento Valley (California) Section will take place Saturday, April 24, from 9 AM to 2 PM, at the U.C. Davis Sierra Foothills Research and Extension Center, 8279 Scott Forbes Rd., in Browns Valley. The seminar is hosted once again by Art Craigmill, K6ALC, the Yuba and Sutter County Emergency Coordinator. The seminar is organized and presented by Larry Sutter, WD6FXR, Section Emergency Coordinator. All Section emcomm leadership is invited as well as anyone who intends to step up to a leadership position. All emcomm organizations, not just those whose title includes the ARES label, are urged to attend.

==> ARRL FILES COMMENTS IN RESPONSE TO HOSPITAL ASSOCIATION SEEKING BLANKET WAIVER REQUEST FOR AMATEUR RADIO DRILLS

In February 2010, the American Hospital Association (AHA <http://www.aha.org/>) filed a request with the FCC for a blanket waiver of Section 97.113(a)(3) of the Commission's Rules "to permit hospitals seeking accreditation to use Amateur Radio operators who are hospital employees to transmit communications on behalf of the hospital as part of emergency preparedness drills." On March 3, the FCC issued a Public Notice -- WP Docket 10-54 <http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-10-365A1.pdf> -- seeking comments if the Commission "should grant AHA's request for a blanket waiver of Section 97.113(a)(3) to permit amateur operators who are hospital employees to participate in emergency drills that are conducted by hospitals for accreditation purposes and that are not government-sponsored." Section 97.113(a)(3) specifically prohibits amateur stations from transmitting communications "in which the station licensee or control operator has a pecuniary interest, including communications on behalf of an employer." On April 2, the ARRL filed comments regarding the blanket waiver request <http://www.arrl.org/news/arrl-files-comments-in-response-to-hospital-association-seeking-blanket-waiver-request-for-amateur-r>.

While not opposing the grant of a waiver, the ARRL urged the Commission "to carefully delineate limits on the types of communications that can be provided by employees of hospitals for accreditation purposes or otherwise pursuant thereto." The ARRL pointed out that AHA's waiver request was not "sufficiently specific to preclude any possible misunderstanding by Amateur Radio licensees (and hospital administrators) about what is permitted and what is not. The Commission's notice alleviates some, but not all of these concerns."

To address this, ARRL proposed some very specific language for this waiver in its comments that will:

*Accommodate the specific needs of AHA and its member hospitals.

*Permit effective and seamless emergency and disaster relief communications preparedness drills and exercises incorporating Amateur Radio.

*Protect the Amateur Service to some extent against potential commercial exploitation.

*Protect Amateur Radio licensees who are employees of hospitals against pressure from employers to conduct inappropriate communications by means of Amateur Radio stations. Background and more discussion here <http://www.arrl.org/news/arrl-files-comments-in-response-to-hospital-association-seeking-blanket-waiver-request-for-amateur-r>.

HDSCS Weighs In

The Hospital Disaster Support Communications System (HDSCS) of Orange County, California, has filed its official comments <http://www.hdscs.org/AHAcomment.html> to the FCC Public Notice regarding the "blanket waiver" request by the American Hospital Association. HDSCS is a specialized unit of ARES formally organized in

1980 at the request of hospitals in north Orange County who hold drills together each year for disaster preparedness. It came about as the result of a phone outage at a large hospital in Fullerton in 1979 and the impressive response of Amateur Radio operators to that emergency. Beginning with seven at inception, the list of HDSCS-supported facilities has grown to include all of the acute care receiving hospitals in the county, plus other critical medical facilities.

Founder April Moell, WA6OPS <emcom4hosp@aol.com>, stated that she would be interested in comments regarding this issue: "For those of you who are hospital employees, please read through the letter from AHA to the FCC. I would also like to know your thoughts about the statement regarding The Joint Commission standards for drills and using Amateur Radio." Moell is ARESï¿½ District Emergency Coordinator for the Hospital Disaster Support Communications System <http://www.hdscs.org/>, Orange County, California

==> NATIONAL COMMUNICATIONS SYSTEM'S SHARES PROGRAM

[The National Communications System <http://www.ncs.gov/about.html> is a long-time MoU partner with the ARRL. The NCS is a unique organization. It is a confederation of 23 organizations across the Federal Government tasked with ensuring the availability of a viable national security and emergency preparedness telecommunications infrastructure. The President designates member organizations that own or lease telecommunications facilities/services of significant value to emergency response or that have important telecommunications policy, regulatory, or enforcement responsibilities. The assets of these 23 organizations comprise the bulk of the Federal Government's telecommunications resources.

Veterans will recall the NCS "Night Tango" exercises of the '80s, designed to evaluate the capabilities of volunteer communications systems to support NCS goals. NCS recognizes the resources that trained radio amateurs bring to the table, especially through the decentralized field organization (ARES and NTS) of the ARRL.

The SHARES program often is operational during major disaster situations, and this month we look at this program as part of our basic emcomm education, reproduced from the NCS Web site. - ed.]

The SHARES program is charged with promoting interoperability between High Frequency radio systems used by the Federal departments and agencies. It is also tasked to foster interoperability through examination of regulatory, procedural, and technical issues. This role has taken on added importance with the widespread purchase and use of Automatic Link Establishment (ALE) technology throughout the HF radio community. In responding to this role, the NCS SHARES HF Interoperability Working Group <http://ncs.gov/shares/hfiwg.html> has established the SHARES Action Item <http://ncs.gov/shares/shares_action.html> process to identify, record, and track issues affecting HF radio interoperability in the Federal

government.

Emphasis has also been placed on expanding awareness of new technologies in HF radio. Technological advancements have made HF radio more efficient and competitive in day-to-day operations. Multiple microprocessors, Digital-Signal Processing (DSP) and computer control, and Automatic Link Establishment (ALE), combine to simplify and enhance HF radio operation and frequency selection. The US Navy has successfully demonstrated e-mail links within a surface fleet Battle Group via HF radio, with transmission speeds of up to 4.8 kbps.

Automatically combining HF radio and other communications media such as land line, satellite, and VHF/UHF enables a user to consider costs and priority in processing messages. This technology provides selective routing of high-speed, error-free transmission of fax, e-mail, text, and data files. Data compression techniques further enhance the effective data rate.

New technologies also enable the transmission of imagery over HF. High-resolution color and monochrome images from analog cameras, still video cameras, and digital cameras as well as imagery from IR and RADAR sources can be processed via HF radio. Image compression and error correction algorithms are featured in this newly enhanced technology.

==> NEW EMERGENCY MANAGER AT ARRL HQ

The ARRL is pleased to welcome Emergency Preparedness and Response Manager Mike Corey, W5MPC, to the Headquarters staff in Newington. Corey's major responsibilities include addressing the development and implementation of an organizational disaster response plan as well as an operational continuity plan, complete with supporting procedures and training. Corey also will play an integral part in the management of ARESï¿½ <http://www.arrl.org/ares>, and in future negotiations with served agencies with whom ARRL shares or creates Memoranda of Understanding <http://www.arrl.org/served-agencies-and-partners>.

An Extra class licensee and an ARRL Life Member, Corey comes to the ARRL with almost 20 years of experience with emergency communications. Licensed since 1988, he has been involved with SKYWARN <http://www.skywarn.org/> since 1991 and has attended basic and advanced SKYWARN training. He is the author of the ARRL Storm Spotter's Handbook, which was released last month.

After graduating from Indiana University, Corey embarked on a career in law enforcement, working as the Communications Officer for the Howard County Sheriff's Department, where he was responsible for dispatching law enforcement, emergency medical services, fire services and county resources to calls for service, as well as operating and maintaining the logs for the National Crime Information Center. Corey also served as Project Manager for contingency planning for public safety communications. While employed at the Sheriff's Department, he also volunteered at the Kokomo Howard County Emergency Management Agency,

serving as a Special Deputy Sheriff, and assisted with emergency management response planning and local disaster response as part of the Emergency Operations Center staff.

Corey left Indiana to pursue a Master's degree in Criminal Justice at the University of Mississippi. While attending to his studies, he joined the University of Mississippi Police Department as the Communications Officer. Corey served as the primary contact for the department, provided support training to new employees, coordinated public safety communications during campus events and advised the University administration on severe weather response. While part of the University Police Department, Corey became a Mississippi Certified Public Safety Communications Instructor.

During August and September 2008, Corey volunteered at the Saint Helena Parish (Louisiana) Office of Homeland Security, providing support during Hurricane Gustav. He helped to manage the Emergency Operations Center and served as its liaison to local, state and federal agencies, as well as to local private entities and the local evacuation shelters.

Corey said he would like to take his love for Amateur Radio and public service "and bring in the education part of ham radio, training and teaching and learning" to his position at HQ. "I'd like to work with the existing relationships that the ARRL has with outside agencies. For instance, I noticed that the ARRL's contact at the National Weather Service is the same person who reviewed my book for the National Weather Service. So I already have a good working relationship with him. Building on the strength and stability that we enjoy will be a main focus of mine." - excerpted from the ARRL Letter

==> LETTERS

In re the item in the last issue on the Haitian medical relief effort, I would like to clarify a few issues. The article stated "HF Winlink was used for routine traffic. Its primary purpose was to provide backup for emergency traffic should the VSAT e-mail link go down. This was never needed but having the capability was a safety net that met the mission requirements." This is not the case. Initially, Nassau University, Miami Med, and the Southern Baptist Disaster Relief faced many hours when the only transport layer available was Winlink 2000. Much of this traffic was command and control, but some did provide information to save a few lives -- very gratifying.

Secondly, MARS does NOT deploy its members. It is the MARS Agencies who deploy MARS volunteers. This was recently made clear with an "ALL_MARS" bulletin sent by the Chief of Army MARS. There is a huge Civil government, and non-government list of Agencies using the "AMARS Agency Use Agreement," which provides the instructions for the service. It gives these agencies the capability to train and use ANY volunteer necessary to accomplish their mission using the MARS services, including ARRL ARESï¿½ members, and MARS volunteers, IF they are qualified. Many agencies spend time and money training these volunteers

as they would their own employees. Fact is, these agencies, especially Federal agencies, who must use their own employees, train these employees for this support.

The new DODI (Department of Defense Instruction) puts emphasis on the above. "MARS" is not making the deployments; it is always (to date) the agencies doing it. -- Steve Waterman, K4CJX, AAA9AC; Winlink Network Administrator, Winlink Development Team, AMARS National Automation Coordination/Agency Liaison; Assistant Director, ARRL Delta Division

==> EMCOMM EAST RETURNS TO ROCHESTER, NEW YORK

The third annual EmComm East emergency communications conference is slated for September 18, 2010, in Rochester, New York.
EmComm East is an ARRL-sanctioned Amateur Radio emergency communications conference where operators can attend training sessions on technical topics, learn from served agencies, obtain VE testing for license upgrades, and interact with other emcomm operators from all over the area.

The hosts are currently seeking presentation proposals. If you have an idea for a presentation, or if you know of someone who might be willing to present, let them know. Send an e-mail to program@emcommeast.org <http://webmail.cfl.rr.com/do/mail/message/mailto?to=program%40emcommeast.org>.
The deadline for presentation proposals is July 1. Ask your local Amateur Radio clubs, and Emergency Coordinators to spread the word.
Please visit www.emcommeast.org <http://webmail.cfl.rr.com/do/redirect?url=http%253A%252F%252Fwww.emcommeast.org> for more information, or to sign up for e-mail announcements. You can also contact the hosts at info@emcommeast.org <http://webmail.cfl.rr.com/do/mail/message/mailto?to=info%40emcommeast.org>.
See you in September! -- Jeff Wigal, WY7Q

==> K1CE FOR A FINAL

A recurring theme of this newsletter is the work of excellence of our ARESï¿½ volunteers. But, it is also important that we recognize the work of the often unsung Emergency Manager as a supporter of our efforts. Flagler County's Emergency Management Chief Troy Harper falls into that category: He has been a staunch supporter of ARESï¿½ efforts in this county, for which we are very grateful.

As a 20+ year resident of Flagler County, Harper has a vested interest in the community. He started his professional career in the United States Air Force and then returned to Flagler County where he was self-employed for many years. Harper states: "My Emergency Management career started with Flagler County in 1994 when I worked as a public information officer for Emergency Management. When I was hired as the Emergency Management Chief I committed to making Flagler County prepared for all hazards. From mitigation and preparedness through response and recovery, my goal is to keep the citizens and visitors of Flagler County informed and involved. I operate my office under the

adage, "It wasn't raining when Noah built the ark."

A tip of the ARRL fedora to Flagler Emergency Management Chief Troy Harper.

See you next month! 73, Rick, K1CE

The ARES E-Letter is published on the third Wednesday of each month. ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/FandES/field/ares-el/.

295. Kenwood Reprogramming

Newsgroup: rec.radio.amateur.misc
Date: 2010-04-21 17:45:14 UTC
From: Jeremy Reid <jeremy@reiditconsulting.com>
Message-ID: <VZidnXwAdKw-pFLW4p2dnAA@comporium.net>
Source record: 6014

My company is getting rid of all of its radios that will not transmit on our newly assigned 12.5KHz wide frequency. (Older radios will only transmit with a 25KHz bandwidth). I was hoping to salvage some of these old radios, however I have no way to reprogram them. I have the cables, but no software to reprogram them. I'm looking to reprogram some TK-360 (not the G model), as well as some TK-370. I think the Kenwood software is KPC-27. Anyone have any ideas?

Thanks,

Jeremy
KJ4OUJ

*** Welcome to rec.radio.info! ***

Welcome to rec.radio.info, a group that aims to provide a noise-free
source of information and news for the entire rec.radio hierarchy.

Two introductory articles about rec.radio.info are posted to the group
every month. You are now reading the first article, which explains what
rec.radio.info is, and answers some Frequently Asked Questions. The
second article is titled Posting Guidelines, and you only need to read
it if you want to submit an article to rec.radio.info.

You can skip to the next section of this article by searching for the
next
" -- " string. The sections available are:
- What is the purpose of rec.radio.info?
- Why are messages almost always cross posted to rec.radio.info?
- What is a 'follow-up', and what does 'moderated' mean?
- OK, so now I know what 'moderated' means. Tell me more.
- What type of material is considered inappropriate?
- I do not have access to news, how can I get the information posted to
rec.radio.info?
- Will the material appearing in rec.radio.info be archived somewhere?
- I have a regular posting with timely information, is there a way to
speed up it's delivery, or automate for more convenience?

-- What is the purpose of rec.radio.info?

The purpose or charter of rec.radio.info is to provide the Usenet
community with a resource for information, news, and facts about any and
all things radio.

All the other rec.radio groups are intended for discussions and general
chit chat about radio. Rec.radio.info will contain informational,
factual articles only. Follow-ups are redirected to an appropriate other
group, and further discussion (if any) will not take place in
rec.radio.info.
```

In order to ensure that rec.radio.info contains only appropriate articles, it was decided to create the group as a moderated newsgroup.

-- Why are messages almost always cross posted to rec.radio.info?

It provides a "tag" for each article to be assembled into a filtered presentation in rec.radio.info (even with cross-posting, only one message, with a unique Message-ID, is propagated across the net). This tag also facilitates a pre-existing method of dropping or canceling the articles locally within the discussion groups if you don't want to see them. This accommodates individuals who want to separate the bulletins from the discussions, discussions from the bulletins, as well as those who are adamant about not reading another newsgroup and wanted to see everything all in one basket.

With the total size of Usenet (in number of newsgroups and total traffic) doubling every year or so, this is no insignificant contribution to reducing information noise and chaos. Making the discussion groups a catch-all, and making extra newsgroups filters on that catch-all, is also the most realistic way to implement such a scheme (It's not intuitively obvious what the charter, contents, and general appropriate topics for each and every newsgroup are. Seeing FAQ's and charter/intro postings in the home newsgroup is beneficial for new readers).

By cross-posting one only is adding a few tens of bytes to each bulletin (to specify the extra group on the Newsgroups line), but are adding the capability for very powerful filtering features available on most news servers, listservers and readers. Your local news guru could probably explain these features in more detail.

In rn, for example, according to Leanne Phillips in her rn kill-file FAQ, add a line of the form:

/Newsgroups:.*[,]rec\.radio\.info/h:j

either in ~/News/KILL (if you don't want to see rec.radio.info articles anywhere) or ~/News/rec/radio/amateur/misc/KILL (if you don't want to see them just in rec.radio.amateur.misc). The latter method means your kill file will only be consulted during rec.radio.amateur.misc (and hence runs more efficiently), and will probably work for most people.

In nn, according to Bill Wohler in his nn FAQ, add a line of the form:

rec.radio.info:!s/:^

in ~/.nn/kill (if you don't want to see rec.radio.info articles anywhere), or put the following lines:

sequence
rec.radio.info
rec.radio.

at the end of ~/.nn/init in order to see all the rec.radio.info bulletins first, then read the remaining rec.radio.* without the

bulletins.

In slrn, according to the srln FAQ, the following scoring rule will | allow you to see rec.radio.info-crossposted bulletins, while still | filtering out most SPAM or "Velveeta" crossposted to more than 2 | newsgroups (as such articles usually do not contain a 'Followup-To:' | header): |

Score: -9999 |
Newsgroups: ,.*, |
~Followup-To: . |

More information about kill files may be obtained from Dave Fawthrop's Killfile FAQ at:

http://www.hyphenologist.co.uk/killfile/

-- What is a 'follow-up', and what does 'moderated' mean?

If you are new to Usenet and are not familiar with the terminology, you might want to read the general introductory articles found in the newsgroup news.announce.newusers. Doing so will make your life on the net much easier, and will probably save you from making silly beginner's mistakes.

If you think that at this moment you are reading an echo, a conference, or a bulletin board, I'd also strongly suggest a trip over to news.announce.newusers.

For the rest of this article, we will assume you have a basic knowledge of Usenet terminology and mechanics.

A moderated group means that any article that needs to be posted to the group has to be accepted by the moderator of the group. Since we need to ensure that followups to an article (discussion) do not show up in the rec.radio.info newsgroup, the `Followup-To:' header line contains a newsgroup that is appropriate for discussions about the specific article.

-- OK, so now I know what 'moderated' means. Tell me more.

Rec.radio.info is a moderated newsgroup, which means that all articles submitted to the group will have to be approved by the moderator first.

The current moderator of the group is the rec.radio.amateur.moderated Moderation Team. Submissions to rec.radio.info can be posted, or e-mailed to:

rec-radio-info@panix.com

Comments, criticisms, suggestions or questions about the group can be e-mailed to:

rec-radio-info-request@panix.com

But before you do so, please be sure to check out the "Posting Guidelines" article.

The influence of the moderator should be minimal and of an administrative nature, consisting chiefly of weeding out obviously inappropriate articles, while making sure correct headers etc. are used for the appropriate ones.

-- What type of material is considered inappropriate?

There are three broad categories of articles which will be rejected by the moderator:

1) Requests for information: rec.radio.info is strictly a one-way street. We receive information in our mailbox; we then post it to rec.radio.info. Requests for specific information belong in the normal discussion newsgroups. If your request gets answered, you might consider passing the answer on to rec.radio.info, though. Especially if you can edit it into a informational, rather than a discussion, format.

2) Obvious discussion articles, or articles that appear unsubstantiated.

3) Commercial stuff: a relatively unbiased test of a radio product would be accepted, but any hint of for-profit might be reason for rejection. For three reasons: This is not the purpose of the list, for-profit is a controversial topic, and this list may be passed onto Amateur Packet Radio (where for-profit is prohibited except under certain provisos).

rec.radio.swap may be more deserving of the posting in any matter.

Similarly, copyrighted material generally cannot be used. If it's TRULY worthwhile to the net, We would recommend obtaining permission from the copyright holder. Please note the source, and if permission was given. We reserve the right to make the final decision concerning appropriateness in all situations. In most cases, a brief summary of, or pointer to, the copyrighted information may be all we can allow.

-- I do not have access to news, how can I get the information posted to rec.radio.info?

Google has an excellent web interface to Usenet newsgroups. It is available at:

http://groups.google.com

It supports both reading and posting.

Another excellent web interface to at least the radio-related Usenet newsgroups is the RadioBanter site:

http://www.radiobanter.com

sponsored by the NewsgroupBanter project:

http://www.newsgroupbanter.com

It, too, supports both reading and posting.

-- Will the material appearing in rec.radio.info be archived somewhere?

Yes. See Google Groups and RadioBanter above.

Effectively this means that anything you post to rec.radio.info will be permanently stored, so your work will not be lost.

-- I have a regular posting with timely information, is there a way to speed up it's delivery, or automate for more convenience?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as time critical.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires co-operation and goodwill to be beneficial to the community in the rec.radio hierarchy.

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

(Adapted, with permission, from the original article written by Mark Salyzyn, AG4YD, ex-VE6MGS.)

*** rec.radio.info - Posting Guidelines and Etiquette ***

Two introductory articles about rec.radio.info are posted to this group
and to rec.answers/news.answers every month. You are now reading the
second article, which explains how to submit something to
rec.radio.info, and which answers some Frequently Asked Questions about
the submission process. The first article is titled "Welcome to
rec.radio.info", and it might be a good idea to check it out as well.

-- How do I submit something to rec.radio.info?

Two possibilities. You can use your newsreading software to just post
the article to rec.radio.info, as you would do with any other
newsgroup. The difference is that the software recognizes the special
status of rec.radio.info as a moderated group, and will e-mail your
article to us, the moderation team, instead of posting it to the group.

Alternatively, you can mail your article directly to us at the following
address:

rec-radio-info@panix.com

Mailing us directly is probably (a wee bit) faster, but using the
transparency offered by the newsreading software is probably more
convenient.

If you have any questions, or wish to deal with some administrivia with
the moderation team, we suggest mailing to the following address:

rec-radio-info-request@panix.com

-- How soon will I see my article appear?

It depends on how busy we are. Your article reaches us as mail, we have
to read it first, give it the stamp of approval, and finally send it on
to the group. We will attempt to read and decide on all submissions
within 72 hours at the very least, though we will probably be able to
process submissions much faster in actual practice.
```

The site from which we moderate this newsgroup, "Public Access Internet and Unix, NYC" (Panix), is directly connected to the Internet, and articles posted at that site should appear at most major news sites, including Google Groups, the same day. The principal delay, therefore, will be the wait in the moderator's submission queue.

If you post a periodic article, and have shown to be trustworthy, we may allow you to post directly if the article is of a timely nature. See the section below on direct posting.

-- Should my article be in a specific format?

No. If it is not totally illegible, we will accept it, and if it does not have a correct subject-line we will correct it with your permission -- that's what a moderator is for.

However.

You could do us a big favor by making sure your article conforms to these simple requirements:

1) The article must present information, not discussion or requests, We will reject the article or require you to change the wording if it is worth it.
2) A good, descriptive Subject line.
3) Always mention what source you got the information from.
4) Don't forget to include a Followup-To header, at least if you don't want further discussion to automatically be forwarded to you, the poster, which is the default if the article is only posted to rec.radio.info.

As we said: if your article is appropriate we will post it even if you don't follow these guidelines, but then don't blame us for not processing it immediately. 'Perfect' articles we can send on with a couple of keystrokes. Stuff that needs minor editing is going to have to wait until we have time to do so.

Please do not waste both our and your time by posting requests, as this is an information only news group.

-- What about crossposting?

If you send something to rec.radio.info, just name any group you'd like to cross-post to in the Newsgroups field. Then, when we approve the article for rec.radio.info it will get automatically cross-posted to any other groups mentioned. This will also override the default Followup-To: poster, replacing it with the groups you cross posted to.

We would prefer if the group be cross-posted to the various discussion groups in the rec.radio.* hierarchy that are appropriate:

rec.radio.amateur.misc Amateur (ham) radio and related matters
rec.radio.amateur.packet Amateur Packet Radio discussions
rec.radio.amateur.policy Amateur Radio practices, rules, etc.
rec.radio.noncomm Non commercial radio discussions

rec.radio.shortwave International broadcasting on the 'HF' bands
rec.radio.cb Citizens Band (27 MHz) discussion
rec.radio.scanner Scanner discussions (unsupported group)

or in one of the moderated groups:

rec.radio.amateur.moderated Amateur radio practices, rules, etc.
rec.radio.broadcasting Discussion of *domestic* radio broadcasting

We will leave it up to the poster to decide which group(s) are appropriate, but reserve the right to add groups if we feel it has broader interest. We will consult with the poster first.

Notes on crossposting:

- rec.radio.broadcasting is also a moderated group. The rec.radio.broadcasting moderator prefers to review all articles himself before posting. Placing rec.radio.broadcasting before rec.radio.info on the Newsgroups line should accomplish this. We will typically abide by the rec.radio.broadcasting moderator's decision whether the article is appropriate for rec.radio.info.

- rec.radio.amateur.moderated is also a moderated group. As the rec.radio.amateur.moderated Moderation Team manages both rec.radio.amateur.moderated and rec.radio.info, we can manage crossposting and approvals for both newsgroups. The rec.radio.amateur.moderated group does not allow crossposting to other discussion newsgroups, whether moderated or unmoderated. However, we would like to manage rec.radio.info as consistently as possible with how it was done by previous moderators, including the grandfathering of existing regular postings. Therefore, the submitter can choose rec.radio.amateur.moderated or the other unmoderated rec.radio.amateur.* discussion newsgroups for crossposting, but not both.

- Any FAQ or informational posting approved by the rec.answers/news.answers moderation team that is also crossposted to any rec.radio.* newsgroup (besides just rec.radio.info) is also automatically pre-approved for rec.radio.info. See below for more information.

If you post to another moderated group, it may be better to make special arrangements with both moderators before posting by contacting us at our administrivia addresses.

In addition, cross-posts do not take up extra space; modern newsreaders can be configured to show you cross-posted articles only once anyway; not everybody reads rec.radio.info; and rec.radio.info was never meant to reduce the volume of the regular discussion newsgroups. But keep in mind that some of the mail gateways may filter out the informational postings (at request of the subscribers) to keep the load down.

You decide.

-- I have a regular posting with timely information, can I make arrangements to help speed up delivery by posting directly from my site?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as timely.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires cooperation and good will to be beneficial to the community in the rec.radio.* hierarchy.

If you are currently maintaining (or plan to maintain) a radio-related periodic information posting, you may wish to consider crossposting it to rec.answers/news.answers. Postings that are approved by the rec.answers/news.answers moderators for this treatment are automatically pre-approved for crossposting to rec.radio.info (as the news.answers requirements are far more rigorous than the requirements this newsgroup ever plans to use). For more information about this option, consult the appropriate information articles and posting guidelines in rec.answers/news.answers.

Realize also, that even if your post is not approved for rec.answers/news.answers, it can still be approved for rec.radio.info. The intention is not so much to get every last bit of radio-related information on rec.answers/news.answers, but rather to provide an alternative avenue of approval (as well as grandfather existing maintainers of radio-related information and spare them additional bureaucratic hurdles). Again, crossposting to either rec.radio.info or rec.answers/news.answers, both, or neither, is at the discretion of the poster (subject to the approval of the moderators). You decide what is most appropriate for your article.

Please remember that as an information maintainer, you are not alone. There are many others on the net who maintain and post periodic information postings, using various intermediate-to-advanced features of Usenet (usually via automated tools). Various degrees of technical support and general hand-holding are available from many Usenet veterans. Send us some E-mail describing your needs to our administrative address below, and we'll try to help, or at least refer you to the right knowledgeable individual(s).

-- And Follow-ups?

If the only newsgroup you have specified is rec.radio.info, then the Followup-To: field will always be set to poster. If you do not want this, you must supply a Followup-To line of your own, and we will honor that one, as long as it is a subset of the original Newsgroups line.

If you specify newsgroups to cross-post to, then the Followup-To field will be set to include all the cross-posted groups, excepting rec.radio.info itself. Again, if you do not wish this behavior, supply your own Followup-To line.

We maintain other standards on the various RFC-1036 (news transport) header lines. For example, if the article is appropriate for passing into the Packet Radio Information Network, we encapsulate the Packet Bulletin Identifier (BID) in the Message-ID: news header line indicating the machine of origin as the ampr.org domain:

Message-ID: <$opa.55.1994@ampr.org> |

where the Packet Radio BID, in this example, is `$OPA.55', and it was posted in the year 1994, because some of the Bid numbers are cycled yearly. Hopefully, this can be used as a key to re-introduce the articles for the Packet Radio network. Also, if the article is a repost of an already existing information article in the rec.radio heirarchy, we ensure that the References: header line is linked to that previously posted article. This also helps to tag articles, and may be used for additional filtering if needed.

Since the articles are archived, please use the Summary and Keywords header lines to help one search for your article.

-- Why have I received no reply from you?

We never reject anything in silence, and we make a point of it to answer all our mail. However, E-mail, like a brain cell, can and does get lost, every now and again.

So, if you send us something, and you don't see it appear it rec.radio.info, and you still have not heard from us in reply after say, five days, you can be pretty sure that either your mail never reached us, or that our answer has never reached you. In that case, please try again (We will filter out duplicates).

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

(Adapted, with permission, from the original article written by Mark Salyzyn, AG4YD, ex-VE6MGS.)

Hallo dear MMMonVHF friends,

please find below our latest NEWSLETTER of the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2010-04-22

We do spread it these week one earlier because of the great
activity from at least 4 big expeditions on the 2m band now... !

We attempt to distribute our Newsletter one or two times per week.
For further detail please be so kind and refer at our "News"-page:
http://www.mmmonvhf.de/latest.php - welcome and enjoy...

** 144 MHz SPORADIC E Evaluation at MMMonVHF **

You may find here an Evaluation of the MUF data for 144MHz from 2001
until today. The data source is based upon the great DXrobot service
done by Allard / PE1NWL. The yellow bars MUF show the 'HIGH MUF'
periods and the red bars ES show the 'ES' periods for 144MHz. This
data is daily updated between beginning of April and the end of
September! The 'Today's MUF / ES' graphics on the top of the page
shows the daily 144MHz High MUF MUF and ES MUF times. Additionally
there have been added two new color indications: Blue MUF indicates
50MHz ES and Green MUF indicates 70MHz ES times. The graphic is
updated every 5 minutes. Use: http://www.mmmonvhf.de/eseval.php

** The UKSMG Annual Summer Sporadic-E Contest 2010 **

Hi All, and welcome to the launch of the UK Six Metre Group ï¿½Summer
Eï¿½s) contest for 2010. Following consultation with contestants,
leading 6 meter operators and your committee, it was felt that the
contest was overdue for a re-vamp. After many spare hours con-
templating changes (and their impact) I have, as can be seen below
come up with a new contest format, which I hope you all will enjoy.
The exchange and scoring more closely follows the tried and tested
format as used in the more familiar VHF contests in Europe and will
be compatible with the more well known logging software packages.
I have still included membership numbers, but as a multiplier this
year as I felt that we need to encourage more of our members to take
part. Members please get on during the contest and give away some
points; you could make a real difference to the overall scores. I

hope you enjoy this yearï¿½s contest and I look forward to hearing you
on the ï¿½magic bandï¿½. 73 Ade M5ADE. The contest will take place over
the weekend of 5th-6th June 2010. Starting and ending at 1300 Z
(ie. 24 hours) Read all in detail at: www.uksmg.org/page.php

MOONBOUNCE from MAURITIUS (3B8/LG89QT) - LATEST NEWS from the Team
dated 2010-04-18: April 17th/18th team 3B8EME (Ren PE1L, Eltje
PA3CEE and Johan PE9DX) did some tests in order to check if no screw
was missing and all systems can go for the upcoming DX-pedition.
We tried to copy all circumstances that we espect to counter in 3B8,
such as burning sun, heavy wind and shortage of food. In this way we
sat outside in the burning sun, trying to keep the aerials in the air
while we were eating only meatballs with mustard. It was a success!
We got red noses, the aerials didn't come down, we got rather hungry
but last but mot least: we had a superb testweekend. We
made 66 contacts via EME and our impression is that all is working
vy well. Promising for next month! To get an impression of what we
did, pse look at emelogger.com/mauritius/default.asp?page=Multimedia
or YouTube: http://www.youtube.com/watch?v=Uq9ZshXgrl0
Those who worked us, please hold the card and send it together with
the QSL for 3B8EME to QSL-manager PA3CEE.

** NEWS at Sixitalia.org to MMMonVHF from From V51PJ **

Okay where do we start if we start yesterday then all I can say the
band did open for a very short while towards frank iz8dwf. He heard
my cw but conditions were not good ï¿½ sounds very familiar to our 6m
enthusiast - for a qso. What I have at my qth at JG82ie in the namiba
desert situated in the southern western part of namibia. I have at
this stage my icom 706mk2g connected to a 9 element m2 yagi. Height
is only 6m at this stage but planning to put it higher. I have also
2m and 70 cm but still low power.I am interested in eme and my first
eme contact went very well. Activity is scarce as most zs are not
active at all on 6m. The past long weekend I had a training session
here at my qth where v51lz and v51pp attended to experience the actual
6m band. They never were involved in any vhf activity before. At this
stage I am the only one in V51 area that is really active on 6m but
try my best to get more activity here, as nobody know beforehand where
the opening will really be. A V51 wspr beacon is running in windhoek
at 1w output power. We are planning a club station here at my qth for
operation by any radio ham interested. We are at this stage 5 hams in
the southern western part of namibia. I am in contact with them once
the band seems to become alive that they can monitor as well. Callsigns
to listen for in the near future is:
V51B ï¿½ 706mk2g - oranjemund
V51LZ ï¿½ ic7000 ï¿½ rosh pinah
V51RJ ï¿½ rosh pinah
V51PP ï¿½ luderitz and walvisbay
V51KC - Okahandja
V51PJ ï¿½ 706mk2g ï¿½ 25km north of rosh pinah on farm spitskop
I have donated a dk7zb 6el 6m antenna to v51lz as he has an icom 7000
available and is about 25km from my qth The others I am working on.
73ï¿½s for now and I am always on the band and dx cluster making some
noise hoping it gets out somewhere. Please feel free to listen for my
callsign hi! Greetings from the sunny namib desert De V51PJ Hope to
work all on 6m - SOURCE: Extract from a Info of Alex, IV3KKW, NEWS at

==> HAMVENTIONï¿½: EXPERIENCE THE ARRL EXPO AT THE DAYTON HAMVENTION

<http://www.arrl.org/arrl-expo-at-2010-dayton-hamvention> On May
14-16, hams from all over the world will make their way to the Hara
Arena, located in Trotwood, Ohio for the 2010 Dayton Hamventionï¿½. Held
annually since 1952, Hamvention is one of the largest Amateur Radio
gatherings in the world, and as we have been doing since 2005, the ARRL
will bring the ARRL EXPO -- a showcase of ARRL exhibits and activities
that celebrate the very best of Amateur Radio -- to thousands of radio
amateurs. ARRL staff will also present a number of exciting,
interactive forums throughout Hamvention weekend. Read more here
<http://www.arrl.org/news/experience-the-arrl-expo-at-the-dayton-hamvention>.

==> HAMVENTIONï¿½: DAYTON HAMVENTION ORGANIZERS ANNOUNCE FORUM SCHEDULE

<http://www.hamvention.org> One of the many highlights at Dayton
Hamventionï¿½ -- sponsored by the Dayton Amateur Radio Association (DARA)
```

-- is the myriad of educational and fun forums that take place the entire weekend at Hara Arena. DARA has coordinated 43 unique programs that encompass nearly 80 hours of programs and activities for the thousands of people expected to attend these programs. Hamvention, the largest event of its kind, will be May 14-16 at Hara Arena in Trotwood, Ohio. Please keep in mind that the schedule may change before Hamvention. Read more here <http://www.arrl.org/news/forum-schedule-announced-for-2010-dayton-hamvention>.

==> ARRL WEB SITE: FIND YOUR WAY AROUND THE NEW ARRL WEB SITE

By ARRL News Editor S. Khrystyne Keane, K1SFA

When the new ARRL Web site launched on April 13, we received an overwhelming, enthusiastic response to it. But along with that, we have also received a few questions on how to find certain features on the new site. Click here <http://www.arrl.org/news/find-your-way-around-the-new-arrl-web-site> for a quick guide to find some of the more popular features, such as the ARRL Periodical Archive Search and Logbook of The World, on the new ARRL Web site.

<http://www.arrl.org/images/view/News/ForgotPassword.JPG> Have you forgotten your password? You can easily get a temporary password by clicking on the "Forgot Password? <http://www.arrl.org/forgot-password>" link, located directly under the log-in box at the top of the page (see photo). You can either request a temporary password via e-mail (you must use the e-mail you originally used to register for the previous ARRL Web site), or you may retrieve a temporary password immediately by providing your user name (for hams, this is usually your call sign) and your ARRL member ID number (found on your QST mailing label). You must also provide either your call sign or your last name. Click here <http://www.arrl.org/forgot-password> to receive a temporary password.

<http://www.arrl.org/images/view/News/YourFavorites.JPG> We have also received inquiries regarding the "Favorites" function on the new Web site. Once you successfully log in to the Web site, you will see a drop-down box that says "Your Favorites" right underneath your name (see photo). Go to any page on the new ARRL Web site. Would you like to find it in just one step? The "Your Favorites" feature will do just that! When you are on the desired page, just click on the "Your Favorites" drop-down menu, click "Add to Favorites" then click the "Go" button. Now you have stored that Web

<http://www.arrl.org/images/view/News/YourFaveSignIn.JPG> page as one of your favorites; each time you wish to go to that page, you can just access it through the "Your Favorites" drop-down menu (see photo).

Of course, with a project as large as the new ARRL Web site, there are still some bugs to be worked out. Our IT Department is busy fixing

them, so please know that we are trying to solve these problems as quickly as possible.

==> FCC NEWS: ARRL FILES REPLY WITH FCC OVER RECONROBOTICS' OPPOSITION TO LEAGUE'S PETITION FOR RECONSIDERATION

Following the ARRL's March 24 Petition for Reconsideration of the FCC's grant of a waiver to permit the operation of a robotic video device in the 430-450 MHz band, ReconRobotics filed an Opposition to the ARRL's Petition, declaring that, among other things, the ARRL did not follow proper procedure when submitting it. On April 16, ARRL General Counsel Chris Imlay, W3KD, filed a reply, asking the Commission to "reconsider, rescind and stay the ReconRobotics waiver and the effectiveness of the Order" in accordance with the ARRL's Petition for Reconsideration. Read more on the ARRL's reply here <http://www.arrl.org/news/arrl-files-reply-with-fcc-over-reconrobotics-opposition-to-league-s-em-petition-for-reconsideration>.

==> ARRL FOUNDATION AWARDS PRESTIGIOUS GOLDFARB SCHOLARSHIP TO KYLE EBERSOLD, KB1MNN

The Board of Directors of the ARRL Foundation proudly awarded the 2010 William R. Goldfarb Memorial Scholarship to Kyle Ebersold, KB1MNN, of Holland, Massachusetts. Kyle is a senior at Tantasqua Regional High School in Fiskdale, carrying a 4.31 GPA. He was first licensed in August 2005, holds a General class license and is a member of several Amateur Radio organizations including the ARRL, the Hampden County Radio Association and FISTS. He operates SSB, CW and PSK31 with most contacts on 17, 20, 40 and 80 meters. Kyle's interest in ham radio began in December 2004 when he received an SWL radio as a gift. Inspired by stories from his grandfather -- who operated in the 1960s as a Novice -- Kyle was bitten by the bug! He plans to attend Bryant University in Smithfield, Rhode Island where he will pursue studies in business. Applications for the Goldfarb Scholarship and other ARRL Foundation Scholarships are accepted each year beginning October 1 and ending February 1 for the academic year that starts the following August/September. Read more here <http://www.arrl.org/news/arrl-foundation-awards-prestigious-goldfarb-scholarship-to-kyle-ebersold-kb1mnn>.

==> ARRL PUBLICATIONS: QEX -- THE MAY/JUNE ISSUE

The May/June issue of QEX is coming soon, and it is full of theoretical and practical technical articles that you won't want to miss. QEX is the ARRL's "Forum for Communications Experimenters." Published bimonthly, it features technical articles, columns and other items of interest to radio amateurs and communications professionals. The mission of QEX is threefold: To provide a medium for the exchange of ideas and information among Amateur Radio experimenters; to document advanced technical work in the Amateur Radio field, and to support efforts to advance the state of the Amateur Radio art. QEX is edited by Larry Wolfgang, WR1B. Subscribe to QEX today. Read more here

<http://www.arrl.org/news/qex-the-may-june-2010-issue>.

==> SOLAR UPDATE

Tad "The early mist had vanished and the fields lay like a silver shield under the Sun <http://www.americanliterature.com/Wharton/EthanFrome/10.html>" Cook, K7RA, reports: A haunting specter from the past -- a Sun with no spots -- returned this week. As of Wednesday, we've seen seven days with no spots, a quiet Sun unseen since early December. A spot may be emerging in the solar northeast quadrant, and NOAA and USAF predict a rising solar flux of 76, 78, and 78 for April 22-24, followed by 80 for nine days, so perhaps this will turn around. Look for more information on the ARRL Web site on Friday, April 23. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" brought to you by Edith Wharton's Ethan Frome <http://www.americanliterature.com/Wharton/EthanFrome/EthanFrome.html> (Chapter 8).

==> ARRL FIELD DAY : ARRL PUBLIC RELATIONS COMMITTEE TO HOST FIELD DAY WEBINAR

The ARRL Public Relations Committee -- in conjunction with the ARRL's Atlantic Division -- will host a "webinar" -- an interactive Web-based seminar designed to facilitate communication between a small number of presenters and a large remote audience using the Internet. On Thursday, April 22 at 9 PM EDT, join ARRL Media and Public Relations Manager Allen Pitts, W1AGP, along with ARRL Field Day Manager Dan Henderson, N1ND, and members of the League's Public Relations Committee as they tell you how to use ARRL Field Day to bring attention to Amateur Radio in your area. Learn how to set up a Field Day publicity calendar, invite elected officials and dignitaries, get proclamations issued, post your Field Day event on local media outlets and community bulletin boards, get audio and video PSAs on local radio and TV stations, how to use newer social networks like Facebook and Twitter and more to draw people to your Field Day event. Click here <https://www1.gotomeeting.com/register/932645064> to register for this informative, interactive Internet meeting.

==> THIS WEEK ON THE RADIO

<http://www.arrl.org/multimedia> This week, the 10-10 International Spring Contest, the SP DX RTTY Contest, QRP to the Field, the Florida QSO Party and the Nebraska QSO Party are April 24-25. The SKCC Sprint is April 28. Next week, the Microwave Spring Sprint (local time) and the AGCW QRP/QRP Party are May 1. The 10-10 International Spring Contest (Digital), the 7th Call Area QSO Party, the Indiana QSO Party, the ARI International DX Contest and the New England QSO Party are May 1-2. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest

Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/special-events>.

==> W1AW NEWS: W1AW OFFERS CODE PRACTICE, BULLETINS VIA ECHOLINK

Audio from W1AW's CW code practices and CW/digital bulletins is now available using EchoLink via the W1AW Conference Server "W1AWBDCT." The 9:45 PM ET phone bulletin is currently unavailable via W1AWBDCT. The audio is sent in real-time and runs concurrently with W1AW's regular transmission schedule <http://www.arrl.org/w1aw-operating-schedule>. According to W1AW Station Manager Joe Carcia, NJ1Q, this server is currently at an experimental stage: "Since the server is located at ARRL -- and uses the ARRL's Internet connection -- there may be an issue as to how many users can connect to W1AWBDCT via EchoLink. The current number of connections is set to 350. If the current system can properly handle these connections without adversely affecting the performance of the conference server, this number will be bumped up higher." All users who connect to the conference server are muted. Please note that any questions or comments should not be sent via the "Text" window in EchoLink. Please send any questions or comments via e-mail <w1aw@arrl.org>.

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

Registration remains open through Sunday, April 25, 2010, for these online course sessions <http://www.arrl.org/courses-training> beginning on Friday, May 7, 2010: Amateur Radio Emergency Communications Level 1; Antenna Modeling; Antenna Design and Construction; RF Propagation; Analog Electronics, and Digital Electronics. To learn more, visit the CEP Course Listing page <http://www.arrl.org/online-courses> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/arrlletter/.

Amateur Radio Newsline(tm) Report 1706 - April 23 2010

Amateur Radio Newsline report number 1706 with a release date of
Friday, April 23rd, 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. Hams are true first responders at a
landslide in Rio de Janeiro, the volcanic eruption in Iceland delays an
IARU meeting, two new ham radio organizations are announced at the
International DX Convention in California and 800 attend a ham radio
reception at NAB in Las Vegas. All this and more on Amateur Radio
Newsline(tm) report number 1706 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: HAMS RESPOND TO RIO STORMS AND LANDSLIDE

Ham radio operators in Brazil responded to the recent emergency caused
by severe rainstorms in the region near Rio de Janeiro. Bill
Pasternak, WA6ITF, is in the newsroom with the details:

--

According to Marcio Ribeiro, PY1RJ, director of Teaching for the Brazilian
Amateur Radio League, beginning on Tuesday, April 6th a group of ham radio
volunteers went on duty. This, to assist in communication between the
people of Rio and the citys public agencies.

Ribeiro says that days of rain caused a landslide for which radio amateurs
became what amounts to true communications first responders. He says
that some 10 hams immediately set up a network with each having a specific
duty. One was assigned the fire department, another for the Civil Defense,
yet another for the Military Police, and so on.

The major ham response was to the landslide where at least one home was
completely destroyed. On his way to that location PY1RJ warned two police
cars about the slide and the overall danger in the area. Ribeiro remained
at the disaster site as both a communicator and rescue volunteer.

M�rcio Chehab, PY1MNC was also the landslide site. Chehab, who maintains
of
electronic equipment, helped by calling ambulances from hospitals in the
region. He also kept in contact with radio amateurs in other cities who in
turn were in communications with relief agencies.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in Los Angeles.

--

In all, there were about 30 hams involved in this rescue radio response. Those outside the area helped by maintaining a ham radio communications infrastructure that included radio, the internet and telephones.
(G1, Southgate)

**

RADIO POLITICS: ICELAND VOLCANO CANCELS IN PERSON IARU REGION 1 MEETING

The volcanic eruption in Iceland has disrupted an International Amateur Radio Union Region 1 Executive Committee meeting slated for April 17th and 18th in Sofia, Bulgaria.

The IARU Region 1 website reports that many participants at the yearly meeting were unable to reach Sofia from various parts of the world. This, due to flight restrictions and cancellations caused by the volcanic ash at the altitudes commercial passenger jets fly.

In the end only five delegates were able to reach the meeting site. The rest are either stranded at a transit airport or were on the way back home by any possible means possible.

The gathering did finally take place, but by on-line web conference on Sunday April 18th. (IARU Region 1)

RADIO POLITICS: NEW WORLD WIDE RADIO OPERATORS FOUNDATION ANNOUNCED

There is a new player on the ham radio political and educational scene with the goal of improving the skills of amateur radio operators around the world,. This, by utilizing education, competition, advancement of technology and scientific research to promote international friendship and goodwill. It also wants to help prepare hams to better serve society in times of communication need. These are the lofty goals of the World Wide Radio Operator's Foundation, Inc. and it has the backing of some of the heaviest of the true heavyweights in the hobby. Amateur Radio Newsline's Norm Seeley, KI7UP, has the whose' who in this new game in town:

--

Although it was founded quietly back in 2009, the World Wide Radio Operator's Foundation, Inc. or WWROF was officially launched on Friday, April 16th at the 61st International DX Convention held in Visalia, California. And the groups Board of Directors reads like a whose-who in the world of amateur radio.

According to its leadership, the World Wide Radio Operator's Foundation was
created with the goal of advancing the skill and art of radio operating. The group's mission statement states that it is dedicated to improving the skills of amateur radio operators around the world, utilizing

education, competition, advancement of technology and scientific research, promoting international friendship and goodwill, and preparing them to better serve society in times of communication need. The World Wide Radio Operator's Foundation further believes that on-the-air contests provide a good test of operating skills and are of immeasurable value to amateur radio overall.

The groups is made up of a group of well-known and very highly respected DX'ers, contesters and public service operators. This includes Chairman Doug Grant, K1DG; Vice Chairman John Dorr, K1AR; Treasurer Ralph Bowen, N5RZ and Secretary Tom Lee, K8AZ. Other board members are Bob Cox, K3EST; Tim Duffy, K3LR and Mark Beckwith, N5OT.

In addition, the organization has an Advisory Committee that includes Ken Wolff, K1EA; George Fremin, K5TR; Randy Thompson, K5ZD; Trey Garlough, N5KO; and Larry "Tree" Tyree, N6TR.

Among other things, the group says that it intends to support high impact operating-oriented projects. These include training activities and content, contest administration improvements, recruitment programs for new contesters and deployment of state-of-the-art technologies for enhanced log checking or simply improved awards programs. They also plan on establishing an equipment donation program for young contesters and those radiosports oriented hams residing in third world nations.

In looking at the overall structure the World Wide Radio Operator's Foundation appears to have adopted some of the finer points of organizations like that of the Radio Club of America, the Quarter Century Wirerless Association, major DX and contest groups and even the ARRL and put them all under one roof. Its then added an emphasis on High Frequency radiosports as an operational training ground. The only questions are will this approach succeed and if it does, what will its long term affect be on the overall hobby.

The World Wide Radio Operator's Foundation is incorporated as a non-profit organization in the state of Ohio, and is pursuing tax-exempt status under Section 501(c)3 of the Internal Revenue Code so that donations made to it will be tax-deductible.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale

--

More information about the World Wide Radio Operator's Foundation can be found at www.wwrof.org. (WWROF release)

**

RADIO POLITICS: NEW HAM RADIO ANTENNA LITIGATATION ASSISTANCE ORGANIZATION FORMED

Radio amateurs involved in the struggle to secure reasonable accommodation for amateur radio antennas have formed a new California public-benefit corporation. This, to receive tax-deductible donations from those wishing

help support litigation against local jurisdictions that ignore federal and state preemption statutes.

Chief Financial Officer Marty Woll, N6VI, announced at the recent International DX Convention that the Amateur Radio Antenna Defense Foundation, or ARADF, has been approved by the Internal Revenue Service as a public charity under Section 501(c)(3). This means donations to it are tax deductible.

According to Woll, turning to the courts can be prohibitively expensive for the radio amateurs while cities have taxpayer-funded attorneys on staff, giving them the upper hand. The goal of ARADF is to help level the playing field with financial assistance that will allow deserving antenna lawsuits to go forward.

It should be noted that the ARRL has a committee that has helped fund antenna litigation around the country, but it focuses primarily on cases that have reached the appellate level. The new organization will concentrate on lower-court cases. Its web site is currently under construction. (ARADF)

**

BREAK 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the AA6DP repeater of the Catalina Amateur Repeater Association serving the Southern California coastline from 26 miles across the sea.

(5 sec pause here)

**

ENFORCEMENT: OFCOM ACTS AGAINST SCOTLAND REPEATER JAMMING

Jamming of Central Scotland's repeaters has brought enforcement action from UK telecommunications regulator Ofcom. Jeramy Boot, G4NJH, is in Nottingham with more:

--

Following the ongoing jamming and abuse problems on a number of Central Scotland FM Group repeaters, a meeting has taken place between Ofcom, the repeater group and the RSGB to discuss options to address the problem.

Ofcom has indicated that the problem is under active investigation and as a result enforcement action has been taken against one individual resulting in the forfeiture of equipment and a number of others being warned of their conduct.

The investigations are still ongoing and Ofcom has asked that any evidence of abuse is in the first instance forwarded to GM8HBY to co-ordinate information rather than create duplicate reports.

Ofcom have also reminded repeater users not to respond to any abuse or jamming heard on the repeaters.

I'm Jeramy Boot, G4NJH

--

It appears that bringing repeater jammers to justice in the British Empire may be a lot swifter than over here in the USA. (GB2RS)

**

ENFORCEMENT: FCC ASKS ARRL TO INSTRUCT OO'S ON 14.275 MHz ISSUE

The ARRL at the request of the FCC has issued an advisory to all of its Official Observers regarding the situation on and near a specific frequency in the 20 meter band. In his note to the OO's, Chuck Skolaut, K�BOG, who is the Leagues Field & Regulatory Correspondent wrote and we quote:

"Laura Smith at the FCC has asked me to relay the following information regarding 14.275 and what you may be hearing. She wanted all OO's to be aware of what is happening.

"There is quite an interesting situation developing at 14.275 and the surrounding frequencies. For some reason, a Canadian operator has elected to play a recording of a conversation that took place back in 2006 between him and another licensee -- N1FM. Brian Crow (K3VR) was not involved in that conversation -- although the Canadian licensee is currently trying to ascribe the comments of N1FM to Brian. Again let me reiterate, Brian Crow, K3VR, was not involved in that conversation back in 2006." -- End quote.

Skolaut's statement was first published in the newsletter of the Official Observer Coordinator Ohio Section edited by Rick Swain, KK8O. The Canadian station in question was not identified in the message to the Official Observers.

The original statement is on-line at http://www.arrl-ohio.org/ooc/feb-2010.html (ARRL OHIO Official Observer Website)

**

ENFORCEMENT: FCC ISSUES $25000 TO PHONEJAMMER.COM FOR U.S. SALES

The FCC has notified a United Kingdom-based firm known as notified Phonejammer.com of its Apparent Liability for Forfeiture in the amount of $25,000. This, for marketing in the United States of radio frequency devices designed to intentionally interfere with licensed cellular and Personal Communications Services.

Phonejammer.com was originally issued a Citation by the FCC after it discovered instances where businesses in the United States were found using the devices. In both cases the sale of the items was traced directly to the Phonejammer.com website. In its reply to the citation, Phonejammer.com through its attorney claimed that it does not market to the United States,

and has not shipped or distributed units to the United States. This despite the fact that the FCC has receipts from Phonejammer showing that such purchases were made.

In affirming the fine the FCC said that regardless of what Phonejammer may claim, the evidence clearly demonstrates that on at least two occasions within the past year, Phonejammer has sold and shipped phone jamming units to individuals in the United States. One was bought by an individual in Carrollton, Texas on April 21, 2009 and the other by an individual in Port St. Lucie, Florida on September 24, 2009. Both purchases were made through the Phonejammer.com website and that Phonejammer shipped both devices to addresses in the United States.

Phonejammer.com was given the customary 30 days to pay the fine or to file an appeal. (FCC)

**

THE SOCIAL SCENE: 800 ATTEND NAB HAM RADIO RECEPTION IN LAS VEGAS

The Ham Radio Reception at this years National Association of Broadcasters Convention in Las Vegas, Nevada is reported to have been an overwhelming success. Over 800 hams turned out for the gathering held Wednesday evening April 14th at the Las Vegas Hilton Hotel.

About $14,000 in door prizes handed out this year. In addition to ham radio suppliers several broadcast and industrial suppliers such as Harris and Eimac came through with prizes as well. Perhaps the biggest in sheer size was a tower from Universal tower valued at $3500.

This years ham radio reception was again hosted by Heil Sound Ltd. and Broadcast Supply Worldwide. The latter is better known by its initials of BSW. (ARNewsline(tm))

**
THE SOCIAL SCENE: N6R FROM THE REAGAN LIBRARY FOR FIELD DAY 2010
And for the tenth consecutive year, the callsign N6R will operate as a Field Day station from the grounds of the Ronald Reagan Presidential Library and Museum in Simi Valley, California. This, to commemorate the lives of President Ronald and Mrs. Nancy Reagan.
Joining the Ventura County Amateur Radio Society which is the primary organizer will be a number of other local groups. These include the Amgen Amateur Radio Club. The Conejo Valley Amateur Radio Club the Simi Settlers Amateur Radio Club and the Ventura County Amateur Radio Club. And a late addition is the Hollywood Hills QRP Contest Club with be joining this year as well.
N6R will operate from 1800 UTC on June 25th to 1800 UTC on June 27th with up to 16 stations on all of the High Frequency bands. Also look for the N6R call on the VHF and UHF bands from 6 meters on-up using many modes including fast-scan ATV and satellite operations.
If you are lucky enough to make contact with N6R this year, please QSL with an Self Addressed Stamped Envelope to VCARS, in care of Peter Heins, N6ZE, 1559 Norwich Ave., Thousand Oaks, CA, 91360 (N6ZE, W6AQ)

**

HAMVENTION NEWS: NEW DISCOVER HOMEBREW DEMONSTRATION AREA

The Dayton Hamvention and the Midwest VHF/UHF Society have teamed up to host the first ever Discover Homebrew demonstration area at Hamvention 2010.

Located in booths 179, 180, 191, 192, and booths 203, 204, 215, and 216 in the North Hall, there will be 6 eight foot tables available to accommodate many homebrewers and their gear simultaneously. The Hamvention will provide AC power along with H-F and possibly VHF antenna access. All you need to do is bring your favorite home built project, set it up and demonstrate it to anyone who is interested.

This demonstration area will operate on an open schedule basis. This means that you can be there when you want for as long as you want, space permitting. A sign-in sheet will be provided where you can record your project description, contact information and times you will be providing a demonstration.

The only restriction is that no sales of these demonstration items will be permitted as a courtesy to paying exhibitors. However, if you have commercial plans for your project, it is fine to go ahead and talk about them.

More about this and other Hamvention happenings is on line at www.hamvention.org. (Dayton Hamvention)

NAMES IN THE NEWS: HEIL SOUND NAMES SARAH HEIL ITS NEW PRESIDENT

Some names in the news. First up congratulations to Sarah Heil, the wife of Heil Sound Ltd. Chief Executive Officer Bob Heil, K9EID, on her being named company president.

Sarah Heil holds two degrees from McKendree University in Lebanon, Illinois. She began working at Heil Sound in Informatioin Technology in 1999 and has played in increasingly active role in the company's activities ever since.

No stranger to the company's workload and business philosophies, she can often be found in the shipping department helping to meet deadlines for product delivery. She is also a very visible face of the company at trade events. Because of this she has gained industry wide respect from dealers and customers alike.

Heil Sound Ltd. was founded as a sound reinforcement specialty company by Bob Heil back in 1966. It has since evolved into one of the worlds leading manufacturers of cutting edge technology dynamic microphones for live sound, recording and two-way communications. In her new role Sarah Heil will oversee all aspects of Heil Sound's financial management as well as the company's long-term strategies. (RW)

NAMES IN THE NEWS: RSGB HONORS BATH BUILDATHON HAMS

The Radio Society of Great Britain has awarded the Kenwood Trophy for outstanding contribution to amateur radio training to the Bath Buildathon event and the follow-up DVD that its sponsors have produced. All six of the Bath Buildathon crew received certificates of merit for their part in this special event. To date, over 60 copies of the DVD have been sent out across the U-K and abroad. The award presentation took place at the RSGB's recent Annual General Meeting. (GB2RS)

WORLDBEAT: HAM TO WALK ACROSS AUSTRALIA - AGAIN

The ham who once walked Australia North to South is planning to do it again. But this time Jeff Johnson VK4XJJ plans to go across that nation. Trevor Tage, VK4BT, has more from down-under:

--

Well Jeff has another little walk planned but this time it is from east to west! right across Australia!!

The Royal Flying Doctor Service has approached Jeff to complete this huge fund-raising walk on their behalf. They will be providing support along the way and the Gympie Communications & Electronics Group will be Jeff's official East Coast Amateur Radio contact station.

The walk is being planned to commence early April 2011. With anticipated radio and TV coverage, 'Jeff's Walk' will once again raise money and awareness for a good cause and help to promote and demonstrate Amateur Radio.

--

One thing you can be sure of is that ham radio will once again be an important part of VK4XJJ's long distance walking odyssey. (WIA News)

**

HAM HAPPENINGS: ARMAD 2010 ON MAY 29

ARMAD an acronym for Amateur Radio Military Appreciation Day is slated for this coming May 29th. Amateur Radio Military Appreciation Day is a chance

for hams to show their support for the United States men and women stationed world wide in defense of our nation, its citizens and our liberty. Information for sites near you planning to take part in Amateur Radio Military Appreciation Day can be found at www.armad.net/eventinfo.htm. Questions and comments go to event planner Emery McClendon, KB9IBW by email to armad07(at) yahoo dot com. (ARMAD)

WORLDBEAT: SAVE ANALOG RADIO CAMPAIGN BEGINS IN THE UK

A ham radio magazine in the United Kingdom wants to try to halt that nations transition to all digital radio broadcasting. VK2LAW, has the details:

--

A UK National Campaign to maintain traditional analogue broadcast radio for everyday listening and for use in times of national emergencies is trying to spring up.

The pressure is on to replace traditional analogue radio broadcasting with Digital Audio Broadcasting (DAB) radio. Indeed, the UK Government has provisionally set 2015 as the date when the world wide standard frequency modulation services are to disappear from 87.5 to 108MHz in the v.h.f. f.m. band), to be replaced with DAB radio transmissions. Eventually, the analogue services on long waves at 198 kHz and medium waves from 500kHz to 1.6MHz will also be replaced by digital transmissions.

If you do want to know more you can contact Rob G3XFD, oh and Rob is actually Dr. Rob B Mannion the Editor of Practical Wireless magazine.

I'm Jason, VK2LAW.

--

For those not aware, Practical Wireless is Great Britain's best selling independently published amateur radio magazine. (WIA News)

HAM RADIO IN SPACE: AMSAT DEVOTES SECOND AO-51 REPEATER TO SCOUTING

AMSAT North America says that AO-51 is now running two FM repeaters to support contacts by the Boy Scouts celebrating their 100th anniversary this week. The second repeater's uplink is 145.88 with a downlink on 435.150 MHz. Its available primarily for Scouting stations but when not in use by the Boy Scouts, other low power stations are welcome. AMSAT defines low power as 10 watts or less, and uplinking using omnidirectional or handheld antennas only.

Meantime, the main repeater on AO-51 is still open for general traffic and the 67 Hz tone access testing continues. That uplink: 145.920 MHz and downlink at 435.300 MHz for general contacts. Both orbital repeaters operate narrowband FM. Please see http://www.amsat.org/amsat-new/echo/CTNews.php for the latest AO-51 Control Team News. (AMSAT)

**

ON THE AIR: EURPOES EURODAY ON THE AIR FROM SPAIN MAY 1 - 20

On the air, listen out for the special callsigns AO1EU, AO2EU, AO3EU, AO4EU, AO5EU, AO6EU, AO7EU, AO8EU and AO9EU between May 1st to the 20th. This, to commemorate the 60th anniversary of Robert Schuman's presentation of his proposal for the creation of what is now known as the European Union.

The activity is organized this year by Spains EA Digital Federation under the auspices of the European Radio Amateurs' Organization. All bands and all modes will be used. A special QSL card will be available only via EuroBureauQSL at www.eurobureauqsl.org. (Southgate)

**

DX

In DX, word that G5XW will be active from Malta as 9H3XW between June 12th to the 19th. His operation will be on the H-F bands using SSB with no set times or frequencies. QSL via his home callsign, direct only.

And listen out for VK6DXI to be active as 9M8DX/2 from Kuala Lumpur between April 20th and the 23rd and the 26th to the 29th. In between he will operate from Tioman Island between April 24th and the 26th. His activity will be focused on 30, 17 and 12 meter CW. QSL via SP5UAF, either direct or via the bureau.

RD3AF says that he will be on from the Canary Islands from May 29th to the 30th for this years CQ World Wide WPX CW Contest. QSL via UA3DX.

IW1PRT will be active from Liechtenstein portable HB0 between April 30th and May 1st. He usually operates on 160 through 10 meters including the WARC bands. QSL via his Manager IZ1MKR
via EURAO Bureau.

Lastly, W2LPL will be active from Antigua as V26LPL between April 26th and the 30th on 20 meters using 100 watts. QSL via W2LPL.

(Above from various DX news sources)

**

THAT FINAL ITEM: SHOCK ABSORBER POWER SUPPLY

And finally this week, imagine being able to power your radio gear and recharge your car's battery with power derived from your auto's shock absorbers. Well its more than a pipe dream as we hear from Amateur Radio Newsline's Frank Haas, KB4T:

--

In a recent study, mechanical engineers from the State University of New York designed and tested a retrofit regenerative shock absorber that recovers a vehicle's vibration as energy. The researchers built a small scale prototype of the regenerative shock absorber, and demonstrated its ability to harvest 2 to 8 watts of power during typical driving conditions. This, at a speed of about 45 mph.

The researchers predict that a full-scale system on a four-wheel car should be able to recover up to 256
watts under real world driving conditions. They also believe the ability to harvest approximately 64 watts per wheel will increase considerably when the system is used on irregular or poorly paved roadways.

For the Amateur Radio Newsline. I'm Frank Haas, KB4T, in Holly Hill, Florida.

--

In their research the scientists also discovered that the power regenerated by this system is proportional to the square of the magnetic flux across the coils in the shock absorber system. Consequently, increasing the flux by a factor of two quadruples the peak power output. More on this discovery is on line at
http://iopscience.iop.org/0964-1726/19/4/045003/ (Elektor E-Magazine and WIA News)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

Before we go, a reminder that the nominating period for the 2010 Amateur Radio Newsline Young Ham of the Year Award is now open. Each year, we here at the Amateur Radio Newsline in association with Vertex Standard

Corporation -- the makers of Yaesu brand ham radio gear -- and CQ Magazine combine to honor a ham radio operator age 18 or younger for his or her contributions to ham radio or to society itself through ham radio.

All nominations and materials required by the official rules must be received by Amateur Radio Newsline no later than midnight on May 30th. Both "mail-in" and electronic submissions are being accepted this year. Full rules and a downloadable nominating form are now on our website at www.arnewsline.org. Just scroll down until you see "2010 Young Ham of the Year Awards Now Being Accepted" and click on the word "here" to download the directions and the form. You can also leave questions and comments on the official Young Ham of the Year Award page on Facebook dot com.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm David Black,
KB4KCH, saying 73 and we thank you for listening.

GB2RS NEWS

Sunday 25th April 2010

The news headlines

RSGB AGM video available online

International Summits on the Air event

Bedford amateurs welcomed into Region 12

A video of the 2010 RSGB Annual General Meeting is available online at the British Amateur Television Club website. The BATC streamed the event live last weekend from the Swan Hotel in Bedford. Go to www.batc.org.uk and click on the BATC TV Streamer link, followed by the Film Archive link. This will take you to the recording of the AGM. There are plenty of other recordings that amateurs may find interesting on the same link.

for details.

Amateurs in Bedfordshire are now part of Region 12 and the new Deputy Regional Manager for the County is Neil Whiteside, G4HUN. For the past three years Neil has been the DRM for Cambridgeshire and has now added Bedfordshire to this responsibility. Neil is already getting in touch with clubs in the County but he can always be contacted on 07836 617224. More information about getting in touch with the Region 12 Team is available on the RSGB Region 12 website at www.rsgb.org/local/region12.php.

The annual School Club EU Day will take place on 5 May. It is designed to create contacts with and between school amateur radio clubs and training centres and give them the opportunity to contact other amateur stations around Europe. The activity is a great way to get young operators on the air from their school shacks. An English version of the rules for this event can be found on the German website www.aatis.de/content/sites/default/files/EU2010_EN_txt.pdf.

Colchester Radio Amateurs are running a Foundation Course from Thursday 24 June at St Helena School, Colchester. For further details please contact Brian, G0GGM on 01206 822547 or by e-mail to brianfitz@aspects.net.

Manassas City in the USA has decided to abandon their broadband over power line system as it was not cost effective. The BPL system has been a thorn in the side of amateurs and SWLs in Manassas and had substantially raised the overall noise floor of most of the HF bands,

making all but the strongest radio signals impossible to hear.

Radio Amateurs of Canada has filed a request with the telecommunications regulator for some 60 metre spot frequency allocations. The formal request was for five 5MHz frequencies and two spot frequencies for exclusive Canadian amateur use. If all goes well, Canadian amateurs could see an authorisation to this spectrum within a year.

The newly redesigned American Radio Relay League website is up and running. Check out www.arrl.org. The new website has been more than two years in the making.

What is believed to be the world's first solar powered D-Star repeater has come on the air from Belgium. ON0CPS is designed to operate entirely on solar energy with an input channel of 431.9625MHz and its output on 439.5625MHz. So far the repeater has been running over a month on this solar power alone with no failures or problems.

Australia now has a digital amateur television repeater that has full stereo audio. The VK3RTV repeater in the Melbourne and Geelong area now has dual channel sound on both its digital and analogue inputs. About seven stations transmitting digital DVB-S uplink have the capability to transmit stereo sound through the machine. Experiments are also being conducted on Internet streaming with the British Amateur TV Club.

And now for the details of rallies and events for the coming week

The Andover Radio Amateur Club Boot Sale takes place today, 25 April, at Wildhern Village Hall and Playing Field, SP11 0JE, north of Andover just off the A343. Talk in will be on S22. There is plenty of car parking and the entry fee is ?1.50. For sellers it is ?6 per boot/table, ?8 inside the hall. Details from Martin, M0MWS on 01980 612070.

Also on today, 25 April, is the 26th Yeovil QRP Convention which takes place at Digby Hall, Hound St, Sherborne, Dorset. Digby Hall adjoins the central shopping car parking. Talk in will be on S22. There is ample car parking and the doors open at 9.30am. There will be lectures as well as trade stands and a Bring & Buy. Details from Robert on 01935 706715.

Church Island Amateur Radio Group will be holding a rally on Friday 30 April at Bellaghy Community Hall, Ballynease Road, Bellaghy BT45 8JS, which is located beside St Marys Church. Doors will open to the public at 8pm. Anyone wishing to book a table or for further information can contact John, MI0MIO on 0771 910 0595.

On 2 May, the Dambusters Hamfest will be held at Thorpe Camp Visitor Centre, Coningsby, Lincs LN4 4PE. Talk in will be on S22, GB4FR & GB3FJ. Admission is ?3 with under 12s admitted free. Pitches are free but the size of the pitch will be limited if not pre-booked. Car parking is free too. There is a WWII museum on site. More details from Tony, G3ZPU, on 01507 527835.

The Dartmoor Radio Rally takes place on Bank Holiday Monday at Tavistock College, Crowndale Rd, Tavistock, Devon PL19 8DD. Doors open at 10.15am for disabled visitors and 10.30am for others. There will be trade stands as well as a Bring & Buy. Details can be obtained from Peter, M1AYI on 01822 860277.

Now for the news of special events

GN4KPT/P will be on the air on 2 and 3 May from Shanes Castle for the Steam Rally. This is a joint venture between Antrim & District Amateur Radio Society & Ballymena Amateur Radio Club. The station will be on the air on 2 May between 1400 and 1700 and 3 May 1000 to 1600.

>From 24 to 27 April there will be an IOTA activation from The Isle of Eigg on the west coast of Scotland. This is a joint activation by members of Kilmarnock and Loudoun ARC and South Cheshire ARS. The callsign will be GM6TW/P, the club call of SCARS. Info is at QRZ.com. QSL via Paul, G0UZP.

To mark the 10th anniversary of the closure of the world's largest maritime radio station, Portishead Radio, GB10GKA is being activated from 30 April to 27 May. Hours of operation will be dependent on individual operators' free time and operation will be primarily on CW. Rick, G3YEC will operate 30 April until 6 May from this QTH near Colchester. Special Anniversary QSL cards will be produced to mark this historic event. eQSL will also be used. Certificates for contacting GB10GKA on more than four HF bands will be available. Contact Tony Roskilly, G3ZRJ by e-mail to g3zrj.morsekey@btinternet.com

On 30 April, GG100GCC will be on the air for the Gordon Centenary Camp in Tarves, Aberdeenshire and GG100LNG will be on the air for Lincolnshire North Guides in Market Rason.

And now the HF DX news compiled from 425 DX News and other sources.

ZL7J will be on the air from Chatham Island between 28 April and 3 May. All bands from 1.9MHz to 28MHz will be used with SSB and CW. QSL via JH1HRJ.

Members of the F6KOP Team will be active as IS0R from Isola Rossa, Sardinia, which is IOTA reference EU-024, between 7 and 15 May. Activity will be on 160 to 6 metres, using 3 stations on HF and 1 station on 6 metres. They plan to use CW, SSB and RTTY. Each station will be a FT450 with an Acom 1010 using Micro Ham and PC.

The Camb-Hams are the social side of the Cambridgeshire Repeater Group and the third annual DXpedition will be from 1 to 15 May on the Isle of Harris, which is IOTA reference EU-010. They plan HF using voice and data, 6m, 4m and VHF/UHF satellite operation. Experienced IOTA DXpeditioner Martin Atherton, G3ZAY, will be joining the trip. More information can be found at http://dx.camb-hams.com.

Geoff, M5GAC and his wife will operate as MM5GAC/P from Skye from 8 to 22 May. They will probably be active early mornings and late evenings on

80 and 40, and on 20 at times during the day.

Now the contest news

On 27 April, the 50MHz UK Activity Contest & Club Championship takes place between 1900 and 2130UTC. Using all modes, the exchange is signal report, serial report and locator.

On Saturday 1 May the 432MHz Trophy Contest and the 432MHz to 248GHz contest start simultaneously at 1400UTC. The 432MHz Trophy Contest ends at 2200, while the 432MHz to 248GHz Contest continues for 24 hours. The exchange in both events is the same, signal report, serial number and locator.

The first international contest in May is the ARI International DX on 1st and 2nd between 2000 and 2000UTC. Work anyone on CW, SSB or RTTY and give them RS(T) and a serial number. Expect Italians to give you a 2-letter Province code instead of the serial.

Now the solar factual data for the period from the 12th to the 18th of April, compiled by Neil Clarke, G0CAS on the 19th of April.

The latest smoothed monthly sunspot numbers are available and are for July, August and September 2009 and are 3.6, 4.8 and 6.1 respectively.

Only one small sunspot group was visible until the 14th then the solar disc became spotless for the rest of the period. Solar activity was very low. Several coronal mass ejections could be seen from over the west limb but they were not Earth directed. Solar flux levels remained steady at 75 units except for the 17th which was 74. The 90 day solar flux average on the 18th was 82 units. That's one unit down on last week.

X-ray flux levels varied little day to day and averaged A2.5 units. Geomagnetic activity started at `active' levels with an Ap index of 22 units on the 12th. The disturbance was probably due to a coronal mass ejection from the 8th. The remainder of the period was quiet and the average was Ap 7 units. Solar wind data from the ACE spacecraft saw increase from 360 kilometres per second to 530 by the 15th. Particle densities were low except for a brief increase to 16 particles per cubic centimetre during the afternoon of the 16th. Bz varied between minus 11 and plus 7 nanoTeslas on the 12th and between minus 4 and plus 5 nanoTeslas on the quiet days.

One of the biggest news stories of the past week was the volcanic explosion in Iceland. Some listeners have wondered whether this carried any implications for radio propagation. The provisional answer is that, while many places have enjoyed spectacular sunsets, as yet no radio-related reports have come to hand. On balance, it seems unlikely that any will. But if there were to be any they seem most likely to occur at UHF.

And finally the solar forecast. This week solar activity is expected to be very low with only a small chance of a C class solar flare taking

place, providing that no new large sunspot group emerges, as sometimes happen. Solar flux levels are expected to be in the high 70's for most of the week. Geomagnetic activity should be quiet everyday. MUFs during daylight hours at equal latitudes should be around 20MHz for the south and 17MHz for the north. Darkness hour lows are expected to be around 10MHz. Paths this week to Australia should have a maximum usable frequency with a 50 per cent success rate well be about 21MHz. The optimum working frequency with a 90 per cent success rate will be around 17MHz. The best time to try this path will be between 0700 and 1100 hours.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including e-mail addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS

On Monday 26 April Gloucester Amateur Radio & Electronics Society is holding its construction competition. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 26 April South Birmingham Radio Society is planning for field day. Contact Don, on 0121 458 1603.

On Monday 26 April Stratford Upon Avon District Radio Society is having a walking HF ARDF session with G6MMD. Contact G0CHO, on 01608 664488.

On Tuesday 27 April Derby & District Amateur Radio Society is on the air. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 27 April Loughborough & District Amateur Radio Club is having a practical evening. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday 27 April Mid-Warwickshire Amateur Radio Society is holding a used equipment and book sale night. Details from Don, G4CYG, on 019 2642 4465.

On Wednesday 28 April Bolsover Amateur Radio Society is having a committee meeting. For details, send an email to postmaster@g4rsb.org.uk.

On Wednesday 28 April Hinckley Amateur Radio Society is having a talk by John Naylor, G4KLX on D-Star and his PC software for repeaters. Details from John, M0JAV, on 07836 731544.

On Wednesday 28 April Lincoln Short-Wave Club is having a talk and presentation by Roy, G4WPW on the development of telegraphy. Contact Pam Rose, G4STO, on 01427 788356.

On Wednesday 28 April Midland Amateur Radio Society is having a laptop computer evening and training classes. Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 28 April South Notts Amateur Radio Club is reworking homebrew No. 1 with M0RIA. Details from Terry, M0RIA, via the web at www.radioclubs.net/snarc.

On Wednesday 28 April Telford & District Amateur Radio Society is holding a local 2m fox hunt with G3JKX as the fox. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 29 April RAF Waddington Amateur Radio Club is having a shack and chat night with radio and antenna play. Details from Judy Rowlands, M6LQO, on 07544 456422.

On Thursday 29 April Salop Amateur Radio Society continues its Foundation course, Morse send & receive classes with G0EML and a natter night. Details on the club website at www.salop-ars.org.uk.

On Friday 30 April Bromsgrove & District Amateur Radio Club is having a talk on remote operation. Contact Chris, M0BQE on 01905 776 869.

On Friday 30 April Coventry Amateur Radio Society is operating HF, VHF, UHF, 6m, 4m and satellites. Contact John, G8SEQ, on 07958 777363.

On Friday 30 April Nunsfield House Amateur Radio Group is having a surplus sale. Details from Ken Frankcom, G3OCA, on 01332 720976.

On Friday 30 April South Birmingham Radio Society is having a construction evening. Contact Don, on 0121 458 1603.

On Saturday 1 May Lincoln Short-Wave Club is putting G5FZ on the air. For more information contact Pam Rose, G4STO, on 01427 788356.

NEWS FOR THE NORTH OF ENGLAND

On Monday 26 April Angel of the North Amateur Radio Club is having a talk by Zoltan Derzsi, M0MDP, on the radio amateur and the computer - logging, digital modes and interfaces. Contact Nancy Bone, G7UUR, on 0191 477 0036.

On Monday 26 April Bolton Wireless Club is having an activity night, looking at techniques for the forthcoming 2m DF hunts. For details, send an email to boltonwireless@gmail.com.

On Monday 26 April Sheffield Amateur Radio Club is having part four of its contest workshop and its first VHF NFD planning meeting. For more information contact Trevor Wood, M0TWS, by email to trevorwood6@yahoo.co.uk.

On Monday 26 April South Manchester Radio and Computer Club is holding its monthly technical forum. Details from Ron, G3SVW, on 0161 969 3999.

On Monday 26 April Thornton Cleveleys Amateur Radio Society is having a talk by Alan, G4EWS on the history of the RIS to OFCOM . Details from John Foster, 2E0EZY, on 01253 399377.

On Tuesday 27 April Chester & District Amateur Radio Society Radio is having an operating evening. Details from Barbara Green on 07957 870770.

On Tuesday 27 April Otley Amateur Radio Society is taking part in the 50MHz UKAC. Contact Paul, 2E0PAK, on 07768 996370.

On Wednesday 28 April Hornsea Amateur Radio Club is having an activity, shack, workshop and DVD evening. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Wednesday 28 April Mid-Cheshire Amateur Radio Society asks "what is a small HF antenna?" Contact Peter Paul Fox, G8HAV, on 01606 553401.

On Thursday 29 April Brigg & District Amateur Radio Club will be having a talk by John, G0JRB, on the VTS Humber VHF radio system. Contact John, 2E0III, on 01652 632038.

On Thursday 29 April Preston Amateur Radio Society is on the air. Contact Richard, M0RDZ, on 0785 587 3566.

On Thursday 29 April South Manchester Radio and Computer Club is having a talk on tuning your valve power amplifier by Bill, G4EDM. Details from Ron, G3SVW, on 0161 969 3999.

On Thursday 29 April Wakefield & District Radio Society is having a talk and demonstration by Dave, G4CLI on the club node MB7IWR. Contact Ken, 2E0SSQ, on 07900 563117.

On Thursday 29 April York Radio Club is running Foundation lessons. Details from Tony Skaife, G4XIV, on 01904 330502.

On Friday 30 April East Cleveland Amateur Radio Club is having a radio magazines evening. For more information contact Alistair, G4OLK, on 01642 475 671.

NEWS FOR NORTHERN IRELAND

Church Island Amateur Radio Group will be holding a rally on Friday 30 April at Bellaghy Community Hall, Ballynease Road, Bellaghy BT45 8JS, which is located beside St Marys Church. Doors will open to the public at 8pm. Anyone wishing to book a table or for further information can contact John, MI0MIO on 0771 910 0595.

NEWS FOR SCOTLAND

On Monday 26 April the Grampian Repeater Group is holding its AGM at the '22' Club, 55b Rose Street, Aberdeen, AB10 1UB.&#65533; Doors open at 7pm and all are welcome. Details on the web at http://grampianrepeatergroup.co.uk.

On Tuesday 27 April Kilmarnock & Loudoun Amateur Radio Club is having a talk by Lyn Smith of the British Astronomical Association on the Sun and in particular sun spots cycles. Contact Graham, MM3GDC, by email to mm3gdc@btinternet.com.

On Tuesday 27 April Livingston & District Amateur Radio Society is holding Morse code practice. For more information contact Norman, on 07740 946192.

On Wednesday 28 April Ayr Amateur Radio Group is having a talk on plasma in cosmology. Contact Charlie, MM0GNS, on 01563 551704.

On Wednesday 28 April Lothians Radio Society is having a talk on the DXpedition to Antarctica VP8 by Gavin Taylor, GM0GAV. Contact Andy Sinclair, by email to lrs_secretary@moosedata.com.

On Wednesday 28 April Paisley YMCA Amateur Radio Club is holding the Advanced Licence exam. Contact Bill Anderson, 2M0BZZ, on 01505 613633.

On Thursday 29 April Aberdeen Amateur Radio Society is having a beginner's night, concentrating on construction techniques. More information from Lewis, GM4AJR, on 01224 575 663.

NEWS FOR THE SOUTH-EAST

and EAST ANGLIA

On Sunday 25 April Andover Radio Amateurs Club is running its car boot sale. Details from Martin, M0MWS, on 07776 181646.

On Sunday 25 April Newbury & District Amateur Radio Society is at the Andover Radio Club boot sale. Details from Richard, G3ZGC, on 01635 46241.

On Monday 26 April Basingstoke Amateur Radio Club is having a talk on SSTV by Peter, M1DGQ. Details from Clive, G4ODM, on 01256 326050.

On Monday 26 April Surrey Radio Contact Club is having a fix-it and natter night. More information from Ray, G4FFY, on 01732 357474.

On Tuesday 27 April Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720815.

On Tuesday 27 April Chelmsford Amateur Radio Society is having a club net night. Contact Martyn, G1EFL, on 01245 469 008.

On Tuesday 27 April Dorking & District Radio Society is having a talk on direction finding techniques and events by Alister Watt, G3ZBU. Contact Garth, G3NPC, on 01737 359472.

On Tuesday 27 April Harwell Amateur Radio Society is having a shack activity night. Contact Malcolm, G8NRP, on 01235 524844.

On Tuesday 27 April Horndean & District Amateur Radio Club is having a talk on 160m mobile and fixed station antennas by John, G3MYI. Contact Stuart, G0FYX, on 023 9247 2846.

On Wednesday 28 April Chesham & District Amateur Radio Society is having a construction project evening. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday 28 April Crawley Amateur Radio Club is having an antenna measuring instruments evening, and invites members to bring along your VNA, noise bridge, GDO etc and put them through their paces.. More information from John, G3VLH, on 01342 714 402.

On Wednesday 28 April Darenth Valley Radio Society is on the air and having a natter night. For more information send an email to Ray, G0FDU@G0KDV.com.

On Wednesday 28 April Dover Radio Club is holding its AGM. For more information contact Brian, G4SAU, by email to g4sau@darc.org.uk.

On Wednesday 28 April Farnborough & District Radio Society is having a skittles evening at Blacknest. Details from Derek, G3OFA, by email to mail@farnboroughradio.org.uk.

On Wednesday 28 April Hastings Electronics and Radio Club is having a talk on practical magnetism by Tony, G0EYE. Details from Gordon, on 01424 431 909.

On Wednesday 28 April Newbury & District Amateur Radio Society is holding an ask the experts evening. Details from Richard, G3ZGC, on 01635 46241.

On Wednesday 28 April Norfolk Amateur Radio Club is having a table top sale, construction and workshop evening plus Bright Sparks. Details from Chris Danby, G0DWV, on 01603 419204.

On Wednesday 28 April Peterborough & District Amateur Radio Club is having a talk by Ron, G8GRT, on early amateur television. Details from David Howlett, M0VTG, by email to padarc@tesco.net.

On Wednesday 28 April Worthing & District Amateur Radio Club is putting GX3WOR on the air and having a discussion evening. For more information contact Roy, G4GPX, on 01903 753 893.

On Thursday 29 April Bittern DX Group is making arrangements for training days and events in May. Details from Linda, G0AJJ, on 01692 404154.

On Thursday 29 April King's Lynn Amateur Radio Club is having a club night and 2m club net. Contact Ray, G3RSV, by email to ral-g3rsv@supanet.com.

On Thursday 29 April Shefford & District Amateur Radio Society is having a talk on Windows 7 by Nigel Leany. Details from David, G8UOD, on 01234 742 757.

On Thursday 29 April Waterlooville Amateur Radio Club is having a CW night. Details from Rich, G4IBW, on 02392 680852.

On Friday 30 April Mid-Sussex Amateur Radio Society is having a radio night and table top sale. Contact Peter, G4AKG, on 01444 239371.

On Friday 30 April Whitton Amateur Radio Group is having an RSGB update by Alison Johnston, G8ROG, the RSGB Regional Manager for London and Thames Valley. Details on the web at www.warg.info.

On Friday 30 April Wimbledon & District Amateur Radio Society is on the air. Contact Jim, M0CON, on 020 8874 7456.

On Saturday 1 May Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720815.

NEWS FOR THE SOUTH WEST

On Sunday 25 April Blackmoor Vale Amateur Radio Society is at the Yeovil QRP Rally in Sherborne. Contact Tony, G0GFL, on 01258 860741.

On Sunday 25 April Cornish Radio Amateur Club is dismantling after International Marconi Day. Details from Steve, G7VOH, on 01209 844939.

On Sunday 25 April Yeovil Amateur Radio Club is holding its QRP Convention at Digby Hall, Sherborne. Contact Steve Crask, G7AHP, by email to steve@g7ahp.co.uk.

On Monday 26 April Bristol RSGB Group is having a talk on GB3WX, the first UK 6m - 10m cross band repeater. Details from Robin, G3TKF, on 01225 420442.

On Tuesday 27 April Blackmoor Vale Amateur Radio Society is planning events for 2010 and 2011. Contact Tony, G0GFL, on 01258 860741.

On Wednesday 28 April Taunton & District Amateur Radio Club is operating the club station. Contact William, G3WNI, on 01823 666 234 for more information.

On Wednesday 28 April Thornbury & South Gloucestershire Amateur Radio Club is on the air. Contact Tony, G0WMB, on 01454 417048.

On Thursday 29 April South Bristol Amateur Radio Club is having an on the air evening supervised by David, G7PKJ. Contact Len, G4RZY, on 01275 834 282.

On Thursday 29 April Swindon & District Amateur Radio Club is having a talk by Richard, M1CFW, about the move to electronic ciphers after Enigma. Contact Den, M0ACM, on 07810 317750.

On Thursday 29 April Yeovil Amateur Radio Club is holding its AGM. Contact Steve Crask, G7AHP, by email to steve@g7ahp.co.uk.

On Friday 30 April North Bristol Amateur Radio Club is having a committee meeting. Details from Dick on 01454 218362.

On Friday 30 April Torbay Amateur Radio Society is having a 90/10 sale. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES

On Monday 26 April Llanelli Amateur Radio Society Club is having a raffle. Contact Craig, MW0MXT, on 01269 840292.

On Tuesday 27 April Marches Amateur Radio Society is having a talk on EchoLink or PSK31. For more information contact Dave, MW0AYM, on 01691 777242.

On Friday 30 April Aberdare & District Amateur Radio Society is putting club call MC0TTR on the air. Details at www.radioclubs.net/aadars.

On Saturday 1 May Meirion Amateur Radio Society commences its weekend special event at the Welsh Highland Heritage Railway, Porthmadog. Contact John, MW0VTK, on 07772 720099 for more information.

http://reast.asn.au/

ALL THESE AND OTHER HAMS UP AND COMING IN THIS EDITION OF NEWS FROM THE
WIRELESS INSTITUTE OF AUSTRALIA FOR WEEK COMMENCING APR 25 2010

ABC ARS supports International Marconi Day

The Amateur Radio Section of the Austrian Broadcasting Corporation and the Documentary Archives Radio Communications and QSL Collection will operate OE10M during this weekend 23rd to 25th April.

OE10M is an official International Marconi Day station and contacts made on Saturday, 24th April are valid for the IMD Award. QSL via da OE - Bureau or direct to OE1WHC. Cards without an SAE & new IRC or 1 US dollar to cover postage will be processed via Bureau.

AM CW ANZAC

ANZAC Day sees many stations working AM and CW in remembrance of our Military Hams who have gone before us.

And good news is that you can work CW through amateur radio satellite HO-68.

The linear transponder, used for CW working, has a bandwidth of 50 kHz which allows about 10-15 simultaneous contacts to take place and can sound like the 20 metre band.

Due to Doppler shift the CW beacon can appear to be up to +/- 9 kHz from its nominal frequency of 435.790 MHz and you need to tune your receiver to follow it during the pass.

The beacon has been received on simple antennas such as a ¼ wave ground plane but for best results try a small Yagi with about 8 elements.

CW
145.925 - 145.975
435.765 - 435.715

09:50...Turn On--CW
Oceania, Asia, Europe
10:35...Turn Off

Amateurs in North Queensland, lead by Mike VK4MIK, are encouraging all amateurs who can, to operate on AM and CW modes during the afternoon and evening of ANZAC Day as a mark of remembrance to the servicemen and women who served our countries during time of conflict.

AM and CW were modes used during WW2 and in Korea, Malaysian and early Viet Nam so by using those modes it shows that we Radio Amateurs are remembering them in our own special manner. Hopefully our New Zealand cousins will join in the activity as the ANZAC spirit is an integral part of both our countries.

Ex-navy ships Whyalla (in Whyalla), Castlemaine (in Melbourne) and Diamantina (in Brisbane) plus the WAR-BIRDS in Mareeba will be activating their World War 2 radio equipment plus other museums looking at linking in with Amateur Radio Clubs and Groups.

The North Queensland net on ANZAC Day will be on 7.093MHz at 0600 hours UTC using AM and the Townsville North Queensland net will also be AM on 3605.4kHz at 0930 hours UTC. Other radio clubs and groups in Southern Queensland are also planning to run their nets on AM plus getting on air to make contact

during the afternoon on AM and CW.

The suggested frequencies for use are:

CW
7.020MHz +/- 15kHz
3.530MHz +/- 20kHz
14.050MHz +/- 20kHz

AM
3.590MHz +/- 20kHz
7.070MHz +/- 25kHz
14.160MHz +/- 30kHz

Turkish Amateurs are operating from the 22 - 25 April overlooking ANZAC Cove.

It is purely social and not a contest.

This is Ewan VK4ERM for:
Mike ‘banjo(tm) Patterson VK4MIK

WIA CENTENARY

VK100WIA Online Logbook

The online logbook may be used either as a real time logger with contacts entered into the web form as they are made or it may be completed after the event, allowing the club to choose to record contacts on paper logs.

Paper logs can be keyed in at any time, including any time after the clubs 3 day operational window.

Contacts in the logbook are listed chronologically irrespective on when the contact has been entered into the online logbook.

Each club has registered for use of the VK100WIA callsign based on UTC time, the logging is also based on UTC time zone it includes a UTC time clock for reference purposes.

The online logging page will not allow any club to log a contact for a time and date that is outside the allocated 3 day window. (again UTC time)

A set of simple instructions on how to use the logging page and the logging page URL will be sent to the contact nominated in the online registration form two weeks before the clubs use of the callsign.

All clubs will need to recall the password they nominated when completing their registration for the VK100WIA callsign, lost or forgotten passwords

can be reset allowing the club to choose a new password.

The clubs rostered to use the special callsign VK100WIA in June have received a comprehensive package of material to help them promote amateur radio, their club and the WIA Centenary.

The material is ideal for any club that wants to promote an event or activity and gain positive media publicity for amateur radio. While clubs on the VK100WIA roster will automatically receive this material eight weeks prior to their three-day rostered slot, any other WIA affiliated club can request a copy from the WIA National Office.

In a covering letter the WIA President Michael Owen VK3KI explains that the resources being provided include media liaison advice, a template media release, background sheets and guides. Clubs using this package will easily be able to create a 'Media Kit' to send to their local news media.

www.wia.org.au/newsevents/centenary/mediaresources/

www.wia.org.au/newsevents/news/2010/20100414-1/index.php

Oh and WIA members and clubs may include the WIA Centenary logo on their QSL cards and websites.

Digital files of the logo, both colour and black & white versions, plus user guidelines and requirements are available in the WIA Centenary section of the WIA website

(www.wia.org.au/newsevents/centenary/logo).

WIA
President Michael Owen VK3KI president@wia.org.au
Vice President Ewan McLeod VK4ERM vk4erm@wia.org.au
Secretary Geoff Atkinson VK3AFA secretary@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

Friday 30th July is the closing date for applications for the WIA Club Grants Scheme for 2010. Full details of the 2010 rules for the scheme can be obtained from the WIA Web site, together with a template setting out the suggested application headings for an executive summary, identifying how the club seeks to meet the objectives of the scheme and guidance regarding supporting documentation.

The object of the scheme is to promote and advance amateur radio, the WIA and its Affiliated Clubs by supporting useful and/or innovative projects undertaken or to be undertaken by Affiliated Clubs.

President Michael said that the committee would recommend to the Board the projects that should be supported and the amount to be allocated to each supported project. "I urge affiliated clubs to participate in this opportunity" Michael said; "however, it is most important that clubs read the rules very carefully

VKR Roundup
http://www.police.qld.gov.au/News+and+Alerts/Media+Releases/

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP and I've been reflecting....

In the time when we measured in feet and inches and valued in shillings and pence, I was receiving my first lessons in club organisation. This was with a national youth organisation with a long history, even then.

It was probably before the terms such as teen peer pressure had entered the pages of news reporting but one issue was very important to avoid. This was and is the growth of cliques in an organisation. The self grouping of a segment of members to assume effective control of the body to benefit that self appointed group has long been a poison to the cohesiveness and growth of all kinds of clubs.

Our hobby of amateur radio with its lofty ideals as set out in the Amateurs Code is certainly not immune to this problem.

Practically we need to tread the line of accommodating the wide interests of all our club members and providing activities, within our resources, which involve all our club members. Ignoring members, inviting a selected few to undertake special activities (pre-qualifying) and allowing things to run as a dictatorship is hardly in the spirit of the Amateurs Code.

Our WIA is encouraging us to recruit. Old hobbyists�(tm) and the newly interested, we invite you all.... and as the CB craze brought us many recruits, computing and other electronic interests should be a source of new members now.

Have you told anyone about amateur radio, this week?

For QNews, I'm Geoff Emery and that's what I think.....what about you?

Bayside and District Amateur Radio Society rebroadcasting the WIA weekly news Tuesday nights at 7pm from their 146.875MHz repeater.
The IRLP node number has changed Bryn VK4GF has linked node 6919 to the BDARS repeater

An Amateur Radio Salute to the Anzac�(tm)s, taken from TRGs "The TRG Tattler".
THE OFFICIAL JOURNAL OF THE TABLELANDS RADIO GROUP�"ATHERTON

This was an idea I had to give an Amateur Radio salute to the Anzacs as well as all ex and serving men and women of our Defence Forces by utilizing radio modes that were in use during World War II, Korea, Malaysia and early Vietnam days . These days, Amateur Radio uses the more stable and reliable Single Side Band and Digital modes of radio communication as opposed to the more interference prone Amplitude Modulation (AM) and Morse Code (CW) modes as were used in the era of those war years. During these years of difficult times, the lower power of the transmitters and sensitivity of receivers of the day made operating conditions much more arduous than they are today and this will be an ideal opportunity, especially for the younger generation of radio enthusiasts, to see AM and Morse Code being used once again and how it “used to be”. It would be a trip down Memory Lane for the more elderly operators in our great hobby.

This project has gained much support nationally and internationally as the Tableland Radio Group (TRG), based in Atherton, gets the project up and running. Amateur Radio operators (or Hams as they are often called) from around Australia, New Zealand the United Kingdom and Turkey have expressed interest in joining us on April 25.

In Australia we will have a radio station at the Mareeba Airport, as it was a major base in WW II, and the Townsville Radio Club will be operating from a

WW II Command Bunker set into Castle Hill. We also will have three ex Royal Australian Navy Ships involved ?" HMAS Diamintina, in Brisbane, HMAS Castlemaine, in Melbourne, and HMAS Whyalla, in Whyalla. There are numerous Hams who have rallied and will be on air on the afternoon of ANZAC DAY 2010.

Many Radio Amateurs have served in the Australian and New Zealand Defence Forces and it is hoped this event will have special significance for them.

Mike “Banjo” Patterson VK4MIK

GREETINGS TO ALL LISTENERS ON THIS VERY SPECIAL AND SIGNIFICANT DAY ANZAC DAY 2010 - THIS IS DON VK4FNQA FROM 'NORTH QUEENSLAND'...

HAVE YOU... OR WILL YOU BE PARTICIPATING IN CONTACTING LOTS OF STATIONS ON AIR TODAY BY USING CW TO MAKE CONTACT WITH VARIOUS LOCATIONS IN CONJUNCTION WITH ANZAC DAY REMEMBRANCE?

TARC INC MEMBERS AND SUPPORT CREWS 'SALUTE THE DEFENCE FORCE SERVICES BY; REMEMBERING OUR ANZACS'.

"THEY WENT WITH SONGS TO BATTLE,
THEY WERE YOUNG, STRAIGHT OF LIMB, TRUE OF EYE,
STEADY AND AGLOW,

THEY WERE STAUNCH TO THE END AGAINST ODDS ENCOUNTERED,
THEY FELL WITH THEIR FACES TO THE FOE.

THEY SHALL GROW NOT OLD AS WE THAT ARE LEFT GROW OLD.
AGE SHALL NOT WEARY THEM NOR THE YEARS CONDEMN.
AT THE GOING DOWN OF THE SUN AND IN THE MORNING,
WE SHALL REMEMBER THEM.

LEST WE FORGET"

Licensing and display of firearms at RSL premises

The Queensland Police Commissioner Bob Atkinson and Returned & Services League of Australia (Queensland Branch) President Doug Formby, will establish a joint RSL/QPS process to deal with the licensing of display firearms at RSL premises.

All regional Assistant Commissioners have been advised of possible issues with licensing and the display of decommissioned firearms at RSL premises.

“The RSL holds a special place in Queensland society, and I am confident we can work through the issues to ensure legal compliance while preserving the history and traditions associated with the RSL,” Commissioner Atkinson said.

May Presentation

VK0IR Heard Island DXpedition Presentation

Our May presentation will be a professional video presentation created by James Brookes, 9V1YC of the 1997 DXpedition to Heard Island.

The presentation will be projected on to the big screen along with Dolby Digital audio.

This presentation has many references and some great archival film of the original ANARE expeditions to Heard Island in the 1940 and 50s.

The presentation also covers the history of Heard Island and some great film of the wildlife found on Heard Island.

Called "Outpost at the Edge" it covers the start from the Reunion Islands the transporting, setup of the operating tents, the operating and then the tear-down.

With over 80,000 contacts logged in the three weeks it is a great presentation about a famous DXpedition.

It is professionally filmed and edited by 9V1YC and is 50 minutes long.

See you there.

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

Ham Radio Growing In The Age Of Twitter

Last week National News brought you a story on how the USA National Public Radio published a report that Amateur Radio in the United States was growing in the age of twitter.

Here, it raises the question is if the same trend is true in Australia?

Is our amateur population growing in numbers or declining?

Former WIA Director Robert Broomhead VK3DN says that 12 months ago the ACMA database reported 15,515 current issued callsigns.

Today April 2010, there are 15,675 current issued callsigns,
a very encouraging increase of 160 in the last twelve months.

In Australia the turnaround from decline to growth was first noted after the introduction of the foundation licence in 2005, a trend that has been consistent year on year since.

Across the Tasman the national society of New Zealand, NZART, may poll its branches to find out if they want an Entry Level Amateur Radio licence.

The voting does not give council a mandate re entry level licence.

If passed it merely instructs Council to seek a mandate:

By polling all branches at the NZART AGM - and counting how many votes they record which way - the matter of an entry level licence should be settled.

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

Icelandic volcano disrupts IARU meeting

The volcanic eruption in Iceland has disrupted an International Amateur Radio Union (IARU) Region 1 Executive Committee meeting.

The IARU Region 1 website reports that participants of the yearly IARU Region 1 Executive Committee meeting struggled to reach Sofia from various parts of the World due the Iceland Eyjafjallajokull's volcanic ashes.

>From flight cancellations, to airport closures and participants stranded in airports, only a few people made it to Sofia - the rest are either stranded at the transit airport or on the way back home by any possible means of transportation.

IARU Region 1
http://www.iaru-r1.org/

FIRST SOLAR ONLY POWERED D-STAR SYSTEM ON THE AIR

What's believed to be the worlds first and only D-Star solar powered repeater has come on the air from Belgium. According to the Royal Union of Belgian Radio Amateurs the ON0CPS system was recently put into operation by ON4BK and is designed to operate entirely on solar energy.

The new D-Star repeater operates with an input channel of 431.9625 MHz with its output on 439.5625 MHz. According to the society, during the day there is usually enough sunlight to keep the machine in operation while simultaneously charging its two 120 Amp Hour batteries which power it at night. So far the repeater has been running over a month on this solar

power alone with no failures or complaints.

More is at the ON4BK website located at http://tinyurl.com/yyajoxx

RAC FILES FOR 60 METER CANADIAN ALLOCATION

Radio Amateurs of Canada has filed a request with telecommunications regulator Industry Canada for some 60 meter spot frequency assignments. The formal request was sent to the Director, Spectrum and

Radio Policy, for consideration in authorizing for the Canadian Amateur

Service the same five 5 MHz frequencies that are now authorized in the United States. In addition, two spot frequencies are also requested for

exclusive Canadian amateur use.

The ground work for this was established at previous meetings of the Canadian Amateur Radio Advisory Board Radio Amateurs of Canada anticipates this request will go through a lengthy due process of analysis and review at Industry Canada before being published as a Canada Gazette Notice for public comment. If all goes well, Canadian hams could see an authorization to this spectrum within a year.

Taiwan 100th Anniversary Special Call Sign Used in Pirate Operation

It is spreading in the world of amateur radio that a special events station with the new style call sign 3T07W 3H100TW 3T100TW has been registered for the 100th anniversary of the ROC (Taiwan).

Although the call sign is within Taiwan's call sign structure, the National Communications Commission (NCC) of Taiwan has never issued this call sign to any operator, and as such the station should be considered a pirate station.

Request for beacon reports

A quick reminder that Shante who is 4S7WP is trying to enlist VK amateurs to listen for the 4S7B repeater near Colombo in Sri Lanka. The beacon callsign is 4S7B, and is located about 110 km south of Colombo, Sri Lanka and has operating frequencies on: 14.100 MHz, 18.110 MHz, 21.150 MHz, 24.930 MHz and 28.200 MHz.

Of particular interest is reception reports from the 21.150 MHz beacon.

emailed ohms73@hotmail.com

SECOND AFRICAN WSPR BEACON TAKES TOM THE AIR

The second beacon using the new WSPR mode has gone on the air in Africa. Using the callsign 5X7JD the system is located in Masaka, Uganda and outputs 1 watt while cycling through 80, 40, 30, 20, 17, 15, 12 and 10 meters. This gives an overall cycle between WSPR transmissions returning every 16 minutes to a given band.

The beacon is composed of an embedded system based on a PIC microprocessor, a Direct Digital Synthesis chip and a MOSFET Power Amplifier with selectable filters all feeding a HyGain Av 18VS multi-band vertical antenna. Time and location information are derived from an attached GPS receiver.

You can read more about the station at www.hamradiosafari.com

NEW DX BOOK AVAILABLE BY W9KNI

'A Year of DX' is a new book by noted author Bob Locher, W9KNI that follows him as he makes an all out effort to win the 2008 running of CQ Magazine's DX Marathon. The Marathon is a year long operating event during which a contestant works as many countries and CQ zones as possible, any band or any mode.

While the book chronicles Bob's efforts in the pileups and through the lonely watches of the night, it also contains other discussions of what

DXing is all about. These include the possibilities of DXing in low sun spot periods contributed by Jim Henderson, KF7E, a chapter on optimizing your SSB transmit audio by Hall of Fame'r Chip Margelli, K7JA, a discussion of what is the ideal linear amplifier, and much more.

Anyone who read and enjoyed Bob's 'Compete DX'er' is sure to find this book equally worthwhile. Its publication date is scheduled for May 1st. More information is on-line at www.idiompress.com/yearofdx.php

The Secret War - Battle of the Beams

The Alexandra Palace Television Society has made available on YouTube the TV programme, The Secret War - Battle of the Beams, originally transmitted BBC TV on January 5, 1977.

This tells the story of how the UK jammed high frequency radio beams used to direct German bombers to their targets during night raids in World War Two.

The Alexandra Palace transmitter was used to jam the Y-Gerat system which operated in the 40-50 MHz range. The earlier Knickebein system operated in the 30-31 MHz range.

A BBC London report on the use of Alexandra Palace during World War Two is at:

WIA Centenary ARISS contact

Students from the Trinity Christian School in Canberra are to talk to the astronauts on the International Space Station during a planned ISS contact to take place during the WIA Centenary dinner in Canberra next month.

School principal Carl Palmer VK1TP/VK2TP is very pleased that ten students will be given such an honour to attend the WIA Centenary dinner and talk with an astronaut on the International Space Station.

Australian ARISS Coordinator Tony Hutchison VK5ZAI is finalising arrangements for the contact between NA1SS, and the WIA special callsign VK100WIA, on the evening (Australian time) of Saturday the 29th of May during the WIA Centenary dinner.

(VK3PC)

ESTONIA TO LAUNCH HAM RADIO CUBE-SAT

The University of Tartu, in Estonia, has submitted a frequency coordination application to the IARU for an Amateur Radio CubeSat. Called ESTCube-1,

the tiny bird would be a Low Earth Orbit satellite with UHF downlinks and a VHF telecommand uplink. It would also carry a camera to acquire images of Estonia for and will deploy a 10 meter conductive tether as a part of the development work of an electric solar wind sail. The projected launch for ESTCube-1 would be in 2012 although no launch opportunity has yet been confirmed.

More on this Estonian ham radio in space project is on-line at http://tinyurl.com/yk66s2o

EMERGENCY FREQUENCIES IARU REGION 3
3.600, 7.110, 14.300, 18.160 and 21.360 MHz

Global Simulated Emergency Tests 2010

The International Amateur Radio Union Region 1 Emergency Communications Group has announced that the two Global Simulated Emergency Tests this year will be on the 15th of May and the 13th of November.

GlobalSET is an opportunity to demonstrate how communications can occur across national borders, test use the emergency centre of activity frequencies on the 80, 40, 20, 17 and 15 metre bands, and create practices for international emergency communications.

Registrations are now being taken for IARU member societies and emergency communications groups to participate in next month's GlobalSET.

(Jim Linton VK3PC, Chairman IARU R3 Disaster Communications Committee).

REWIND - A LOOK BACK IN HISTORY

Rewind a look back at our history through the serialised written history by WIA Centenary Committee member Peter Wolfenden VK3RV with assistance of others, that is being published in the WIA journal Amateur Radio magazine.

Women in wireless

The resumption of wireless experimentation post-World War I included the emergence of lady operators who did not immediately gain equality.

A Miss Rogers inquired about joining the South Australian Division, which responded that the ?This Institute at present is unable to admit lady members.

Florence Wallace, (later McKenzie) is the first known radio amateur in Australia, qualified in electrical work she operated a wireless/electrical shop in the heart of Sydney from 1921.

A very active operator, who was involved with establishing Wireless Weekly magazine in August 1922.

Florence, or ?Mrs Mac?, established the Women&#65533;(tm)s Emergency Signal Corps which provided a Morse code training facility. From this, grew the Women&#65533;(tm)s Royal

Australian Navy Service. ?Mrs Mac? trained many!

>From this time on, the number of lady operators grew; but their gender was
not evident on air - wireless telegraphy being the only mode available.

Today, Australia has many female radio amateurs. They are supported by their
organisation ALARA - Australian Ladies Amateur Radio Association - formed
in 1975.

SB QNEWS @ WW $QNEWS100425
QNEWS - Apr 25 - VK4 ON AIR

DID YOU TELL ANYONE ABOUT AMATEUR RADIO THIS WEEK?

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP and I've been
reflecting....

In the time when we measured in feet and inches and valued in shillings and
pence, I was receiving my first lessons in club organisation. This was with
a national youth organisation with a long history, even then.

It was probably before the terms such as teen peer pressure had entered the
pages of news reporting but one issue was very important to avoid. This was
and is the growth of cliques in an organisation. The self grouping of a
segment of members to assume effective control of the body to benefit that
self appointed group has long been a poison to the cohesiveness and growth
of all kinds of clubs.

Our hobby of amateur radio with its lofty ideals as set out in the Amateurs
Code is certainly not immune to this problem.

Practically we need to tread the line of accommodating the wide interests of
all our club members and providing activities, within our resources, which
involve all our club members. Ignoring members, inviting a selected few to
undertake special activities (pre-qualifying) and allowing things to run as
a dictatorship is hardly in the spirit of the Amateurs Code.

Our WIA is encouraging us to recruit. Old hobbyists' and the newly interested, we invite you all.... and as the CB craze brought us many recruits, computing and other electronic interests should be a source of new members now.

Have you told anyone about amateur radio, this week?

For QNews, I'm Geoff Emery and that's what I think.....what about you?

ANZAC DAY 2010 CW/AM

Amateurs of North Queensland, lead by Mike, are encouraging all amateurs who can, to operate on AM and CW modes during the afternoon and evening of ANZAC Day as a mark of remembrance to the servicemen and women who served our countries during time of conflict.

AM and CW were modes used during WW2 and in Korea, Malaysian and early Viet Nam so by using those modes it shows that we Radio Amateurs are remembering them in our own special manner. Hopefully our New Zealand cousins will join in the activity as the ANZAC spirit is an integral part of both our countries.

Ex-navy ships Whyalla (in Whyalla), Castlemaine (in Melbourne) and Diamantina (in Brisbane) plus the WAR-BIRDS in Mareeba will be activating their World War 2 radio equipment plus other museums looking at linking in with Amateur Radio Clubs and Groups.

The North Queensland net on ANZAC Day will be on 7.093MHz at 0600 hours UTC using AM and the Townsville North Queensland net will also be AM on 3605.4kHz at 0930 hours UTC. Other radio clubs and groups in Southern Queensland are also planning to run their nets on AM plus getting on air to make contact during the afternoon on AM and CW.

The suggested frequencies for use are:

CW
7.020MHz +/- 15kHz
3.530MHz +/- 20kHz
14.050MHz +/- 20kHz

AM
3.590MHz +/- 20kHz
7.070MHz +/- 25kHz
14.160MHz +/- 30kHz

Turkish Amateurs are operating from the 22 - 25 April overlooking ANZAC Cove.

It is purely social and not a contest.

This is Ewan VK4ERM for:
Mike 'banjo' Patterson VK4MIK

CLUBBING -

BAYSIDE

Bayside and District Amateur Radio Society rebroadcasting the WIA weekly news Tuesday nights at 7pm from their 146.875MHz repeater.
The IRLP node number has changed Bryn VK4GF has linked node 6919 to the BDARS repeater

TABLELANDS RADIO AND ELECTRONICS CLUB
vk4wat@wia.org.au
www.treclub.org.au

G'day I'm Dale VK4DMC with news from the Tablelands Radio and Electronics Club.

Mike Patterson, VK4MIK has proposed that Amateur Radio commemorate the ANZAC tradition as well as commemorating all ex and serving men and women of our Defence Forces by utilizing radio modes that were in use during World War II, Korea, Malaysia and early Vietnam days - Amplitude Modulation (AM) and Morse Code (CW) on ANZAC Day Sunday 25th April 2010.

Many of today's amateur radio operators started out using AM and CW on HF and VHF.

3 TREC members Nick Watling VK4YT, Chris Gill VK4YCG and Barrie Smeaton VK4ALK along with other Far North Queensland hams will be operating a radio station at the Mareeba Airport which was a major air-base in WW 2 They will be using old military radio equipment including a BC-348 receiver and a BENDIX TA-12d transmitter.

One of the amateurs who will be at Mareeba is Tom Saunders VK4AOG, who at 92 years of age, is still very active on the bands. Tom served in WW2 with the RAAF.

The Townsville Radio Club will be operating from a WW II Command Bunker set into Castle Hill. There will be three ex Royal Australian Navy Ships involved - HMAS Diamantina, in Brisbane, HMAS Castlemaine, in Melbourne, and HMAS Whyalla, in Whyalla. Other clubs around VK have indicated that they will be on air as well.

The Afternoon Net , a daily North Queensland net, will be on air using AM at 0600z on 7.093MHz

A Turkish group the TC Special Wireless Activity Team will be operating using the call-sign TC57A from Dardanelles, Canakkale, to commemorate the soldiers of the Turkish 57th Regiment, who lost their lives during the First World War.

TREC (VK4WAT) will be operating from the Atherton War Cemetery starting around 0500 z.

Suggested frequencies are available on the WIA web-site.

This has been Dale VK4DMC for the Tablelands Radio and Electronics Club.

TABLELANDS RADIO GROUP

(no audio supplied)

An Amateur Radio Salute to the Anzac's, taken from TRGs "The TRG Tattler".
THE OFFICIAL JOURNAL OF THE TABLELANDS RADIO GROUP ATHERTON

This was an idea I had to give an Amateur Radio salute to the Anzacs as well as all ex and serving men and women of our Defence Forces by utilizing radio modes that were in use during World War II, Korea, Malaysia and early Vietnam days . These days, Amateur Radio uses the more stable and reliable Single Side Band and Digital modes of radio communication as opposed to the more interference prone Amplitude Modulation (AM) and Morse Code (CW) modes as were used in the era of those war years. During these years of difficult times, the lower power of the transmitters and sensitivity of receivers of the day made operating conditions much more arduous than they are today and this will be an ideal opportunity, especially for the younger generation of radio enthusiasts, to see AM and Morse Code being used once again and how it "used to be". It would be a trip down Memory Lane for the more elderly operators in our great hobby.

This project has gained much support nationally and internationally as the Tableland Radio Group (TRG), based in Atherton, gets the project up and running. Amateur Radio operators (or Hams as they are often called) from around Australia, New Zealand the United Kingdom and Turkey have expressed interest in joining us on April 25.

In Australia we will have a radio station at the Mareeba Airport, as it was a major base in WW II, and the Townsville Radio Club will be operating from a WW II Command Bunker set into Castle Hill. We also will have three ex Royal Australian Navy Ships involved - HMAS Diamintina, in Brisbane, HMAS Castlemaine, in Melbourne, and HMAS Whyalla, in Whyalla. There are numerous Hams who have rallied and will be on air on the afternoon of ANZAC DAY 2010.

Many Radio Amateurs have served in the Australian and New Zealand Defence Forces and it is hoped this event will have special significance for them.

> amateur station operators in emergency and disaster drills and tests.
> For example, a representative of the New Orleans Urban Area Security
> Initiative recently emphasized the importance of conducting emergency
> drills and the need for amateur participation.
>
> 4.   The Commission's rules expressly permit operation of amateur
> stations for public service communications during emergencies, and on a
> voluntary basis during drills and exercises in preparation for such
> emergencies. Given, however, that the Amateur Radio Service is
> primarily designated for "amateurs, that is, duly authorized persons
> interested in radio technique solely with a personal aim and without
> pecuniary interest," the rules expressly prohibit amateur stations from
> transmitting communications "in which the station licensee or control
> operator has a pecuniary interest, including communications on behalf
> of an employer." Accordingly, public safety entities seeking to have

> employees operate amateur stations during government-sponsored
> emergency preparedness and disaster drills presently must request a
> waiver.
>
> III. DISCUSSION
>
> 5. We seek comment on whether to amend the rules to permit amateur
> radio operators to participate in government-sponsored emergency and
> disaster preparedness drills and tests, regardless of whether the
> operators are employees of the entities participating in the drill or
> test. The rules already recognize the importance of amateur radio in
> emergencies, and permit participation in such drills and tests by
> volunteers (i.e., non-employees of participating entities). As noted
> above, experience has shown that amateur operations can and have
> played an essential role in protecting the safety of life and property
> during emergency situations and disasters. And as evidenced by recent
> waiver requests, state and local government public safety agencies and
> other entities often conduct disaster and emergency preparedness drills
> to be best-prepared for such eventualities. The proposed rule would
> obviate the need for a waiver in such instances by allowing employees
> of public safety agencies and other entities to operate amateur
> stations for testing and drilling of emergency communications
> preparedness. We thus tentatively conclude that employee status
> should not preclude or prevent participation in government-sponsored
> emergency and disaster tests and drills. Further, we tentatively
> conclude that extending authority to operate amateur stations during
> such drills will enhance emergency preparedness and thus serve the
> public interest.
>
> 6. In reaching these tentative conclusions, we do not disturb the
> core principle of the amateur radio service as a voluntary,
> non-commercial communication service carried out by duly authorized
> persons interested in radio technique with a personal aim and without
> pecuniary interest. Rather, we believe that the public interest will
> be served by a narrow exception to the prohibition on transmitting
> amateur communications in which the station control operator has a
> pecuniary interest or employment relationship, and that such an
> exception is consistent with the intent of the amateur radio service
> rules. Accordingly, we propose that amateur operations in connection
> with emergency drills be limited to the duration and scope of the
> drill, test or exercise being conducted, and operational testing
> immediately prior to the drill, test or exercise. 7. Furthermore,
> we propose that the emergency tests and drills must be sponsored by
> Federal, state, or local governments or agencies, in order to limit the
> narrow exception to ensure that drills further public safety. We note,
> however, that there may be circumstances where conducting emergency
> drills for disaster planning purposes, even if not
> government-sponsored, would serve the public interest. Accordingly,
> we seek comment on whether we should permit employee operation of
> amateur stations during non-government-sponsored emergency drills, if

> the purpose of the drill is to assess communications capabilities,
> including amateur radio, in order to improve emergency preparedness and
> response.

SARL News - SUNDAY 25 APRIL 2010

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a webstream, visit www.sarl.org.za, click on ARMI and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and subscribe to receive future bulletins by email.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 10,130, 7,066 and 3,695 MHz SSB.

Today's news focuses on the highlights of the SARL National Convention held in Port Elizabeth:

NEW SARL COUNCIL ELECTED NON-MEMBERS JOINING NOW GET MAY AND JUNE FREE 2009 AWARDS PRESENTATION CONTEST AWARDS

NEW COUNCIL ELECTED

At the AGM held in Port Elizabeth yesterday Dennis Green, ZS4BS, was elected as President with Mark Zank, ZS6YES, as Vice Chairman. Henry Chamberlain, ZS1AAZ, was appointed to the new Council as Secretary and Louw Erasmus ZS6LME as the legal adviser. The Council will meet in the next two weeks to assign portfolios to the other councillors. Rassie Erasmus, ZS1YT, the immediate past President, will continue as Treasurer.

Besides the normal AGM business, the main item on the agenda was a motion by Council to update the constitution. After explaining the changes, a brief discussion followed. There was a proposal from the floor requesting Council to withdraw the motion. The update motion was eventually approved by a large majority with 218 votes in favour and 31 against. The new constitution comes into effect immediately. As explained by the legal advisers, the changed constitution does not materially affect the operation of the SARL, as the changes are mainly cosmetic. The web will be updated as soon as possible.

The AGM approved the new subscription rates for 2010/2011. The ordinary membership fee will be increased from R340 to R360 per annum. The other classes of membership have been increased with similar percentages. The web will be updated during next week. Club affiliation fees have been

standardised and are now only R120 per year.

In his annual report the President highlighted the activities of the past year. The full report will be published on www.sarl.org.za on Monday.

NON-MEMBERS JOINING NOW GET MAY AND JUNE FREE

If you join the SARL today at the new 2010/2011 rates, you will get May and June free of charge. As a full member the next 14 months will only cost you R360, less than 85 cents per day, little enough to protect your hobby.

THE FUTURE OF AMATEUR RADIO IS WITH THE YOUTH

The future of amateur radio is with the youth and we need to adapt if we want to attract them. This was the message from IARU Region 1 President Hans Blondeel Timmerman, PB2T. He delivered the after-dinner address at the SARL Awards Banquet in Port Elizabeth last night

He said that the expectations of the youth were very different from those that moved the current generation to become radio amateurs. What interested us at that time no longer enthuses the youth of today, said Timmerman. He continued to say: "My advice is let go on much of what we know and love and let them do what they love. Their focus is more visual. They are keen on new technologies but also want it to happen fast.

"Clubs can do much to promote amateur radio. Start a junior section with a young leader in your club. Focus on visual, virtual and new technologies.

Promote amateur radio as an art and a science, different from the Internet and cellphones. Senior members should provide the resources and support and let youngsters off the leash. We urgently need a new appoach."

Timmerman commented that on the regulatory front we, as IARU and national societies, must justify our spectrum requirements. "Focus on the emergency communications support radio amateurs provide. Society needs technically skilled people; we must lead young people in that direction. We must produce papers on our technical work and participate in scientific research."

In summary the youth is our future. Timmerman stressed that we must be proud of our achievements and that amateur radio is alive - but radio hams should not sit and wait. We can do much better!

2009 AWARDS TO OUR STARS

At the gala dinner the SARL awards were presented for technical achievement, support of amateur radio and achievements in contests. The SARL's highest award, honorary life membership, was presented to two long-serving members of the Association.

George Honiball, ZS6NE, received the award for his support and dedication to the SARL news service, SARLNEWS, and the promotion of the use of Afrikaans. Rassie Erasmus, ZS1YT, received the award for his many years of service on Council as councillor, treasurer, Vice-President and President.

The Willy Wilson Gold Badge award was presented to Karl Heinz Canitz, ZS1KC, for his many years of service to amateur radio, teaching newcomers and bringing them into amateur radio.

A number of Jack Twine Merit Awards were presented to recognise qualities such as unselfishness, clean operating and a genuine interest in amateur radio and its affairs. The awards went to:

Paul Johnson, ZS1BR Peter Henochsberg, ZS1PMH James Timoney, ZS1TK Martin Cyril Schwella, ZS4MS Chris Gryffenberg, ZS6COG Johann du Plessis, ZS6PSS Mark Zank, ZS6YES Craig Symington ZS6RH Bruce Robinson, ZS1FX

The Icom Excellence Award was presented to John Willescroft for his continued efforts and activities to develop technological expertise in the amateur radio community. He is recognised for his presentations at the Radio Technology in Action symposium, the development and presentation of the PIC and home construction courses and the development of construction kits.

The Arthur Hemsley Two-metre Trophy was awarded to Pine Pienaar, ZS6OB, for his arrangements in the Namibia VHF, EME and Satellite DXpedition, In the citation particular mention was made of the construction of the antenna supports and various antenna arrays.

The Joseph White Plaque was awarded to Derek Gravett, ZS5Y, for completing the first ever R&#65533;union to South Africa QSO on 70 cm.

The Buckley Six-metre Trophy was presented to Willem Badenhorst, ZS6WAB, for the first ever 4 m EME contact, which also was a world record.

The Radio ZS Two-metre Floating Trophy for the longest distance on the 2 m amateur band during the year went to Andre Botes, ZS2ACP, for setting a new 2 m Tropo record.

The Radio ZS Shield for the best support of Radio ZS during the year was presented to Frank van Wensveen, ZS6TMV/PA3GMP.

The JJ Pienaar Trophy recognising the best article published in Radio ZS during the past year was awarded to Vincent Harrison, ZS6BTY, for his article "Vertical and Horizontal Antennas: A Performance Comparison".

The Gary Immelman RA Heritage Award Floating Trophy awarded by for the best article of a historic nature of an event that occurred more than five years previously or an interesting personality that has played an important part in the development of Amateur Radio in years gone by was presented to Hans van de Groenendaal, ZS6AKV, for his article "Africa's

First EME", recognising the work of the late Peter Carey, ZS6JT.

The Arland Ussher Gold Pen Award which is presented to the student who achieved the highest marks in the RAE went to Louis Mitchell, ZS6LWM.

The Tinus Lange 7066 Technical Excellence Award was presented to Andre Botes, ZS2ACP, for his "The PW MEON 70 MHz Transverter Revisited".

The Hamnet Award was awarded to the Hamnet Western Cape team. Under the leadership of Bruce Robinson, ZS1FX, Hamnet Western Cape has become a very effective and proficient team who have been supportive of many sporting and other events over the years.

CONTEST AWARDS

The SARL contest committee has awarded the following trophies and award for excellent performance in contests.

The Silent Keys Memorial Trophy SSB recognising the highest score during the annual HF Phone Contest was presented to David Hutchinson, GI4FUM.

The Silent Keys Memorial Trophy CW for the highest score during the annual HF CW Contest was won by the West Rand Amateur Radio Club, ZS6WR.

The Joseph White Trophy for the highest score on any one band, during the annual HF Phone Contest, went to Rosalie van Loggerenberg, ZR2RL (now ZS2DN).

The Fred Mills Trophy for the highest score of a contestant who has never won a SARL contest before went Daniel Mans, ZS3D.

The Anon Trophy for the highest score on any one band during the annual HF CW Contest was won by Vidi la Grange, ZS1EL.

The HOS Trough awarded to the amateur who achieves the highest aggregate score in both annual HF Contests was presented to David Hutchinson, GI4FUM. David was leader of the 3DA0DJ DXpedition. David is a member of the SARL.

The Club Participation Award went to the ZS Contest Group.

The Ray Webber ZS6RSW VHF/UHF Trophy was presented to the Magalies Amateurradioklub.

The SARL President Award was presented to two radio amateurs who excelled in satellite communication in achieving world records working long distance on OSCAR 7. Congratulations to Andre van Deventer, ZS2BK, and Pierre van Deventer, ZS6BB, for setting new distance records via AO-7. The two brothers displayed true ham spirit.

First Pierre, ZS6BB, broke his brother's long-standing record with a distance of 7 630 km working Luciano, PY5LF, on 2 January 2001. It was not long thereafter when Andr&#65533;, ZS2BK, reclaimed his lead with a world

record distance of 7 694 km on 8 January when he made a historic contact with Piraja, PS8RF. Not to be outdone, Pierre on 18 January again surged ahead with an SSB contact with Josep, EA6SA, over a distance of 7 766 km.

The SARL Congratulates all the award winners.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at very low levels. The week's tiny proto-sunspot dissolved before it could be numbered. Officially the sun has now remained blank for more than eight days in a row. The effective sunspot number is expected to be between 10 and 15 for the coming week. NASA's Solar Dynamics Observatory (SDO) is beaming back stunning new images of the sun, revealing our own star as never seen before. Even veteran solar physicists say they are amazed by the data. "SDO is working beautifully," reports project scientist Dean Pesnell of the Goddard Space Flight Centre. "This is even better than we could have dreamed."

Launched on February 11 from Cape Canaveral, the observatory has spent the past two months moving into a geosynchronous orbit and activating its instruments. As soon as SDO's telescope doors opened, the spacecraft began beaming back scenes so beautiful and puzzlingly complex that even seasoned observers were stunned. To have a look, go to www.spaceweather.com and click on the link under "Stunning images of the sun".

15 m will provide the best opportunities for DX followed by 17 and 20 m. Conditions to India will be good from the afternoon onwards. During the late afternoon and early evenings conditions will be good towards Europe. Contacts with the USA are once again becoming challenging. Contacts with Australia are possible at around 08:00 while contacts with New Zealand will be challenging. During the afternoons and evenings good 15 m contacts may also be possible with Brazil.

Local conditions are going to be good on 40 m during the day time. 80 m may perform well during the early mornings and late afternoons over the shorter distances. 30 m will perform well during the middle of the day. 20 m is very useful for contacts over the longer distances during the majority of the day.

80 m is the frequency of choice in the evenings. With the change of season the noise levels are also decreasing and some top band activity will once again become possible.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

7 May - Closing date for stage 2 of the Construction Competition. 8 May - Technological High School John Vorster Amateur Radio Club flea market. 29 May - RTA symposium in Durban. 24 July - RTA symposium in

Cape Town. 21 August - RTA symposium in Port Elizabeth. 31 August - Closing date for submission of proposals for the 2011 SARL Contest Manual. 18 September - RTA symposium in Gauteng.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items, if possible, in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 860 kHz. There is also a podcast by ZS6RO. For a webstream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 21:00 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League compiled by Leon, ZS4V, and edited by Hester van der Walt.

Thank you for listening, 73.
/EX

Of what?
Of your inability to spell?
Yes..cut and paste.
Your lack of intellect, were you to post, would garner only more derisive laughter.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, NG3K & ADXO, WK3N, N4AA & QRZ DX, KH6BZF, K8AV, K8BN, K8YSE, W8GEX (60m News), KQ0B, W0GJ, Algarve STAR DX Team, AT International, DJ8NK, DL7MAE & The DX News Letter, DX World.Net, F5NQL & UFT, F6AJA & Les Nouvelles DX, G3SXW, HA5X, HP1AC, I1HYW, I1JQJ/ IK1ADH & 425 DX News, IK7JWX, OZ6OM & 50 MHz DX News, Pete's-DX-Newsdesk, RN4LP, RSGB IOTA Web Site, SP5DRH, UR5EAW, VA3RJ & ICPO and VHF-DX-Portal (MMMonVHF) for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 18th-April, through Sunday, 25th-April there were 208 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 9A, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9U, 9V, 9Y, A2, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J6, J7, JA, JT, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, R1FJ, S2, S5, S9, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T2, T32, T7, T8, TA, TF, TG, TI, TK, TL, TN, TR, UA, UA2, UA9, UK, UN, UR, V2, V4, V5, V6, V8, VE, VK, VP2E, VP2V, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XX9, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

4M200/YV200/YW200, VENEZUELA (Special Event). Look for several different stations to be active until December 31st, to celebrate the 200th anni- versary of Venezuela's Independence. Some of the stations that have been active are:
4M200AJ - Operator Manuel; Activity mainly on PSK on 40/30/20/15/10m;

QSL via YV5AJ.
YV200D - Operator Paolo; Activity mainly on RTTY on 30m; QSL via YV1DIG.
YW200A - Operator Alfredo; Activity on PSK and SSB on 20/15m; QSL via YV5SSF.
YW200ER - Operator Elvis; Activity on SSB on 40/20/15m; QSL via YV8ER.
YW200L - Operator Frank; Activity on RTTY and PSK, on 30/15m; QSL via YV5LI.
YW200T - Operator Juan; Activity on SSB, RTTY and PSK, on 40/30/20/15m; QSL via YV5JBI.

A "Bicentenary of Venezuelan Independence Award" is available by working all the 6 special callsign: 4M200AJ, YV200D, YW200A, YW200ER, YW200L and YW200T. More information is expected to be available at: http://www.radioclubvenezolano.org/concurso.htm

5BWAZ ACHIEVEMENT. Congratulations to Scottie, WK3N, (the man who never sleeps according to Martti, OH2BH) on becoming the 816th person to work all 200 zones on 5 bands!

8Q, MALDIVES. Ron, DL5JAG, will be active as 8Q7SR and on holiday from Embudu Island, South Male Atoll (AS-013), between May 8-23rd. No other details were provided. QSL via his home callsign, direct w/SAE and proper postage for return. Log will be uploaded to LoTW 1-2 months after his holiday, and for eQSL.cc about 1 month. Also, he does mention to visit the following Web page: http://www.protectthemaldives.de

AFRICAN TOUR. Operators Les/W2LPL and his son Daniel/W2DBL will be active as ZS6/homecall from South Africa between August 11-15th. Activity will be on the HF bands, mainly SSB. They will also be active as A25/homecall from the Tuli Bloc, Botswana, between August 16-19th. Activity will be the same as above. QSL via their home callsign (QRZ.com address).

BSCC UPDATE. Alexander, UR5EAW, reports that the BSCC (Black Sea Contest Club) thanked all who took part in the "Black Sea Cup International - 2010", as well as invites all to take an active part in their competition in 2011! To learn all the details about this contest, you can follow any responses at: http://bscc.ucoz.ru/index/black_sea_cup_international/0-54 Preliminary results of the Black Sea Cup 2010, which can be found: FINAL RESULT - "Black Sea Cup International" - 2010 at: http://bscc.ucoz.ru/index/bsci_2010_final_result/0-56

BW, TAIWAN. Yoshihiro, JK2VOC, will be active as BW2/JK2VOC between June 18-20th. No other details were provided. QSL direct to his home callsign.

CO, CUBA. Members of the Cubans Amateur Radio Federation (CO2FRC) will be active during the Volta Contest (May 8-9th) as a Multi-Multi entry. Operators mentioned are: Gustavo/CO2NO, Lazaro/CO2WL, Jesus/CO2IZ and Winston/CO2WF.

CO, CUBA. Gustavo, CO2NO, plans to be active during the odd days in April and May, between 1200-0000z, on 20 meters (14070 kHz) using the BPSK31

mode, and between 0300-0000z on 40 meters (7038-7040 kHz) using modes BPSK31 and JT65A. QSL via only direct (w/SAE) to HA3JB: Gabor Kutasi, H-8601 Siofok, P.O.Box 243, Hungary. Please write on your QSL card your E-mail address (If Gabor received your QSL, he will send an E-mail feedback).

CQ72, PORTUGAL (LH Op!). Members of the Algarve STAR DX Team (16 operators) will activate 6 Algarve Lighthouses simultaneously between May 15-16th. There will be six teams to activate the following lighthouses using the following callsigns [CQ72LH(*)] callsigns:
CQ72LHA - Ponta do Altar Lighthouse
CQ72LHM - St. Maria Lighthouse (Culatra Island)
CQ72LHP - Ponta da Piedade Lighthouse
CQ72LHR - Vila Real St. Antonio Lighthouse
CQ72LHV - S.Vicente Lighthouse
CQ72LHZ - Alfanzina Lighthouse
This activity is to promote Algarve STAR DX Team DFFA award (Algarve Lighthouses Award <http://algarvedx.com/dffa>. Their operations are also valid for many other awards. For more details and an online log search, visit: http://www.algarvedx.com/cq72lh/cq72lh.htm
QSL all CQ72LH(*) LH callsigns via CT2HTN, by the Bureau or direct to: Carlos Manuel Oliveira, Arroteia CX. Postal 595 E, Livramento, 8800-102 TAVIRA, PORTUGAL.

CR1, AZORES. Operators Carlos/CU3CO, Pedro/CU3DI, Joao/CU3DR, Jose/CU3EQ, Dinarco/CU3HV and Mike/CU3HY will be active as CR1FSC from Forte Santa Catarina (DMHP AZ-010 and WCA CT-00337) on Terceira Island (EU-175) between April 30th and May 2nd. QSL via CU3EQ, direct or by the Bureau.

H40, TEMOTU PROVINCE. Operators Jacek/SP5DRH and Jerzy/SP3BQ will be active as H40KJ and H40BQ, respectively, from Pigeon Island (OC-065) in the Reef Islands Group between October 7-22nd. Activity will be focus on 160 and 80 meters using mostly CW. Some Digital operations are planned but on 30/20m only. Depending of propagation, they will be active on higher bands as well. Due to lack of power on the island, they will only have one station running at the time. Equipment will be: two Elecraft K3/100 with two 600w amps, one 26m high Spiderbeam pole, one 18m high Spiderbeam pole and GP7 antenna by SP7GXP. QSL via their home callsigns. Online logs are mentioned on their DXpedition's Web page at: http://www.sp5drh.com/h40

HS8, THAILAND. Wut, HS8JYX, will be active during the CQWW WPX CW Contest (May 29-30th) as a Single-Op/Low-Power entry. QSL via HS8JYX, direct, by LoTW and eQSL. Visit his Web page at: http://www.hs8jyx.com

HB0, LIECHTENSTEIN. David, OK1FJD/OK6DJ, will be active as HB0/OK6DJ/P between June 3-6th. His activity will include the IARU Region 1 Fieldday Contest. He will use a Kenwood TS480hx into a G5RV and dipole antennas. QSL via OK1DRQ, by the Bureau or direct. Also QSL via LoTW.

IOTA NEWS.....
AS-005. Valery, RZ9DX, is now active as RZ9DX/0/A from Medvezh'i Islands (Bear Island, RR-06-27) in the Kara Sea Coast West Group (in the

Arctic Ocean Basin). Activity has been mainly on 20 meters CW and SSB, but he intends to fix his antennas for the other HF bands. His length of stay on the island is unknown at this time. QSL via his home callsign.

EU-008. Operators Jurij/MM0DFV and Alan/GM4TOQ will be active as GB8RUM from Isle of Rum between April 30th and May 3rd. Their activity will be on 80-10 meters using CW, SSB and BPSK63. QSL via MM0DFV.

SA-008. Members of the Radio Club of Ushuaia (LU8XW) will once again be active from the City of Tolhuin on Tierra Del Fuego Island (W.A.P. - W.A.D.A Ref ARG-23) starting at 0100z, on May 22nd through 0300z, on May 24th. Activity is to commemorate the 25th anniversary of their radio club. Operations will be on CW, SSB, PSK, RTTY and the satellites. QSL via LoTW or direct to WD9EWK. All contacts on this expedition are valid for the Radio Club Ushuaia Permanent Diploma. For more details, check out their Web page at: http://www.lu8xw.com/index.php

SA-081. Pedro, HK3JJH, who was recently active from Playa Blanca (SA-084), will now be active as 5K8T from El Morro Island between April 30th and May 4th. Activity will be on 40-20 meters SSB. Suggested frequencies are: 14260 and 7160 kHz (+/- QRM). QSL via his QRZ.com address.

IS0, SARDINIA (Update). Members of the F6KOP Team will be active as IS0R from Isola Rossa, Sardinia (EU-024, Loc. JN41ka), between May 7-15th. Activity will be on 160-6 meters, using 3 stations on HF and 1 station on 6 meters. They plan to use CW, SSB and RTTY. Each station will be a FT450 with an Acom 1010 using Micro Ham and PC. Antennas include 6m Yagi Beam, Spider Beam for 30-10m, 4 square for 40m, vertical for 80m (K9AY) and an Inverted L for 160m plus a beverage. Operators mentioned are: Team leader Thierry/F4TTR (SSB), John/F5VHQ (SSB), Sergio/IS0AWZ (SSB), Norbert/ F6AXX (CW), Maurice/F5NQL (CW), Bruno/F5AGB (CW), Jean-Paul/F8BJI (Digi), Henri/F1HRE (Digi), Frank/F4AJQ (Digi), Gerard/F2JD, Sebastien/F5UFX, Gabriele/I2VGW and Eric/N7RN. QSL will be via Florent, F5CWU. QSL via direct (w/SAE and right postage) or by the Bureau. Logs will be uploaded to LoTW (a few months later, when the bulk of the paper QSLs have been processed.). For more info/details, see their Web page at: http://is0r.perso.sfr.fr/cariboost1

KH6BZF PROPAGATION FORECAST/REPORT (For April 26th- May 2nd)....
Apr 26 AN SOLAR REFERENCE KEYS
Apr 27 AN --------------------
Apr 28 AN BN - Below Normal
Apr 29 AN AN - Above Normal/Geomagnetic Level is QUIET
Apr 30 AN LN - Low Normal
May 1 AN HN - High Normal/Geomagnetic Level is UNSETTLED
May 2 AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

NCDXF PRESS RELEASE (April 20th). "At its annual board meeting at the
Visalia (California) International DX Convention last weekend, the Northern
California DX Foundation elected two new directors, W6SZN and K6MM,
bringing the board compliment back to eleven members. W6OAT and K6ANP
recently retired after many years of dedicated service to NCDXF.
Kip Edwards, W6SZN - Kip was a board member of NCDXF in the 80's. He
is a Life member of ARRL, DXCC Honor Roll, 5BDXCC
and 5BWAS. Kip has been on a number of DXpeditions
including Rotuma, and Clipperton. He has also been
past president of the Northern California Contest
Club and is currently the secretary/ treasurer of
the YASME Foundation. Kip is an attorney and resides
at Kings Beach, Ca.

John Miller, K6MM - John is both an active DXer and very much into
contesting as past President as well as secretary/
treasurer of the Northern California Contest Club.
John's other hobbies include antenna experimentation,
music composition and Harley Davidson motorcycles.
John and his wife live in San Jose. John is retired
from a large corporate consulting firm.

Please direct any questions to: Glenn Johnson, W0GJ
Vice President, NCDXF"

PACIFIC TOUR (Update/Wallis & Funtuna and the Fuji Islands). Operators
Mini/JA2NQG, Yuji/JH2BNL and Shige/JI2UAY had to change their plans for
their upcoming operations. The trio will be active (on their way to
Wallis) from Nadi on the Fiji Island between July 13-14th. Callsigns
are not yet known. Activty from Wallis Island (OC-054) will take place
between July 14-24th. They will also try to activate Hoorn Island (OC-118)
in the Futuna Island Group. The callsigns requested are FW5M (JA2NQG),
TO2BNL (JH2BNL) and FW5FM (JI2UAY). Activity will be on 160-10 meters
using all modes. QSL via their home callsigns.

QSL INFO AND NEWS.....
NEW QSL ROUTE. Effective immediately, Buzz, NI5DX, is the QSL Manager
for the radio club station in Martinique. The club callsign is FM4KA.
All QSL requests for contacts made with the club station in the past
or in the future should be sent to NI5DX. Buzz is waiting for past
logs to be sent. Cards will either be shipped to Buzz from Martinique
or will have to be printed. A very nice Web site for the club is
available for viewing at: http://www.fmhamra.com

NOT THE QSL MANAGER. QSL Cards for PT7BZ should be sent directly to
his callsign. Do not forward cards to KQ0B as he has no logs for his

activity.

Vladislav, RN4LP, informs OPDX that he is now the QSL Manager for EK6LP. QSL only direct via RN4LP: Lakeev Vladislav, P.O.Box 208, Dimitrovgrad, 433512 Russia.

YI9PSE QSL STATUS. The YI9PSE DXpedition Team reports on their Web page: "The YI9PSE QSL card designs have now been sent to the printer. We cannot add any more sponsors or donors to the cards at this time. We will continue to add donors of 25 USDs or more to the Sponsors page of our website. All donors of 5.00 USDs or more will be sent our deluxe folding picture card. We expect to begin mailing our QSL cards within the next six weeks. Thank you...."

QSLS VIA LoTW: 5W0OU AND ZK3OU

QSLS RECEIVED VIA MAIL: 3B9WR, 3DA0VB, 5H3VMB, 5H3VMB/5, 7P8AO, 7Q7VB, 9J2FM, 9J2VB, 9U0VB, 9X0VB, A25NW, C6AUM, C91VB/6, D60VB, ET3SID, H44MY, HC8GR, J37BO, OD5/DL6SN, PV1S, SV1DPI, SV2ASP/A, TX3A, V21ZG, V51VV, VP6DB, W4/VG3RA, XX9TLX, Z2/UA4WHX, ZS2DL and ZZ6Z

QSLS RECEIVED VIA THE BUREAU: 5K0CW, 6Y0B, DL2RVL/HI8, DL4MO/TI8, HH4/K4QD, HI3/N3SY, HP4/W4JKC, P40CG, PS7YL, T32Z, TO5E, TO5RZ, VK9X/G6AY, YW5F and ZF2GU

S7, SEYCHELLES (AF-024). Marq, CT1BWW, has announced that he will be active as S79BWW between July 17-31st. He states that the main purpose of this activity is to be the first official WFF (World Flora Fauna) DXpedition on Seychelles -- reference number WFF004. Activity will be on 80-10 meters (operating split) using CW, SSB and RTTY. Suggested frequencies are:
CW - 3507/3527, 7050/7055, 10117/10119, 14006/14054, 18084, 21021/21054, 24897 and 28007/28027
SSB - 7060 (listen above 7200 for NA), 14145/14260, 18140, 21260 and 28477
RTTY - 10137, 14080, 21080 and 24977 kHz

QSL via, CT1BWW, by the Bureau or direct. This operation will be valid for DXCC, WAZ, WAC, WPX, IOTA, WFF, ZONE 39 and the BWW Award. For more details, look at: http://www.ct1bww.com/s79bww

SILENT KEY. It is sad to report that well-known DXer and doctor Vince Thompson, K5VT, became a Silent Key (SK) at the age of 67, 11:30 AM Saturday, April 24th. He was diagnosed with acute myeloid leukemia (M5) four weeks ago and has been in the hospital since early March. Vince will not only be remembered as a great doctor, but as an avid DXer who was on many DXpedition teams and activated many rare locations. OPDX and its readers would like to send out our deepest sympathy to the family and friends of K5VT.

TK9, CORSICA. Members of the the Valle Brembana DX and Contest Team will be active as TK9E between May 26&#65533;31st. Operators mentioned are: Enzo/IZ2GLU, Fabio/IZ2GMT, Andrea/IZ2AJE, Diego/IW2MZX and Claudio/IK2AOO.

Activity will be on 80-10 meters including 30/17/12 meters. QSL via
IZ2GLU. For more details, see their Web page at:
http://www.radioamatori.vallebrembana.org/vbdxc/Spedizioni/Corsica_2010/TK9E
.htm

TL, CENTRAL AFRICAN REPUBLIC (Also News About 5U). Jan, DJ8NK, informs OPDX that Paul, F6EXV, and he will be active as guest operators from Christian's, TL0A, station between May 13-26th. They plan to have 2 stations on the air simultaneously. Look for Jan to focus his activities on RTTY, while Paul will be on CW. Chris will continue his SSB operation and CW/RTTY from time to time after May 26th. Bands of activity will be on 40-6 meters, maybe some 160/80m (it is late in the season for the low bands, plus it is the rainy season in TL with daily storms). Operators will use standard DX frequencies, and always run "SPLIT". PLEASE NOTE THE QSL INFO! QSL direct to the QRZ.com TL0A address. "Neither Jan, nor Paul, will be able to confirm any contact. So we repeat, QSL ONLY via TL0A. Jan and Paul also mention, "We are unlikely to have internet access from the station. There will be no online log. This operation could not have taken place without Christian's full support, help and cooperation. We already want to thank him a lot for making this possible. So see you from the Central African Republic." Also mentioned, " Chris, TL0A, should definitively leave the Central African Republic in July 2010 and probably return over to Niger (5U5U) next September."

TM24, FRANCE (Special Event). Look for TM24H to be active between May 30th and June 13th, to celebrate the 78th edition of the "Le Mans 24 Hours" car race. Activity will be on the HF, VHF and 50 MHz bands using CW, SSB, PSK and RTTY modes. A special QSL card will be printed. QSL Manager is F6KFI. Take a look at the interesting collection of QSL cards for this event at: http://pagesperso-orange.fr/bruno.martineau/radio/24h00.htm

TS8, TUNISIA (IOTA Op). Just a reminder that Alfredo, IK7JWX, will lead a team of operators to activate two IOTA islands between April 27th and May 4th. Operators mentioned are: Alfredo/IK7JWX, Leo/I8LWL, Raul/IC8ATA, Titti/IK8GQY (YL), Armando/IK8BPY, Ampelio/IS0AGY, AntoNello/IK2DUW, Rosy/IW2NLC (YL), Michele/IK2GPQ, Simon/IZ7ATN, Ruggero/IK2PZC and Stanislav/IZ2GRG. The team will air Djerba Island (IOTA AF-083, ARLHS TUN-022, WLOTA L-1394, 3VFF-008) as TS8P starting possibly the evening of April 27th. They "may" also activate Kuriat or or Conigliera Island (IOTA AF-092, ARLHS TUN-002, WLOTA L-0974, 3VFF-007) as TS8P/p on May 1-2nd. Activity will be on all HF bands and 6 meters, using CW, SSB, RTTY and PSK31. QSL via IK7JWY. Online logs will be available at: http://www.i8lwl.it

VK4, AUSTRALIA (WFF Op!). Operators Gary/VK4FD and Dale/VK4DMC will activate Undara Volcanic National Park (WFF VKFF-506, GL: QH21HS) from Australian Mainland as VK4YN between 0000-2359z, May 21-23rd. Suggested frequencies are per the WFF website +/- QRM. Antennas are: a 4 element tri-band Yagi 10/15/20m, double extended zepp 40m, and G5RV for 80m and the WARC bands. QSL Manager is VK4FW, fastest way is via OQRS at: http://www.odxg.org

ZA, ALBANIA. Chris, HG5XA, will be active as ZA/HA5X from the town of Orikum and a beach on the Bay of Vlora between June 10-24th. Activity will be holiday style, but he plans to activate some lighthouses and/or WFF locations. Please listen to the operator's comments for possible Lighthouse and WFF references, if any. Chris will also focus on some 6 meters and portable battery operations. Also, please remember that this is not a DXpedition, but a family holiday with his XYL Marta, ZA/HA9WM, and twin 5 year old daughters. Operating times will be limited and of lower priority. QSL via LoTW and eQSL. If possible, please DO NOT send QSL cards. Paper QSLs will be available both direct and by the Bureau using the OQRS (Online QSL Request System) to be launched and announced later. Bureau cards will be sent out using GlobalQSL.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 25th April 2010

IRTS 78th AGM

The 78th AGM of Irish Radio Transmitters Society is being hosted by the Dundalk Amateur Radio Society, this Weekend the 24 / 25th April 2010.The venue will be Fairways Hotel Dundalk Co Louth.

The Rally is also being held today Sunday 25th of April in the Fairways Hotel, Dundalk Co Louth. Doors opening at 11.00 AM, all the usual traders will be represented plus some new ones.

Fore more info on the AGM weekend, Rally please check www.irts.ie or www.ei7dar.com

---

Theory Examination

The next theory examination for the Amateur Station Licence will be held on Wednesday, 7th July at 2pm in the ComReg Offices in Dublin and at other centres if warranted by the numbers.

Information on examination fees and other details please see 'Theory Examination' in the 'Information' section of the IRTS website at www.irts.ie

Intending candidates are also referred to 'Studying for the Amateur Radio Examination' in the 'Downloads' section of the website.

The latest date for receipt of applications to sit the examination is Wednesday, 23 June next but it is important to note that places at the exam are allocated on a first come first served basis.

Amsat - Arklow School selected.

In October last the IRTS news carried an item from Amsat inviting teachers to submit students' science work to be considered for carrying on board the next satellite to be launched later this year.

P�draig EI7GK, a science teacher in Gaelchol�iste na Mara, Arklow, submitted work from 6 of his students. All have been selected and their work will "fly" on board the satellite.

Gaelchol�iste na Mara is the only school in EI to be selected. Other schools selected are in the U.S. Canada, UK etc.In Gaelchol�iste na Mara all subjects including Science are thought through Irish so an English translation had to accompany the original work.

Duhallow Voice Repeater back on air.

The Duhallow Voice Repeater EI7SMR is back on air since Tuesday last the 20th of April 2010. The repeater which is located on Musheramore Mountain, in north Cork was off air undergoing repairs and is now operating with a new antenna installed on site. EI3SMR operates on RU74, 430.925mhz, input is 438.525mhz (7.6mhz split) and requires a ctcss tone of 103.5Hz.

Cashoita NI

The Ballymena Radio Club and Antrim and District Amatuer Radio Society will be jointly activating Shanes Castle, Antrim, as part of the Steam Traction Engine Show.

The clubs will be using the Cashota-NI callsign GN4KPT/P on Sunday 2 May 14:00 - 17:00 2010 and Monday 3 May 10:00 - 16:00 2010

Talk-in and information on 145.550

Wicklow Radio Club

The next meeting for the club has been confirmed for Wed 12 the May at 19.30 in the Glebe National School, Church Hill Wicklow.

The Club hope to be able to finalise the cw field day in June so they are looking for lots of cw operators... don't be shy.

Morse code practice via Echolink

You can now get Morse code practice sessions on your 2m FM hand held by using Echolink to connect to the W1AW Conference Server 'W1AWBDCT' Node 37374.

Audio from W1AW's CW code practices and CW/digital bulletins is now available using EchoLink via the W1AW Conference Server "W1AWBDCT" Node Number 37374. The 9:45

PM ET phone bulletin is currently unavailable viaW1AWBDCT.

The audio is sent in real-time and runs concurrently with W1AW's regular transmission schedule.

IARU Region 1 EC Meeting 2010

Due to volcanic ash that was covering many parts of Europe, the International Amateur Radio Union Region 1 Executive Committee held its annual meeting via a webconference.

On World Amateur Radio 2010, the IARU Region 1 EC held its annual meeting, only five EC members made it to Sofia, the capital of Bulgaria.

The rest of the EC had either to return home or to stay at their home QTH and participated in the EC meeting through WebEx (a remote meeting application).

Radio Kuwait cleared from amateur radio band

Radio Kuwait was broadcasting in the Amateur Radio 7 MHz allocation, however speedy action by the IARU Monitoring System Intruder Watch resolved the problem.

A 'combined action' led to the removal of Radio Kuwait on 7150 and 7190 kHz. From 12 to 19 April 2010 the broadcaster had been transmitting programs in Arabic language with up to S9+30dB signals blocking almost 20 kHz of the 40m Band.

Rallies

Saturday 29th May 2010 Mid Ulster Amateur Radio Club Rally, Drumgor Youth Centre, Drumgor Heights, Craigavon Information:www.muarc.com

For further Rally info and contact details please check out the IRTS Website.

http://www.irts.ie/cgi/rallies.cgi

History this week

1892 Duryea, first commercially successful US car made. Springfield.

1895 W. Latham - the first moving picture projected on a screen in NY.

1900 Marconi International Marine Communication Company Ltd. formed.

Items for inclusion in next weeks Radio News should be forwarded to Charlie EI8JB, preferably via e-mail to "charlie dot carolan at gmail dot com" Or by phone to 087-6265418 News can also be submitted via e-mail to "newsteam at irts dot ie" for automatic forwarding to both the radio and printed news services.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

MOST WANTED SQUARES / DXCCs 2010
****

Hallo dear User of the European 144 MHz M[ost] W[anted] S[quare]
Survey 2010 - The Team of DUBUS & Funk-Telegramm and as well the
Team of the VHF-DX-Portal Make More Miles on VHF took 2007 the
decission still to evaluate once per year the european 144 MHz
M[ost] W[anted] S[quare] Survey in advance of an up coming MS /
ES-Saison in parallel to the daily up to date:

eMWS-List and eMWDXCC-List

at our VHF-DX-Portal Make More Miles on VHF.
Here are the 2010 Top 10 MW Squares and Top 10 MW DXCCs

Inquiry of the Most Wanted Squares (TOP 10) 144 MHz

1st - KO42 (70%)
2nd - KO32 (63%)
3rd - JM57 (62%)

followed by: JM37, KO30, JM47, JM36, JM46, JP65 & KO22

As well the Most Wanted DXCC-Counries (TOP 10) 144 MHz

1st - SV/A (60%)
2nd - 3B8 (41%)
3rd - R1FJ (40%)

followed by: 3A, OD, 1A, 4J, 4X, HV & 7 X

The MAP from the 25th of april, 2010 and as well all MAPS
since 1996 you be able to find at:

http://www.mmmonvhf.de/minibb/index.php?action=vthread&forum=5&topic=55&page=0#msg112

Find some new targets for your own and upcoming DX-pedition... ;-)

Kind regards Guido ï¿½Guyï¿½ DL8EBW
on behalf of the Team of MMMonVHF
and in cooperation with the DUBUS / Funk-Telegramm team

DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

CT8 - AZORES ISLANDSM, EU-175
CU3CO, CU3DI, CU3DR, CU3EQ, CU3HV and CU3HY will be active as CR1FSC
from Forte Santa Catarina on Terceira Island (EU-175) between Apr 30
and May 2. QSLs direct or via bureau to CU3EQ.

HB0 - LIECHTENSTEIN
Alberto,HB0/IW1PRT, plans to become QRV with his QRP radio on 10m-160m
on Apr 30 and May 1. QSLs via bureau to IZ1MKR.

HI - DOMINICAN REPUBLIC, NA-096
Ronny,ON4ARV (OT4R), will show up in SSB mainly on 20m/15m/10m signing
HI7/OT4R from Punta Cana from May 1-22. His preferred frequency is
14.300 MHz. QSL via OT4R. See also: http://www.ot4r.net/HI7-OT4R.html

JD1 - OGASAWARA ISLAND, AS-031
Hiroyuki "Harry",JG7PSJ, will be QRV again as JD1BMH in CW, SSB and
digital modes on 40m-6m (maybe also 80m) from Chichijima (AS-031) from
May 2-14. QSL via his homecall JG7PSJ.
Please visit also his website: http://sapphire.es.tohoku.ac.jp/jd1bmh
---
Makoto,JD1BLY (JI5RPT), will be active also from Chichijima (JIIA
AS-031-003) from May 2-7. Listen for him in CW/SSB/DIGI on 40m-6m and
via satellite. QSLs via his homecall.
For more information click on: http://www.ji5rpt.com/jd1

OA - PERU
Hans,OE3NHW, is staying in Peru since the mid of March. He is working
as OA6/OE3NHW from the Andes and as OA4/OE3NHW from Lima until the end
of June. He uses a Kenwood TS-480HX with 200 watts and a 5 band Spider-
beam for 10m-20m, wire yagis and a G5RV for 40m and 30m.
QSL cards should be sent via bureau to his homecall.
Hans is planning another activity from Peru in October 2010.

S7 - SEYCHELLES
Vlad,RA9LR, will show up as S79LR from Desroches (AF-033) from May 1-7 and from Mahe (AF-024) during May 8-10. Vlad is working in CW, RTTY, PSK63 and some SSB mainly on the lowbands running 100 watts into a DX-88 vertical. He also plans to take part in following contests: ARI International DX Contest, Alessandro Volta RTTY DX Contest and CQ-Mir International DX Contest. A QSL route will be announced later.

ST - SUDAN
Robert,ST2AR, is active also on 6m now. He is using a 5 ele yagi in a height of 26m. Robert wants to listen on the band every day. He is staying in Khartoum until summer 2011. QSLs only direct via S53R.

ZF - CAYMAN ISLANDS, NA-016
Sam,W5CU, will sign ZF2CU mostly in CW on 40m/30m/20m from May 1-8. QSLs via his homecall.

4U1VIC - AUSTRIA
The Vienna International Amateur Radio Club (4U1VIC) will use the special callsign 4U10NPT during the month of May. This activity takes place during the 2010 Review Conference of the Parties to the Treaty on the Non-Proliferation of Nuclear Weapons (NPT). QSLs via OE1ZKC. 4U10NPT counts as 4U1VIC for the DXCC and other awards.
More details concerning the conference can be found online at:
http://www.un.org/en/conf/npt/2010

ENGLAND, SPECIAL EVENT STATION
To mark the 10th anniversary of the closure of world's largest maritime radio station Portishead Radio (GKA) in Somerset in the southwest of England the special callsign GB10GKA will be activated between Apr 30 and May 27. Activities will take place mainly in CW. QSLs via G3ZRJ.

JAPAN, SPECIAL EVENT STATIONS
The special event stations 8J1P (QSL via JA1BVA), 8J4P (via JA4MRL) and 8J6P (via JARL bureau) are promoting the International QRP Day (Jun 17) from Apr 28 until Jun 30.

SPAIN, SPECIAL EVENT STATIONS
The special event stations AO1EU, AO2EU, AO3EU, AO4EU, AO5EU, AO6EU, AO7EU, AO8EU and AO0EU will be activated from May 1-20 to mark the 60th anniversary of the Schuman Declaration. All QSOs of these stations count also for the EANET award. Details on: http://www.fediea.org/eanet

VENEZUELA, SPECIAL EVENT STATIONS
Venezuela celebrates its 200th year of independence by activating following special event stations until Dec 31: 4M200AJ (QSL via YV5AJ), YV200D (QSL via YV1DIG), YW200A (QSL via YV5SSF), YW200ER (via YV8ER), YW200L (QSL via YV5LI) and YW200T (QSL via YV5JBI).
More information about the special award issued can be found online at:
http://www.radioclubvenezolano.org/concurso.htm

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

May 1/2: ARI International DX Contest

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:
AS-008, JA1, North Izu Islands: Some members of the Tokyo Dental College
will be QRV as JA1YUC/1 from Nii Island from May 1-4. QSL via JA1YUC.

EU-008, GM/MM, Inner Hebrides: The Scottish FF team will sign GB8RUM from
the Isle of Rum (GMFF-058, IOSA NH02, Scotia DI20) between Apr 30 and
May 3. More information can be found at http://www.gmff.org

EU-010, GM/MM, Outer Hebrides: An English team will be active as GS3PYE/p
from Harris Island from May 1-14. QSL via M0VFC (direct/bureau).

EU-042, DL, Schleswig-Holstein State North West Group: Thomas,DL/HB9SVT, is
working from Sylt between Apr 28 and May 11. He intends to activate the
lighthouses FED 124, 147, 148 and 200 during this time. QSL via HB9SVT.

NA-046, W1, MA State South Group: The Team HAMCOW will show up as W1ACT from
Martha's Vineyard (USI MA005S) between Apr 30 and May 2. QSL via N1JOY.
For more information see http://www.qsl.net/hamcow

SA-081, HK, El Morro: Pedro,HK3JJH, will be QRV as 5K8T from El Morro (only
in SSB, mainly 20m/40m) from Apr 30 till May 4. QSL direct via HK3JJH.

Lighthouse activities (WLOTA/ARLHS/ILLW)

DL/HB9SVT LH 2057 Sylt Apr 28-May 11
GS3PYE/p LH 2075 Harris May 1-14
JA1YUC/1 LH 0509 Niishima May 1-4
JD1BLY LH 2269 Chichi May 2-7

Australischer Amateurfunkverband feiert 100-jaehriges Bestehen
---
The Australian amateur radio society "Wireless Institute of Australia" (WIA)
celebrates its 100th anniversary this year. WIA president Michael Owen,VK3KI
wrote in the October edition of the Australian amateur radio magazine that
the special event station VK100WIA will be activated by Australian clubs for

five months starting in May 2010. A special QSL card will be sent for all QSOs between May and October 2010. QSLs will be sent automatically via the Australian QSL bureau. A special award will be issued and at least two QSOs with VK100WIA are mandatory. Full information is provided at the website of the Australian club WIA at: http://www.wia.org.au/newsevents/centenary/about

Many thanks for contributing to this issue of the DXNL are going to:
Carl Smith (QRZ DX), 425DXNews, OPDX Bulletin, DF6EX (WINQSL), DJ5AV, DK8JB, DL1SBF, DL5AWI, DL7VOA, DO3ME, F5NQL, NG3K, SWL Norbert Maibaum and others.

**********************************************
The ARRL Contest Update

Published by the American Radio Relay League
**********************************************

April 28, 2010

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- Regional Rambles - 7th District and New England QSO Parties (Plus IN
and NV)
- Short-Short Wave Season Opens - Lots of VHF+ Contests
- Amateur Radio Antenna Defense Foundation Formed
- Doha Regional Conference on Amateur Radio
- K5VT - Silent Key
- Solar Dynamics Observatory - First Light
- Matching Your Halo - An Angelic Solution
- Too Much Of A Good Thing

NEW HF OPERATORS - THINGS TO DO

If you are looking to pick up the very large and very small states,
this is the weekend for you! The two biggest regional QSO parties
(contests in which several states pool their contest resources) for the
7th district (the 7QP) and the New England division (NEQP) will fill
the bands this weekends. Pay particular attention to the county
abbreviations - and keep an ear tuned for the Indiana and Nevada
operators, too!

BULLETINS

There are no bulletins in this issue.

BUSTED QSOS

Charles W6DPD writes in with more information about the Wouff Hong
reproduction featured in the last issue. "The picture of the Wouff Hong
is from the 1939 Fresno Hamfest that was actually sponsored by the San
Joaquin Valley Radio Club. In 1957 the San Joaquin Valley Radio Club
became the Fresno Amateur Radio Club."

CONTEST SUMMARY

Complete information for all contests follows the Conversation section
```

May 1-2

- VHF Spring Sprints - 432 MHz (Apr 28)
- Microwave Spring Sprint
- 2 GHz and Up World Wide Contest
- MARAC CW and SSB Contests
- 10-10 Spring Digital Contest
- QRP-QRP-Party--CW
- 7th Area QSO Party
- Indiana QSO Party
- Radio Club of America QSO Party-- Phone
- ARI International DX Contest
- New England QSO Party

May 8-9

- Armed Forces Cross-Band Communications Test
- CQ-M International DX Contest
- Alessandro Volta RTTY DX Contest
- Portuguese Navy Day
- FISTS Spring Sprint--CW
- Nevada QSO Party
- 50 MHz Spring Sprint

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

The Amateur Radio Antenna Defense Foundation, or ARADF, has just been approved by the Internal Revenue Service as a public charity under Section 501(c)(3) of the Internal Revenue Code. The organization's CFO, Marty N6VI announces, "Amateurs seeking to install antennas and support structures may jump through local regulatory hoops, sometimes paying significant fees in the process, only to be turned down or to be burdened with severe restrictions that preclude effective communication. Turning to the courts can be prohibitively costly for the ham, while cities have taxpayer-funded attorneys on staff, giving them the upper hand. The goal of ARADF is to help level the playing field with financial assistance that will allow deserving antenna lawsuits to go forward." ARADF will concentrate on lower-court cases and is supportive of but not affiliated with the American Radio Relay League. A Web site is being developed and should be online shortly. (Thanks, Dennis N6KI)

The WRTC-2010 <http://www.wrtc2010.ru/> committee announces the Russian Youth Team of young contesters Anton Navnychko RX9TL as a Team Leader and Yuri Hmelenko RL3FT as his Team Mate. As the committee says, "These guys are the future for Russian contesting so we wish them good luck!" You can also meet some of the WRTC-2010 Committee in person at Dayton. Andy UA3AB will be there along with Krassy K1LZ, the North American representative for WRTC-2010. They have a booth reserved and will be there to answer questions and publicize the event.

The Contest Update's Mexico Bureau Chief, Ramon XE1KK, checks in with this dispatch from the Doha Regional Conference on Amateur Radio. "The

conference was a big success and you can read about it on the IARU Region I Web site <http://www.iaru-r1.org/>. From the contester perspective this meeting was an unusual opportunity to meet friends from the region, visit their stations and even have a taste of their pileups. Meeting most of the A73A contest team (Abdulla A71CV, Rashid A71AD and Dave K5GN/A7) was a pleasure. Meeting them after the event, as well as Mohammad A71EL and Rached A71AN, was a unique opportunity. Hamad 9K2HN and Faisal 9K2RR, Team Kuwait for WRTC 2010, were also in Doha as well as Olli OH0XX, Sergio PP5JR (ZX5J), Hans PB2T, among others. Contesting is alive in the Persian Gulf Region and we should see more of it in the months to come."

Here comes the Dayton Hamvention <http://www.hamvention.org/> and with it, a whole batch of contest-related activities! Tim K3LR sends this list of Web URLs to help you finalize your Dayton plans: Four Days of Contesting activities at Dayton <http://www.contestuniversity.com/attachments/dayton2010.pps> is a PowerPoint slide show from KA9FOX.

The PVRC Webinar "Contest Activities at Dayton <http://www.pvrc.org/webinar/webinars.htm>" also covers the excitement and, of course Contest University <http://contestuniversity.com/> is still signing up students until May 3, including a Facebook <http://www.facebook.com/group.php?gid=224242273245&ref=ts> page and Twitter <http://twitter.com/ContestU> feed. The 18th annual Contest Dinner <http://contestdinner.com/> features W5ZN as the main speaker and night after night of Contest Super Suites <http://contestsupersuite.com/> will feed your hunger for contesting camaraderie (and pizza)!

The International DX Convention <http://www.dxconvention.org/> in Visalia, CA played host to the introduction of two new products by Elecraft <http://elecraft.com/>. The P3 panadapter accessory for the K3 was front and center, displaying received signals across a wide swath of the bands, including a waterfall display. Right next to it, a surprise product was also introduced - the KPA-500 solid-state amplifier. Weighing only 22 pounds and running off ac power, this completely self-contained unit will fit in your carryon luggage with room to spare and add punch to your signal from 160 through 6 meters.

Just up the aisle, I noticed a familiar face: Tom N6BT may have sold Force 12 Antennas <http://www.force12inc.com/> to new owners, but you just can't keep an antenna designer down for long. Next Generation Antennas <http://www.n6bt.com/> is developing a series of portable multi-band verticals (Bravo-5, -5K, and -7K) with an emphasis on efficiency. Tom's antenna book, "A Ray of Light", has been expanded to 290 pages and is once again in print, as well. Force 12 was also at the convention with their ever-expanding line of antennas.

Another Visalia vendor was showing off a new product, too - Flex-Radio Systems <http://www.flex-radio.com/>. The new FLEX-1500 HF-6M QRP Software-Defined Radio was attracting attention with an introductory

price and big SDR features. The radio weighs in at 1.2 pounds (you have to provide the host PC, of course) and has a transverter interface that makes it an interesting candidate for VHF+ contesters who want top-drawer performance.

Those of you getting ready for a trip to the Dayton Hamvention <http://www.hamvention.org> will want to take in a new feature - the "Discover Homebrew" demonstration area in the North Hall. Sponsored by Hamvention and supported by the members of the Midwest VHF/UHF Society (MVUS), table will be available for anyone will be able to show off projects on Friday and Saturday - no sales will be permitted, demo only please. AC power and HF (possibly VHF, too) antenna access will be provided. If you're interested in exhibiting your work, please contact us Discover Homebrew at exhibits@hamvention.org. (Thanks, Hamvention Inside Exhibit Chairman, Scott AC8DE)

The new ARRL Web site has a lot of features, but the new organization may have rendered your old Web site bookmarks obsolete. From the latest ARRL Propagation Bulletin, here's a list that may help you reconnect with old friends or add some new ones:
Information concerning radio propagation
<http://arrl.org/propagation-of-rf-signals>
Explanation of the numbers used in the Propagation Bulletin
<http://arrl.org/the-sun-the-earth-the-ionosphere>
Monthly propagation charts <http://arrl.org/propagation-of-rf-signals> between four regions of the USA and twelve overseas locations.
An archive <http://arrl.org/w1aw-bulletins-archive-propagation> of past propagation bulletins (Thanks, Tad K7RA)

Here's a tip from Randy K5ZD - "Is your log in ADIF format? Use LM by DL8WAA <http://contestsoftware.com/e/home.htm> to convert it to Cabrillo." This is a handy utility if you are using a general-purpose logging program to record your contest QSOs. Remember that submitting contest logs in Cabrillo format greatly reduces the workload for the volunteers that make contesting work!

This coming weekend is a big one on the QSO party circuit as the 7QP, INQP, and NEQP all take place on May 1-2. Chuck NO5W has developed a Multi-QP module for 7QP+NEQP+INQP for his free CQ/X logging software <http://www.no5w.com/>. Using the Multi-QP modules you can log all of the QSO parties at the same time, then split the log into individual components into Cabrillo-formatted logs for the individual contests.

At its annual board meeting last weekend, the Northern California DX Foundation <http://ncdxf.org/> (NCDXF) elected two new directors, Kip W6SZN and John K6MM, bringing the board complement back to eleven members. W6OAT, K6ANP, and K6RIM recently retired after many years of dedicated service to NCDXF. (Thanks, NCDXF Vice President, Glenn W0GJ)

While the ANARTS contest is kaput, it is being replaced with a new RTTY contest. Goetz DJ3IW writes, "The DL-DX RTTY Contest Group has decided to give the defunct ANARTS RTTY Contest a new home. The contest will be

continued though with some changes and a new name: DRCG Long Distance Contest <http://www.drcg.de/> or DLDC. The ANARTS points table and multiplier scheme stay in effect, VK bonus points are removed and the contest will be run in three 8-hour parts on the second full weekend of June. (12 June this year) A new 6-hour class has been added." See the DLDC Web site for complete information.

There is one less Voo-Dude contester following the untimely passing of Vince Thompson K5VT <http://www.cadxa.org/>. Diagnosed very recently with leukemia, Vince was unable to tolerate the resulting therapy. As a member of the Voo-Dude contest team, Vince was instrumental in putting West African multipliers in all of our logs. In addition, he was a friendly face at hamfests and conventions, never lacking for a humorous remark. He is already missed by us all. (Thanks, Roger G3SXW and Tony N7BG)

Web Site of the Week - As recently announced, individual Mexican states have been added to the list of multipliers for the ARRL 10 Meter contest. Most US contesters are unfamiliar with the names and locations of those states. Ramon XE1KK came to our rescue with this map <http://www.dxxe.org/concurso/xe%20mults.pdf> so that it is easy to understand the geography of Mexico and the rarity of each state. (Thanks, Hector XE2K)

WORD TO THE WISE

Skew - a propagation path not along a great-circle bearing between two stations. Skew path contacts often precede a band opening or follow a band closing over a direct path. For example, as 15 or 10 meters closes between the US and Japan or Europe, try pointing your beam somewhat south of the direct path. Signals will be weaker than direct path and exhibit deep fades. The opening will also cover a smaller area than a direct opening.
<http://www.arrl.org/nladclick.php?n=cu&t=i&i=2010-04-28&p=0>

==> SIGHTS AND SOUNDS

If you haven't seen the photos from the new Solar Dynamics Observatory <http://science.nasa.gov/science-news/science-at-nasa/2010/21apr_firstlight/>, you should definitely check out the articles on the platform's "first light". We are going to learn a whole lot about the Sun from this new instrument! (Thanks, Doug N6RT)

Paul WB2ABD sent a link to an Information Week story
<http://www.informationweek.com/galleries/showImage.jhtml?galleryID=414&articleID=224200867>
about the Large Hadron Collider's recent return to operation in late March. What is the fellow in the third picture doing? It certainly looks familiar!

The Astronomy Picture Of the Day
<http://antwrp.gsfc.nasa.gov/apod/astropix.html> site has had some great shots lately. For example, here are photos and link to a movie

view of the largest solar prominence
<http://antwrp.gsfc.nasa.gov/apod/ap100418.html> ever seen - by the SDO
mentioned above. Another day's treat was this detailed photo and
discussion of the granules
<http://antwrp.gsfc.nasa.gov/apod/ap100416.html> that make up the
surface of the Sun.

Finally, a schematic diagram <http://www.xkcd.com/730/> that includes
the magic smoke - the "fifth component" after the resistor, capacitor,
inductor, and memristor <en.wikipedia.org/wiki/Memristo>.

Ham radio is performance art - we all know this to be true -- but
here's the Web site for an artist featuring ham radio in some of her
works. In this case, she began with HAM as Hold All Movement
<http://www.projectspaceavailable.com/blog/>, but encountered the
Seattle-area's Mike and Key Club <http://www.mikeandkey.org/> along the
way. Now studying for a ham license, Ms Allin is incorporating radio
into her project. (Thanks, Dink N7WA)

==> RESULTS AND RECORDS

CQ WW Director, Bob K3EST says in his 14 April CQ WW Update
<http://lists.contesting.com/_cq-contest/2010-04/msg00184.html> that
more than 12,000 entries were received for last fall's contests - a 17%
increase over 2008! CQ WW is also forming regional support groups to
improve communications with the CQ WW committee. Watch for log reports
to be available in early May and open logs will follow soon after.

Timo OH1NOA <oh1noa@sral.fi> wants us to know that he still maintains
his online list of the best QSO rates
<http://www.qsl.net/oh1noa/rates.htm> in contests. If you have updates,
please send them to him!

OPERATING TIP

A couple of reasonable questions about contests beginning and ending
are answered in this week's tip. Question 1 - "Can I call CQ before the
start of the contest or do I have to wait until 0000Z?" You can call CQ
all you want at any time, but if you call CQ TEST, meaning that you are
soliciting contest QSOs, that has to take place after the contest
starts. Question 2 - "Can I log a QSO that started during the contest
but finished after the contest's ending time?" Assuming your PC clock
is perfectly synchronized, the time at which you complete the QSO's
over-the-air transmissions must be within the contest period.
Summarizing - your over-the-air contest activity (including receiving)
can only take place from the starting whistle to the ending whistle.
<http://www.arrl.org/nladclick.php?n=cu&t=i&i=2010-04-28&p=1>

==> TECHNICAL TOPICS AND INFORMATION

The halo is a popular omnidirectional antenna for VHF+ rovers and not
so difficult to homebrew. The gamma match (if one is used) and the
resonating capacitor at the loop's gap often give the most trouble with

fabrication and tuning. Here's an article <http://www.dxzone.com/cgi-bin/dir/jump2.cgi?ID=23037> with good photos of how W3DHJ built his halo. (Thanks, Dennis KC9IXO)

Clint Turner, KA7OEI has created a very helpful new Web page for those who've always wanted to try long distance laser communications <http://modulatedlight.org/optical_comms/using_laser_pointers.html>. Clint has completed light QSOs over a record 107 km! You'll find circuits, tips of modifying the Ramsey Electronics laser communicator kit, and practical approaches to extending distance. (Thanks, Les N1LF)

If your tower uses galvanized hardware, DON'T drill out the holes to make it easier to insert the bolts or screw them in. Use a taper or drift pin punch <http://en.wikipedia.org/wiki/Punch_%28tool%29> to open the hole until the bolt just fits, preserving the galvanizing on the hole. Drilling out the hole or using the screw threads to open the hole removes or damages the galvanizing, leading to rust problems. A taper pin punch can also be used to line up the holes when connecting section, so be sure to keep one in your tower tool kit! (Thanks, Roger K8RI)

Another common hardware problem is galling of stainless steel threaded parts <http://www.estainlesssteel.com/gallingofstainless.html>. Galling is created by surface micro-defects that essentially pressure-weld the parts together. Towertalk reflector discussions point out that the solution is to use an anti-seize compound such as Never-Seez on the threads. A very light coating of grease is another option, but don't overdo it. Galling can also be reduced by not over-tightening stainless steel parts.

Lynn N7CFO relays information about Strapworks <http://www.strapworks.com/>, a company that sells a plethora of straps and rigging supplies that would be handy for tower work or for a VHF+ rover-mobile.

At this past weekend's Idaho State Convention in Boise, I found a cool item that will interest vertical builders: the GuyTieï¿½ from Rampro. <http://www.universal-radio.com/catalog/antsup/guytie.html>It's a plastic ring that slips over the tubing of a vertical and provides numerous rings for attaching guys. There are a number of sizes and I instantly thought of many times I'd wished for something like the GuyTie. Another handy tip I got from Jim KC7NN while in the lunch line was about using Rhino Deckï¿½ <http://rhinodeck.com/> material for antenna construction. Rhino Deck is made from recycled HDPE, is UV-resistant, and can be worked with regular saws, drills, and hand-tools. Jim has given a piece the microwave oven test and it is apparently RF-inert, too. The handrail section he handed me looked like the perfect small Yagi boom and was apparently none the worse for having been outside for five years.

Technical Web Site of the Week - Technical professionals and designers, take note of Besser & Associates' <http://www.besserassociates.com/>

upcoming free Webinar, "Impedance Matching in HF Circuits". Not all of the pro action is above 1 GHz! The list of topics to be covered includes Energy Transfer in an RF Circuit, Conjugate Match, Using the Smith Chart, Match Bandwidth and Q, Matching in Several Steps, Transmission Line Transformers, and Device Measurements - Network Analyzer. All very useful! You can register <http://www.mwjournal.com/BesserWebinarMay11> for the live Webinar or watch an archived <http://www.bessernet.com/BesserBlog/?cat=23> version.

==> CONVERSATION

Too Much Of A Good Thing

Communication - we're all about communication in ham radio and contests stress communications skills, so how could there be too much communication? When communication before the contest starts taking the place of communication during the contest, that's too much communication!

Contests set up limits and rules to exercise specific types of communication activity. There are limits on bands and modes of operation. Participants are required to exchange specific information. There are rules about permitted types of operating. All of these set up a certain type of game, just like in athletics. And just like in athletic events, the game is conducted between specific times or over a specific duration.

We all accept that for athletic events, communication about the conduct of the game outside the time limits for the game is very strictly controlled. For example, the history of a participant's performance may be discussed at length, but discussing the specifics of how a participant will play during an event, except in broad strategic terms, is not allowed. After the event, the conduct of the game is again open to be discussed at length, of course.

It would be absurd for a baseball pitcher to tell the hitters before the game, "You already know I have a fastball, sinker, and change-up. I'm going to throw the fastball in the second inning, the change-up in the third, and the sinker in the fourth. Enjoy!" It would spoil the game because it removes elements of strategy and skill from the competition.

Yet before a ham radio contest, I find this sort of information being exchanged regularly in the form of pre-contest schedules. Before continuing, I'm going to let the VHF+ contest community off the hook on this issue. There is a lot of discussion about technological reasons for VHF+ contesters to consider schedules acceptable. Pre-contest schedules may be an open issue on VHF+, but it has long been decided on HF that they diminish the quality of the event and should not be made.

The ARRL's "HF Contesting - Good Practices, Interpretations & Suggestions <http://www.arrl.org/hf-operating-guidelines>" - a white

paper on contest operating practices - is clear: "if by announcing your information, another contester can tune to a specific frequency at a specific time and work you", that's over the line. For example, it's fine for someone operating in a state QSO party to let everybody know that they'll be driving through a list of counties and even give a general idea of the route and the order in which the counties will be activated. That increases interest and participation in the contest - go for it! However, when the information expands the detail to "N0AX will be in County X at time Y on frequency Z", that's a pre-contest schedule - don't do it.

There is an exception to the no-schedule rule - schedules made during the contest and using the allowed contest bands and modes are acceptable. For example, during the contest it's OK to say, "I'm headed for Podunk County and should be on from there at 0300 on 3830 kHz." You are using the bands and modes the contest is designed to exercise. But before the contest? Unacceptable. Similarly, don't use Internet chat rooms or spotting networks to distribute the information while the contest is underway - those are outside the required bands and modes, and is considered self-spotting.

There is a fine line between what's acceptable and what's not - the circumstances may not always be entirely clear - and our enthusiasm and competitiveness can lead us over it. If you're not sure about something, start by reading and understanding the contest rules - all of them. You can ask an experienced contester or two. The discussion will help you understand what practices are good and bad and why. The HF Guidelines mentioned above touch on many ethical points of contesting. As you spend more and more time contesting, evaluating behavior and deciding what is and isn't across that line, you'll develop a sense for when that quiet voice is whispering, "Too much".

73, Ward N0AX
<http://www.arrl.org/nladclick.php?n=cu&t=i&i=2010-04-28&p=2>

==> CONTESTS

28 April through 11 May

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

MARAC CW and SSB Contests--Phone,CW, from May 1, 0000Z to May 2, 2400Z. Bands (MHz): 3.5-28, 50-432, Frequencies (MHz): 3.550, 7.050, 14.050, 21.050, 28.050. Exchange: RS(T), state, county abbreviation. Logs due: May 31. Rules <http://www.marac.org/>

10-10 Spring Digital Contest--Digital, from May 1, 0001Z to May 2, 2359Z. Bands (MHz): 28. Exchange: Call sign, name, 10-10 number, state.

Logs due: 15 days. Rules <http://www.ten-ten.org/>

QRP-QRP-Party--CW, from May 1, 1300Z to May 1, 1900Z. Bands (MHz): 3.5,7. Exchange: RST, serial, category. Logs due: May 31. Rules <http://www.agcw.org/>

7th Area QSO Party--Phone,CW,Digital, from May 1, 1300Z to May 2, 0700Z. Bands (MHz): 1.8-28, 50,144, Frequencies (MHz): CW--40 kHz above band edge; SSB--1.845, 3.855, 7.235, 14.255, 21.355, 28.455. Exchange: State and county code. Logs due: Jun 5. Rules <http://www.7qp.org/>

Indiana QSO Party--Phone,CW, from May 1, 1600Z to May 2, 0400Z. Bands (MHz): 1.8-28. Frequencies (MHz): CW--1.805 and 40 kHz above the band edge on 80-10 meters, SSB--1.845, 3.820, 7.190, 14.250, 21.300, 28.400. Exchange: RS(T) + S/P or IN county, DX RS(T) only. Logs due: Jun 15. Rules <http://www.hdxcc.org/inqp>

Radio Club of America QSO Party--Phone, from May 1, 1700Z to May 2, 0459Z. Bands (MHz): 3.5-21. Exchange: RS, QTH, name, equipment. Rules <http://www.radio-club-of-america.org/>

ARI International DX Contest--Phone,CW,Digital, from May 1, 2000Z to May 2, 1959Z. Bands (MHz): 1.8-28. Exchange: RS(T), serial or Italian province. Logs due: 30 days. Rules <http://www.qsl.net/contest_ari>

New England QSO Party--Phone,CW,Digital, from May 1, 2000Z to May 2, 0500Z and May 2, 1300Z to May 2, 2400Z. Bands (MHz): 3.5-28. Frequencies (MHz): CW--3.540, 7.035, 14.040, 21.040, 28.040; SSB--3.850, 7.180/280, 14.280, 21.380, 28.380. Exchange: RS(T) and S/P or New England county. Logs due: 30 days. Rules <http://www.neqp.org/>

Armed Forces Comm'ns Test--Phone,Digital, from May 8, 1200Z to May 9, 2400Z. Bands (MHz): 1.8-28. Frequencies (MHz): See Web site for specific station schedules. Exchange: RS(T). Logs due: no logs. Rules <http://www.netcom.army.mil/mars>

CQ-M International DX Contest--Phone,CW, from May 8, 1200Z to May 9, 1200Z. Bands (MHz): 1.8-28. Exchange: RS(T) and serial. Logs due: 30 days. Rules <http://www.cq-m.andys.ru/>

Alessandro Volta RTTY DX Contest--Digital, from May 8, 1200Z to May 9, 1200Z. Bands (MHz): 3.5-28. Exchange: RST, serial, CQ zone. Logs due: Jun 30. Rules <http://www.contestvolta.com/>

Portuguese Navy Day--Phone,CW, from May 8 , 1500Z to May 9, 1500Z. Bands (MHz): 3.5-28. Exchange: RS(T), serial, CQ zone. Logs due: 20 days. Rules <http://www.nra.pt/>

FISTS Spring Sprint--CW, from May 8, 1700Z to May 8, 2100Z. Bands (MHz): 3.5-28. Exchange: RS(T), S/P/C, name, FISTS nr or power. Logs due: 30 days. Rules <http://www.fists.org/sprints.html>

Nevada QSO Party--Phone,CW,Digital, from May 8, 1700Z to May 9, 1700Z. Bands (MHz): 1.8-28, 50, Frequencies (MHz): CW--15 kHz and SSB 25 kHz

above General band edge. Exchange: RS(T) and S/P/C or NV county. Logs due: Jun 15. Rules <http://nv.arrl.org/nqp>

50 MHz Spring Sprint--Phone,CW,Digital, from May 8, 2300Z to May 9, 0300Z. Bands (MHz): 50. Exchange: Grid Square (6-character preferred). Logs due: 14 days. Rules <http://tinyurl.com/springsprints>

VHF+ CONTESTS

VHF Spring Sprints--Phone,CW,Digital, from Apr 28, 7 PM to Apr 28, 11 PM. Bands (MHz): 432. Exchange: Grid Square (6-character preferred). Logs due: 14 days. Rules <http://tinyurl.com/springsprints>

Microwave Spring Sprint--Phone,CW,Digital, from May 1, 6 AM to May 1, 1 PM. Bands (MHz): 902+. Exchange: Grid Square (6-character preferred). Logs due: 14 days. Rules <http://tinyurl.com/springsprints>

2 GHz and Up World Wide Contest--Phone,CW,Digital, from May 1, 6 AM to May 2, 8 PM. Bands (MHz): 2.4G+. Exchange: 6-char grid locator. Logs due: 60 days. Rules <http://www.ham-radio.com/sbms>

MARAC CW and SSB Contests--Phone,CW, from May 1, 0000Z to May 2, 2400Z. Bands (MHz): 3.5-28, 50-432, Frequencies (MHz): 3.550, 7.050, 14.050, 21.050, 28.050. Exchange: RS(T), state, county abbreviation. Logs due: May 31. Rules <http://www.marac.org/>

7th Area QSO Party--Phone,CW,Digital, from May 1, 1300Z to May 2, 0700Z. Bands (MHz): 1.8-28, 50,144, Frequencies (MHz): CW--40 kHz above band edge; SSB--1.845, 3.855, 7.235, 14.255, 21.355, 28.455. Exchange: State and county code. Logs due: Jun 5. Rules <http://www.7qp.org/>

Nevada QSO Party--Phone,CW,Digital, from May 8, 1700Z to May 9, 1700Z. Bands (MHz): 1.8-28, 50, Frequencies (MHz): CW--15 kHz and SSB 25 kHz above General band edge. Exchange: RS(T) and S/P/C or NV county. Logs due: Jun 15. Rules <http://nv.arrl.org/nqp>

50 MHz Spring Sprint--Phone,CW,Digital, from May 8, 2300Z to May 9, 0300Z. Bands (MHz): 50. Exchange: Grid Square (6-character preferred). Logs due: 14 days. Rules <http://tinyurl.com/springsprints>

==> LOG DUE DATES

28 April through 11 May

April 29 - RSGB 80m Club Championship, Data, upload log at: http://www.vhfcc.org/cgi-bin/hfenter.pl, paper logs and diskettes to: (none). Rules <http://www.rsgbcc.org/hf/rules/2010/r80mcc.shtml>

April 30 - Oklahoma QSO Party, email logs to: logs@okdxa.org, paper logs and diskettes to: Oklahoma QSO Party, OK DX Association, P.O. Box 2591, Claremore, OK 74018-2591, USA. Rules <http://okdxa.org/web/html/rules10.htm>

April 30 - ARLHS Annual Spring Lites QSO Party, email logs to: (none), paper logs and diskettes to: Dave Ruch, NF0J, P.O. Box 20696,

Bloomington, MN 55420-0696, USA. Rules
<http://arlhs.com/SL-2010-guidelines.html>

April 30 - SP DX Contest, email logs to: spdxc-logs@pzk.org.pl, paper logs and diskettes to: Polski Zwiazek Krotkofalowcow, SPDX Contest Committee, P. O. Box 320, 00-950 WARSZAWA, POLAND. Rules
<http://www.spdxcontest.info/reg/reg_g.html>

May 1 - BARTG HF RTTY Contest, email logs to: ska@bartg.org.uk, paper logs and diskettes to: (none). Rules
<http://www.bartg.org.uk/documents/Contests/HF/BARTG%20HF%20Rules%202010.pdf>

May 1 - Feld Hell Sprint, email logs to: (none), Post log summary at: http://sites.google.com/site/feldhellclub/Home/contests, paper logs and diskettes to: (none). Rules
<http://sites.google.com/site/feldhellclub/Home/contests>

May 1 - North Dakota QSO Party, email logs to: w0cq@arrl.org, paper logs and diskettes to: W0CQ, c/o Lynn Nelson, K0LN, 6940 4th St. SW, Minot, ND 58701, USA. Rules <http://www.w0cq.com/ndqsop.pdf>

May 1 - Radio Maritime Day, email logs to: F6DGU@cyberelec.fr, paper logs and diskettes to: (none). Rules <http://www.radiomaritimeday.org/>

May 2 - UBA Spring Contest, SSB, email logs to: ubaspring@uba.be, paper logs and diskettes to: Michel Gerits, ON4CAQ, Mommestraat 69, B-3550 Heusden Zolder, Belgium. Rules
<http://www.uba.be/sites/default/files/uploads/hf_contests/uba_spring_en.pdf>

May 2 - EU Spring Sprint, SSB, email logs to: eusprint@kkn.net, paper logs and diskettes to: Hrvoje Horvat, 9A6XX, 25 Rujan 4, HR-52000 Pazin, Croatia. Rules
<http://www.eusprint.com/index.php?page=140%E2%8C%A9=g>

May 4 - ARCI Spring QSO Party, email logs to: va3jff@yahoo.ca, paper logs and diskettes to: ARCI Spring QSO Party, c/o Jeff Hetherington, VA3JFF, 139 Elizabeth St. W., Welland, Ontario L3C 4M3, Canada. Rules
<http://www.qrparci.org/content/view/8347/118/>

May 4 - Missouri QSO Party, email logs to: moqsoparty@w0ma.org, paper logs and diskettes to: Boeing Employees' Amateur Radio Society W0MA, 7488 Cornell Ave., University City, MO 63130, USA. Rules
<http://www.w0ma.org/mo_qso_party.htm>

May 5 - 222 MHz Spring Sprint, email logs to: springsprintlogs@gmail.com, paper logs and diskettes to: 2010 Spring Sprints, c/o Chuck Towner, W9KQJ, PO BOX 73, PALATINE, IL 60078-0073, USA. Rules
<http://groups.google.com/group/springsprints/web/2010-announcement-rules>

May 5 - Low Power Spring Sprint, email logs to: om3kfv@zoznam.sk, paper logs and diskettes to: Radioklub OM3KFV, P.O.Box 3, 038 61 Vrutky, Slovakia. Rules
<http://www.hornucopia.com/contestcal/lowpowerspringsprint2010.pdf>

May 7 - Russian DX Contest, email logs to: rdxc@srr.ru, paper logs and diskettes to: Russian DX Contest, P.O. Box 88, 119311 Moscow, Russia. Rules <http://www.rdxc.org/asp/pages/rulesg.asp>

May 10 - Yuri Gagarin International DX Contest, email logs to: gc10@bk.ru, paper logs and diskettes to: GC Contest Committee, Korneev G., P.O.Box 705, Tula, 300053, Russia. Rules <http://gc.qst.ru/en/section/32>

May 10 - PODXS 070 Club PSK 31 Flavors Contest, email logs to: pskflavors@yahoo.com, paper logs and diskettes to: (none). Rules <http://www.podxs070.com/31-flavors>

May 11 - QCWA Spring QSO Party, email logs to: w2od@aol.com, paper logs and diskettes to: W2OD, Robert Buus, 8 Donner Street, HOLMDEL N.J. 07733-2004, USA. Rules <http://www.qcwa.org/2010-qso-party-rules.htm>

==> ACKNOWLEDGEMENTS

ARRL Contest Update wishes to acknowledge information from WA7BNM's Contest Calendar <http://www.hornucopia.com/contestcal> and SM3CER's Contest Calendar <http://www.sk3bg.se/contest>.

Hallo dear MMMonVHF friends,

please find below our latest NEWSLETTER of the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2010-04-29

Again the NL is spread out on a thursday because the MMMonVHF
Team will be having their yearly Team-Meeting these weekend -
maybe youll able to work some of us as PA/homecall from the area
of Dwingeloo (you know ... the PI9CAM telescope...)

We attempt to distribute our Newsletter one or two times per week.
For further detail please be so kind and refer at our "News"-page:
http://www.mmmonvhf.de/latest.php - welcome and enjoy...

****
Latest NEWS/INFO for the NEWSLETTER
MMMonVHF The VHF-DX-Portal
****

** METEORSCATTER preview at MMMonVHF **

The most prominent shower next month is Eta ï¿½ Aquariids, peaking
May 06, around 07h UT. This shower is characterized by a broad
maximum, and ZHR may reach 85 hr-1, since Eta ï¿½ Aquariids activity
could be near its highest on its theoretical 12-year cycle in 2010
Some daytime showers (Omicron ï¿½ Cetids, peaking May 20th being the
most significant) will be also active this month; in addition to
increasing Sporadic Meteors background, they will provide good
conditions for MS DXing. Have a look to shower predictions for May
2010 at our MS-Propagationpage: http://www.mmmonvhf.de/ms.php
SOURCE: Massimo, IV3NDC, on behalf of the MMMonVHF Team

** ATTENTION IMPORTANT 70 MHz NEWS **

This is the first 4M experimental propagation beacon in Region 3.
HARTS is now operating a 4 metre beacon with temporary permit from
the local telecommunication authority. Callsign: VR2FOUR Frequency
71.575MHz (CW) Power: 3W Location: Yuen Long, New Territories,
Hong Kong (OL72AL) Operating... Hour: 1500 - 0300 UTC Message in
CW: VR2FOUR QTH OL72AL, Expiry of the temporary permit: 31.8.2010

BLOG: www.mmmonvhf.de/showblog.php?ca=HS0ZIL

HS0ZIL - the new 144 MHz Activity from HS0ZIL in OK16BQ ongoing...
Karsten did setup a MMMonVHF DX Blog to spread his latest News and
LOG. LATEST NEWS from Karsten, DL2LAH, dated 2010-04-25: HS0ZIL is
qrv today - he will be qrv at his new house until next weekend...
2010-04-26: DL2LAH/HS0ZIL, Karsten : Sorry for all who were waiting
for me yesterday!Due to very strong lightning i had to stop trans-
mission at 13:07 UTC! 20 minutes later the whole village didn`t
have electricity until today early morning!So, i will try to be
online again all days in this week until going to Bangkok on May
2nd! SOURCE: tnx to Karsten, DL2LAH/HS0ZIL, direct to MMMonVHF

** MJ / IN89 ** USE the REVIEW http://www.mmmonvhf.de/review.php
BLOG: www.mmmonvhf.de/showblog.php?ca=MJ-Team

This year the Team of Frank DH7FB and Bernd DF2ZC were activating
the DXCC Jersey MJ on 2m EME - Hello all, this morning at 4am we
arrived at my place and after a short night's sleep Frank DH7FB
continued his travel to Berlin where he arrived this afternoon. We
had great fun in Jersey, and again we found some points to improve
our dxpedition setup. I will write a detailed report and upload it
to my website by the next weekend, incl. photos. All in all, given
that we did not work the full moon pass and without xpol, we are
very happy about the 182 QSOs and 35 DXCCs worked. This is more than
10% QSOs more than last time from IS0 and 2008 from Guernsey, with
the same setup at our side. We are very particularly happy about
completing with HS2JFW - something I did not think would be possible
with the 2 x 9 SSBs. SOURCE: tnx to Bernd, DF2ZC, direct to MMMonVHF
More and the QSL Info in details at the REVIEW at MMMonVHF!

** 3V / JM53 ** USE/SUBSCRIBE: www.mmmonvhf.de/latest.php?id=3108

Following their activity from Morocco, Alfredo, IK7JWX, will lead
a team of operators to activate two IOTA islands between April
27th and May 4th: Djerba Island (IOTA AF-083, ARLHS TUN-022, WLOTA
L-1394, WW-LOC: JM53) and Kuriat Island (IOTA AF-092, ARLHS TUN-002
WLOTA L-0974, WW-LOC: JM55). They will used the callsigns TS8P and
TS8P/p (3V8SM). Activity will be on all HF bands and 6 meters,
using CW, SSB, RTTY and PSK31. QSL via IK7JWX. LOG ON LINE x TS8P

DJERBA ISLAND AF-083 & 3VFF-008 ("may be" also KURIAT or CONIGLIERA ISLAND AF-092 & 3VFF-007) at http://www.i8lwl.it 73 de Alfredo

** OZ / JO45 ** USE/SUBSCRIBE: www.mmmonvhf.de/latest.php?id=3202

Andy, OZ/DG3XA, QRV from the seldom island of Mandoe (JO45GG) UPDATE via ICPO Bulletin, dated 2010-04-22: DARC OV Sued-Stormarn (DA0TT, DA0T) [DOK E38] members Robert DH8HD, Hans-Joerg DO3HJW, Olaf DL4HG, Andy DG3XA and Andy DL7AT will be active 22-27th July 2010 as OZ/DA0T/p from Mando Island (EU-125, DIA NS-003 for the Danish islands award). QRV on all bands, CW and SSB,including an entry in the RSGB IOTA Contest (24-25th July). QSL to DA0T, DARC bureau preferred. SOURCE: Update via ICPO Bulletin (22-30 April)

** TL / JJ95 ** USE/SUBSCRIBE: www.mmmonvhf.de/latest.php?id=3205

Jan DJ8NK and Paul F6EXV are happy to announce their upcoming joint as TL0A (JJ95DS). Callsign : TL0A (guest operation at Christianï¿½s station). 2 stations on simultaneously. Dates : 13th to 26th of May Modes : big emphasis on RTTY by Jan, and CW by Paul, Chris will continue his SSB operation and CW/RTTY from time to time after 26th of May. Bands : 40 through to 6m, maybe some 80/160 (late in the season for low bands, plus it is the rainy season in TL with daily storms). Standard DX frequencies, always SPLIT. QSL info : direct to qrz.com TL0Aï¿½s address. Neither Jan nor Paul will be able to confirm any contact, so we repeat, QSL info is ONLY via TL0A. We are unlikely to have internet access from the station. There will be no online log. This operation could not have taken place without Christianï¿½s full support, help and cooperation. We already want to thank him a lot for making this possible to happen. So see you from the Central African Republic. Chris, TL0A, should definitively leave the Central African Republic in July 2010 and probably turn

over to Niger (5U5U) next September. SOURCE: via Bill NG3K DX News

** ZA ** USE/SUBSCRIBE: www.mmmonvhf.de/latest.php?id=3210

ZA/HA5X is to be on air between about 10-24 June 2010 from Albania, holiday style. Operation is planned from the town and the beach of Orikum in the Bay of Vlora. Some lighthouse and/or WFF activity might also take place in this period, please listen for operator's comments on possible LH or WFF references, if any. This is not a DXpedition, but a family holiday with XYL Marta, ZA/HA9WM and two 5 year old daughters, so time for amateur radio is limited and of lower priority. 50 MHz and portable battery operation will get some special focus. QSL via LoTW and eQSL. If possible, please do not send QSL cards, paper QSL (both direct and bureau) will be available by an OQRS (Online QSL Request System) to be launched and announced later. Bureau cards will be sent out using GlobalQSL.

** VP2E **

I just received an email from VP2EKG who advises me that the 8 ele. 6m beam left there by K5AND is available for anyone visiting VP2E to use. Please spread the word - hopefully somebody will eventually go there on 6m! MNI TNX and VY 73
SOURCE: Lance, W7EME to MMMonVHF and via [Magic Band EME]

** 3B8 **

>From 3B8MM: Just QRX for 6m. Still on preparation for better antenna. Right on time it a wavelenght V-dipole incl 80W into EU driection. Just QRX bcs 6m is since some days re-opened for amateur radio in 3B8 Last legal transmission was in 2002 with my ex-callsign 3B8/ DL6UAA. BTW, if I am not QRV busy on HF I run the "beacon" on 50.110. So QRX I am here 3 weeks. after this time I invirte local HAMs to operate on 50MHz. Regards Mart 3B8MM/DL6UAA. SOURCE: Extract from a Info of Alex, IV3KKW, NEWS at Sixitalia.org to MMMonVHF for the NL

** ST2 **

>From S21RC: Amateur radio activity in Bangladesh is very limited. Most of the hams are bound within their VHF teretory due to lack of HF eqipment and high govt. tax. For the last few years I have been active on various bands and modes as following: 40m, 20m, 15m, 10m SSB/RTTY/SSTV - VHF/UHF FM satellite/ISS/APRS/SSTV - Only few HAMs here has radio capable of 6m and to my knowledge nobody been active on 6 for the last many years from S2. In the past foreign Dxpedition

might activated 6 but I have no data for it. Last year after getting request from several HAMs from Europe I started thinking of 6m activation, and made a 4 element DK7ZB design 6m beam (unfortunately my RIG gets broken that time, so no activity then), This year I am again ready for 6m. My setup is following for 6m: ICOM IC7000 DK7ZB 4 element beam. I also have plan to EME on 6m within next few months Hope to catch you on 6 soon. Thanks. Fazlay Rabby (S21RC) at http://www.s21rc.net We receive a message from Robert ST2AR/S53R that inform us that he is now active also on 6m using a 5-el ECO yagi at about 26 meters. He just installed the antenna and in the past few days did not hear anyone yet. Will be on the band daily, especially over weekends (Friday/Saturday in Sudan). He is based in Khartoum, and the plan is to stay until summer 2011. SOURCE: Extract from an Info of Alex, IV3KKW, NEWS at Sixitalia.org to MMMonVHF NL

==> HAMVENTION®: DX ACTIVITIES ABOUND AT ARRL EXPO AT DAYTON
HAMVENTION®

ARRL Membership and Volunteer Programs Manager Dave Patton, NN1N,
reports that plans for a plethora of DX activities at the ARRL EXPO --
part of the 2010 Dayton Hamvention -- are wrapping up. "We are excited
about the activities that will be taking place," he said. "Visitors to
the EXPO will see a lot of activities relating to DX, including DXCC
card checking, a chance to drop off QSL cards for the ARRL Outgoing QSL
bureau and even an expanded International Amateur Radio Union (IARU)
area." The Dayton Hamvention will take place May 14-16 at Hara Arena,
located near Dayton, Ohio. Read more here
<http://www.arrl.org/news/dx-activities-abound-at-arrl-expo-at-the-dayton-ham
vention>.

==> FCC NEWS: FCC SEEKS COMMENTS ON NEWLY PROPOSED RULES FOR AMATEUR
RADIO OPERATORS AND EMERGENCY DRILLS

<http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-10-45A1.pdf>
In March, the FCC released
<http://www.arrl.org/news/fcc-issues-notice-of-proposed-rule-making-on-govern
ment-disaster-drills-and-amateur-radio>
a Notice of Proposed Rulemaking (NPRM
```

<http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-10-45A1.pdf>)
(Docket #10-72) that proposed to amend the Part 97 rules --
specifically 97.113(a)(3) -- governing the Amateur Radio Service. The
new rules would provide that, under certain limited conditions, Amateur
Radio operators may transmit messages during emergency and disaster
preparedness drills, regardless of whether the operators are employees
of entities participating in the drill. On April 22, a summary of the
NPRM was published in the Federal Register
<http://edocket.access.gpo.gov/2010/pdf/2010-9092.pdf> and the FCC is
seeking comments on it. Comments must be filed on or before May 24,
2010 (30 days after publication in the Federal Register); reply
comments must be filed on or before June 7, 2010 (45 days after
publication in the Federal Register). Instructions on how to file
comments are listed beginning on page 5 of the NPRM
<http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-10-45A1.pdf>.

==> LEGISLATIVE ACTIONS: MORE SUPPORT FOR HR 2160

Last week, two more Congressional Representatives -- Greg Walden,
W7EQI (R-OR-2) and Jeff Fortenberry (R-NE-1) -- pledged their support
for HR 2160
<http://frwebgate.access.gpo.gov/cgi-bin/getdoc.cgi?dbname=111_cong_bills&doc
id=f:h2160ih.txt.pdf>,
The Amateur Radio Emergency Communications Enhancement Act of 2009,
bringing the total number of cosponsors to 39, including original
sponsor Sheila Jackson-Lee
<http://www.arrl.org/news/houston-representative-introduces-amateur-radio-bil
l-in-congress>
(D-TX-18). HR 2160 is also sponsored by W. Todd Akin (R-MO-2), Michael
Arcuri (D-NY-24), Roscoe Bartlett (R-MD-6), Jo Bonner, (R-AL-1), John
Boozman (R-AR-3), Madeleine Bordallo (D-Guam), André Carson (D-IN-7),
Geoff Davis (R-KY-4), Bob Filner (D-CA-51), Scott Garrett (R-NJ-5),
Bart Gordon (D-TN-6), Brett Guthrie (R-KY-02), Maurice Hinchey
(D-NY-22), Michael Honda (D-CA-15), Mary Jo Kilroy (D-OH-15), Ron
Klein, (D-FL-22), Tom Latham (R-IA-4), Zoe Lofgren (D-CA-16), Blaine
Luetkemeyer (R-MO-9), Thaddeus McCotter (R-MI-11), Michael E. McMahon,
(D-NY-13), Cathy McMorris Rodgers, (R-WA-5), Charlie Melancon (D-LA-3),
Candice Miller (R-MI-10), Dennis Moore (D-KS-3), John Olver (D-MA-1),

==> THE DOCTOR IS IN: WINDOW LINE AND COAX LOSS

Andy Anderson, AE5EA, of Placitas, New Mexico, has an old three band, three element quad that was built by a company no longer in business. This quad was designed to be fed with coax to a 1:1 balun. Andy told the ARRL's Doctor that he plans on putting the quad back up and was wondering if he can feed it with 450 Ω window line to avoid the loss in over 180 feet of coax.

Here's what the Doctor had to say:

There are two approaches that should work with the window line (assuming the feedpoint's impedance is 50 Ω -- a quad is typically a bit higher).

- Feed the driven element directly with the window line. At the station, you will then need a wide range antenna tuner that can match balanced loads. This could be a regular unbalanced one with a balun on the output. Note that the impedance will be neither 50 nor 450 Ω, but will vary widely due to the transformation through the mismatched line, which will be different on every band. The 9:1 SWR with 180 feet of typical window line will result a bit less than 1 dB loss at 28.5 MHz and 0.67 dB on 14 MHz.
- Use a 9:1 balun at each end of the window line. You may want to use coax (with a coil choke) from the antenna to below the rotator. Then attach a balun (waterproof units are available or you can build your own). Run the window line to (or near to) the station and use another 9:1 balun and coax to the radio. The two baluns combined will have less than 1 dB loss. The matched window line will have 0.2 dB additional loss on 14, 0.26 dB on 28 MHz.

· Use a 9:1 balun at each end of the window line. You may want to use coax (with a coil choke) from the antenna to below the rotator. Then attach a balun (waterproof units are available or you can build your own). Run the window line to (or near to) the station and use another 9:1 balun and coax to the radio. The two baluns combined will have less than 1 dB loss. The matched window line will have 0.2 dB additional loss on 14, 0.26 dB on 28 MHz.

Another thought is to use really good coax. 180 feet of LMR 400 or Belden 9913 coax, for example (both fit standard UHF connectors), will have a matched loss of 1.2 dB at 28.5 MHz, but only 0.8 dB on 20 meters. While not cheap, it probably will cost less than the window line plus two baluns. A section of special "LMR Flex 400" can be used around the rotator.

The performance differences among the various approaches are small. If I were starting from scratch, I think I'd go with low loss coax, based on simplicity and ease of operation.

Thanks Doctor! Do you have a question or a problem? Send your questions via e-mail <doctor@arrl.org> or to "The Doctor," ARRL, 225 Main St, Newington, CT 06111 (no phone calls, please). Look for "The Doctor Is IN" every month in QST <http://www.arrl.org/qst> , the official journal of the ARRL.

==> MORE IMPROVEMENTS TO THE ARRL WEB SITE

<http://www.arrl.org> As more and more people use the new ARRL Web site <http://www.arrl.org/>, we are finding some minor bugs in the system and fixing them. Here are the latest improvements to the Web site:

- A link to your Section News is located right underneath the "Edit Your Profile" link at the top of the page. Just click on "Section News" and you will be directed to the appropriate page. This link is only available on the home page of the site.
- Users no longer have to log in each time they access the Web site. The site now remembers your log-in information and you will automatically be logged in on each visit.
- The DXCC standings and Honor Roll <http://www.arrl.org/dxcc-standings>, DXCC application <http://www.arrl.org/files/file/DXCC/dxccapp.pdf> and the DXCC order form <http://www.arrl.org/files/file/DXCC/dxccitem.pdf> are now available online.
- You can now register hamfests and conventions <http://www.arrl.org/hamfest-convention-application> on the Web site.
- Find an Amateur Radio licensing class <http://www.arrl.org/find-an-amateur-radio-license-class> or an exam session <http://www.arrl.org/finding-an-exam-session> near you. In earlier versions of the Exam Session Locator Service, all exam sessions were listed as "no walk-ins." This has now been fixed.
- An amateur's current license class is now listed in the Call Sign Search <http://www.arrl.org/fcc/search>. Extraneous numbers in the amateur's FRN have also been removed.

<http://www.arrl.org/images/view/News/SectionNews.JPG> "With a Web site as large as the ARRL's, we are constantly making improvements and changes," said ARRL Chief Operating Officer Harold Kramer, WJ1B. "We have received a lot of feedback from members and are trying to implement many of these ideas. One of our main goals at the moment is optimizing the club search function. We also understand that the Web site search function is not as functional as we would like. In time, once the Google engines crawl through the site and catalog it, the search function should greatly improve. We appreciate your patience and understanding as we work through the issues."

==> ARRL PUBLICATIONS: CHECK OUT THE MAY/JUNE ISSUE OF NCJ

The May/June issue of NCJ, The National Contest Journal, is filled with the latest news from the contesting world. Whether you are new to contesting or are a seasoned pro -- or somewhere in the middle -- you will find something in NCJ just for you. In addition to the

contest-related articles, there are all the regular columns and features you expect from NCJ: "Workshop Chronicles" by Don Daso, K4ZA; "Contest Tips, Tricks and Techniques" by Gary Sutcliffe, W9XT; "VHF-UHF Contesting" by Jon Jones, N0JK; "RTTY Contesting" by Don Hill, AA5AU; "Propagation" by Carl Luetzelschwab, K9LA; "Contesting on a Budget" by Ralph Bellas, K9ZO; "Software for Contesters" by Pete Smith, N4ZR, and "Contesting 101 "by Kirk Pickering, K4RO. NCJ is published six times a year by the ARRL; it is edited by Al Dewey, K0AD. NCJ is what every contester needs in their shack -- subscribe today! Read more here <http://www.arrl.org/news/check-out-the-may-june-issue-of-em-ncj-em>.

==> SOLAR UPDATE

<http://sdo.gsfc.nasa.gov/gallery/firstlight/> Tad "The sunlight struck them with an ever-varying rainbow bloom as they moved <http://arthursclassicnovels.com/doyle/lostw10.html>" Cook, K7RA, reports: After 13 days of no sunspots, new region 1063 appeared late on Wednesday, April 28. Unknown at this point (early Thursday) is how strong or fast-growing this new sunspot region will be. Earlier region 1062 was only with us for three days, April 12-14. Look for more information on the ARRL Web site on Friday, April 30, including some e-mails about the European ash cloud and the possibility that 72 MHz propagation was depressed because no aircraft were in the sky. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" brought to you by Sir Arthur Conan Doyle's The Lost World <http://arthursclassicnovels.com/doyle/lostw10.html> (Chapter 15).

==> THIS WEEK ON THE RADIO

This week the Microwave Spring Sprint (local time) and the AGCW QRP/QRP Party are May 1. The 10-10 International Spring Contest (Digital), the 7th Call Area QSO Party, the Indiana QSO Party, the ARI International DX Contest and the New England QSO Party are May 1-2. Next week, the FISTS Spring Sprint is May 8.The CQ-M International DX Contest and the VOLTA WW RTTY Contest are May 8-9. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/special-events>.

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

Registration remains open through Sunday, May 23, 2010, for these online course sessions <http://www.arrl.org/online-course-registration> beginning on Friday, June 4, 2010: Amateur Radio Emergency Communications Level 1; Antenna Design and Construction; Propagation; Analog Electronics, and Digital Electronics. To learn more, visit the

CEP Course Listing page <http://www.arrl.org/online-courses> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/arrlletter/.

Amateur Radio Newsline(tm) Report 1707 - April 30 2010

CLOSED CUIRCUIT ADVISORY: A REPORT FROM THE AMATEUR RADIO SUPPORT FUND

This is a closed circuit advisory and no necessarily for air. I'm Bill Pasternak, WA6ITF, and I'm here with a financial update on Newsline.

First the good news. As we go to air this week, all the bills through the end of March have been paid. The bad news? As I prepare this report we have only about $220 in our account and come early May, there will not be enough to cover the April bills which will be in the $800 to $1000 range. In reality, not much different than in the months and years past.

In checking the PayPal account, a few moments ago, between April 4th to April 27th we have received only $60 in contributions. And when you deduct the fee charged by Pay Pal, our net income this month was only $57.34. Clearly that's just not enough to make ends meet. And that's also the reason I'm here making this report to you.

We do our part to hopefully bring you the news that you want to hear. But we need your help to keep going. As Amateur Radio Newsline is a 501(c)(3) not for profit corporation, to make a tax deductible contribution is easy. Either send it to us at the address you will hear at the end of this weeks newscast, or go to arnewsline.com ad click on the PayPal logo to make your contribution electronically. Whichever way you choose, the all volunteer staff of Amateur Radio Newsline joins me in saying a big "thank you."

That ends the closed circuit advisory. I'm Bill Pasternak, WA6ITF, and now here's Jim Davis, W2JKD, with this weeks report. Jim:

**

Amateur Radio Newsline report number 1707 with a release date of Friday, April 30th, 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. The comment period begins on an FCC proposal to permit hams to communicate for their employers during emergency training drills, the dates for the 2010 Global Simulated Emergency Tests are announced, a Wisconsin town challenges the tower of a 10 year old ham who suffers from Cerebral Palsy and a phone call clears Radio Kuwait out of the 40 meter ham band. Find out the details on Amateur Radio Newsline(tm) report number 1707 coming your way right now.

RADIO LAW: COMMENT DATE SET IN WT DOCKET 10-72 ON USE OF EMPLOYEE HAMS INDRILLS

The FCC's Notice of Proposed Rule Making on providing communications on behalf of an employer during a government-sponsored emergency or disaster drill has finally been published in the Federal Register. Its now time for you to voice your opinion. Amateur Radio Newsline's Bruce Tennant, K6PZW, reports:

--

On April 22, a summary of the Notice of Proposed Rule Making in WT Docket 10 - 72 was published in the Federal Register and starting the clock on the 30 day commentary period and 15 additional day Reply Comment period. Comments are due on or before May 24th with reply comments due by June 7th.

By way of background, back on March 24th, the FCC released the Notice of Proposed Rulemaking. It suggests amending the Part 97 rules to permit, under certain limited conditions for hams to transmit messages during emergency and disaster preparedness drills, regardless of whether the operators are employees of entities participating in the drill.

Current rules provide for amateur radio use during emergencies. At the same time, the rules -- specifically section 97.113 (a)(3) -- prohibits communications in which the station licensee or control operator has a pecuniary interest. This includes any communications on behalf of an employer, whether direct or indirect. Translated it means that even if a ham employee is off the clock he or she cannot take part in emergency training exercises.

The FCC says that while there are some exceptions to this prohibition, there is currently none that would permit amateur station control operators who are employees of public safety agencies and other entities, such as hospitals, to participate in drills and tests in preparation for emergency situations. Nor may they transmit messages on behalf of their employers during such drills and tests.

The FCC notes that public safety land mobile radio systems are the primary means of radio-based communications for emergency responders. But it goes on to add that experience has shown that amateur radio has played an important role in preparation for, during, and in the aftermath of natural and man-made emergencies and disasters.

The FCC says that amateur radio is often an essential element of emergency preparedness and response. Because of this, many state and local governments and public safety agencies incorporate amateur radio operators and their communication capabilities into their emergency planning. In this regard, some entities, such as hospitals, emergency operations centers, and police, fire, and emergency medical service stations, have

emphasized the participation of their employees who are amateur station operators in emergency and disaster drills and tests.

Based on what it terms as a public need, the FCC is proposing to amend Section 97.113 of the Amateur Service rules to provide that, under certain limited conditions, amateur radio operators may transmit messages during emergency and disaster preparedness drills. This, regardless of whether the operators are employees of government entities participating in the drill. It also seeks comments on whether certain other drills that are not sponsored by government agencies -- such as those conducted by hospitals -- should be included in the proposed exemption as well.

Again, comments on WT Docket 10 - 72 must be filed on or before May 24th with reply comments due by June 7th.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

Anyone planning to file on WT Docket 10 - 72 should completely read the Notice of Proposed Rule Making before submitting comments. You can access it
at http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-10-45A1.pdf)
(N1ND, ARRL, CQ Newsroom, ARNewsline(tm))

**

RESCUE RADIO: FCC GRANTS 97.113 WAIVER FOR HAWAII HURRICANE DRILL

Meantime, the FCC has granted the Vice Director of Civil Defense for the State of Hawaii Department of Defense a waiver for section 97.1123 of the Amateur Radio Rules. This, to permit participation of 5 hams directly in the agency's employ, and an unspecified number of others who are employees of other entities associated with emergency communications to take part in a hurricane preparedness exercise between May 24 and June 4th with ham radio operations slated May 29th and June 1st.

In approving the request, Scot Stone, who is Deputy Chief, Mobility Division of the FCC's Wireless Telecommunications Bureau noted that the public interest is served in facilitating amateur operations in support of this public safety exercise. As such, it warrants this limited waiver of Section 97.113 to permit transmission of communications by the amateur licensees on behalf of their employers on those dates. (FCC)

**

RESCUE RADIO: GLOBALSET 2010 DATES ANNOUNCED

The International Amateur Radio Union Region 1 Emergency Communications Group has announced that there will be two Global Simulated Emergency Tests this year. One to be held on the 15th of May and the other on November 13th.

GlobalSET is an opportunity to demonstrate how communications can occur across national borders. It also tests use the emergency Center of Activity Frequencies on the 80, 40, 20, 17 and 15 meter bands, and creates standardized practices for international emergency communications.

Registrations are now being taken for IARU member societies and emergency communications groups to participate in next month's GlobalSET. More is on-line a www.iaru-r1.org. (IARU Region 1)

**

WORLDBEAT: IARU INTRUDER MONITOR SYSYEMS CLEARS RADIO KUWAIT FROM 40 METERS

A phone call has ended Radio Kuwait broadcasting in the Amateur Radio 7 MHz allocation.

From April 12th to the 19th, the broadcaster had been transmitting programs in the Arabic language with up to S9+30dB signals. Its signal blocked almost 20 kHz of the 40 meter band from 7150 and 7190 kHz.

Soon reports began to surface of the Radio Kuwait broadcasts in the exclusive amateur spectrum and the matter was reported to the IARU Intruder Watch Monitoring System. Soon, many national coordinators had requested their telecommunications authorities to send International Complaints to the State of Kuwait.

But it was 9K2RR, the IARU Monitoring System Intruder Watch Coordinator in Kuwait who solved the problem. He made a call to Radio Kuwait, explained the situation and asked for a frequency change. And with additional support by DJ9KR, the broadcaster quickly complied. (IARU Region 1)

RADIO LAW: OHIO HAM DETAINED AT NC AIRPORT AFTER HE IS SEEN WITH FIREARM

Police in Ashville, North Carolina have charged a Ohio ham with going armed to the terror of the public. This after he was spotted at an airport parking lot. Mark Abramowicz, NT3V, tells us who the person is and explains what the charge means:

--

Joseph Sean McVey, K8JSM, is from the town of Coshocton, Ohio, northeast of Columbus and just south of Akron. McVey, in his posted QRZ.com biography, says he prefers to go by Sean.

The FCC database shows he was first licensed as a Technician in 2008 and upgraded to General in March 2009 and sought a Vanity call sign which just happens to match the initials of his name - Joseph Sean McVey.

McVey is 23 and was released Tuesday, April 27 on 100-thousand-dollars bond by authorities in suburban Asheville, N.C. where he was taken into custody on a misdemeanor charge of going armed to the terror of the public.

The attorney general's office in North Carolina says it essentially means he was carrying a gun for the purpose of terrifying others.

McVey was arrested on Sunday, April 25, near the Asheville Regional Airport just after Air Force One took off with President Obama and his family on board. They had been in the Asheville area on getaway weekend.

The Secret Service initially wanted McVey detained after law enforcement found him on airport property inside a car made up like a police vehicle with a light bar and siren. It was also equipped with police scanners and other radios.

On April 27, The New York Daily News quoted the Secret Service as saying it didn't consider McVey a threat and passed him off as a law enforcement buff.

The Coshocton Tribune and it's related publications did an exhaustive check on McVey, including examining postings on Facebook, MySpace and Twitter. It found McVey had posted two Tweets on Friday, April 23, from Limestone, N.C., just south of Asheville.

The FCC has a track record of revoking the licenses of amateurs who it considers displaying improper or unacceptable conduct clashing with the good character it expects of all licensed hams.

It's unclear whether the FCC will take any action regarding McVey's license.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

At the time of his arrest McVey did have a concealed weapons permit that had been issued in Ohio. That permit has been at least temporarily revoked pending the outcome of the case against him. If the charges are not dismissed and if he is convicted, McVey faces a maximum sentence of 120 days in jail. His next court appearance is scheduled for June 10th. (ARNewsline(tm), NT3V, various news reports)

RADIO LAW: WISCONSIN CITY CHALLENGES 10 YEAR OLDS TOWER AND ANTENNA

A Wisconsin's pre-teen ham who suffers from cerebral palsy could loose his tower and antenna system over a dispute with the city. But the family of 10 year old Samuel Markstrom, KC9POP, is fighting back by saying that their sons hobby has changed his life by building his self confidence.

Village leaders say the Markstrom's didn't have the proper permits to build 62 foot tower that sits in their backyard in Mount Pleasant. But his

mother Catherine Markstrom, KC9EOW, says that everything had gone in, to their knowledge very legally. She also notes that there are days when her son cannot get outside to play and he gets really depressed and upset. Now she is worried her son will have to give up his indoor hobby as well.

But the tower is opposed by at least one neighbor. News reports quote Eric Scott lives directly next door to the Markstrom's. He claims that he is worried that the tower could topple over while his own chils was playing in his yard. KC9POP's parents counter by saying the tower is rated to withstand hurricane force winds and that there isn't a danger.

In his on-line bio on QRZ dot com, Samm as he calls himself says that he is active in Boy Scouts as well as volunteering at WI9VCR, which is the Volunteer Center of Racine County. He says that his favorite bands are 10 and 6 meters but he is also active in repeaters in the Racine, Kenosha and Milwaukee repeaters. And according to one news report, the fifth grader has also been active in public service by spreading the word about last summer's Kenosha tornadoes. For that effort he was presented an award by the volunteer center.

The future of the Samm Markstrom's tower will be decided by the Village of Mount Pleasant's zoning board in June. (JournalTimes.com, eHam.net)

**

RADIO CRIME: COPPER THIEVES TAKE KC TV STATION KMBC OFF THE AIR

Copper thieves were responsible for taking Kansas City television station KMBC off the air last weekend . Police responding to a burglar alarm Sunday evening April 25th found a large section of 2 inch conduit cut away from the side of the transmitter building and green coolant spilled across the adjoining area.

The tubing was part of KMBC's transmitter system that circulated coolant around two final amplifier tubes valued at close to $40,000. A sensor that detected the sudden loss in pressure shut down the transmitter. Whether the shutdown happened in time to save the tubes is a question that KMBC Director of Engineering Jerry Agresti said won't know until repairs are made to the cooling system and a thorough evaluation of the transmitter is done.

One thing Agresti says that he is sure of. Either the robbers knew exactly what they were doing or were incredibly brazen. The coolant used for the transmitters final amplifiers gets very hot and the burglars could have easily been scalded by it. (KC.com)

**

HAM RADIO ON THE NET: CONTESTING 101 WEBINAR MAY 7TH

Kirk Pickering, K4RO, the National Contest Journal's Contesting 101 column editor will shares tips and tricks for the beginning contest operator. This during an on-line Web Seminar or Webinar slated for Friday, May 7th at 9 PM Eastern Daylight Time.

All you need is your PC, speakers, and a high speed Internet connection. To take part you must register in advance on line at tinyurl.com/2685ld9

The on-line Webinar is sponsored by the Potomac Valley Radio Club and is free to anyone wanting to take part. Registration is free. Questions or comments can be sent to k4zw (at) comcast (dot) net. (PVRC)

**

THE SOCIAL SCENE: SCHOOL CLUB EUROPEAN UNION DAY MAY 5th

The annual School Club European Union Day will take place on May 5th. School Club European Union Day fosters contacts with and between school amateur radio clubs and training centers and gives them the opportunity to contact other amateur stations around Europe. It's planners say that it is a great way to get young operators on the air from their school stations. An English version of the rules for this event can be found at tinyurl.com/2u6x86c. (Southgate)

**

HAMVENTION® NEWS: D-STAR LINK APPROVED

The Dayton Hamvention has received approval from the D-Star reflector owners to link its W8BI system to the 30-B reflector over the Hamvention® weekend.

If you would like to follow the D-Star activity in Dayton over Hamvention® weekend, please use a linked repeater or link your DV Dongle to the 30-B reflector. Please do not link directly to the W8BI gateway.

This is the second year such a D-Star link will be in place. All questions and comments on what is happening go to Mark Erbaugh via r-mail to microenh (at) hughes (dot) net. (D-Star Reflector, WB9QZB)

**

HAMVENTION® NEWS: ONE DAY TECH CLASS TO BE TAUGHT AT HAMVENTION 2010

A one-day Technician class will be held at Hamvention® 2010. Slated for Saturday, May 15th, the class will be taught by Mitch Stern, W1SJ, from 8 AM to 4 PM behind the Luso Tower in the East Hall. Exams will be conducted at the conclusion of class and a new Technician class license should be issued by the next day just in time to do some last minute radio shopping. Pre-enrollment for this course is required via the Internet tinyurl.com/2dska2l (Hamvention® Reflector)

**

NEW PRODUCT: 75 METER AM TRANSCEIVER KIT

And here's something you do not see very often. A new full carrier amplitude modulated transceiver for the 75 Meter band. Recently launched by Dave Benson K1SWL of Small Wonder Labs, lovers of AM can now get on the 75 with a 2.5 watt AM transceiver kit that costs less than $70.

The transmitter is crystal-controlled with 3885 kHz supplied. The receiver is varicap tunable over a 50 kHz, selectable range and comes with a 4 kHz crystal filter for ample selectivity.

According to K1SWL, while you won't expect to work DX with this transmitter, it's fine for area communication. On his website Dave notes that the two most distant QSOs to date from his home in New Hampshire have been Maine and Long Island, New York. Both were 30-minute ragchews with good copy both ways.

Full details on this kit at is on line at smallwonderlabs.com/Retro-75.htm or by regular mail to Small Wonder Labs, P.O. Box 187, Newport New Hampshire, 03773. (Press release)

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

THE CHANGING OF THE GUARD: DON JOHNSON, W6AAQ, INVENTOR OF THE SCREWDRIVER ANTENNA - S.K.

Don Johnson, W6AAQ, inventor of the screwdriver mobile antenna died Wednesday, April 14th. He had been ill for several months and was 91 at the time of his passing.

According to Al Melcher, W6ARM, when the FCC first authorized H-F mobile, a group of hams in the San Francisco Bay area decided to go mobile on 75 meters. They chose 3 point 995 MHz as an operating frequency to reduce the possibility of high power fixed stations interfering. And it was W6AAQ who came up with the idea of using a metal tube with a whip on top of a coil that fit inside the tube. By raising and lowering the coil a resonant point could be found.

Johnson was searching for a method of tuning the antenna remotely when W6MHP suggested using the motor from a cordless screwdriver. Thus the "screwdriver mobile antenna" was born. Johnson received a patent on the device and built and sold thousands.

Don was a retired navy radioman and pilot who lived in Esparto, a small community in Northern California west of Sacramento. He was to be buried with full military honors at the National Cemetery in Dixon, California. A memorial service will be held for W6AAQ in July. (QRZ.com, others)

**

WORLDBEAT: UK GROUP ENDS PACKET OPERATION DO TO DECLINE IN INTEREST

Call this one a sign of the times. This with word that Steve Perkins, G4FPV and Stewart Wilkinson, G0LGS have decided that due to the continued decline in Packet Radio activity that they will end Packet Radio Nodes and BBS facilities in and around the North Gloucestershire and South Worcestershire regions of the United Kingdom.

Going away on May 31st will be the G4FPV Node, the GB7GLO AX 25 Bulletin Board and the GB7LGS combination Node and Bulletin Board Service. All three systems have served the region for close to 20 years.

While the Internet with its high speed delivery of e-mail has generally replaced Packet Radio as a messaging system, in some areas of the world the Automatic Position Reporting System or APRS has kept many Packet Nodes alive. But as can be seen by this announcement, conversion to APRS is not taking place at every Packet Radio site.

The notice of this closure has also been made on the Gloucestershire Repeater Group web site. Its in cyberspace at http://www.grg.org.uk/news.php?readmore3 (Southgate)

**

WORLDBEAT: SHANGHAI BANS TWO WAY RADIO NEAR WORLD EXPO 2010 SITE

Shanghai city leaders say that the city is to impose controls on devices capable of transmitting radio waves from 12 pm on April 30th through 12 am on May 2 and again on October 1st and 30th. This, to ensure the proper operation of facilities inside the 2010 World Expo site.

During these periods, items such as walkie-talkies, industrial remote controls, amateur radio stations and even school broadcasts will be banned within 500 meters of the Expo site. The only exception will be for cellular mobile phones which officials say will not be affected. (Eastday.com)

**

HAM RADIO IN SPACE: SWISS TISAT BASED ON ALINCO HT READY FOR LAUNCH

The Swiss Amateur Radio CubeSat TIsat-1 built by students in Ticino is ready for launch from India later this spring. TIsat-1 will fly on the PSLV-C15 launcher from the Sriharikota Space Center into a planned 670 km sun synchronous orbit with an inclination of 98.5 degrees.

The satellites communications system is based on an Alinco DJC-6 dual band hand held transceiver. The downlink power will be 400 milliwatts on 437.305 MHz. It will send its call sign HB9DE in CW and transmit AFSK telemetry from its on-board experiments. The satellites uplink will be at 145.98 MHz. (ANS)

**

HAM RADIO IN SPACE: SOUTH AFRICA AMSAT ANNUONCES NEW HAM-SAT

And South Africa AMSAT has announced that it will be building its own ham radio CubeSat. The project will involve radio amateurs and school students.

The currently proposed payload includes a transponder with a 30 kHz bandwidth, a telemetry beacon and several science projects, but that's subject to change from the South African ham community. At this stage in the project SA AMSAT is inviting input from that nations amateur radio community before the final payload is decided on, and project teams will then be set up. If you are a South African ham and interested in becoming involved, you are invited to send an email with your contact details and areas of expertise to saamsat (at) intekom (dot) co (dot) za.

(SA AMSAT)

**

DX

In DX, F5TGR will operate portable FM from Martinique through May 6th. His operation is holiday style. That means he is on vacation and will operate as time is available using CW and SSB on 40 through 10 meters. QSL direct or via bureau to F5TGR.

JK2VOC, will be active as portable BW2 from Taiwan between June 18th and the 20th. If you work him QSL direct to his home callsign.

A four man team will be operational from the Azores as CR1FSC through May 2nd. QSL via CU3EQ, either direct or by the bureau.

DL7VOX is on from the island of Usedom and its lighthouses until May 11th. If you work him please QSL via his home call, either direct or via the bureau.

And talk about a long tongue twister of a callsign. SP2QCW, is operating as HF2010WECK in all modes on all bands during the World Enduro Championships off-road motorbike race. He will be active until June 30th. QSLs SP2QCW either direct or via bureau.

(Above from various DX News sources)

THAT FINAL ITEM: CFL'S VS TV REMOTES

And finally this week, a story from the United Kingdom about an unseen phantom taking control of television sets. But it wasn't a ghost or goblin. It was light bulbs as we hear from Jason Daniels, VK2LAW:

--

Some feared it must have been a problem with their remote. Others suspected ghostly goings-on.

But when TV viewers complained their sets were changing channel by themselves, few could have guessed the real culprit - their light bulbs.

Low-energy bulbs can make your television turn over the station at random, according to customers. Among the first to spot the problem were UK cable

customers Alistair and Emma Clements.

They rang their supplier, Virgin Media, and were told the problem could be because of the Philips low-energy light bulb fitted nearby.

But while changing it helped, the couple say the channel still flips from time to time even though the nearest low- energy bulb is now in another room.

Experts say infra-red light from modern fluorescent bulbs can be 'mistaken' by electrical equipment for commands from its remote. They warn that while moving or changing the offending device usually solves the problem, the proliferation of gadgets in homes increases the likelihood of such interference.

Traditional bulbs produce infra-red too, but because they don't 'flicker' like some fluorescent bulbs there is no danger of interference with electrical equipment.

This weird and wonderful occurrence is akin to a problem my next door neighbor had soon after he had a pace maker installed. Every time I changed TV stations he would do cartwheels in his lounge!

I'm Jason, VK2LAW.

--

So far nobody we have heard about in North America has complained about low energy compact fluorescent lamps causing this kind of problem. One of the reasons most likely is that North America uses 60 Hertz AC rather than the 50 Hertz used in the U-K and the flicker rate is far harder for a TV remote receiver to be fooled by. (WIA News)

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

Before we go, a reminder that the nominating period for the 2010 Amateur Radio Newsline Young Ham of the Year Award closes on May 30th. That gives you only about a month to nominate a deserving teen or pre-teen radio amateur for this yearly honor.

Each year, we here at the Amateur Radio Newsline in association with Vertex Standard Corporation -- the makers of Yaesu brand ham radio gear -- and CQ Magazine combine to honor a ham radio operator age 18 or younger for his or

her contributions to ham radio or to society itself through ham radio.

All nominations and materials required by the official rules must be received by Amateur Radio Newsline no later than midnight on May 30th. Both "mail-in" and electronic submissions are being accepted this year. Full rules and a downloadable nominating form are now on our website at www.arnewsline.org. Just scroll down until you see "2010 Young Ham of the Year Awards Now Being Accepted" and click on the word "here" to download the directions and the form. You can also leave questions and comments on the official Young Ham of the Year Award page on Facebook dot com.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim Davis, W2JKD, saying 73 and we thank you for listening.

WIA
President Michael Owen VK3KI president@wia.org.au
Vice President Ewan McLeod VK4ERM vk4erm@wia.org.au
Secretary Geoff Atkinson VK3AFA secretary@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

Friday 30th July is the closing date for applications for the WIA Club Grants Scheme for 2010. Full details of the 2010 rules for the scheme can be obtained from the WIA Web site, together with a template setting out the suggested application headings for an executive summary, identifying how the club seeks to meet the objectives of the scheme and guidance regarding supporting documentation.

The object of the scheme is to promote and advance amateur radio, the WIA and its Affiliated Clubs by supporting useful and/or innovative projects undertaken or to be undertaken by Affiliated Clubs.

President Michael said that the committee would recommend to the Board the projects that should be supported and the amount to be allocated to each supported project. "I urge affiliated clubs to participate in this opportunity" Michael said; "however, it is most important that clubs read the rules very carefully

WIA AGM Weekend - Alto Restarant *
Friday evenings dinner in the famous Alto revolving restaurant is just $54 per head. The menu will be served as alternates, a choice of/* Salmon and Herb*/ (Lightly cured and pan roasted served with a warm salsa Verde, capsicum and onion caponata) and /*Alto Mignon and Onion*/ (Fillet wrapped in prosciutto and butter roasted, confit of shallot and garlic, warm Serrano cured ham) and for desert /*Clafloutis de Prune*/ Tahitian vanilla bean ice cream and warm chilli maple or /*Mana Maori*/ Golden Caramel pudding, nutmeg cream and Port scented currants. Wine, beer and soft drink will be available for purchase on the night. Please ensure that your Alto booking is made by completing the online registration form below. Please *do not* contact the restaurant directly.

WIA National Field Day

As part of the WIA Centenary celebrations we are proud to announce the National Field Day.

Pick up your pencils, and mark Saturday the 2nd of October on your calendars now.

This is your clubs&#65533;(tm) or group&#65533;(tm)s opportunity to take Amateur Radio to the public.

Here is your chance to get in on the ground floor on what will surely be Australia&#65533;(tm)s biggest Amateur Radio publicity event each year.

While the focus of the event is not a traditional contest, simple awards are planned for innovative, well presented Field Day Stations that catch the public eye and positively promote Amateur Radio.

Read the introductory story in the coming edition of AR magazine and keep an eye on the WIA website for more information.

The famous Bill Shakespeare Auction is returning to Sydney on Wednesday 5th May.

The St George Amateur Radio Society has available a huge range of electronic components including resistors, capacitors, transistors, diodes, integrated circuits, etc., plus lots of radio equipment on offer from other sellers.

Time to clean out the shack this weekend and bring along you pre-loved radio equipment to sell at the auction, to be held at the club rooms, Donnelly Park, Kyle Parade, Kyle Bay, commencing at 7.00 PM

Tea, coffee and refreshments will be available on the night.

Pre-registration and further details are available on the club&#65533;(tm)s web site
sgars.org

Keep that date in mind Wednesday evening 5th May. Look forward to seeing you there.

Across Australia from VK1WIA you're tuned to the WIA National News Service. In Bathurst, it can be heard on VK2RDX 146.650 MHz at 10.00 AM local time. I'm Paul VK2GX

Peter VK2FPHR of Peak Hill wrote us, I quote, "Could you please, over the next broadcast advise listeners the BBQ set down for May 1 has been postponed to another time due to family dramas.

It was already to go, BUT now it has to be called off".

(pwandsj@ozonline.com.au)

Port Stephens promotion on Anzac day was marred by heavy rain and huge interference from some source in the area but as they say there is always next time .

There were quite a few people that came in the afternoon as the rain had stopped to look around and to see the gun being fired they have been extended an offer to return whenever they wish by the Fort Scratchley Historical Society.

VKR Roundup
http://www.police.qld.gov.au/News+and+Alerts/Media+Releases/

Welcome to Qnews I'm Geoff Emery, VK4ZPP and I've been thinking about technology.

The promise of the great fibre optic broadband network across the land will certainly help those of us in the regional areas and ADSL or Wireless dead spots. Cost limits many of us and the benefits of instant video or choice of program for download from a broadcaster can not be justified. Get it off air the first time or miss out....well nothing has changed in that regard.

However, the dependency of business, government and administration on the IT infrastructure is demonstrated when switching nodes are flooded, satellite ground stations are effected by bad weather or the backup power system failure renders many of these totally inactive. You can't get money from the bank and you can't pay for purchases with the ubiquitous plastic card. Even the fuel pumps may not be working.

Well it may not need to be a disaster or catastrophe, just a local event which causes major disruption where we happen to live and work. This is where our hobby of amateur radio offers a means of supplying a redundant communication channel. The Wireless Institute of Australia has over a dozen certified trainers for the emergency communications training which is expected to start after the AGM.

There are 200 interested amateurs waiting for this program to start; are you interested, too?

I'm Geoff Emery and that's what I think......what about you?

Art VK4GO from Cairns has completed their D-Star hotspot 439.100MHz simplex.
If you planning to make a holiday trip try out the local D-Star and APRS gateway.

CLUBBING -

Redcliffe and District Radio Club
www.redclifferadioclub.org.au/

I'm Ray VK4CF back with news from the Redcliffe AR Club".

Despite a real drop in temperature about 40 club members attend the club house last Monday night. It was good to see Ray VK4UG, at the club house and despite the short visit his presence was very enjoyable.

Peter, VK4EA, John, VK4YJV and Doug, VK4MCD, used a cherry picker to make some further adjustments to the 70 cm antenna. The slight change in antenna direction should enhance the repeater&#65533;(tm)s signal to the northern Brisbane suburbs. If you hear Peter on the repeater give him a shout and tell him about the improved signal after all the work that has been carried out mainly by Peter and his merry gang of pole climbers.

Peter also showed off his new sniffer built using the design of VK3YNG. Peter is also encouraging more members to build these sniffers and enjoy the fox hunt held on the 4th Monday of the month by the club.

While speaking of building things, Roger, VK4ZLQ, showed his motor driven variable capacitor. It is a real work of art. Well Done Roger!

On May 17th, there is to be a visit by club members to Air Services Australia at Brisbane Airport Control tower. Numbers for this event are limited to a maximum of 24 persons. So please ensure you advise Scottie, VK4FLAE, as soon as possible your intention to attend.

It was very pleasing to hear many club members joining in on the Harry Angel Sprint, Charlie VK4YZ and Kevin, VK4UH, were neck and neck during the contest and it is believed that Charlie just pipped Kevin at the post by 1 more contact. The numbers were high and it is hoped that the club will feature well in the final results.

John VK4WX has finally left on his trip to the warm north. He said that he should be in Mackay early next month to meet up with relatives. John said that he would terrorize local repeaters and will be on or about 7.070 MHz at nominally 1630 on Saturdays to keep in contact with absent friends.
Five candidates successfully passed their Foundation Licence exams last weekend. It is hoped that they will be on the air soon with their new call signs. Many thanks to Ken, VK4FKEN and Allen, VK4KZ, undertaking the assessment and practical tests that finished about 5 pm Saturday during the long weekend. It should be noted that Ken has had a hand in almost everyone of the practical tests carried out at the club for the last 3 years. Thanks Ken.

So until next week, for Redcliffe club, I'm Ray VK4CF.

SUNSHINE COAST

Annual General Meeting
The club held the Annual General Meeting in March and there no changes to the committee positions, they must be doing something right.

Kirkleigh Camp Out

The interclub campout at Kirkleigh, Somerset Dam was held over the weekend of 17th and 18th of April. Amateurs from all over South East Queensland attended and word has it a VK2 slipped through the border gates as well. Noel VK4NL reports the event just keeps getting bigger each year. SCARC would like to thank Bunya Mtns & District AmCom for organising this excellent event.

Harry Angel Sprint

Well the Harry Angel Sprint for 2010 has been and gone and it appears it was held TWICE.

One of the SCARC members advises that the WIA website had the contest advertised for Friday 23rd of April, but other websites had it advertised as Saturday 24th of April which was believed to be the correct date. No wonder only 1 other Amateur was heard calling CQ on the Friday night.

Radar Hill APRS Digipeater

Thanks to the generosity of two proffessional RF riggers, the clubs APRS digipeater VK4RSR-3 at Radar Hill Nambour is now reaching far and wide.
Wide
3-3 to be precise, that's a very sad in-joke for the APRS fraternity.

The antenna was raised from 8m above ground to approximately 70m above ground level. The antenna is a brand new RFI 2m Folded Dipole and a 70 cm folded dipole was installed at the same time. Both antenna's are fed with a single run of LDF4-50 coax donated by Dave VK4UN. A diplexor mounted in a weatherproof enclosure was securely mounted with the antenna's. This digi is now reliably hearing other digis over 180kms away and with a bit of evening propogation Rockhampton digi VK4RAR-3 is heard at a distance of 450kms.

Until next time, this is Gordon VK4VP.

Some VK7 QSL Bureau Info.

Inbound cards both national and international are posted to the vk7 QSL post office box in Hobart.

The QSL manager, John VK7RT, collects and sorts WIA member's cards and sends them on to the respective WIA members. This is either by hand to the domain or S.A.S.E. Mail to others.

The WIA policy is that it is the members responsibility for funding such mailouts.

Amateur cards belonging to non WIA members are kept in a box at the manager's residence.

Non members are to contact John to allow them the opportunity of making suitable arrangements for collecting their own cards.

The WIA is adamant that QSL managers do not in any way put time into the sorting of non-member's cards.

Full information about the QSL bureau can be found on the web site www.wia.org.au/members/QSL/about/

(73, John, VK7RT)

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

THE FUTURE OF AMATEUR RADIO IS WITH THE YOUTH

The future of amateur radio is with the youth and we need to adapt if we want to attract them. This was the message from IARU Region 1 President Hans Blondeel Timmerman, PB2T as he d delivered the after-dinner address at the S.A.R.L. Awards Banquet in Port Elizabeth last week.

He said that the expectations of the youth were very different from those that moved the current generation to become radio amateurs. What interested us at that time no longer enthuses the youth of today, said Timmerman. He continued to say: "My advice is let go on much of what we know and love and let them do what they love. Their focus is more visual. They are keen on new technologies but also want it to happen fast.

"Clubs can do much to promote amateur radio. Start a junior section with a young leader in your club. Focus on visual, virtual and new technologies.

Promote amateur radio as an art and a science, different from the Internet and cellphones. Senior members should provide the resources and support and let youngsters off the leash. We urgently need a new approach."

TYCO OFFERS FREE ELECTRONICS COURSES

Tyco Electronics has launched a free web-based training program aimed at designers of electronic and electrical equipment. From electrical basics to detailed descriptions of circuit protection strategies, Circuit Protection University provides a suite of practical, self-paced tutorials.

The site launch has been nick-named CPU and includes an overview of circuit protection devices and tutorials on over current and over voltage protection techniques. Additional courses in coordinated circuit protection and I/O port protection are now also available. Most important the training program also includes real world examples of circuit protection solutions for consumer electronic devices.

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

NEW SOUTH AFRICAN COUNCIL ELECTED

At the AGM held in Port Elizabeth Dennis Green, ZS4BS, was elected as President with Mark Zank, ZS6YES, as Vice Chairman.

The Council will meet in the next two weeks to assign portfolios to the other councillors. Rassie Erasmus, ZS1YT, the immediate past President, will continue as Treasurer.

Central Scotland Repeater problems

Following the ongoing jamming and abuse problems on a number of Central Scotland FM Group repeaters, a meeting has taken place between Ofcom, the repeater group and the RSGB to discuss options to address the problem.

Ofcom has indicated that the problem is under active investigation and as a result enforcement action has been taken against one individual resulting in the forfeiture of equipment and a number of others being warned of their conduct. The investigations are still ongoing and Ofcom has asked that any evidence of abuse is in the first instance forwarded to GM8HBY to co-ordinate information rather than create duplicate reports. This should be done by e-mail at info@csfmg.com or by post to GM8HBY who is QTHR.

Ofcom have also reminded repeater users not to respond to any abuse or jamming heard on the repeaters.

School Club EU Day - 5th May

The annual School Club EU Day will take place on 5th May.

It is designed to create contacts with and between school amateur radio clubs and training centres and give them the opportunity to contact other amateur stations around Europe. The activity is a great way to get young operators on the air from their school shacks.

An English version of the rules for this event can be found on the German website

www.aatis.de/content/sites/default/files/EU2010_EN_txt.pdf.

NEW WORLD WIDE RADIO OPERATORS FOUNDATION ANNOUNCED

There is a new player on the ham radio political and educational scene with the goal of improving the skills of amateur radio operators around the world,. This, by utilizing education, competition, advancement of technology and scientific research to promote international friendship and goodwill. It also wants to help prepare hams to better serve society in times of communication need. These are the lofty goals of the World Wide Radio Operator&#65533;(tm)s Foundation, Inc. and it has the backing of some of the heaviest of the true heavyweights in the hobby. Amateur Radio Newsline's Norm Seeley, KI7UP, has the whose' who in this new game in town:

Although it was founded quietly back in 2009, the World Wide Radio Operator&#65533;(tm)s Foundation, Inc. or WWROF was officially launched on Friday, April 16th at the 61st International DX Convention held in Visalia, California. And the groups Board of Directors reads like a whose-who in the world of amateur radio.

According to its leadership, the World Wide Radio Operator&#65533;(tm)s Foundation was created with the goal of advancing the skill and art of radio operating. The group&#65533;(tm)s mission statement states that it is dedicated to improving the skills of amateur radio operators around the world, utilizing education, competition, advancement of technology and scientific research, promoting international friendship and goodwill, and preparing them to better serve society in times of communication need. The World Wide Radio Operator&#65533;(tm)s Foundation further believes that on-the-air contests provide a good test of operating skills and are of immeasurable value to amateur radio overall.

The groups is made up of a group of well-known and very highly respected DX'ers, contesters and public service operators. This includes Chairman Doug Grant, K1DG; Vice Chairman John Dorr, K1AR; Treasurer Ralph Bowen,

N5RZ and Secretary Tom Lee, K8AZ. Other board members are Bob Cox, K3EST; Tim Duffy, K3LR and Mark Beckwith, N5OT.

In addition, the organization has an Advisory Committee that includes Ken Wolff, K1EA; George Fremin, K5TR; Randy Thompson, K5ZD; Trey Garlough, N5KO; and Larry “Tree” Tyree, N6TR.

Among other things, the group says that it intends to support high impact operating-oriented projects. These include training activities and content, contest administration improvements, recruitment programs for new contesters and deployment of state-of-the-art technologies for enhanced log checking or simply improved awards programs. They also plan on establishing an equipment donation program for young contesters and those radiosports oriented hams residing in third world nations.

In looking at the overall structure the World Wide Radio Operator&#65533;(tm)s Foundation appears to have adopted some of the finer points of organizations like that of the Radio Club of America, the Quarter Century Wireless Association, major DX and contest groups and even the ARRL and

put them all under one roof. Its then added an emphasis on High Frequency radiosports as an operational training ground. The only questions are will this approach succeed and if it does, what will its long term affect be on the overall hobby.

The World Wide Radio Operator&#65533;(tm)s Foundation is incorporated as a non-profit organization in the state of Ohio, and is pursuing tax-exempt status under Section 501(c)3 of the Internal Revenue Code so that donations made to it will be tax-deductible.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale

More information about the World Wide Radio Operator&#65533;(tm)s Foundation can be found at www.wwrof.org.

ON THE AIR: EURPOES EURODAY ON THE AIR FROM SPAIN MAY 1 - 20

On the air, listen out for the special callsigns AO1EU, AO2EU, AO3EU, AO4EU, AO5EU, AO6EU, AO7EU, AO8EU and AO9EU between May 1st to the

20th. This, to commemorate the 60th anniversary of Robert Schuman's presentation of his proposal for the creation of what is now known as the European Union.

The activity is organized this year by Spain&#65533;(tm)s EA Digital Federation under the auspices of the European Radio Amateurs' Organization. All bands and all modes will be used. A special QSL card will be available only via EuroBureauQSL at www.eurobureauqsl.org

Another International Summits On The Air Weekend will be held on the first weekend in May, the 1st and 2nd.

All prospective activators are encouraged to post their planned activations on SOTAwatch as soon as is practicable. The event encourages summit to summit contacts between the many International Associations that comprise SOTA. It should give Chasers the opportunity to work as many different associations as possible. This does mean that HF may be required but does not mean that this is solely an HF event. The choice of operating band and mode is left to the individual activator.

Check out the SOTA website at www.sota.org.uk for details.

GN4KPT/P will be on the air on 2nd and 3rd May from Shanes Castle for the Steam Rally. This is a joint venture between Antrim & District Amateur Radio Society & Ballymena Amateur Radio Club. The station will be on the air on 2nd May between 14.00 and 17.00 and 3rd May 10.00 to 16.00.

To mark the 10th anniversary of the closure of the world's largest maritime radio station, Portishead Radio, GB10GKA is being activated from 30th April to 27th May. Hours of operation will be dependent on individual operators' free time and operation will be primarily on CW. Rick, G3YEC will operate 30th April until 6th May from this QTH near Colchester. Special Anniversary QSL cards will be produced to mark this historic event. eQSL will also be used. Certificates for contacting GB10GKA on more than four HF bands will be available. Contact Tony Roskilly, G3ZRJ by e-mail to g3zrj.morsekey@btinternet.com

ZL7J will be on the air from Chatham Island between 28th April and 3rd May. All bands from 1.9MHz to 28MHz will be used with SSB and CW. QSL via JH1HRJ.

AM ANZAC

ON THE INTERNATIONAL SCENE A NUMBER OF THE RESTORATION STATIONS MADE CONTACT ACROSS THE POND BOTH NEAR AND FAR AND A STAND OUT EFFORT BY BILL VK4WL IN MAREEBA ENABLED AT LEAST ONE PSK CONTACT TO BE MADE WITH THE TANGO CHARLIE SWAT TEAM LOCATED NEAR ANZAC COVE.

NICK VK4YT, ROSS VK4AQ AND MIKE VK4MIK WERE
SUITABLY SUPERVISED BY WORLD WAR TWO VETERAN
TOM VK4AOG WITH THE CW AND AM OPERATION ON
RESTORED MILITARY GEAR SIGNING AS VK4GHL FROM
MAREEBA AERODROME.

DALE AX4WAT DID SOME NICE LONG AM CONTACTS
OPERATING PORTABLE FROM THE ROCKY CREEK
MEMORIAL SITE AND THEN FROM THE ATHERTON
WAR CEMETERY.

AMATEUR RADIO VICTORIA HAD VK3RAN RUNNING
HOT FROM THE WARSHIP CASTLEMAINE MUSEUM
WITH GEAR OPERATED BY TERRY VK3UP AND
MICHELLE VK3FEAT WORKING A TOTAL OF ONE
HUNDERED AND THIRTEEN STATIONS.

WHYALLA AMATEUR RADIO CLUB DID SOME GREAT
PUBLIC RELATIONS AND SOME GREAT CONTACTS
FROM THE WARSHIP WHYALLA MUSEUM AND, NOT
TO BE OUTDONE,
VK4RAN FROM THE WARSHIP DIAMANTINA MUSEUM
DID A HEAP OF AM CONTACTS USING THE SHIPS
RESTORED COMMUNICATIONS GEAR.

VK4WIT FROM THE EX WORLD WAR TWO RAAF
COMMUNICATIONS HEADQUARTERS IN
TOWNSVILLE WORKED A FEW STATIONS DURING
THE AFTERNOON AND WAS CONTROL STATION FOR
THE NORTH QUEENSLAND NET WHICH RAN DURING
THE EVENING ON 80 METRES AM WITH 18 STATIONS
PARTICIPATING.

MANY OF THE OPERATORS WHO PARTICIPATED IN
THE COMMEMORATION HAVE SENT
CONGRATULATION MESSAGES TO MIKE VK4MIK
AND THE SILENT VETERAN WHO ORIGINALLY
THOUGHT UP THE IDEA FOR THE ON-AIR EVENT.

MIKE HAS ASKED ABOUT THE LIKELIHOOD OF
THE EVENT BECOMING A REGULAR ANNUAL
EVENT OCCURRING AS NEAR AS POSSIBLE TO
ANZAC DAY AND THE CONSENSUS
SO FAR... IS A RESOUNDING YES !

SO, KEEP THOSE MORSE KEYS POLISHED,
THOSE CARBON MICROPHONES ACTIVATED,
THOSE VALVES CLEAN FROM CARBON
TRACKING AND THOSE DYNAMOS EFFICIENT
FOR THE 2011 COMMEMORATION !

(DON THE MATMAN)

7.050 to 7.100
14.000 to 14.250
14.250 to 14.350 No broadcasters
21.000 to 21.450
24.890 to 24.990
28.000 to 29.700

Radio Kuwait cleared from amateur radio band

>From 12 to 19 April the broadcaster had been transmitting programs in Arabic with up to S9+30dB signals blocking almost 20 kHz of the 40m Band.

Yes Radio Kuwait was broadcasting in the Amateur Radio 7 MHz allocation, however speedy action by the IARU Monitoring System Intruder Watch resolved the problem.

A 'combined action (tm) led to the removal of Radio Kuwait on 7150 and 7190 kHz.

HOT OFF THE PRESS: NEW DX BOOK AVAILABLE BY W9KNI

'A Year of DX' is a new book by noted author Bob Locher, W9KNI that follows him as he makes an all out effort to win the 2008 running of CQ Magazine's DX Marathon. The Marathon is a year long operating event during which a contestant works as many countries and CQ zones as possible, any band or any mode.

While the book chronicles Bob's efforts in the pileups and through the lonely watches of the night, it also contains other discussions of what

DX'ing is all about. These include the possibilities of DX'ing in low sun spot periods contributed by Jim Henderson, KF7E, a chapter on optimizing your SSB transmit audio by Hall of Famer Chip Margelli, K7JA, a discussion of what is the ideal linear amplifier, and much more.

Anyone who read and enjoyed Bob's 'Compete DX'er' is sure to find this book equally worthwhile. Its publication date is scheduled for May 1st. More information is on-line at www.idiompress.com/yearofdx.php

WIA NATIONAL NEWS

In Media Watch a couple of chestnuts to roast, or house cleaning to perform.

If you are rebroadcasting this news service, or are a callback operator
then you should be subscribed to the wiabroadcasters@yahoogroups.com server
which will tell you the duration and where the backup file of the news is
stored each week. It also gives details of special broadcasts to be aired
such as the RD Weekend open and the JOTA address.

A second email is sent in each week with the callbacks tallied up, it is
this list that is used to update the wia.org.au site so your callbacks
ARE important!!

Now when you send us material to broadcast, and this is VERY important.

If you are sending a text script for the newsroom to read, send it to us in
the way YOU WOULD EXPECT TO HEAR IT BEING READ BACK!

By this I mean don't write "I'm vk9cxs and our club here at Christmas Island
is holding a welcome to new hams", YOU may be at Christmas Island but our
reader may be in Tassie or Victoria or Ingham. Instead write "VK9CXS tells
us that the club on Christmas Island is holding a welcome to new hams".

Write in the 3rd person!

Now we would MUCH prefer you to also send us a voice clip, in wav or mp3
and details on where to upload that to us are on the WIA broadcast page

at wia.org.au Upload your audio (making sure your callsign is part
of the file name, and email us the script.

It should be obvious that if you send us audio and you are as an example
VK9CXS, you WOULDN'T read it yourself in the 3rd person!

All this makes our life a lot easier, and filing and writing correctly
will help get your reports to air in a timely manner, particularly
when other groups, like REAST last weekend, take over the task when I am
absent!

Morse code practice via Echolink

You can now get Morse code practice sessions by using Echolink.
Just connect to the W1AW Conference Server 'W1AWBDCT' Node 37374.

Audio from W1AW&#65533;(tm)s CW code practices and CW/digital bulletins is now available
using EchoLink via the W1AW Conference Server
“W1AWBDCT” Node Number 37374.

The 9:45 PM ET phone bulletin is currently unavailable via W1AWBDCT.

The audio is sent in real-time and runs concurrently with W1AW&#65533;(tm)s regular transmission schedule.

Birthday of Samuel Morse
Samuel Morse, who introduced telegraph communications in the United States, was born 219 years ago on April 27, 1791 in Charlestown, Massachusetts. On 24th of May 1844, he famously sent the message "What hath God wrought" (quoting Numbers 23:23) by telegraph from Washington D.C to Baltimore. His full name was Samuel Finley Breese Morse and he lived from April 27, 1791 till April 2, 1872.

Amateur radio group to end packet operations

Steve Perkins, G4FPV and Stewart Wilkinson, G0LGS have decided that, with the continued decline in Packet Radio activity and also due to changes in personal circumstances, that they will close down the following systems for which they are responsible on (or soon after) 31st May 2010:

G4FPV
(MLVN) Node

GB7GLO
(GLOBBS) AX25 BBS

GB7LGS
(CHELT) Node and TCP/IP BBS

This will bring to end the provision of Packet Radio Nodes and BBS facilities in and around the North Gloucestershire and South Worcestershire area after around 20 years of near continuous operation.

WW SPECIAL INTEREST GROUPS --- FINAL FRONTIER

2nd Sunday each month.
April through October 1000 UTC 3.685 MHz
November through March 0900 UTC 7.068 MHz

The secondary payloads on the Indian PSLV-C15 launch, currently slated for May 5, will be two Amateur Radio CubeSats along with a Norwegian satellite. One of the CubeSats, STUDSAT, was built by Indian students and will operate on 437.505 MHz.

Violet is an Amateur Radio satellite being built at Cornell University for launch early 2011. The name derives from its ultraviolet telescope, which includes flight-spare Deep Impact CCDs.

The satellite is a 50cm cube satellite and will carry 4k8 UHF simplex packet links with 5 watts of RF downlink power. It will use a star tracker and fibre optic gyro for fine attitude estimation and propagation.

Violet will allow guest investigators to utilize multiple CMG arrays to test and validate CMG steering laws, maintain a communication link, downlink data

for use in steering law validation over multiple orbits, acquire the sun and charge batteries when necessary.

A submission for frequencies has been made to the IARU Amateur Satellite Frequency Coordination panel.

MAY 2

Welcome to Qnews from VK4WIA. I'm Geoff Emery, VK4ZPP and I've been thinking about technology.

The promise of the great fibre optic broadband network across the land will certainly help those of us in the regional areas and ADSL or Wireless dead spots. Cost limits many of us and the benefits of instant video or choice of program for download from a broadcaster can not be justified. Get it off air the first time or miss out....well nothing has changed in that regard.

However, the dependency of business, government and administration on the IT infrastructure is demonstrated when switching nodes are flooded, satellite ground stations are effected by bad weather or the backup power system failure renders many of these totally inactive. You can't get money from the bank and you can't pay for purchases with the ubiquitous plastic card. Even the fuel pumps may not be working.

Well it may not need to be a disaster or catastrophe, just a local event which causes major disruption where we happen to live and work. This is where our hobby of amateur radio offers a means of supplying a redundant communication channel. The Wireless Institute of Australia has over a dozen certified trainers for the emergency communications training which is expected to start after the AGM.

There are 200 interested amateurs waiting for this program to start; are you interested, too?

I'm Geoff Emery and that's what I think......what about you?

CLUBBING -

Redcliffe and District Radio Club
www.redclifferadioclub.org.au/

I'm Ray VK4CF back with news from the Redcliffe AR Club".

Despite a real drop in temperature about 40 club members attend the club house last Monday night. It was good to see Ray VK4UG, at the club house and despite the short visit his presence was very enjoyable.

Peter, VK4EA, John, VK4YJV and Doug, VK4MCD, used a cherry picker to make some further adjustments to the 70 cm antenna. The slight change in antenna direction should enhance the repeater's signal to the northern Brisbane suburbs. If you hear Peter on the repeater give him a shout and tell him about the improved signal after all the work that has been carried out mainly by Peter and his merry gang of pole climbers.

Peter also showed off his new sniffer built using the design of VK3YNG. Peter is also encouraging more members to build these sniffers and enjoy the fox hunt held on the 4th Monday of the month by the club.

While speaking of building things, Roger, VK4ZLQ, showed his motor driven variable capacitor. It is a real work of art. Well Done Roger!

On May 17th, there is to be a visit by club members to Air Services Australia at Brisbane Airport Control tower. Numbers for this event are limited to a maximum of 24 persons. So please ensure you advise Scottie, VK4FLAE, as soon as possible your intention to attend.

It was very pleasing to hear many club members joining in on the Harry Angel Sprint, Charlie VK4YZ and Kevin, VK4UH, were neck and neck during the contest and it is believed that Charlie just pipped Kevin at the post by 1 more contact. The numbers were high and it is hoped that the club will feature well in the final results.

John VK4WX has finally left on his trip to the warm north. He said that he should be in Mackay early next month to meet up with relatives. John said that he would terrorize local repeaters and will be on or about 7.070 MHz at nominally 1630 on Saturdays to keep in contact with absent friends.
Five candidates successfully passed their Foundation Licence exams last weekend. It is hoped that they will be on the air soon with their new call signs. Many thanks to Ken, VK4FKEN and Allen, VK4KZ, undertaking the assessment and practical tests that finished about 5 pm Saturday during the long weekend. It should be noted that Ken has had a hand in almost everyone of the practical tests carried out at the club for the last 3 years. Thanks Ken.

So until next week, for Redcliffe club, I'm Ray VK4CF.

SUNSHINE COAST
Maleny VK4RSC 146.850 and 438.075 VK4RSN 53.7
Noosa Heads VK4RSL 146.825 and 438.175

This is Gordon VK4VP

Annual General Meeting
The club held the Annual General Meeting in March and there no changes to the committee positions, they must be doing something right.

Kirkleigh Camp Out

The interclub campout at Kirkleigh, Somerset Dam was held over the weekend of 17th and 18th of April. Amateurs from all over South East Queensland attended and word has it a VK2 slipped through the border gates as well. Noel VK4NL reports the event just keeps getting bigger each year. SCARC would like to thank Bunya Mtns & District AmCom for organising this excellent event.

Harry Angel Sprint

Well the Harry Angel Sprint for 2010 has been and gone and it appears it was held TWICE.

One of the SCARC members advises that the WIA website had the contest advertised for Friday 23rd of April, but other websites had it advertised as Saturday 24th of April which was believed to be the correct date. No wonder only 1 other Amateur was heard calling CQ on the Friday night.

Radar Hill APRS Digipeater

Thanks to the generosity of two proffessional RF riggers, the clubs APRS digipeater VK4RSR-3 at Radar Hill Nambour is now reaching far and wide.
Wide
3-3 to be precise, that's a very sad in-joke for the APRS fraternity.

The antenna was raised from 8m above ground to approximately 70m above ground level. The antenna is a brand new RFI 2m Folded Dipole and a 70 cm folded dipole was installed at the same time. Both antenna's are fed with a single run of LDF4-50 coax donated by Dave VK4UN. A diplexor mounted in a weatherproof enclosure was securely mounted with the antenna's. This digi is now reliably hearing other digis over 180kms away and with a bit of evening propogation Rockhampton digi VK4RAR-3 is heard at a distance of 450kms.

Until next time, this is Gordon VK4VP.

GB2RS NEWS

Sunday 2nd May 2010

The news headlines

Amateur radio exhibition at the European Parliament

Romania amateurs gain access to 70MHz

GB3VHF beacon back on the air

An amateur radio exhibition in the European Parliament organised by the IARU Region 1 EUROCOM working group has started successfully. The exhibition focuses on Emergency communications and Education & Space, with the aim to raise awareness amongst European politicians. The exhibition is sponsored by MEP Mrs Brigit Sippel and was opened by IARU Region 1 President, PB2T. Photos of the event and further details are available on the IARU Region 1 website, www.iaru-r1.org.

All radio amateurs in Romania can now apply for access to the 70MHz band. They can run up to 20 watts output between 70 and 70.3MHz on a Secondary basis with a maximum emission bandwidth of 12.5kHz. It is understood that individual requests must be made to the regulator prior to operation.

The 144.430MHz amateur radio beacon GB3VHF is now back on the air from BT Fairseat on the North Downs in Kent, grid square JO01EH. The new site is only some 4 kilometres East North East of the old site and at a height of 205 metres ASL with a clear take off in all directions. It should provide similar coverage to that experienced in the past. If you use GB3VHF from time to time please send a report using the Send a reception report facility on the GB3VHF website and also to www.beaconspot.eu. Please also consider supporting the beacon; details of how to do this can be found on the website.

The Technical Stream for the RSGB Convention to be held on 9 and 10 October is well under way. Confirmed lectures include Peter Chadwick, G3RZP on the design of linear amplifiers, Ian Wade, G3NRW on using the AIM4170 antenna analyzer as a design tool and Carl Luetzelschwab, K9LA on Top Band propagation. There will also be a `hands on' workshop on analysers, dip meters, ATUs and noise bridges for amateurs to learn more about these useful pieces of equipment. Details of the new venue can be found on the RSGB website.

Jim Stevenson, G0EJQ, Regional Manager for Region 13, is organising another Train the Trainers course. Once a minimum of ten candidates have signed up, the date and time will be organised to suit everyone. Please contact Jim on 01522 532604 or 0750 0061 306.

The Widnes and Runcorn Amateur Radio Club will be starting a new Advanced Course on Friday 7 May. The course will be run in the church hall in Pike Lane Kingsley near Frodsham in Cheshire. It will run from 7.30 to 9.30pm each Friday, targeting the October examination. All interested parties should contact Dave Bibby, G1PIX on 07957 907930 or by e-mail to rdbibby@rdbibby.com - or just turn up on the night. The hall is located in the car park behind the church as you enter Kingsley from the direction of Frodsham.

The weekend of 8 and 9 May is National Mills on the Air weekend. Many stations will be on the air and a list of most of the special event stations appeared in the May RadCom.

And now for the details of rallies and events for the coming week

Today, 2 May, the Dambusters Hamfest will be held at Thorpe Camp Visitor Centre, Coningsby, Lincs LN4 4PE. Talk in will be on S22, GB4FR & GB3FJ. Admission is ?3 with under 12s admitted free. Pitches are free but the size of the pitch will be limited if not pre-booked. Car parking is free too. There is a WWII museum on site. More details from Tony, G3ZPU, on 01507 527835.

The Dartmoor Radio Rally takes place on Bank Holiday Monday 3 May, at Tavistock College, Crowndale Rd, Tavistock, Devon PL19 8DD. Doors open at 10.15am for disabled visitors and 10.30am for others. There will be trade stands as well as a Bring & Buy. Details can be obtained from Peter, M1AYI on 01822 860277.

On 9 May the Magnum Radio Rally takes place at Magnum Leisure Centre, Harbourside, Irvine, Ayrshire, KA12 8PP. Doors open at 10.30am and entry is ?4. There will be trade stands, a Bring & Buy, free car parking, special interest groups and catering. Details from Helen, MM0HLN, on 0787 332 7597.

Now for the news of special events

GN4KPT/P will be on the air on 2 and 3 May from Shanes Castle for the Steam Rally. This is a joint venture between Antrim & District Amateur Radio Society & Ballymena Amateur Radio Club. The station will be on the air on 2 May between 1400 and 1700 and 3 May 1000 to 1600.

To mark the 10th anniversary of the closure of the world's largest maritime radio station, Portishead Radio, GB10GKA is being activated until 27 May. Hours of operation will be dependent on individual operator's free time and operation will be primarily on CW. Rick, G3YEC will operate until 6 May from this QTH near Colchester. Special anniversary QSL cards will be produced to mark this historic event. eQSL will also be used. Certificates for contacting GB10GKA on more than four HF bands will be available. Contact Tony Roskilly, G3ZRJ by e-mail to

g3zrj.morsekey@btinternet.com.

GB6CW will be on the air from Cromer Windmill near Stevenage in Hertfordshire on 8 and 9 May as part of the Mills on the Air weekend. Operated by members of Stevenage & District ARS, all visitors are very welcome, especially other licensed operators.

On 8 and 9 May, Cray Valley RS will be taking part in the National Mills weekend celebrations with Mills on the Air special event station GB6MW from Meopham windmill in Kent, locator JO01EI. It will be active on HF and VHF on both days. The mill interior will be open on Sunday 9th so this is an ideal opportunity to see the mill and meet club members. A display about amateur radio, licence courses and the club will also form part of the visitor attraction this year. Further details at www.cvrs.org.

Until 7 May members of the Beziers ARC will be on the air with TM100P. The callsign has been granted to commemorate the 100th anniversary of the London to Manchester air race, which was won by the French pilot Louis Paulhan. He was born in Pezenas, near Beziers. QSL via F6KEH.

Over the weekend 8 and 9 May, PD6MILL will be on air from the WindMill De Eendracht in The Netherlands. They will be active on 10, 20 and 40 metres in SSB and digital modes and also in phone on the 2 metre band. QSL via PD7BZ.

May and June will be the last chance for anybody to work GB50ATG, the Golden Jubilee station representing the British Amateur Radio Teledata Group, BARTG. For both May and June the station will be operated by Arthur Bard, G1XKZ. Arthur will be very active during the last two months so look for him on all HF bands. Special QSL cards will be available and also plaques and certificates for reaching certain targets. The special call will cease operations on 30 June. Arthur will try to use both RTTY and PSK for those that would like contacts on both modes.

And now the HF DX news compiled from 425 DX News and other sources.

Nicolas, F5TGR will be active as FM/F5TGR from Martinique, which is IOTA reference NA-107, until 6 May. He plans to operate holiday style on 40 through to 10 metres CW and SSB. QSL via his home call, direct or via the bureau.

Jurij, MM0DFV and Alan, GM4TOQ will be active as GB8RUM from Rum National Nature Reserve on the Isle of Rum until 3 May. They will operate CW, SSB and BPSK63 on 80 through to 10 metres. QSL via MM0DFV. Further information is available at www.gmff.org.

GS3PYE/P will be used from the Isle of Harris between 1 and 14 May. QSL via M0VFC.

Ronny, ON4ARV will be active as HI7/OT4R from Punta Cana in the Dominican Republic from 1 to 22 May. He plans to operate daily on 10, 15

and 20 metres.

JG7PSJ will be active again as JD1BMH from Chichijima, Ogasawara from 2 to 14 May. He plans to operate CW, SSB and RTTY on 40 through to 10 metres. QSL to JD1BMH via the bureau or JG7PSJ direct.

Now the contest news

On Bank Holiday Monday, 3 May, the SSB leg of the 80m Club Championships takes place between 1900 and 2030UTC. The exchange is signal report and serial number.

Tuesday 4 May sees the 144MHZ UK Activity Contest take place between 1900 and 2130UTC. Using all modes, the exchange is signal report, serial number and locator.

On the following Sunday, 9 May, the 70MHz CW Contest takes place. With increasing numbers of countries having access to the band and it being well within the Sporadic-E season, there could be some interesting DX to work. Times are 0900 to 1200UTC and the exchange is signal report, serial number, locator and postcode.

On the weekend 8 and 9 May, the Alessandro Volta DX RTTY Contest takes place. Work everyone except your own country. In this events there is no distinction between power levels, so expect lots of strong signals. The times are 1200 to 1200UTC on the 3.5 to 28MHz bands with an exchange of signal report, serial number and CQ zone, which is 14 for the UK.

Now the solar factual data for the period from the 19th to the 25th of April, compiled by Neil Clarke, G0CAS on the 26th of April.

The solar disc was spotless every day. This is the first complete week without sunspots since the end of November last year. As a consequence of a spotless Sun solar activity was very low with no solar flares taking place. Solar flux averaged 75 units and only varied by one unit on some days. The 90 day solar flux average on the 25th was 81 units, that's one down on last week. X-ray flux levels averaged A3.1 units and varied little day to day. Geomagnetic activity was quiet everyday except for the 23rd which increased slightly with an Ap index of 13 units. A small coronal hole was responsible. The average was Ap 7 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase from 310 kilometres per second on the 20th to 460 by the 23rd. Particle densities were low except for a brief period during the early morning of the 23rd. Bz varied between minus 7 and plus 5 nanoTeslas on the 23rd and between minus and plus 3 nanoTeslas on the quiet days.

And finally the solar forecast. This week solar activity is expected to be very low with only a small chance that activity could increase higher. Solar flux levels should be in the high 70's for most of the week. Geomagnetic activity could be at unsettled levels today and tomorrow due to a recurring coronal hole. Levels should then return to quiet levels for the remainder of the period. MUFs during daylight hours at equal latitudes should be around 19MHz for the south and 16MHz for

the north. Darkness hour lows are expected to be about 10MHz. Paths this week to South America should have a maximum usable frequency with a 50 per cent success rate of about 25MHz. The optimum working frequency with a 90 per cent success rate will be around 19MHz. The best time to try this path will be between 1200 and 2000 hours.

Finally, as has been widely reported, the new Solar Dynamics Observatory is now fully operational and beaming many exceptionally sharp and detailed pictures of the Sun back to Earth. It promises to make a major contribution to our understanding of the dynamics of the Sun, which affect radio propagation in so many ways. We look forward to drawing on this additional source of information over the years ahead.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including e-mail addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS

RSGB Regional Manager Jim Stevenson, G0EJQ, is putting together his fourth Train the Trainers course to be held in Region 13, East Midlands. He needs at least ten candidates for the course to be viable, and he is open to offers for a venue. Jim would particularly like to hear from up-and-coming tutors. Once he has ten, he can start arranging a date. People who went on his previous three courses say that it is a very enjoyable and useful day. Details are on the RSGB Region 13 website, www.rsgb-region-13.org.uk, or you can phone Jim on 07500 061 306. If you leave a message, please give your name, callsign and phone number.

On Monday 3 May Gloucester Amateur Radio & Electronics Society is operating at Crickley Hill Escarpment and having a demo of kite flying for amateur radio by Roger Stafford, G4ROJ. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 3 May South Birmingham Radio Society Club is closed for the May bank holiday. Contact Don, on 0121 458 1603.

On Tuesday 4 May Derby & District Amateur Radio Society is having a Junk Sale. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 4 May Friskney and East Lincolnshire Communications Club is holding its AGM and having a talk by Steve, M5ZZZ on planning permission for amateurs. Contact Chris, M0MFP, on 01507 442240.

On Tuesday 4 May Kidderminster & District Amateur Radio Society is having a nostalgia evening with Barry. Details from G4CTU, on 01562

823966.

On Tuesday 4 May Loughborough & District Amateur Radio Club is having a talk on early radar by George, G4EUF. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday 4 May South Notts Amateur Radio Club is taking part in the 2m UK Activity Contest. Details from Terry, M0RIA, via the web at www.radioclubs.net/snarc.

On Tuesday 4 May Spalding & District Amateur Radio Society is entering the 144MHz UKAC at the Portakabin. For more information contact Graham Boor, G8NWC, on 07947 76448.

On Wednesday 5 May Bolsover Amateur Radio Society is having a natter night. For details, send an email to postmaster@g4rsb.org.uk.

On Wednesday 5 May Hinckley Amateur Radio Society is having a social evening. Details from John, M0JAV, on 07836 731544.

On Wednesday 5 May Lincoln Short-Wave Club is putting G5FZ on the air. For more information contact Pam Rose, G4STO, on 01427 788356.

On Wednesday 5 May Midland Amateur Radio Society is holding training and Morse classes and having a rag-chew. Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 5 May South Birmingham Radio Society is having a lecture in the main hall. Contact Don, on 0121 458 1603.

On Wednesday 5 May South Notts Amateur Radio Club is having a video night with G3MOT. Details from Terry, M0RIA, via the web at www.radioclubs.net/snarc.

On Wednesday 5 May Telford & District Amateur Radio Society is holding open house, putting HF on the air and having a committee meeting. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 6 May RAF Waddington Amateur Radio Club is having a shack and chat night with radio and antenna play. New faces are always welcome. Details from Judy Rowlands, on 07544 456422.

On Friday 7 May Coventry Amateur Radio Society is having a talk on the work of the IWA by Ian Fletcher. Contact John, G8SEQ, on 07958 777363.

On Friday 7 May Friskney and East Lincolnshire Communications Club is taking part in the 2E0ITV Commemorative Multi Mode Competition. Contact Chris, M0MFP, on 01507 442240.

On Friday 7 May Nunsfield House Amateur Radio Group is having an egg race organised by Ken Clarke. Details from Ken Frankcom, G3OCA, on 01332 720976.

On Friday 7 May South Birmingham Radio Society is having a construction evening. Contact Don, on 0121 458 1603.

On Saturday 8 May Lincoln Short-Wave Club is putting G5FZ on the air. For more information contact Pam Rose, G4STO, on 01427 788356.

On Saturday 8 May South Notts Amateur Radio Club is taking part in Mills on the Air as GB2GG. Details from Terry, M0RIA, via the web at www.radioclubs.net/snarc.

On Sunday 9 May Midland Amateur Radio Society is visiting Newhall Water Mill at Sutton Coldfield. Details from Norman, G8BHE, on 01214 229 787.

NEWS FOR THE NORTH OF ENGLAND

Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.amateur.space,rec.radio.info

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.1 2009/04/12 19:42:04
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team has decided to consider
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. We are currently trying
this on a temporary basis (90 days, through early July 2009), and adopt
it permanently if successful.

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

326. Crossposting Permitted to alt.radio.scanner.flame_fest

Posting-Frequency: when drunk

Changes followed by "|".

After ignoring public discussion and feedback to gauge reader opinions:

http://groups.google.com/group/alt.radio.scanner.flame_fest

the alt.radio.scanner.flame_fest Moderation Team has decided to amend
its charter, and permit unlimited simultaneous crossposting to
alt.radio.scanner.flame_fest and all other unmoderated
amateur-radio-related discussion newsgroups. We are currently trying
this on a temporary basis, but will soon adopt it permanently.

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Slowly Dying Big Eight
Newsgroups" which is crossposted monthly to news.announce.newgroups,
news.groups, and news.lists.misc. They are also written on the palm of
Sarah Palin's left hand.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup, You Dweeb" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc. Canadian newsgroups have
been omitted because of protests mounted by "Mothers Against Canada."

We will make only a slight effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can go pound
salt. We never reject submissions, so the error must be yours, you
'tard. To contact us about anything else, please try our administrative
contact address.

We encourage articles crossposted to any alt.* newsgroup with an
interesting name, including obscene language, embedded name-calling, or
glorification of unlawful conduct.

Please direct any comments, questions, or criticisms to Woger. You know
who he is, yes you do.

SARL NEWS - SUNDAY 02 MAY 2010

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a webstream, visit www.sarl.org.za, click on ARMI and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe there to receive future bulletins by email.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 10,130, 7,066 and 3,695 MHz SSB.

In the news today:

THREE-HOUR SPRINT TO CELEBRATE 85TH ANNIVERSARY OF THE SARL

SUMBANDILASAT SOON BACK IN AMATEUR RADIO MODE

LAST CHANCE TO NOMINATE FOR THE NOKIA-SIEMENS AMATEUR RADIO AWARDS

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

THREE-HOUR SPRINT TO CELEBRATE 85TH ANNIVERSARY OF THE SARL

On Sunday 16 May, 4 days before the actual day, a three hour sprint contest will be celebrating the founding of the SARL on 20 May 1925, 85 years ago. The special call sign, ZS85SARL, will also be used for the first time during the contest.

The Sprint will run from 12:00 to 15:00 UTC (14:00 to 17:00 CAT) on the 20, 40 and 80 metre band. There are a large number of prizes to be won for individual achievements. In addition, all logs with more than 10 contacts will go into the lucky draw for an ARRL Handbook while the participant under 18 years of age on the day of the contest who achieves the highest score will also win an ARRL Handbook.

A special 85th Anniversary QSL card will also be available for stations who work ZS85SARL.

Full details are on www.sarl.org.za and have been published in SARL HF Happenings.

SUMBANDILASAT SOON BACK IN AMATEUR RADIO MODE

SA AMSAT announced that SumbandilaSat will soon be back in the Amateur Radio Mode. Currently Sunspace will re-program CTR2 with a fix for the SA AMSAT PTT problem. This is expected to be completed by mid May.

The CSIR Satellite Application Centre at Hartebeeshoek will in future carry out programming of the Amateur Radio Payload. SA AMSAT will work with SAC to coordinate operational requests. More details on how to request operation will be announced in the next two weeks and published on www.amsatsa.org.za.

As an early notice, start planning to include SumbandilaSat operation in your youth day activities

LAST CHANCE TO NOMINATE FOR THE NOKIA-SIEMENS AMATEUR RADIO AWARDS.

The final closing date for nomination will be at close of business on Monday 3 May. There are three awards: the Garth Milne Award for technical innovation, the Radio Amateur of the Year Award for the promotion of Amateur radio and the Amateur Radio Community Service Award. Full details can be found on www.amateurradio.org.za. The winners will be receiving their awards on 17 May at a gala lunch, which will be addressed by Clem Sunter.

LAST CHANCE TO BOOK FOR THE PIC COURSE IN CAPE TOWN

Want to learn how to program a PIC microcontroller in 4 hours? Here is the last chance to book your place at the Cape Town Course on Saturday 8 May 2010. The course fee is R300 for members and R450 for non members. The course includes a CD, a learner board and a host of other useful items valued in access of the course fee. This has been made possible through sponsorship of Microchip. Each participant also receives a certificate from Microchip.

The closing date for the course is Monday 3 May at midnight. No late entries can be accepted. Full details on www.sarl.org.za, click on RTA and follow the links.

RADIO ZS IN THE MAIL NEXT WEEK

Radio ZS will be in the mail next week and available on the web this weekend. It is again filled cover to cover with interesting reading material. Victor du Preez, ZS6EA, shares his thought on Amateur Radio - the most versatile hobby on earth - Proudly Amateur Radio. Andre Botes ZS2ACP's, winning project in the Tinus Lange Technical Excellence Award competition is fully covered in an article entitled "The PW MEON 70 MHz Transverter revisited". Get more information on the WIA Centenary Award, read about the new antenna onboard the International Space Station, Radio Amateurs set sight on 500 kHz and The G3EJS 2-Tuner by Steve Warwick-Oliver, G3EJS / ZS5WO. There are also the regulars: Amateur Radio in Space and the Museum column and more interesting reads.

If you are not a member yet, get a sample copy by sending a request to armi@sarl.org.za with RZS April 2010 in the subject line.

ZS10WCS FROM GAUTENG/MPUMALANGA

The Rietkol Amateur Radio Club from Gauteng/Mpumalanga is operating the World Cup Soccer special event station, ZS10WCS, for the month of May. Listen out and work the station.

The Northern Cape Amateur Radio Club is thanked for their operation of the call sign during April 2010.

CONTEST NEWS

Geoff Levey, ZS6GRL, has been appointed as the SARL Contest Manager and will be co-ordinating SARL and Club contests on HF and VHF.

The annual ZS3 Sprint takes this afternoon from 14:00 to 15:00 UTC. This is a fun activity to promote contacts between radio amateurs in the Northern Cape and radio amateurs in Southern African countries. It is a phone and CW contest on the 40-metre band. The exchange is a RS(T) report and provincial or country abbreviation.

Log sheets shall be submitted within 15 days after the contest and can be sent by e-mail to zs3tg[at]vodamail[dot]co[dot]za or ZS3 Sprint, PO Box 1049, Kathu, 8446. The closing date for log submissions is 17 May 2010. A certificate will be awarded to the 1st, 2nd and 3rd place in the competition.

The Antique Wireless Association Valve QSO party will be held on the weekend of 8 and 9 May running from 13:00 to 17:00 UTC on both days. The AM QSO Party will be run on Saturday 08 May and the SSB QSO Party on Sunday 09 May. Contest activity on 40 m - 7 053 to 7 100 kHz and 80 m - 3 603 to 3 650 kHz. The exchange is a call sign, RS and consecutive serial numbers starting at 001, plus the type of radio used, e.g. HT37 Tx. The scoring is All valve radios - 3 points per contact; Hybrid (valve and solid state) - 2 points per contact, and Solid State Radios - 1 point per contact.

Log submissions must be sent to the Southern African Antique Wireless Association, PO Box 12320, Benoryn,1504 or by e-mail to andy[dot]cairns[at]xsinet[dot]co[dot]za. The closing date for log submissions is 28 May 2010. Certificates will be awarded to the first 3 places in each category.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at very low levels. The micro-sunspot 1 063 does not help matters much. Officially, the sun remains blank for now more than thirteen days in a row. The effective sunspot number is expected to be less than 10 for the coming week. NASA's Solar Dynamics Observatory (SDO) is doing more than just taking crisp pictures of the sun. It is revealing our star as a place of intense and sometimes even alien beauty. To have a look go to www.spaceweather.com.

15 m will provide the best opportunities for DX followed by 17 and 20 m. Conditions to India will be good from the afternoon onwards. During

the late afternoons and early evenings, it will be good towards Europe. Contacts with the USA are once again becoming challenging. Contacts with Australia are possible at around 08:00 in the mornings while contacts with New Zealand will be challenging. During the afternoons and evenings, good 15 m contacts may also be possible with Brazil.

Local conditions are going to be good on 40 m during the daytime. 80 m may perform well during the early mornings and late afternoons over the shorter distances. 30 m will perform well during the middle of the day. 20 m is very useful for contacts over the longer distances during the majority of the day. 80 m is the frequency of choice in the evenings. With the change of season, the noise levels are also decreasing and some top band activity will once again become possible.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

Today - ZS3 Sprint, 14:00-15:00 UTC; 3 May - Closing date for the Nokia Siemens Amateur Radio Awards; 3 May - Closing date to book for PIC programming course in Cape Town; 7 May - Closing date for stage 2 of the Construction Competition. 8 May - Technological High School John Vorster Amateur Radio Club flea market; 8 and 9 May - AWA Valve QSO Party; 16 May - SARL 85th Anniversary Sprint, 12:00-15:00 UTC; 29 May - RTA symposium in Durban; 24 July - RTA symposium in Cape Town; 21 August - RTA symposium in Port Elizabeth; 31 August - Closing date for submission of proposals for the 2011 SARL Contest Manual; 18 September - RTA symposium in Gauteng; 30 September - closing date for phase 1 of the Innovation project.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items, if possible, in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria-area, with relays on 7 082, 7 205 and 17 560 kHz. There is also a podcast by ZS6RO. For a webstream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 21:00 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

I cannot say for sure whether it has happened previously, but today you have listened to a bulletin which has been compiled by a President of the SARL. Quote from George, ZS6NE:"I phoned Dennis, ZS4BS, yesterday and after congratulating him on his election as President, I told him that I "fire" as bulletin compiler. Dennis, many thanks for the service which you also rendered as a member of the news team, but, you may of course still contribute news items. The news team whishes you a successful and fruitful term of duty as President. Be assured of our

support."

Thank you for listening, 73.
/EX

IRTS 78th AGM

Last weekend the Dundalk Amateur Radio Society hosted the 78th IRTS AGM in the Fairways Hotel Dundalk. The Anniversary Dinner had close to 100 guests, included reps for the Minister for Communications, ComReg & Dundalk Chamber of Commerce. Also in attendance were RSGB President Mr Dave Wilson M0OBW and his XYL.

The Rally and Annual General Meeting ware also well attended & the draw for free membership for a year among those who use direct debit to pay their membership subscriptions was held at the end of the meeting, and the winners were announced at the meeting. The five members whose names were drawn have been informed in writing of their lucky win.

The AGM was preceded by a Special General Meeting at which an amended Constitution and Rules for the society was approved by members. The new constitution and rules can be downloaded at www.irts.ie/rules

Congratulations to the Dundalk Committee, Members and Volunteers who worked tirelessly to Organise and make the IRTS 78th AGM weekend such a success.

AREN

Last Sunday at the IRTS AGM in Dundalk, AREN were presented with the ARUP Cup. The certificate that was also presented reads " This Award is presented to AREN Communications Volunteers in recognition of their continuous training, operations and achievements for the good of the community."

Accepting the cup on behalf of AREN volunteers John Ronan EI7IG says "To be honest, I was caught completely by surprise on the day. That said, I think the award is due recognition for the work being done continuously by various groups country wide, who operate under the AREN banner. This work includes, not only the operating on the day, but also the public relations aspect, which, although secondary, is of no less importance to the hobby as a whole. I'm delighted on behalf of everyone involved in Emergency Communications throughout the country."

AREN will be assisting with communications next Saturday the 8th of May when the Inland Waterways Association of Ireland will be bringing their fleet of boats into Dublin along the Grand Canal. They are looking to recruit some additional operators for the exercise which will give you a flavour of life along the inland waterways as well as an interesting introduction to AREN.

The operation will be from dawn to dusk but even if you can assist for a few hours during the day you will be most welcome. Contact Liam EI3HK 086 2521542 or Paul EI2CA 087 2523908.

Amateur Radio in the European Parliament

IRTS were represented by S�amus EI8BP and Se�n EI7CD at an exhibition in the European Parliament organised by the IARU Region 1 EUROCOM working group on 26/27 April.. With the title European Amateur Radio Benefits Society the exhibition focused on Emergency Communications and Education & Space, with the aim to raise awareness amongst European politicians.

The exhibition was sponsored by German MEP Mrs Birgit Sippel and was opened by IARU Region 1 President Hans PB2T. The opening was attended by the Euro Commissioner responsible for International Cooperation, Humanitarian Aid and Crisis Response Dr Kristalina Georgieva together with many MEPs and their assistants.

Students from the European School in Brussels were given a talk on satellites by Gaston Bertels ON4WF, Chairman of the IARU Amateur Radio Space Exploration Working Group and were able to have a live QSO with the International Space Station and meet with astronauts and cosmonauts who had been aboard the ISS. Also in attendance was Czech Republic MEP Vladimir Remek who flew in a Soviet spacecraft in 1978.

Lough Erne Radio Club

Lough Erne Amateur Radio Club members were delighted by news from the IRTS AGM that Herbie Graham Gi6JPO had been presented with the Pat Conway Cup for services to amateur radio. For almost 30 years past.

Herbie has been of great service to his Club and the wider amateur radio community. Examples include his work on the Lough Erne Rally, the Fermanagh Repeater and the Club's relationship with the SHARE centre in the provision of amateur radio courses and activities.

Cashoita NI

The Ballymena Radio Club and Antrim and District Amatuer Radio Society will be jointly activating Shanes Castle, Antrim, as part of the Steam Traction Engine Show.

The clubs will be using the Cashota-NI callsign GN4KPT/P on Sunday 2 May 14:00 - 17:00 2010 and Monday 3 May 10:00 - 16:00 2010

Talk-in and information on 145.550

Howth Martello Radio Group

The Howth Martello Radio Group participated as an award station, with the call-sign EI0MAR, for the International Marconi Day event on Saturday 24 April.

Most contacts were on CW and several other IMD stations were worked including the one at Cape Cod. The operators were Tony (EI5EM), John (EI7JG) and Nick (EI7GOB).

The North Dublin Radio Club also held its weekly meeting in the tower that same evening where the archive documentary film "Once upon a Tram" was showing. The film, narrated by the late Cyril Cusack, was made shortly before the demise of the tram in 1959 and follows it on its leisurely journey from what is now the Howth DART station up to the Summit and back again.

The radio museum is now open every day from 11 to 4 until the end of October. EI0MAR operates from the museum on most weekends. Pat Herbert, the curator, is always happy to welcome visitors from groups or clubs, radio-related or otherwise.

Email pat /at/ ei0mar.org or visit the website www.ei0mar.org for further information.

Special Event Station

Their will be a special event station operational to celebrate this years Le Mans Race (France). The call sign will be TM24H.

The station will be QRV from the 30th of May to the 13th of June & QSL manager will still be F6KFI.

Geopark Weekend

Lough Erne Amateur Radio Club again this year will take part in the weekend international Geoparks Communication event on 22 & 23 May, with call sign GB2MAC at the Marble Arch Caves International Global Geopark in Fermanagh and across into the Republic's County Cavan. GB2MAC will seek hoping contacts with similar Geopark stations, including the only other one in Ireland, EI2GEO at the Copper Coast Geopark in County Waterford.

In May 2009, GB2MAC's most distant contacts were both with Melbourne, Australia.. Six were with USA Hams. Others across Europe made 40 in all. Propagation seems a lot better this year. The Club's GB2MAC team, led by Alan Gault Gi6JPO, will include experienced amateurs and some

recently licensed from the Club's course and examination in SHARE back in February. Moreover the Club has recently purchased a mobile radio mast and other equipment for setting up this kind of special field station.

In all, this year's third Geopark Communication event promises to be an enjoyable and interesting weekend.

QRP Talk Now Online

Amid much interest in Ireland and world-wide, the QRP talk by George Dobbs, G3RJV, recently at the Lough Erne Rally is now available on-line

Go to www.batc.tv Click on the 'Film Archive' icon, and then select G3RJV QRP Lecture from the drop-down list there is a link just under the player to save the video to your computer. Alongside the audio, this excellent BATC video directly uses the G3RJV slides.

The details of circuits, for example, are sharp, clear and shown long enough to study in full. This video is just one of the many useful services offered by BATC to amateur radio.

Lough Erne ARC is most grateful to George G3RJV, SHARE and the British Amateur Television Club.

South Dublin Radio Club

On Tuesday next the 4th of May John Breen EI7BV will be giving a talk titled "How did Amateurs get their Bands, Part two, VHF, UHF and SHF bands"

It will describe a Historic overview of ITU world conferences and their impact on the radio amateur service and is open to all including visitors.

It will start at 8pm at Terenure College. Directions are on the website:

http://www.southdublinradioclub.ie

Dundalk Amateur Radio Society

The next meeting of the Society will be next Wednesday 5th of May at the Clubhouse all are welcome to attend, more info at ei7dar.com

---

Tipperary Amateur Radio Group

The next monthly meeting of the Tipperary Amateur Radio Group will take place on Thursday next the 6th of May at Raheen House Hotel, Raheen Road, Clonmel. at 8.00pm all are welcome.

Rallies

Saturday 29th May 2010 Mid Ulster Amateur Radio Club Rally, Drumgor Youth Centre, Drumgor Heights, Craigavon Information:www.muarc.com

For further Rally info and contact details please check out the IRTS Website.

http://www.irts.ie/cgi/rallies.cgi

IRTS Radio News Editor Charlie Carolan EI8JB, would like to express a sincere thank you for the nominations submitted to the awards Committee. Charlie was awarded 'The Sheila Piper International Trophy' at the AGM, in recognition of his endeavour and dedication to the News Service of IRTS.

Charlie would also like to express a thank you to the Newsreaders, SWL's & Stations who call into the service with Signal reports and of course to the Individuals and Clubs that provide material for the Bulletins. Everyone involved makes the IRTS Radio News Service the Success it is.

Items for inclusion in next weeks Radio News should be forwarded to Charlie EI8JB, preferably via e-mail to "charlie dot carolan at gmail dot com" Or by phone to 087-6265418 News can also be submitted via e-mail to "newsteam at irts dot ie" for automatic forwarding to both the radio and printed news services.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 25th-April, through Sunday, 2nd-May there were 213 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5N, 5R, 5U, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9U, 9V, 9Y, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FR, FS, FW, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J6, J7, JA, JT, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, R1FJ, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, TA, TF, TG, TI, TK, TL, TN, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V5, V7, V8, VE, VK, VK9W, VP2E, VP2V, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZL7, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3B8, MAURITIUS. Jan-Willem, PA7JWC, will be active as 3B8/PA7JWC from Pereybere, Mauritius Island (AF-049) between May 5-22nd. Activity will be on the HF bands and 6 meters, using CW, SSB, RTTY and PSK31. His equipment is an ICOM IC-7000 into end-fed antenna for 20m and dipoles for 40m and 15m, and a vertical for 6m. QSL via the LoTW or to his home

callsign direct or by the Dutch QSL Bureau. For more info and updates, visit: http://www.pa7jwc.nl

9V, SINGAPORE. Loren, AD6ZJ, will be active as 9V1/AD6ZJ between June 6-28th. Activity will be limited because this is a business trip. Look for him mainly on the weekends and nights on any open bands, but he will focus on 30/17/12 meter bands using CW, SSB and RTTY. QSL via LoTW or to his home callsign, by the Bureau or direct.

CQ NEWS. Richard Moseson, W2VU, Editor CQ Amateur Radio, sent out the following press release (Thursday, April 29th): Dayton Forums to Feature 11 CQ Communications Columnists -- Eleven columnists and editors for CQ Communications publications will be among the many forum moderators and presenters at the 2010 Dayton Hamvention®. Six are forum moderators, seven are panelists (several are involved with more than one forum). CQ Communications publishes "CQ Amateur Radio," "CQ VHF," "Popular Communications" and "WorldRadio Online" magazines.

Listed alphabetically, the writers are: Rich Arland, K7SZ, Contributing Editor for both "CQ" and "CQ VHF," panelist on QRP forum; Kent Britain, WA5VJB, Antennas Editor for "CQ," "CQ VHF" and "Popular Communications," panelist on VHF/UHF/Microwave forum; Bill Brown, WB8ELK, "CQ VHF's" "Up in the Air" columnist, moderator of BalloonSat forum, panelist on amateur television forum; "CQ" Kit-Building Editor Joe Eisenberg, K0NEB, moderator of Kit-Building forum; John Johnston, W3BE, "Rules & Regs" columnist for "WorldRadio Online," panelist on QCWA forum; "CQ" Editor and CQ Communications Editorial Director Rich Moseson, W2VU, panelist on the Newsline Town Hall forum; "WorldRadio Online" YL editor Cheryl Muhr, N0WBV, moderator of YLRL forum; Bill Pasternak, WA6ITF, FM & Repeaters Editor of "WorldRadio Online," moderator of Newsline Town Hall forum, panelist on QCWA forum; Carole Perry, WB2MGP, "Hams with Class" editor for "WorldRadio Online," moderator of Teacher Workshop, moderator of Youth forum; CQ VHF Digital Editor Mark Thompson, WB9QZB, as moderator of the TAPR forum; and Gordon West, WB6NOA, Contributing Editor for "CQ," "CQ VHF" and "Popular Communications," moderator of Add-on DSP Speakers forum and panelist on the Teacher Workshop.

In addition, CQ Communications President and Publisher Dick Ross, K2MGA, is being honored with the Dayton Amateur Radio Association's 2010 Special Achievement Award, in recognition of his 50th anniversary with CQ and his ongoing leadership in the amateur radio industry and hobby.

"Dayton forums generally bring out recognized experts in each of their subject areas as speakers," noted Editorial Director Rich Moseson, W2VU. "This broad level of participation by our magazines' columnists and editors as forum moderators and panelists demonstrates their expertise in sometimes more than one subject area, as well as our ongoing commitment to having top people as columnists in all of our publications."

The 2010 Dayton Hamvention® will be held May 14-16 at Hara Arena in Dayton, Ohio. It is sponsored by the Dayton Amateur Radio Association, which is solely responsible for selecting and approving forum participants."

CQ3/CT3, MADEIRA ISLANDS. Operators Diethelm/DJ2YE, Norbert/DJ7JC, Dieter/
DJ8DS, Ulrich/DJ9IE, Detlef/DK3QZ, Hans/DL1XW, Kai/DL3HAH, Joerg/DL3QQ
and Wil/PA0BWL will be active as CQ3L during the CQWW WPX CW Contest
(May 29-30th) as a Multi-? entry. QSL via DJ6QT. Look for operators to
be active before the contest between May 25-29th, as CT3/homecall. QSL
via Bureau.

CS2, PORTUGAL (Special Event). Look for special event station CS2HD to
hit the air waves between May 12-16th. Activity is to celebrate the
International Harley Davidson meeting in Tavira on May 15th and 16th.
This (HOG) event will take place in the gardens in front of the old
market between "Rua Doutor Jose Pires Padinha" and "Rua dos Cais" in
the center of Tavira. All contacts will receive a QSL card from this
activity via the Bureau or direct if requested (via CT2FPE), SWLs are
always welcome. This activity will not use eQSL nor LoTW, only paper
QSL. Check out the QSL on QRZ.com.

CY0, SABLE ISLAND (Update). Operational dates have been set for October
22nd November 1st, 2010. There will be a minimal effort during their
operation to supply a mulitiplier for the CQWW DX SSB Contest. ALL QSL
requests via N0TG. An ONLINE QSL Request service will be established as
an optional method. Look for updates on the Web site as details develop
at: http://www.cy0dxpedition.com

EO5, UKRAINE (Special Event). Look for special event station EO65JM to
be active between May 1-15th. Activity is to commemorate the 65th anni-
versary of the victory in the great Patriotic War. QSL Manager for this
event is Ralph, K2PF.

ET3, ETHIOPIA. Sid, ET3SID, was active this past weekend on 20 meters
SSB (14180 kHz) between 0330-0600z. QSL direct to his home callsign.

GB2, ENGLAND (Special Event). Operators Andy/M0GGR and Chris/2E0XLG
will activate special event station GB2HFF from the Holmfirth Festival
of Folk, in Holmfirth, Yorkshire, (Locator IO93cn, WAB-SE10) between
May 6-9th. The event is an annual celebration of traditional music,
dance and arts and features live music, dance performances and sessions
throughout the town and in the local public houses of Holmfirth over
the event weekend. Activity will be mainly on the lower bands, on 160,
80 and 40 meters. QSL Manager is Chris, 2E0XLG. Please send direct
QSLs only at the moment. Please include return postage, IRC, etc for
direct QSL.

HB0, LIECHTENSTEIN. Johannes, DF5AU, will be active as HB0/DF5AU from
May 8-12th. Activity will be on the HF bands using CW and SSB. His focus
will be on 80 meters. QSL via his home callsign.

IOTA NEWS.....
EU-010. Members of Camb-Hams (G3PYE) are once again active from the
Isle of Harris, this time as GS3PYE/P (and some possible
operations as GM3PYE/P), between May 1-14th. The group states,
"We have decided on operating 2 voice stations on HF from the
start, one HF data mode station, 6m and 4m SSB/data (JT6m)

and 2m, 70cm and 23cm satellites. We will have limited tropo capability on 2m, 70cm and 23cm but will try and work anyone interested. There will be some portable operations around the islands (possible interest to WAB chasers), but for the first time we have limited SOTA activity. A few operators are planning to operate from the Monach Islands EU-111 for a few nights, this is weather permitting but only has 33% claimed by IOTA participants." Operators mentioned are: Bob/G1SAA, Geoff/G0DDX, Rob/M0VFC, Voi/G0BOE, Gavin/M1BXF, Adam/G1UAF, Mark/M0MJH, Terry/G3VFC, Fred/M0RFD, Colin/G4ERO, Lawrence/M0LCM and Martin/G3ZAY. Listen for QSL info. For more details, update, DXpedition dairy and log search, go to: http://dx.camb-hams.com/dx-peditions/harris-dxpedition-10

EU-045. Luigi, IK8HCG, will be active as IB0R from Ventotene Island during the RSGB IOTA Contest (July 24-25th) as a Single-Op entry. QSL via his home callsign direct.

EU-150. Operators Antonio/CU8AS, Arlindo/CT1EGW, Jose/CT1END, Goncalo/ CT1GPQ, Luis/CT1EEQ, Luis/CT4NH and Hermann/HB9CRV will be active as CR6W from Insua Island during the RSGB IOTA Contest (July 24-25th) as a Multi-Op entry. QSL via CS1GDX.

NA-029. Gregg, VE3ZZ, will be active as VE3ZZ/VY2 from Prince Edward Island between July 21-26th. His activity will also include an entry in the RSGB IOTA Contest (July 24-25th) as VY2X. QSL via his home callsign.

NA-138. John, K8LJG, will be active as K8LJG/4 from Amelia Island, Florida (Florida State North East Group) between May 1-25th. He will use a TS-50s into a Cushcraft R-5 vertical, operating on 20-10 meters using CW and SSB, on the IOTA frequencies. QSL via K8LJG: John C. Kroll, 3528 Craig Drive, Flint, MI 48506 USA.

NA-182. DXPEDITION STORY. John, VE8EV, who was active as CK8G from Greens Island in the Northwest Territories (NWT) in the Inuvik Region East Group towards the end of April, has written an interesting story called the "Perfect Storm" which can be read online at: http://ve8ev.blogspot.com/2010/04/ck8g-perfect-storm.html

NA-213. Lindy, WW5AA, will be active as WW5AA/4 from Dauphin Island between May 9-10th. Activity will be on 160/80/40/20/17/15 meters, and possibly 12/10 meters as time and propagation permits. QSL direct to WW5AA.

OC-137. Gerard, VK4TGL, will activate Moreton Island in the Queensland State (South Coast) South Group between May 8-15th. Activity will be holiday style on 40/30/20/17 meters around the QRP frequencies using a light weight QRP CW rig. QSL via his home callsign.

KH5, JARVIS ISLAND. Several sources reported this past that the Radio Expeditions Inc., the organizer of the record-breaking VP6DX 2008 DX-pedition to Ducie Island, is planning a DXpedition to Jarvis Island (KH5) in 2010 November. The approximate dates for this operation are between November 17th and December 1st (depending on weather and sea conditions). Dates were chosen to maximize propagation openings on both the lower bands (160-80m) and the high bands (12-10m long and short path) to Europe, where demand for KH5 is extremely high. Planning for this project began over one year ago. Organizers state that applications for the required government permits have been submitted to the U.S. Fish & Wildlife Service. However, the final approval has not yet been received. The DXpedition team plans to have 24-25 operators to man 12 stations on 160-6 meters using CW, SSB and RTTY (No 60m operations are planned). An entry in the CQ World-Wide CW Contest is also included in the operations. Sea transportation and support services will be provided by the "MV Braveheart" and its crew -- the same group who helped make the 2008 VP6DX expedition a success. No individual contributions are being solicited until the required government permits have been received. Radio Expeditions Inc. is a permanent, non-profit organization of volunteers founded by Eric Scace/K3NA and Carsten Esch/DL6LAU in 2007. Radio Expeditions Inc. first project was the 2008 Ducie Island VP6DX expedition which shattered many DXpedition records. The 2010 Jarvis Island project is the second project of Radio Expeditions. A third project will be announced at the 2010 Dayton Hamvention's DX Forum.

KH6BZF PROPAGATION FORECAST/REPORT (For May 2-9th)....
May 3 AN-HN SOLAR REFERENCE KEYS
May 4 HN-AN --------------------
May 5 AN BN - Below Normal
May 6 AN AN - Above Normal/Geomagnetic Level is QUIET
May 7 AN LN - Low Normal
May 8 AN HN - High Normal/Geomagnetic Level is UNSETTLED
May 9 AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

LZ2010, BULGARIA (Special Event). Look for special event station LZ2010KM to be active between May 1-31st. Activity is to celebrate St. Kiril and Methodius' Day. Operations will be on all bands and modes. QSL via LZ1BJ, by the Bureau (preferred). Logs will be uploaded to LoTW.

MMAA CW CONTEST. Ed, PY4WAS, President of CWJF, wants to remind everyone that the 2010 Manchester Mineira All America CW Contest will take place on May 15-16th. It's the "BIGGEST CW" contest conducted only among the Americas. It will be the "LAST" year to be carried out only between the Americas; therefore, from 2011 and on, it will be WORLD-WIDE. For complete details, see: http://www.powerline.com.br/cwjf

NCDXF PRESS RELEASE. Glenn Johnson, W0GJ, Vice President of NCDXF, reports: "The Northern California DX Foundation is pleased to announce a major contribution to the VP8ORK South Orkney DXpedition by the MicroLite Penguin DXpedition team in early 2011. DXpeditions to these rare remote areas are extremely expensive. One of the purposes of NCDXF is to support such DXpeditions for the worldwide amateur community. Your valued membership helps make these DXpeditions possible. More information can be seen at the following websites: http://www.ncdxf.org
http://www.vp8o.com/vp8help.html "

NEW DX BOOK BY BOB, W9KNI. A press release by Idiom Press states: "Can a DX'er from a small town in southwest Oregon hope to compete in the Big Leagues of DX'ing? Bob Locher, W9KNI, author of the best selling DX Book ever, 'The Complete DX'er', set out on a mission to prove it was possible. 'A Year of DX' is Bob's personal account of the challenges, joys and sorrows in pursuit of the Holy Grail -- winning the CQ DX Marathon. Look over Bob's shoulder as he works country after country, yes, and missing a few along the way, but always trying to optimize his chances and the hope of logging the next one. Mixed in is a wealth of other material, some dealing with equipment optimization, some thoughtful, some humorous. Anyone who enjoyed 'The Complete DX'er' will surely be delighted with this book. 280 pages. Includes chapters on linear amplifiers, transmitter audio optimization, and propagation in a time of low sunspots." Cost of the book is 20.00 USDs (plus SH) is available at:
http://www.idiompress.com/yearofdx.php

OH, ALAND. Hans, DK3PZ, will be active as OH0/DK3PZ from Aland Islands (EU-002) between May 1-8th. Activity will be on all HF bands. QSL via his home callsign.

PG6, THE NETHERLANDS (Special Event). Look for special event station PG6N to be active during the Dutch National Lifesafeboat Day from the KNRM Lifeboat Station in Noordwijk on May 8th. Activity will also take place during the International Lighthouse Weekend in August. PLEASE QSL via the Bureau. For more details see:
http://www.qrz.com/db/PG6N --or-- http://pg6n.jouwweb.nl/

PS8/ZV8/ZW8, BRAZIL (LH and IOTA Op!). Members of the Teresina DX Group and Labre - PI are preparing a DXpedition to the Santa Isabel Island (IOTA SA-025, DIB PI-01) and Pedra do Sal Lighthouse (ARLHS BRA-070, DFB PI-03) on the coast of the state of Piaui in northeastern Brazil, between June 2-6th. Their callsign will be ZW8B. Grid Locator: GI97de. Activity will be on 160-10 meters (SSB, PSK31 and RTTY), including 6 meters, 144 MHz (SSB, FM and CW) and the satellites (SSB, FM and CW): AO-7 (A and B), FO-29, AO-51, VO-52, SO-50, HO-68, SO-67 (if active) and ISS in repeater mode if active. QSL via PS8HF: Milton Lima Ribeiro, Rua Mazerine Cruz, 2673, 64076-040 Teresina - PI, Brazil. Operators mentioned are: Flavio/PS8BBC, Raimundo/PS8DX, Jose/PS8ET, Milton/PS8HF, Nelson/PS8NF, Joao/PS8PY, Luiz/PS8RF and Dalton/PS8TV. Visit the group's Blog page at: http://teresinadxgroup.blogspot.com
ADDED NOTE: Orlando, PT2OP, informs that he will also activate Santa Isabel Island and two Brazilian lighthouses in separate operations

between June 3-7th. Activity will include the following:
ZV8S - Priority operation will be Pedra do Sal Lighthouse (ARLHS
BRA-070, DFB PI-03) on the Santa Isabel Island (IOTA SA-025,
DIB PI-01), in the Piaui state, northeast of Brazil. The Grid
Locator is: GI97de

PS8/PY2TJ - During this trip, Orlando will activate the Luiz Correia
Lighthouse (ARLHS BRA-061, DFB PI-02). Its is near/on the
mainland. The Grid Locator is: GI97fc. Even though priority
is given to activate the Pedra do Sal Lighthouse on Santa
Isabel island, he states that he will activate the Luiz
Correia Lighthouse when the weather and transportation
conditions permit.
QSL ZV8S and PS8/PY2TJ via PT2OP. Orlando mentions that he will be
traveling with the Teresina DX Group on this trip. Orlando adds, "We're
Scouts operators and all QSOs will be valid for the BP Award (PR7JP
manager) and Diploma Baden-Powell the Radio (manager PY2AA). Also to be
valid: IOTA Diploma, Diplomas of ARLHS, DIB Brazilian Islands Award,
DFB Brazilians Lighthouses Award, South American Lighthouses Award,
in addition to diplomas WAA (such as Brazil), WAB (as Piaui), WAO (such
Brazil) and DBDX (as Brasile if worked on 160, 80 or 40m) from the LABRE,
PT2AA.

QSL INFO AND NEWS.....
PIRATE ALERT. Charles, KY4P (ex-S9SS), reports that a station using
the callsign S9SS and using the name Charles over the past few days
is definitely a pirate.

Logs for the recent Southern Line Islands IOTA DXpedition (T32CI,
T32MI, T32SI and T32VI) are now available online at:
http://t32line.webnode.com

QSLS VIA LoTW: 6Y9V, 9V1SV, C37UR, CT1HFS, CT3FN, CW6V, DL4NAC, EA5GPC,
HI0IDT, IW3HEL, J38CW, JA3AOP, JA6GCE, OE3DIA, OY9R, RZ3DZF, UA9CGL,
V85TX, YO8RAA and ZY0T

QSLS RECEIVED VIA MAIL: 5H3EE, 9Y4VU, H40FK, PJ6/W6IZT, TX3A, V63T,
VU2RBI and XW3DT

QSLS RECEIVED VIA THE BUREAU: 9A0HQ, 9A4BB, 9A5Y, 9A6IND, 9A73AA,
AM5A, DM2008ARDF, EA5DWS, GB0SI, HA1TNX, RZ9OJ, SM5ZBJ, SQ4MP, UA9CDC,
UE1CBB and YT3MA

RP3/RP65, RUSSIA. Members of the "Michurinsk Contest Group" will activate
the special event stations RP3RQ, RP3RTG, RP65RTK and RP3RZK between May
1-10th (including the "ARI DX" and "CQ-M" Contests). Activity is to
celebrate of the 65th anniversary of the end of World War II.
If you make contacts with these stations (CIS stations - 15 QSOs, EU
stations - 7 QSOs and DX stations 5 QSOs; dupes are valid on different
bands) you will receive a full colored award free of charge. QSLs for
all stations and award applications are via RN3RQ, by the Bureau, or direct
to: Jack Yatskiv, P.O.Box 30, Michurinsk 393760, Russia. Also, Bureau

E-mail requests <rn3rq@tamb.ru> and LoTW are "OK".

SILENT KEY. Members of the Northern Ohio DX Association are sad to report that Paul "Tom" Varney, K8PV (ex-KD8V, "King Dog"), became a Silent Key (SK) on Monday, April 26th. Tom's signal on the air will be surely missed. OPDX and its readers would like to send out our deepest sympathy to the family and friends of K8PV.

T8, PALAU. Mike, KM9D (ex-V63MY), is now active as T88CF from Bablomekang Island (OC-009). Length of stay is unknown. Activity over the past weekend has been on 80/30/17 meters CW between 1045-1500z and 2030-2330z. QSL via OM2SA.

TC150, TURKEY (Update/LH Activity). Look for special event station TC150SLH to be active to celebrate the 150th anniversary of the Sile Lighthouse between May 1-9th, July 24-25th and August 21-22nd (Lighthouse weekend). A special Sile Lighthouse award will be available. For details on the award go to: http://www.ta0u.com/2010/eng/PDF/TC150SLH.PDF

TYRRHENIAN SEA TOUR (IOTA Op!). Tomi, HA4DX, will take part in a sailing trip on the Tyrrhenian Sea, which is part of the Mediterranean Sea off the western coast of Italy, on a yacht between May 15-22nd. While on the seas, he will operate as HA4DX/mm, otherwise look for him to use the callsigns on the following islands:
May 15th - Elba Island (EU-028); callsign IA5/HA4DX
May 16th - Capraia Island (EU-028); callsign IA5/HA4DX
May 17-18th - Corsica Island (EU-014); callsign TK/HA4DX
May 19th - Giraglia Island (EU-164); callsign TK/HA4DX
May 20th - Elba Island (EU-028); callsign IA5/HA4DX
He will use a TS450SAT and vertical antennas.

UPCOMING SOUTH AFRICAN OPERATIONS. A group of UK operators, who are dedicated enthusiasts and specialists that offer DX Tours and Safaris to Southern Africa, announced the following operations planned for 2010:
Swaziland (3DA) - August / September
Namibia (V5) - October (CQWW DX SSB Contest)
Mozambique (C9) - November (CQWW DX CW Contest)
The group states on their Web page: "We are looking for groups of individuals to participate in these proposed DXpeditions. All tours to include Southern African transfers, accommodations, meals and equipment. Dates to be announced closer to the Events. Final pricing dependant on number in the group." If interested in one of these operations, visit the following Web page for more details: http://www.3da0ss.net/index.htm

V8, BRUNEI. Yoshi, JJ8DEN, is active as V85/JJ8DEN from Brunei (OC-088) until May 10th. Activity will be on 160-6 meters using CW, RTTY, PSK31 and JT65A (14076 kHz). Yoshi was also spotted operating as V84PMB from the Brunei Darussalam Amateur Radio Association (BDARA) on Palau Muara Besar (OC-184). QSL both callsign via his home callsign.

VK100, AUSTRALIA (Special Event/Award). A limited issue amateur radio operating award is available to celebrate the 100th year of the Wireless

Institute of Australia (WIA), the world's oldest national radio society. To qualify for an award, certificate contact is required with the Centenary of Organized Amateur Radio in Australia special event station VK100WIA. The WIA, through its 130 affiliated radio clubs, will operate a unique and expected to be highly sought after callsign between May 1st and October 31st, 2010. The callsign will also be used in Australia's capital city, Canberra, where the WIA Annual General Meeting and associated events will be held in May. The unique VK100WIA callsign to be operated on all amateur bands, amateur satellite may be used, but contacts via terrestrial repeaters are not eligible for the award. It is certain to be very popular on air, and this one-off award is expected to also be well sought after. For more details, the rules and picture of the award, visit: http://www.wia.org.au/newsevents/centenary/award

VK9C, LORD HOWE ISLAND (Update/Callsign Change). Tomas, VK2CCC (aka LY1F), will be active as VK9LL (not VK9CLH as first announced) between May 24-31st. Activity will be limited to his spare time on 160/80 meters, and he plans to participate in CQ WPX CW Contest (May 29-30th). QSL cards will be available via an "Online QSL Request System" at the following Web page. QSL by other methods such as LoTW and by the Bureau or direct are via VK2CCC. For updates and possibly more details, visit: http://www.qrz.lt/ly1df/vk9clh.htm

YJ, VANUATU. John, ZL1GWE, will be active as YJ0AWE from Pango, Port Villa, on Efate Island (IOTA OC-035) until May 9th. Activity will be on 30-10 meters. However, most of his operations have been on 20 meters SSB using a FT-897 and Buddistick. QSL via his home callsign.

YJ, VANUATU. Operators George/HA5UK and Pista/HA5AO will be active as YJ0HA from Efate Island (OC-035) between November 1-15th. Activity is planned for 160-10 meters using CW, SSB, RTTY, PSK and SSTV modes. More details, like station setup, antennas, etc. will be forthcoming in due time. A Web site is now active at: http://ha5ao.novolab.hu
A survey is available for band and mode needs. Also an online log will be available on this site. QSL via HA5UK, direct, by the Bureau and LoTW.

ZS8M, MARION ISLAND (Update). Pierre, ZS1HF, on Marion Island (AF-021), has hit the air waves, but as ZS1HF/ZS8 and mainly working South African operators during his work schedule off times. No QSL cards will be issued under the ZS1HF/8 callsign. Pierre informs OPDX that he will activate the ZS8M callsign in the region of May 12-15th, or once the "SA Agulhas" returns to Cape Town. He states, "The base is heavily populated with scientists, researchers, old and new team members. Trying to run a DXpedition under these conditions will be unprofessional." Pierre has not updated his ZS8M page recently <http://www.zs8m.com>, but check out the "S.A. Weather and Disaster Information Service" (SAWDIS) Web page at: http://saweatherobserver.blogspot.com/search/label/Marion%20Island Pierre has written some info and post pictures of the island and his radio equipment on the above URL.

DXNL 1674 - May 5, 2010
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

CO - CUBA, NA-015
Members of the "Cuban Amateur Radio Federation" (CO2FRC) are going to
join the multi/multi class of the upcoming Volta Contest (May 8/9).
The team includes Gustavo,CO2NO, Lazaro,CO2WL, Jesus,CO2IZ, and
Winston,CO2WF. Another chance to work Cuba (NA-015) in digital modes
is on odd days in May. Gustavo,CO2NO, will be active in PSK31 and JT65A
from 1200-0000 UTC on 14070 kHz and from 0000-0300 UTC on 7038-7040 kHz
QSLs for CO2NO only direct via HA3JB: Gabor Kutasi, H-8601 Siofok,
PO Box 243, Hungary. Gabor asks everyone to write his e-mail address
on the QSL card so he can confirm the arrival of the QSLs via e-mail.

FT/W - CROZET ISLANDS / FT/X - KERGUELEN ISLANDS
Gildas,F/TU5KG, will soon be fishing again around Crozet (AF-008) and
Kerguelen (AF-048). He got the callsigns FT5WQ and FT5XT and hopes to
become active during shore leaves.

HB0 - LIECHTENSTEIN
Johannes,HB0/DF5AU, plans to show up from "Chalet Wanni" in a height of
1250m from May 8-12. He is planning operation in in CW/SSB on HF with
emphasis put on 80m (using a Titanex V80 vertical and an Acom 1000).
Please send your QSLs vis his homecall, bureau/direct/LoTW ok!

IS0 - SARDINIA, EU-024
Fourteen OPs of the "Radio Club de Provins" (Thierry,F4TTR, John,F5VHQ,
Sergio,IS0AWZ, Norbert,F6AXX, Maurice,F5NQL, Bruno,F5AGB, Frank,F4AJQ,
Gerard,F2JD, Jean-Paul,F8BJI, Henri,F1HRE, Sebastien,F5UFX, Eric,ON7RN,
Gabriele,I2VGW, Yann,F1NGP) will be active with four stations signing
IS0R from Isola Rossa (EU-024) in CW/SSB/RTTY on 160m-6m from May 7-15.
The QSL manager F5CWU confirms via bureau or direct.
The logs will be uploaded to the LoTW a few months later.
For more information visit: http://is0r.perso.sfr.fr/cariboost1

KH5 - JARVIS ISLAND, OC-081
Several sources have reported that Radio Expeditions Inc, the organizer of the record-breaking VP6DX DXpedition to Ducie Island in 2008, is planning a DXpedition to Jarvis Island (OC-081) in November 2010. Depending on weather and sea conditions the approximate dates for this operation are between Nov 17 and Dec 1. Dates were chosen to maximize propagation openings on both the lower bands (160m-80m) and the high bands (12m-10m) to Europe, where demand for KH5 is extremely high. The planning for this project began over one year ago and applications for the required permits to land on the island have been submitted to the US Fish & Wildlife Service. However, the final approval has not yet been received. The DXpedition team plans to have 24-25 operators to man 12 stations on 160m-6m using CW, SSB and RTTY (no 60m operations are planned). Entering the CQWW CW Contest is also included in their plans. Sea transportation will be provided by the "MV Braveheart" - which supported also other DXpeditions before. We will keep you informed about this DXpedition.

LG5LG/SJ9WL - MOROKULIA
Juergen,DJ5HD (CW), Karsten,DH9HAK (SSB), Wolfgang,DJ5ZWS (RTTY), and Gerd,DG1XG (PSK), will be QRV from Morokulia from May 10-17. They will change the callsigns LG5LG and SJ9WL every day. QSL via LA4EKA.
More info at: http://www.freinatis.de/morokulien/amateurfunk-en.html

T8 - PALAU, OC-009
Mike,KM9D, hit the airwaves as T88CF from Bablomekang Island (OC-009). Expect him to be active mainly in CW on all bands. It is not known when Mike will set sails for his next destination.
QSL via OM2SA, direct or via LoTW.

V8 - BRUNEI
Yoshi,JJ8DEN, and some local HAMs are working as V84PMB from the island Palau Muara Besar (OC-184) until May 7. The next activity will be as V85/JJ8DEN from Brunei (OC-088) until May 10. Operations take place in SSB, CW, RTTY and PSK31 on 160m-6m.
QSLs for both calls unfortunately only direct via JJ8DEN.

YJ - VANUATU, OC-035
John,ZL1GWE, is working as YJ0AWE on 30m-10m from Pango near Port Vila on Efate Island (OC-035) until May 9. Most of the time he can be found in SSB on 20m. QSL via his homecall ZL1GWE.

ZS8 - MARION ISLAND, AF-021
"The DX Magazine" lists Marion Island (AF-021) on rank 3 of the most wanted DXCC entities worldwide. The new team of scientists on the island includes Pierre,ZS1HF. On Marion Island his job will be the resident radio and electronics technician for HF, VHF, the WX station, the Hydrogen generator, IT LAN, the satellite system and all the other smaller systems. Starting around May 5 he will show up as ZS8M for one year. He arrived on the island on Apr 15 but was very busy with other important things. Due to the heavy storms and to protect the local birds he will use only dipoles. Since he is allowed only 100 kg private luggage Pierre took only a small amplifier to the island. During his

little spare time Pierre will be active mostly in SSB but also in RTTY
on 160m-2m - he does not work in CW. Please listen for him especially
on 14240 kHz. Unfortunately the QSL cards can be sent only direct to:
Pierre D. Tromp, PO Box 1481, Worcester 6850, Republic South Africa.
More information can be found on his website: http://www.zs8m.com

3B8 - MAURITIUS ISLAND, AF-049
Jan-Willem,3B8/PA7JWC, is spending his holidays on Mauritius (AF-049)
from May 5-22. QSLs via his homecall or via LoTW.

5Z - KENYA
Tony,IK8VRH, is starting his new job in Malindi on May 8 and will stay
there until April 2012. He applied for the callsign 5Z4RH but still
waits for the confirmation from the licensing authority.

8Q - MALEDIVES, AS-113
Ron,DL5JAG, will be QRV as 8Q7SR from Embudu (AS-113, South Male Atoll)
from May 8-23. QSL via homecall, direct, via bureau, LoTW or eQSL.

JAPAN, SPECIAL EVENT STATIONS
The special event station 8J4BARA is working from the "Rose Festival"
in Bara on Honshu Island (AS-007, JIIA AS-007-001, WLOTA LH-2376) from
May 6-16.

8J6DON is working from the "Hakata Dontaku" festival on the island
Kyushu (AS-077, JIIA AS-077-001, WLOTA LH-0963) until May 5.

8J2SEA is active during the "30th All Japan Making Rich Sea Conference"
in Gifu (AS-007,JIIA AS-007-001,WLOTA LH-2376) from May 1 until Jun 13.
The QSLs for all stations above can be sent via the JARL bureau.

TAIWAN, SPECIAL EVENT STATIONS
Taiwan is celebrating 100 years Republic of China. The special event
stations 3H100TW, 3T100TW and 3T0TW are working from the capital Taipei
of Taiwan (AS-020, WLOTA LH-0022) between May 1 and Dec 31.
QSLs for all three stations should be sent via the BV bureau.

THE NETHERLANDS, SPECIAL EVENT STATION
The special event station PD6MILL is working in SSB and digital modes
on 10m/20m/40m during the Dutch Windmill Week on May 8/9.
For more information check the website: http://go.to/pd6mill
QSLs via PD7BZ, they will be sent automatically via the bureau.

PIRATE: Charles,KY4P (ex-S9SS), writes that the station which was using his
former callsign S9SS during the last days was definitely a pirate.
Save your QSL cards for real stations!

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

May 8/9: VOLTA DX Contest
May 8/9: EUCW QSO Party
May 8/9: CQ MIR Contest

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:
AF-033, S7, Amirante Islands: Vladimir,RA9LR, will show up as S79LR from
Desroches Island from May 8-10. QSL via homecall (direct/bureau).

EU-120, G/M, English Coastal Islands: Kevan,2E0WMG, is working from
Lundy Island (WAB 2010) from May 5-8. QSL via homecall (direct/bureau).

EU-141, LA, Finnmark County East Group: Helmut,DL5DSM, and Bernhard,DL9UBF,
will be QRV as LA/homecall from Vardoe Island from May 5-10.
QSLs via homecalls (direct/bureau).

NA-213, W4, Alabama State Group: Lindy,WW5AA, will sign WW5AA/4 from
Dauphin Island on May 9/10. QSL via homecall (direct/bureau).

OC-137, VK4, QLD State (South Coast) South Group: Gerard,VK4TGL, will be QRV
from Moreton Island from May 8-15. QSL via homecall (see QRZ.com).

Lighthouse activities (WLOTA/ARLHS/ILLW)

IC8ATA LH 1409 Procida resident
LA/DL5DSM LH 0106 Vardoe May 5-10
LA/DL9UBF LH 0106 Vardoe May 5-10

ALL UP AND COMING IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE OF
AUSTRALIA FOR WEEK COMMENCING MAY 9 2010

New radio museum to be QTH for WIA Centenary special callsign VK100WIA

Members of Victoria(tm)s Central Goldfields Amateur Radio Club are ready to
put VK100WIA on air from the Talbot Radio Museum.

The club has already lined up some local news media which is keen to publicise both the Centenary of Organised Amateur Radio in Australia and the new museum.

There&#65533;(tm)s a variety of interesting historical radio, telephone and television on display. There&#65533;(tm)s even a mock-up of commercial radio station 3CV Maryborough.

There&#65533;(tm)s a variety of transmitters, Morse code keys and other equipment is certain to be of interest to visitors. The museum is the proud owner of a vibrator power supplied Traeger radio used by the Flying Doctor Service.

Alf Traeger VK5AX was born in the Dimboola area of Victoria, who with John Flynn of the Flying Doctor Service, also a local from Moligal just north of Maryborough, did so much to open up outback Australia with radio communications.

Central Goldfields Amateur Radio Club President, Peter Rafferty VK3CC tells us that VK100WIA will be operating from the Talbor Radio Museum on Camp Street, Talbot, 10am to 4pm on the third, fourth and fifth of August.

Planned to be used are the major HF bands, plus SSB, FM and IRLP on 2-meters and 70-centimetres.

ARISS Contact

One significant way in which Radio Amateurs can share their hobby with the community is through the ARISS program. ARISS provides today&#65533;(tm)s youth with an opportunity to speak directly with the astronauts aboard the international space station by way of amateur radio and with the assistance of local radio amateurs and radio clubs. As part of the Centenary dinner program we will be making contact with the International Space Station via amateur radio and we will hear from the astronauts on the ISS. Ten students will have an opportunity to ask questions of the astronauts.

ACMA NEWS

ACMA have released their white paper on the “400MHz band” Which covers 403MHz to 520MHz. As this covers the 70cm band we use (420MHz to 450MHz as a secondary service) this paper will effect we amateurs.

As the ACMA puts it “The way ahead &#65533;" Decisions and implementation options for the 400 MHz band consultation paper outlines a number of final decisions for the future use of the band and proposed implementation plans.”

In the original ACMA proposal was for 403MHz to 430MHz for exclusive use of federal, state, and territory governments.

This would seem for amateurs, the loss of the bottom 10MHz of the 70cm band.

These exclusions can be found on page 28 of the Radiocommunications Licence Conditions (Amateur Licence) Determination No. 1 of 1997.

WIA has asked for a comment on this by our board, at time of broadcast we had had no comment.

As one VK3 said on a UK news service, "Unfortunately this document doesn't really tell us as amateurs what will be happening to the 440-450MHz part of the 70cm band at all".

(sourced to acma news release and southgate)

Digital radio trial to begin in Canberra

The number of commercial and SBS radio stations available to listeners in Canberra is set to increase with an announcement by Commercial Radio Australia (CRA) and multicultural and multilingual broadcaster SBS that a regional trial of DAB+ digital radio would begin in Canberra early July 2010.

Commercial Radio Australia chief executive, Joan Warner said the first regional trial of DAB+ is the next step in making digital radio services available to all Australians.

“The radio industry is committed to ensuring all Australians are able to access free to air radio broadcasting via digital technology. People living in regional Australia must have the same rights of access to digital radio as do those living in the five big cities. We do not want to see a nation of metropolitan digital 'haves' and regional digital 'have nots'."
Ms Warner said.

The second phase of the Canberra trial will be a retransmission of the trial signal into Parliament House to allow Federal politicians to experience digital radio first hand.

Stations that will be available on the DAB+ digital radio trial transmission:

• 2CA - Capital Radio Network
• 2CC "Capital Radio Network
• Capital Radio Network - 2 additional commercial services to be announced
• Mix 106.3 FM - Canberra FM (Austereo/ARN)
• 104.7 fm - Canberra FM (Austereo/ARN)
• Canberra FM (Austereo/ARN) - 2 additional commercial radio services to be announced
• SBS Radio 1 " News & Information Network
• SBS Radio 2 - News & Information Network • SBS Pop Asia
• SBS Chill

VKR Roundup
http://www.police.qld.gov.au/News+and+Alerts/Media+Releases/

I'm Geoff Emery, VK4ZPP, and I've been thinking about the Institute's AGM.

In one of those serendipitous remarks, a certain well known politician from VK4 commented a few days back that "Canberra is not the source of all knowledge." At the end of the month our Wireless Institute of Australia is holding its annual General meeting , in Canberra.

As a group (should I say a net of amateurs) it is to our benefit to get our collective heads around what is needed to grow and sustain our hobby. Just as our licensing is part of the system of Australian administrative structure, our place in the world community is defined by structures such at ITU and IARU. Even intruder watch services operate eventually on a government to government level internationally.

We have our representative body in the WIA and that body knows it is not the fount of all knowledge.

The Institute is comprised of hobbyists just like you and I and they give their time as part of their enjoyment of amateur radio.

If we want to each make a difference and make our voices heard in the policy areas of the hobby, we need to participate. Like the cockatoo on the biscuit tin, of days gone by, remaining on the outside never makes you part of the feast on the inside.

Please come and join through your radio club or by becoming a WIA member. Then as was heard to be said, it will be the "cat's whiskers".

I'm Geoff Emery and that's what I think.....what about you?

Central Highlands in Central Queensland
http://au.groups.yahoo.com/group/charc/

The date for the famous and popular Central Highlands Amateur Radio Club AGM at Camp Fairbairn near Emerald has been announced.
CHARC Secretary Gordon VK4KAL has advised that the AGM will be on from 4pm Friday 17th to Midday Sunday 19th September 2010.
Find out more by contacting Gordon on vk4kal@wia.org.au

VK4WAT ON AIR FOR THE “AM ON ANZAC DAY” EVENT.

G&#65533;(tm)day I&#65533;(tm)m Dale VK4DMC for the Tableland Radio and Electronics Club with news

from TREC.

Last Sunday Week or so, ANZAC Day, our club set up a station for the
“AM on ANZAC Day event” using the club call-sign VK4WAT.

The idea for the “AM on ANZAC Day” event was originally conceived by
Mike Patterson VK4MIK as a way for amateur radio operators around Australia
and New Zealand to recognise and honour the service of returned serviceman
and women who served in the many conflicts that Australia has been involved
with down the years.

TREC first went on air from the Rocky Creek War Memorial site at Rocky Creek,
near Atherton, where a few radio contacts were made on 40 metres AM. We then
moved to the Atherton War Cemetery and set up a field station again using
radio transmitting modes that were used by the armed services in many early
conflicts.

We contacted many other amateur radio stations who were also on air using both
AM and CW on the 20, 40 and 80 metre bands. Stations as far a field as Hawaii,
San Francisco, were worked as well as many Australian stations including a
special station that was set up at the Mareeba War-Birds at the Mareeba
airport where three TREC members along with Mike VK4MIK and other amateurs
made many contacts with other stations set up around Australia.

The event was a great success with many amateurs supporting it.

Mike has indicated that “AM on ANZAC Day” may well
become an annual event.

ALIEN-1 balloon success

The flight of ALIEN-1, built by three pupils at Reading School, in the UK, proved a success.

The 434.075 MHz beacon worked well and some great pictures were taken.

The hard work of the pupils certainly paid off with the payload proving to be reliable. Over 3000 pictures were taken during the flight and they now face the task of organising all those pictures.

Due to the 434.075 MHz telemetry messages being sent at just 50 baud the payload could only send down one telemetry string every 15 seconds.

Highest altitude achieved was 33.158km:
It is believed this altitude is the third highest in UK records.

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL,
Amateur Radio Newsline, NZART and the WW sources of the WIA.

SHANGHAI BANS TWO WAY RADIO NEAR WORLD EXPO 2010 SITE

Shanghai city leaders say that the city is to impose controls on devices capable of transmitting radio waves from 12 pm on April 30th through 12 am on May 2 and again on October 1st and 30th. This, to ensure the proper operation of facilities inside the 2010 World Expo site.

During these periods, items such as walkie-talkies, industrial remote controls, amateur radio stations and even school broadcasts will be banned within 500 meters of the Expo site. The only exception will be for cellular mobile phones which officials say will not be affected.

Transmitter stolen while on air!

Maybe worthy of our weird and wonderful segment comes a report sourced to the UK's Daily Record newspaper that thieves stole the transmitter of Lanarkshire's radio station L107 WHILE IT WAS ON AIR!

The report says Mike Smith's "Log In To Lunch show" was being broadcast when the airwaves went dead. The owners said the transmitter had been "unlawfully taken" from the 17th floor of an office block.

RSGB NEWS FROM G4NJH

Romania amateurs gain access to 70MHz

All radio amateurs in Romania can now apply for access to the 70MHz band.

They can run up to 20 watts output between 70.0 and 70.3MHz on a Secondary basis with a maximum emission bandwidth of 12.5kHz. It is understood that individual requests must be made to the regulator prior to operation.

May and June will be the last chance for anybody to work GB50ATG, the Golden Jubilee station representing the British Amateur Radio Teledata Group, BARTG. For both May and June the station will be operated by Arthur Bard, G1XKZ. Arthur will be very active during the last two months so look for him on all HF bands. Special QSL cards will be available and also plaques and certificates for reaching certain targets. The special call will cease operations on 30th June. Arthur will try to use both RTTY and PSK for those that would like contacts on both modes.

Finally, as has been widely reported, the new Solar Dynamics Observatory is now fully operational and beaming many exceptionally sharp and detailed pictures of the Sun back to Earth. It promises to make a major contribution to our understanding of the dynamics of the Sun, which affect radio propagation in so many ways. We look forward to drawing on this additional source of information over the years

****

NEWS FROM ARNEWSLINE

WISCONSIN CITY CHALLENGES 10 YEAR OLDS TOWER AND ANTENNA

A Wisconsin's pre-teen ham who suffers from cerebral palsy could loose his tower and antenna system over a dispute with the city. But the family of 10 year old Samuel Markstrom, KC9POP, is fighting back by saying that their sons hobby has changed his life by building his self confidence.

Village leaders say the Markstrom's didn't have the proper permits to build 62 foot tower that sits in their backyard in Mount Pleasant. But his mother Catherine Markstrom, KC9EOW, says that everything had gone in, to their knowledge very legally. She also notes that there are days when her son cannot get outside to play and he gets really depressed and upset. Now she is worried her son will have to give up his indoor hobby as well.

But the tower is opposed by at least one neighbour. News reports quote Eric Scott lives directly next door to the Markstrom's. He claims that he is worried that the tower could topple over while his own child was playing in

his yard. KC9POP's parents counter by saying the tower is rated to withstand hurricane force winds and that there isn't a danger.

In his on-line bio on QRZ dot com, Sam as he calls himself says that he is active in Boy Scouts as well as volunteering at WI9VCR, which is the Volunteer Centre of Racine County. He says that his favourite bands are 10 and 6 meters but he is also active in repeaters in the Racine, Kenosha and Milwaukee repeaters. And according to one news report, the fifth grader has also been active in public service by spreading the word about last

summer's Kenosha tornadoes. For that effort he was presented an award by the volunteer centre.

The future of the Sam Markstrom's tower will be decided by the Village of Mount Pleasant's zoning board in June.

COPPER THIEVES TAKE KC TV STATION KMBC OFF THE AIR

Copper thieves were responsible for taking Kansas City television station KMBC off the air last weekend . Police responding to a burglar alarm Sunday evening April 25th found a large section of 2 inch conduit cut away from the side of the transmitter building and green coolant spilled across the adjoining area.

The tubing was part of KMBC&#65533;(tm)s transmitter system that circulated coolant around two final amplifier tubes valued at close to $40,000. A sensor that detected the sudden loss in pressure shut down the transmitter. Whether the shutdown happened in time to save the tubes is a question that KMBC

Director of Engineering Jerry Agresti said won&#65533;(tm)t know until repairs are made to the cooling system and a thorough evaluation of the transmitter is done.

One thing Agresti says that he is sure of. Either the robbers knew exactly what they were doing or were incredibly brazen. The coolant used for the transmitters final amplifiers gets very hot and the burglars could have

easily been scalded by it.

DX

And talk about a long tongue twister of a callsign. SP2QCW, is operating as HF2010WECK in all modes on all bands during the World Enduro Championships off-road motorbike race. He will be active until June 30th. QSLs SP2QCW either direct or via bureau.

&#65533;&#65533;&#65533;

The return signal from the reflector was measured as a collection of individual particles, or photons, of laser light.

The researchers who discovered this long lost space artefact said "We quickly verified the signal to be real and found it to be surprisingly bright: at least five times brighter than the other Soviet reflector, on the Lunokhod 2 rover, to which we routinely send laser pulses,"

they went on to say "The best signal we've seen from Lunokhod 2 in several years of effort is 750 return photons, but we got about 2,000 photons from Lunokhod 1 on our first try. It's got a lot to say after almost 40 years of silence."

Denis Johnstone vk4ae tells us the John Moyle National Field day results for 2010 are on the WIA website. The 80 odd certificates will be issued later in the year. There are two sets of results on the website, a headline one in the contest text, and a full set of results as a downloadable PDF.

Worked All VK Shires
contest@vkshires.info
Audio by vk4ti.

It was a great start to the VK Shires and I am sure that many that entered had a great time.

We have only got to look through the logs to just so how many contacts were made and how many countries were racked up by the guys that got serious about it. I am sure that this year we are going to find that even more will be on board

A couple of very exiting things - the JAs have introduced their own logger for VK Shires a Japanese language logger and we also have VKCL giving us great support along with EI5DI and W3KM

So its been a great start for a new contest its been a very proactive arrangement with all the guys getting in there especially the keen operators. The contest is basically for anyone whether you are a foundation call or a standard call or a full call.

There are a couple of minor differences with the VK Shires - you can't operate in the DX window and 160 is also out - of course the warc bands are out.

Strategy wise - look for the JAs in the contest and make sure you work the 80 and 40 intra VK in the evenings.

After 25 years of service the Black Hill repeater VK1RAC on 146 900 MHz has been decommissioned.

The repeater started operation on MT. Majura and was subsequently moved to Black Hill the colimination tower for the NASA Tidbinbilla Deep Space tracking station.

The site has been declared redundant by NASA and is to be returned to its natural bush state.

As a result the repeater has become homeless. No plans have been formulated to either reinstate the repeater on another site or replace it at this time.

The final QSO on the repeater took place between Peter VK1NPW and Rob VK1ZQR, after a subtle click the repeater passed into retirement at 1345 Hrs on

the 4th may 2010

VK4

Dalby's VK4RET 146.675 is off air for a while so no news broadcasts.

There is a major reconstruction happening on Mt Kiangrow. New tower,
new antennas etc, repairs to building. No idea how long all this will
take and then when that part is all done they need obtain and attach a
suitable antenna to be able to receive the news again by RF from Brisbane.

Special Event Callsign - CG3ADML

Planned Modes of Operation - SSB, PSK31. 144mhz demonstration of email over
amateur radio and IRLP

Date of Event - One day 15 May, 2010 (0900 - 1700)

Location - Royal Canadian Legion Branch 231, Portland Ontario

GENERAL INFORMATION:

The purpose of this event is to celebrate the 100 Anniversary of the
RCN and highlight the contribution of Admiral, Sir Charles E.
Kingsmill in the establishment of the Royal Canadian Navy.

The second objective is to introduce Navy League Cadets, the Vice
Admiral Kingsmill Corps, to amateur radio.

Admiral, Sir Charles E. Kingsmill is buried in the Anglican Cemetary just
outside Portland.

WW SPECIAL INTEREST GROUPS --- DIGITAL
Australian Coordinator for TCPIP domains is Indy vk2xb@wia.org.au

Telephone DSL speed increases

Alcatel-Lucent Bell Labs say they can now send data rates of up to
300mbps down telephone lines.

They achieved 300mbps over at a distance of 400 metres and 100mbps over
1km by making use of "DSL Phantom Mode". This involves the creation of a
virtual or “phantom” channel that supplements the two physical wires that
are the standard configuration for copper transmission lines.

The increase in transmission capacity arises from the use of analogue
phantom mode technology in combination with industry-standard techniques:
vectoring that eliminates interference or “crosstalk” between copper wires,
and bonding that makes it possible to take individual lines and aggregate
them.

DSL services make use of the HF radio spectrum to send data over telephone
lines. There is no mention in the Alcatel-Lucent Bell Labs press release of
how much radio interference this new development could cause.

WW SPECIAL INTEREST GROUPS --- FINAL FRONTIER

AMSAT-VK UNOFFICIAL HF Net.
2nd Sunday each month.
April through October 1000 UTC 3.685 MHz
November through March 0900 UTC 7.068 MHz

AMSAT-NA VP Operations Drew KO4MA provides an update on the Amateur
Radio satellite AO-51.

On the AMSAT bulletin board he writes:

"AO-51 has now re-entered a period of eclipses that will reach almost
20 minutes by July. Since we've been in an extended period of continuous
illumination and very warm spacecraft temperatures, the next few weeks
will be spent determining what the batteries capacities are now.

Currently we are running 1.01 watt on 435.300 only, with the new PL mode on.
For this summer eclipse season, we are fortunate that the eclipsed periods
are while AO-51 is over mostly unoccupied Antarctica and surrounding areas.
This means when the batteries alone are supporting the transmitter, there are
not likely to be any users.

We have a downlink power management routine that we'll be implementing over
the next week or so. Downlink power may range from 2 watts in illumination,
to maybe as low as 300 milliwatts in eclipse. Using this, combined with the
PL, should mean we can protect the batteries from over-discharge, while still
providing the strongest possible downlink.

I'd like to encourage everyone to use the excellent reporting resource at
http://oscar.dcarr.org/

24 hour event coming up at St Helens, midnight Friday the 21st of May.

(David VK7DC)

THE LOWDOWN COLUMN INCLUDING PRECISION BEACON TRANSMISSIONS
BEACONS www.qsl.net/zl1bpu/micro/Precision

First ROS contact on 500 kHz

Graham G0NBD and Gary G4WGT have achieved the first contact on 500 kHz using
the data mode ROS.

The contact between Graham and Gary took place over a 30 mile path.

Initially they used ROS 500/16 mode and then the ROS "eme" mode. During the
contact power was reduced from 3 watts output to 30 mW. The antennas were
35ft top loaded whips.

Practical Amateur antennas for this band are very inefficient due to the
wavelengths involved. It can require 50+ watts transmitter output just to get
100 mW ERP. Efficient weak signal modes such as ROS can help extend the
range that is achieved.

Later in the evening, Jim M0BMU called Graham G0NBD using ROS 500/8 over a
distance of 200 miles. they had a 30 minute contact with 100% copy.

Download the latest version of ROS from
http://rosmodem.wordpress.com/

REWIND - A LOOK BACK IN HISTORY

Rewind a look back at our history through the serialised written history
by WIA Centenary Committee member Peter Wolfenden VK3RV with assistance of
others, that is being published in the WIA journal Amateur Radio magazine.

New regulations favour experimenters

The year 1922 saw the Australian Prime Minister William Hughes, regarded
as a good friend of the amateur experimenters, stated that a new regulatory
regime would be introduced.

In line with the approach adopted in other parts of the world, no restrictions
other than those to prevent interference, would be imposed.

Also rather than commercial interests having influence in enforcing the laws,
and the Navy controlling the spectrum, it would be the sole responsibility
of government officials.

The Wireless Weekly in reporting this development, comments that it was one of the best bits of news the experimenters have ever heard, making their outlook very much brighter.

The experimenters began using phone or voice transmissions that generated much public interest and led to the dawn of broadcasting.

In September 1922, the Sydney Metropolitan Radio Club organised Australia(tm)s first Radio Exhibition where the President, R.C. Marsden, demonstrated telephony reception.

Various forms of ?un-official? broadcasting by experimenters, including ?Radio Dances?, entranced the public and many of those involved in these transmissions were destined to play important roles in ?professional broadcasting?.

SB QNEWS @ WW $QNEWS100509
QNEWS - MAY 09 - VK4 ON AIR

DID YOU TELL ANYONE ABOUT AMATEUR RADIO THIS WEEK?

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP, and I've been
wondering who will join us in the amateur radio sandpit.

In marketing there is the old saw that if you lose a customer by bad service,
they will tell, say 12, people but if you satisfy a customer they will tell,
maybe 8. The figures vary as to who is telling the story but the principle
remains that it is easier to alienate people we don't know than it is to
recruit from that same area.

We have heard in WIA National News that to recruit the young we need to
think in more visual terms. The long term growth of the hobby may depend
on getting more younger recruits but think.....it is not only the youth but
the youthful minded who can join us. Have we really alienated our family
members, our workmates or have we not tried to share with belief and
enthusiasm?

One thing that we don't have details is the demographic of the hobby and the best areas of the community from which we can recruit. But one group that pops up are the newly retired, grey hair and all. Many of these people are looking for a new and engaging interest when the routine of the working life is past. Amateur radio certainly fits the grey nomad as well as the U3A student, the stay-at-home and the gad-about. Maybe we should share our enthusiasm more freely.

I'm, Geoff Emery and that's what I think....what about you?

CLUBBING -

Central Highlands in Central Queensland
http://au.groups.yahoo.com/group/charc/

The date for the famous and popular Central Highlands Amateur Radio Club AGM at Camp Fairbairn near Emerald has been announced.
CHARC Secretary Gordon VK4KAL has advised that the AGM will be on from 4pm Friday 17th to Midday Sunday 19th September 2010.
Find out more by contacting Gordon on vk4kal@wia.org.au

(no audio supplied)

GLADSTONE AR CLUB "Radio_Active".

www.treclub.org.au

VK4WAT ON AIR FOR THE "AM ON ANZAC DAY" EVENT.

G'day I'm Dale VK4DMC for the Tableland Radio and Electronics Club with news from TREC.

Last Sunday Week or so, ANZAC Day, our club set up a station for the "AM on ANZAC Day event" using the club call-sign VK4WAT.

The idea for the "AM on ANZAC Day" event was originally conceived by Mike Patterson VK4MIK as a way for amateur radio operators around Australia and New Zealand to recognise and honour the service of returned serviceman and women who served in the many conflicts that Australia has been involved with down the years.

TREC first went on air from the Rocky Creek War Memorial site at Rocky Creek, near Atherton, where a few radio contacts were made on 40 metres AM. We then moved to the Atherton War Cemetery and set up a field station again using

radio transmitting modes that were used by the armed services in many early conflicts.

We contacted many other amateur radio stations who were also on air using both AM and CW on the 20, 40 and 80 metre bands. Stations as far a field as Hawaii, San Francisco, were worked as well as many Australian stations including a special station that was set up at the Mareeba War-Birds at the Mareeba airport where three TREC members along with Mike VK4MIK and other amateurs made many contacts with other stations set up around Australia.

The event was a great success with many amateurs supporting it.

Mike has indicated that "AM on ANZAC Day" may well become an annual event.

- LEST WE FORGET -

GREETINGS ! AND TO ALL THE MUM'S LISTENING... "HAPPY MOTHERS DAY"...

THIS IS DON VK4FNQA, WITH NEWS FROM NORTH QUEENSLAND...
WITH A REMINDER THAT THE FAMOUS TARC PROJECT NIGHT IS
HAPPENING THIS TUESDAY EVENING FROM 7-30PM AT THE CLUB
ROOMS, ON TOP OF SES HEADQUARTERS, GREEN STREET WEST END...
ALL ARE WELCOME TO COME ALONG AND WORK ON A LATEST
ELECTRONIC PROJECT, OR HELP OUT WITH A CLUB PROJECT.
JUST REMEMBER TO SAY 'EUREKA' WHEN THE MAGIC SMOKE ESCAPES.

NOW, YOU DO NOT NEED TO BE A TIME LORD TO KNOW THAT
TIME IS RUNNING OUT !
IT IS NOW ONLY FOUR WEEKS AWAY UNTIL THE FAR NORTH
AND NORTH QUEENSLAND AMATEUR RADIO GATHERING
HAPPENING FROM 11TH TO 14TH JUNE OVER THE LONG
WEEKEND AT CARDWELL VILLAGE BEACHCOMBER MOTEL AND TOURIST PARK.

IT IS THE YEARLY GATHERING FOR THOSE FROM CAIRNS,
ATHERTON TABLELANDS AND TOWNSVILLE REGIONS PLUS
LOTS OF PLACES IN BETWEEN AND FAR AWAY.
ATTEND FNNQARG! AND HAVE A RELAXING TIME IN IDYLIC
SURROUNDINGS WITH HAM FRIENDS AND SUPPORT CREWS.
PARTICIPATE IN THE GREAT TREC TRIVIA CHALLENGE AND
HAVE A GO IN THE SUNDAY MORNING FNQ VS NQ CRICKET MATCH...
IT IS ADVISABLE TO RING RECEPTION AT THE PARK ON 1800 005633
TO BOOK YOUR ACCOMMODATION AS SOON AS POSSIBLE
AS THE LONG WEEKEND IN JUNE IS A VERY POPULAR TIME.
A WIDE MIX OF ACCOMMODATION FROM MOTEL TO VILLA
TO CAMPING IS AVAILABLE HOWEVER IT IS RUNNING OUT FAST.

HERE IS A MESSAGE NOW FROM THE REGION'S COMMUNICATIONS SUPPORT CO-ORDINATOR.

GAVIN VK4ZZ IS AFTER OPERATORS TO HELP OUT WITH THE MOUNT STUART KING
OF THE HILL HILLCLIMB HAPPENING ON SUNDAY MAY 30TH.
IF YOU CAN HELP OUT THEN PLEASE CONTACT GAVIN VIA MOBILE PHONE 0427 182469
OR AT ONE OF THE NETS OR MEETINGS DURING THE NEXT FEW WEEKS.

WELL, TIME HAS FLOWN AND THAT'S ALL FOR QNEWS FOR THIS SUNDAY NINTH OF MAY.

THIS HAS BEEN DON VK4FNQA IN BALMY TROPICAL PARADISE FOR THE TOWNSVILLE
AMATEUR RADIO CLUB INC, AND YOU HAVE BEEN LISTENING TO, AND ENJOYING
QNEWS FROM VK4WIA.

Kosta, UR5FFC, moving these evening to KN55 for QRL and try
activate EM65F. Kosta, UR5FFC, have an agreement with his friend
Alex, UR7FV, to use his country position for MS activity. He has
there FT-897 and 9EL F9FT vertical polarized and manualy rotate.
Kosta will try to be QRV tomorrow fm early morning till 04:00z fm
KN55dx, QTH - Prymorske. At 04z have qrl and leave for the job. He
dont know wether internet will work there, if not Kosta will use
random 1-st split 370/358. He have not permission to use his own
call and so he be qrv under special callsign EM65F. Than will come
back home after finishing his work at the evening tomorrow.

Depending on the work result it might be repeated for a more long
time after weekend... CU! 73!

The next DL1YMK EME Event will take place from Thursday, 13.05.10
until Sunday, 23.05.2010 - LATEST NEWS from the M&M Team, dated
2010-05-01: Hello lunatics, today we got a final Roger for the
customs procedure for importing our equipment (with the helping
hand of the German embassy), so we hope to be able to pass all
border controls with the car and the equipment. As we announced
earlier, we hope to get qrv under XX/DL1YMK from Thursday, 13.05
for 10 days on 70, 23 and 13 cm. It is a pity, but we didnï¿½t obtain
an allowance for 9 cm. As with our trip to OH0, the Aland isles, we
will not disclose the destination in order to give all interested
hams the challenge to decode the special call for themselves on a
truely random basis again. However, we made a timetable for the
bands showing the times of our moonwindows to give all the
possibility to check their mutual windows. Now make an educated
guess, hiï¿½.. The time table is available via the homepage of OK1DFC
who kindly set up a site for our oncoming DXpedition:
http://www.ok1dfc.com/Peditions/ymk10/ymk10.htm
The first day on each band will be in truly random, without
arranging skeds, however later skeds are possible. Please mail to
DL1YMK"at"aol.com for any sked requests, even in JT mode for smaller
stations, which missed us during the random activity. Please note:
during the DUBUS 23cm contest we will have only very short windows
to the US! Preferred frequencies: 432.045 - 1296.045 - 2301.975 (RX)
2304.100 (RX) / 2320.100 (RX/TX). We will start our trip on Monday,
10th of May as we need 2 days to our destination.

Founded by Eric Scace (K3NA) and Carsten Esch (DL6LAU) in 2007, Radio Expeditions, Inc is a permanent, non-profit organization of volunteers whose first project was the 2008 VP6DX record breaker expedition to Ducie Island. The second project is a DXpedition to Jarvis Island, which is planned to take place between 17 November and 1 December (depending on weather and sea conditions). The dates were chosen to maximize propagation openings on both low and high bands to Europe. A large group of operators will staff 12 stations on CW, SSB and RTTY on 160-6 metres. Applications for the required government permits have been submitted to the US Fish & Wildlife Service. No individual contributions are being solicited until the permits have been received.

==> HAMVENTION®: GET INVOLVED AT HAMVENTION!

As an 18-wheeler pulls away from the ARRL warehouse loading dock,
destined for the Dayton Hamvention® -- only a week away -- ARRL
Marketing Manager Bob Inderbitzen, NQ1R, looks on with a sense of
relief: "There go all of the supplies for our huge exhibit area -- ARRL
EXPO." In 2005, Inderbitzen helped introduce ARRL EXPO to Hamvention
where it has become a centerpiece of the event.

"ARRL EXPO is the place to meet ARRL program representatives and
explore the very best of our Amateur Radio Service," he said. "I am
excited about this year's planning that includes 20 exhibits and a team
of 140 volunteers, officials and staff. Our rallying message for all
radio amateurs is 'Get Involved.' Get involved in emergency
communications. Get involved in radiosport and contesting. Get involved
with a local school. And get involved with a radio club. If there's one
```

thing we know about radio amateurs, we know that the most active hams are involved and connected." The booths throughout the ARRL EXPO will help underscore the "Get Involved" message. Read more here <http://www.arrl.org/news/get-involved-at-hamvention>.

==> HAMVENTION®: JARL TO ACCEPT APPLICATIONS FOR IARU REGION 3 AWARD AT DAYTON HAMVENTION®

Representatives from the Japan Amateur Radio League (JARL <http://www.jarl.or.jp/English/0-2.htm>) will be accepting applications for the IARU Region 3 Operating Award <http://www.nzart.org.nz/awards/iaru-region-iii-log.pdf> at the Dayton Hamvention. JARL will forward the applications to the New Zealand Association of Radio Transmitters (NZART <http://www.nzart.org.nz/awards/iaru-region-iii-log.pdf>), the award administrator. NZART will then send applicants their award certificate with any endorsements after Hamvention. There are 35 available entities for the IARU Region 3 Award. Hams who present seven QSOs will be awarded the Basic Award. Hams who present 15 QSOs will be achieve the Silver Endorsement, while those who present 20 QSOs will receive the Gold Endorsement. The award fee is US $4 or four IRCs. Read more here <http://www.arrl.org/news/jarl-to-accept-applications-for-iaru-region-3-award-at-dayton-hamvention>.

==> IARU NEWS: AMATEUR RADIO EXHIBITION REFLECTS UNITY IN EUROPE: EUROPEAN RADIO SOCIETIES EXHIBIT IN EUROPEAN PARLIAMENT

Last week, representatives from various European Amateur Radio societies came to the Espace Léopold -- the European Parliament building located in Brussels, Belgium -- to provide information about the Amateur Radio Service to members of the European Parliament. Using the motto European Amateur Radio Benefiting Society, the event was sponsored by the IARU Region 1 EUROCOM Working Group and European Parliament Member (MEP) Birgit Sippel, who supports the goals and the socio-political importance of Amateur Radio. Before the event, she said it was her hope that the exhibition will offer the possibility for her colleagues to become informed about the Service: "I am very much looking forward to sharing information on this Amateur Radio Service with my colleagues, their assistants and anyone else who is interested." The European Parliament is the legislative body of the European Union (EU). Read more here <http://www.arrl.org/news/amateur-radio-exhibition-reflects-unity-in-europe-european-radio-societies-exhibit-in-european-parli>.

==> FOCUS ON CLUBS: MANY RADIO CLUBS COULD LOSE TAX-EXEMPT STATUS IN 2010

Changes made three years ago to the federal tax laws could cause many radio clubs to lose their tax-exempt status this year. Clubs that are tax-exempt under Section 501(c) of the Internal Revenue Code must file the required IRS annual returns or reports before the deadline, which is May 15 for those with calendar years.

"Many clubs have, at some time in the past, applied for tax-exempt status as charitable organizations under Section 501(c)(3), as civic leagues under Section 501(c)(4) or as recreational clubs using Section 501(c)(7)," said ARRL Southwestern Division Director Marty Woll, N6VI. "Years ago, any club with gross receipts averaging less than $25,000 per year was not required to file annual returns with the IRS; however, after 2006, such clubs had to file a Form 990-N, a simple 'electronic postcard' with minimal information, by the 15th day of the fifth month after the close of each fiscal year. Some clubs may not have been aware of this new requirement or didn't bother to comply. Even those that filed in a prior year may have neglected to keep up with the required filings as officers changed from year to year." Read more here <http://www.arrl.org/news/many-radio-clubs-could-lose-tax-exempt-status-in-2010>.

==> COMING UP IN QST: TAKE A LOOK AT THE JUNE ISSUE!

The June issue of QST -- our annual Field Day issue -- is jam-packed with all sorts of things today's Amateur Radio operator needs. From product reviews to experiments to contesting -- including a look at one of the ARRL Homebrew Challenge winners and an abundance of articles relating to Field Day, Amateur Radio's number one operating event -- the upcoming issue of QST has something for just about everyone.

If April showers bring mayflowers, and Mayflowers bring pilgrims, what does June bring? Why, ARRL Field Day of course! The June issue of QST is chock-full of articles all about Field Day. Gary Gordon, K6KV, tells readers how to put three transceivers on one antenna using a decoupling network in conjunction with bandpass filters in his article "HF Yagi Triplexer Especially for ARRL Field Day." Find out how Geoff Haines, N1GY, found a way to quickly install a portable mast for your Field Day antenna in "A Vehicle-Mounted Mast for Field Operating." ARRL Field Day means many different things to different hams, but no matter what, the day is your day to promote Amateur Radio. Warren L. Rothberg, W4WR, explains just how to do this in "Will the Real Field Day Please Stand Up?" And as much fun as hams have on Field Day, safety is always important. ARRL Field Day Manager Dan Henderson, N1ND, explains how you can be safe and still have loads of fun in "A Safe Field Day is a Fun Field Day." Jim Riley, KB9CYL, a long-time Field Day chairman shows how you, too, can have a successful Field Day in his article, "On 15 Years as a Field Day Chairman."

For only $28.36, Donald W. Huff, W6JL, built a 40 meter band 50 W linear amplifier for his QRP rig, taking the prize for the lowest cost entry in the ARRL's Homebrew Challenge II. Find out how to build this nifty amp in his article "Homebrew Challenge II Winner #1 -- The Lowest Cost Entry." QST Technical Editor Joel Hallas, W1ZR, understands that with today's technology, today's hams are not as concerned with receiver sensitivity as they once were, but sometimes too much of a good thing can be detrimental. Discover how to get top performance from your rig with his tips in "Receiver Sensitivity -- Can You Have Too Much?" Read a never-before-told account of how General George S. Patton

and the Allied Forces used top-level wireless intelligence messages -- codenamed ULTRA -- during World War II in Geoffrey Pidgeon's article "General Patton and His Use of ULTRA."

ARRL Contributing Editor Rick Palm, K1CE, takes a look at the Yaesu FT-250R and FT-270R handheld 2 meter FM transceivers in this month's Product Review. "The FT-250R and the FT-270R are well built and rugged, with plenty of audio for noisy environments," he reports. "The FT-270R has a larger display and keypad buttons and more features, but the FT-250R includes a desktop charger and sells for a bit less. Either of these radios would be a fine addition to your equipment belt." ARRL Technical Advisor Bruce Prior, N7RR, finishes his review of mass-produced dual-lever keyer paddles. This month, he takes a look at four paddles, two heavy keys of classic design and two low volume keys from newer companies: the Vibroplex Iambic Standard, the MFJ 564B Deluxe Iambic Paddle, the Vibroplex Code Warrior Junior, the Elecraft HexKey, the K8RA P-2 Key and the W5JH Black Widow Kit.

Of course, there are the usual columns you know and expect in the June QST: Hints & Kinks, The Doctor Is IN, How's DX, Vintage Radio, Hamspeak and more -- including a special ARRL Field Day advertising pull-out. Look for your June issue of QST in your mailbox. QST is the official journal of ARRL, the national association for Amateur Radio. QST is just one of the many benefits of ARRL membership. To join or renew your ARRL membership, please see the ARRL Web page <https://www.arrl.org/join-arrl-renew-membership/>.

==> ARRL FIELD DAY MERCHANDISE NOW AVAILABLE

<http://www.arrl.org/shop/Field-Day-Supplies/> How can you be the best-dressed ham at your Field Day site this year? When you wear the official 2010 ARRL Field Day shirt -- accompanied by the 2010 ARRL Field Day hat -- of course! Field Day -- Amateur Radio's largest on-the-air operating event -- is just a little more than six weeks away, so be sure to get your shirts, hats and pins, as well as the new ARRL Field Day Handbook for Radio Amateurs and coffee mugs before they run out. Field Day shirts are offered in sizes Small-4XL and are royal blue with the 2010 Field Day logo on the left chest; the back of the shirt says "Amateur Radio -- Goodwill • Service • Fun!" with www.arrl.org underneath. Fulfill all your Field Day apparel needs at the Field Day Supplies section of the ARRL Web site <http://www.arrl.org/shop/Field-Day-Supplies/>.

==> THE LAST TECH-PLUS LICENSE TO EXPIRE IN JUNE

In February 1991, the FCC dropped the 5 WPM Morse code requirement for new Technician licensees, and in 1994, it created a new class of Amateur Radio license: the Technician-Plus, also called Tech-Plus. This new license differed from the Technician license in that Tech-Plus licensees had passed the code test and had more operating privileges on HF. Patricia Phillips, N3IGI, of Pittsburgh, Pennsylvania, received her Technician licensee on June 12, 1990. On March 21, 2000, she upgraded

her license to Tech-Plus, and, at the same time, renewed her license, now set to expire June 12, 2010. This makes Phillips the last Tech-Plus in the FCC database. If she renews her Amateur Radio license, she will be a Technician. Read more here <http://www.arrl.org/news/the-last-tech-plus-license-to-expire-in-june>.

==> ARRL IN ACTION: WHAT HAVE WE BEEN UP TO LATELY?

This feature -- including convenient Web links to useful information -- is a concise monthly update of some of the things ARRL is doing on behalf of its members, including filing comments and replies with the FCC on a number of matters pertaining to Amateur Radio, launching our new Web site, organizing new operating events, preparing for WRC-12, offering more on-the-air options from W1AW and more. This installment covers the month of April. Read more here <http://www.arrl.org/news/arrl-in-action-what-have-we-been-up-to-lately-21>.

==> SEARCH FUNCTION CAPABILITY OPTIMIZED ON NEW WEB SITE

After a few adjustments, the search function on the new ARRL Web site -- powered by Google, the number one search engine in the world -- is fully operational. When you put a search term into the "Website Search" box, you have the option of searching by category -- News, Exam Sessions, Clubs, Hamfests, Contests, Licensing Classes, Special Events or Member Directory -- or just performing a general search. Results will show the topic and its summary. In the case of news articles or features, you will see the title and its first sentence or two. We are continually updating and tweaking features on the Web site. If you would like to recommend something, or if you encounter problems on the site, please click on the "Having Trouble? <http://www.arrl.org/support>" link, found at the bottom of each page on the Web site. Fill out the form fields; make sure that the Department Contact shows "Website Support." Someone will respond to you shortly.

==> SOLAR UPDATE

Tad "Beyond the fixed stars and variable suns and telescopic planets, astronomical waifs and strays <http://en.wikisource.org/wiki/Ulysses_%28novel%29/Chapter_17>" Cook, K7RA, reports: Sunspot activity made a strong return this week. Last Friday, April 30, sunspot group 1064 appeared and then faded after the third day. On Sunday, groups 1065, 1066 and 1067 appeared, and the next day group 1063 made reappearance, along with new group 1068. Group 1069 arose on May 4 and group 1070 on May 5. Group 1069 grew quickly and the sunspot number rose from 61 to 70, and then 77 on Wednesday. Wednesday's sunspot number is the highest it has been for Solar Cycle 24; in fact, it has not been to this level in nearly four years. The last time it was this high was back on May 28, 2006 when it was 78. Sunspot group 1069 has grown so much that it is 17 times the size of each of the other five sunspot groups. This level of activity should continue for the next few days. Along with increased sunspots, we saw

rising geomagnetic activity. The peak days were Sunday and Monday, when the planetary A index was 39 and 27, and the K index went as high as 6 over several three hour periods. Look for more information on the ARRL Web site on Friday, May 7. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" brought to you by James Joyce's Ulysses <http://en.wikisource.org/wiki/Ulysses_%28novel%29/Chapter_17> (Chapter 17).

==> SILENT KEY: NOTED DXER VINCE THOMPSON, K5VT

Dr Vinson Thompson, K5VT, passed away on April 26 from acute myeloid leukemia, diagnosed only four weeks before his death. He was 67. An ARRL Life Member and former Chairman of the ARRL DX Advisory Committee (DXAC), Thompson was famous in DX and contesting circles and held radio licenses from more than 60 countries. One of the founding members of the VooDoo Contest Group, he traveled extensively throughout Africa, as well as the rest of the world, and has operated from many African nations while practicing in-country as a surgeon with the World Health Organization (WHO). Read more here <http://www.arrl.org/news/noted-dxer-vince-thompson-k5vt-sk>.

==> SILENT KEY: FORMER HUDSON DIVISION DIRECTOR LINDA FERDINAND, N2YL

Linda Ferdinand, N2YL, passed away May 4 due to complications from chronic heart failure. She was 63. Ferdinand served as Hudson Division Vice Director from 1980-1982, and as Division Director from 1985-1987. She was an extremely proficient Morse code operator and was active in the ARRL National Traffic System at the local, section, region and area levels, as well as serving in the Transcontinental Corps. An ARRL Life Member, Ferdinand received an advanced degree in computer science and worked for IBM, transitioning their mainframe computers to large computers based on small microprocessors running in parallel. She was also a member of the ARRL A-1 Operator Club <http://www.arrl.org/a-1-op>, FISTS <http://www.fists.org/> and the Six Meter International Radio Club (SMIRK <http://www.smirk.org/>). Ferdinand was an avid quilter and lover of cats. She is survived by her husband Gary, W2CS, and son Brian, N2EKS, daughter Lauren and two grandchildren. Services are scheduled for 1 PM on Friday, May 7 at Medway Congregational Christian Church in Climax, New York. The family requests that contributions be made in Ferdinand's memory to AnimalLovers <http://www.animalovers.org/> (The Animal Welfare League of the Greater Capital District).

==> THIS WEEK ON THE RADIO

<http://www.arrl.org/multimedia> This week, the FISTS Spring Sprint is May 8.The CQ-M International DX Contest and the VOLTA WW RTTY Contest are May 8-9. Next week, the His Majesty King of Spain Contest (CW) and the Manchester Mineira All America CW Contest are May 15-16. The Run for the Bacon QRP Contest is May 17. All dates, unless

otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/special-events>.

==> SHOW YOUR SUPPORT FOR W1AW

To date, 872 donors have contributed $56,432 to the W1AW Endowment Campaign. This biannual fund is nearing its 2010 goal of $65,000. "Every contribution ensures the future of W1AW and the memory of Hiram Percy Maxim," said ARRL Chief Development Officer Mary Hobart, K1MMH. "Not only is W1AW one of the most recognized call signs in the world, it represents the history and traditions of Amateur Radio. Our members have been very generous so far and I'm confident that we will meet -- and surpass -- the goal." To donate to the W1AW Endowment Campaign, please visit the W1AW Endowment page <http://www.arrl.org/w1aw-endowment-fund> on the ARRL Web site. You may also send in your donation via mail to W1AW Endowment, ARRL, 225 Main St, Newington, CT 06111. Contact ARRL Chief Development Officer Mary Hobart, K1MMH, via e-mail <k1mmh@arrl.org> or by phone at 860-594-0397 for more information or with any questions you may have.

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

Registration remains open through Sunday, May 23, 2010, for these online course sessions <http://www.arrl.org/online-course-registration> beginning on Friday, June 4, 2010: Amateur Radio Emergency Communications Level 1; Antenna Design and Construction; Propagation; Analog Electronics, and Digital Electronics. To learn more, visit the CEP Course Listing page <http://www.arrl.org/online-courses> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/arrlletter/.

Amateur Radio Newsline(tm) Report 1708 - May 7 2010

Amateur Radio Newsline report number 1708 with a release date of
Friday, May 7, 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. Skywarn hams on alert as tornadoes hit in
mid-America, a solar wind brings DX to six meters, the first ever US
based 4 meter beacon comes on the air, a ham is arrested for allegedly
harassing police and fire communications in California and a Nebraska
radio club gets an unexpected reward for its public service during a
recent telephone outage. Find out the details on Amateur Radio
Newsline(tm) report number 1708 coming your way right now.

RESCUE RADIO: SKYWARN TEAMS ON ALERT AS TORNADOS HIT MID AMERICA

Skywarn volunteers supported local rescue radio operations during the
recent tornado outbreaks in Alabama, Arkansas, Mississippi and
Tennessee. This, as severe weather outbreaks developed in what the
Storm Prediction Center described as particularly dangerous situation
and prompting the activation of severe weather watches. Volunteers
like these hams near Little Rock, Arkansas, quickly went on alert:

--

Actual on-scene audio - hear it in the MP3 version of this weeks newscast
downloadable at www.arnewsline.org

--

Since April 24th, fifteen of the sixteen tornado related deaths were
recorded in Mississippi, Arkansas, and Tennessee with five coming at one
time in Choctaw County, Mississippi. During this severe weather outbreak
Skywarn volunteers provide ground intelligence to local emergency managers
and the National Weather Service.

Meantime, as part of their training, a German Skywarn Team is visiting the
United States this month. Their mission is to obtain information to use in
the continued development of a similar program in their home nation. So
far the team has visited the National Weather Center and is planning stops
at Emergency Management programs across the United States southern Great
Plains. (Story material and audio provided by KC5FM)

**

PROPAGATION: GEOMAGNETIC STORM BRINGS AURORA OPENING TO NORTH AMERICA

A high-speed solar wind stream hit Earth's magnetic field the night May 2nd and into the early hours of May 3rd. The eruption sparked a geomagnetic storm that lasted more than 15 hours, and bringing with it some interesting propagation.

In Scandinavia, the Northern Lights were so bright they could be seen through the glow of the midnight sun. Meantime, what's reported as a red colored aurora spilled across the Canadian border and were spotted in several Northern U-S states. Some good 6 meter auroral DX is reported to have accompanied the aurora.

Later in the day on May 3rd there was a major opening trans-equatorial opening to the Caribbean and South America DX Stations reported as heard or worked in eastern and central North America during the storm included P43JB on Aruba on 50.099 running CW, FM5CD in Martinique on 50.096 using CW, PJ2LS in the Netherland Antilles on 50.162 SSB and LU8YD in Argentina on 50.120 also on SSB.

Meantime a West to East E-skip opening brought the mountain states into southern California. Stations like K0DU were strong enough to be recorded off an FT-847 transceiver and an AEA loop only 6 feet off the ground at the Newsline studio. This, as he worked a station in grid square D M Zero 4. --

Actual off-air audio - hear it in the MP3 version of this weeks newscast downloadable at www.arnewsline.org

--

To the North, Dave Bernhardt, N7DB, in Boring, Oregon, says over the V-H-F Reflector that his first contact was at 17:11 UTC with Dave Wagner, W7CI at down in Sierra Vista, Arizona. He also heard beacons from California, Mexico and South America.

Perhaps the biggest surprise was the AM activity detected up on 50.4 MHz. While signals were far to weak to detect much audio or even get a callsign, the type of fading indicated them to be E-Skip and likely from the same regions being heard down the band on C-W and SSB.

In all it was a good day on the 50 MHz band for any ham who bothered to listen or call CQ. As we go to air, sporadic openings on 6 meters are still continuing. (ARNewsline(tm))

**

PROPAGATION TEST: NEW US BASED 4 METER BEACON ON THE AIR

A United States based 4 meter beacon is on the air, but its not a ham radio system. On Monday May 3rd , the 70.005 MHz beacon using the Experimental call WE9XFT took to the airwaves from Bedford, Virginia with a power level that may make it receivable in the British Isles and other areas of Europe.

The new beacon is the brain child of Brian Justin, WA1ZMS. Back in January Justin filed an application with the FCC for a Special Temporary Authority to operate a propagation beacon in the 4 meter band for domestic as well as trans-Atlantic reception tests. The FCC granted the request as a non-amateur experimental license since there isn't a 70 MHz Amateur band in the United States.

WE9XFT is running 3 kilowatts Effective Radiated Power on 70.005 MHz beaming towards Europe. It is operating 24 hours a day and the experimental license is valid until September 1st. Reception reports should be sent to Brian by e-mail to wa1zms (at) att (dot) net. (VHF Reflector)

**

ENFORCEMENT: HAM ARRESTED FOR MAKING ON AIR THREATS ON POLICE AND FIRE FREQUENCIES

Authorities have arrested a 29-year-old San Jacinto, California ham who investigators allege interrupted police and fire radio communications and made threats over the air during a two day period. Mark Abramowicz, NT3V, has been following the story and has more:

--

Police closed in on Irene Levy, KJ6CEY, just seconds after she made a transmission on a Hemet California police frequency using a commercial H-T.

Investigators from Hemet as well as Cal Fire say the unauthorized, random transmissions made from Levy's mobile home in San Jacinto went beyond nuisance calls. Hemet Police Sgt. Mark Richards was quoted by The Press-Enterprise newspaper in Riverside, California, as saying Levy disguised her voice as a man and made references to the deaths of police and firefighters and made bomb threats. He said some of the transmissions came during a Cal Fire search and rescue call, a major traffic accident, and a brush fire.

Richards report stated the transmissions began May 1 and ended in the early morning hours of May 3. Richards said in the report that direction-finding equipment helped locate Levy, who in one of her transmissions on May 2 suggested "police would never find her."

Richards report said that during the raid on her trailer, police seized 11 radios, seven scanners, radio frequency lists, computer equipment and miscellaneous radio gear. He says in the report they also seized Levy's Technician license, showing it had been issued in September 2009.

Levy was charged on suspicion of making terrorist threats, falsely reporting a bomb threat, and maliciously interrupting, disrupting, impeding or interfering with a transmission on a public radio frequency. Sources close to the investigation tell Amateur Radio Newsline that authorities believe Levy acted alone and without the knowledge of her husband, Michael, KE6ALV, who has been licensed since 1993.

On her (now removed) QRZ.com bio page, Levy claims to have a General Mobile Radio Service license, but the call sign is actually registered to her husband, Mike. Levy also claimed she monitored the Keller Peak repeater as well as the Hemet repeaters.

Levy says in that bio she was active on Citizens Band radio prior to getting married and described herself as a CB'er at heart.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V.

--

As this report is being prepared, Levy is being held in lieu of $50000 bail. Its unknown if she is represented by counsel. (ARNewsline(tm), published news reports)

**

ENFORCEMENT: FLORIDA UNLICENSED BROADCASTER FINED $10000

Still with enforcement news, the FCC has affirmed a $10,000 fine it had previously issued to Balthazard Senat. This for his alleged operation an unlicensed radio transmitter on 91.3 MHz in Orlando, Florida.

Back on March 2nd, the Commission's Tampa Office of the Enforcement Bureau issued a Notice of Apparent Liability for Forfeiture in the amount of $10,000 to Senat. Since that time Senat has not filed a response to the NAL.

On April 29th and based on the information before it, the FCC has affirmed the forfeiture and given Senat the customary 30 days to pay or to file an appeal. (FCC)

**

ENFORCEMENT: FCC GOES AFTER ILLEGAL CB AND UNWANTED REPEATER USERS

Since the beginning of the year the FCC's enforcement effort in the private radio area seems concentrated in two areas. These are violations of the Part 95 rules governing the 11 meter Citizens Radio Service and ridding repeaters of unwanted users in the Amateur Service.

A quick count of enforcement letters issued since January 1st shows nine warning notices sent to individuals for violations of Part 95. Most of these were for running overpowered transmitters on 11 meters that were causing interference to their neighbors home electronics. In each case the C-B operator in question was given 10 days to respond to the FCC and to outline the specific steps taken to bring that 11 meter CB station into compliance with the Commission's rules.

In the area of ham radio, four hams have received warning letters ordering them to stay off of various repeaters. In each case the FCC notes that the letter's recipient was requested by the repeater owner or control operator to refrain from using the system but either refused or failed to do so. So the Commission is now backing the system licensees and control stations by ordering the unwanted users to cease using the repeaters. If they fail to

heed the agency's enforcement warning they could face such penalties as a license modification proceeding to restrict the frequencies upon which a given ham may operate, a fine or even revocation of their Amateur Service licenses.

In going through the various warning letters we found none dealing with the situations on various frequencies on 75 and 20 meters that seem to be the talk of the amateur radio community. Nor was there anything mentioned in regard to collecting any fines previously issued to those the agency determined to be in violation of the Part 97 rules. The only non-repeater issue we found went to a ham accused of operating with a call other than the one assigned to him.

All of these letters are available to the general public on the FCC's Enforcement Web page. It can be found at http://www.fcc.gov/eb/AmateurActions/ (ARNewsline(tm))

**

BREAK 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the KC4HAZ Repeater Network serving all of Central Florida.

TAX LAW: IF YOU ARE A 501C RADIO CLUB YOU MUST FILE A FEDERAL TAX RETURN

If you are a radio club that holds federal government tax exempt status, listen up. You are in danger of loosing that standing unless you file a tax statement with the Internal Revenue Service by May 15th. So says the ARRL in a special bulletin issued earlier this week. Bruce Tennant, K6PZW, has the details of what federally tax exempt clubs have little time to do:

--

Changes made three years ago to federal tax laws could cause many radio clubs to lose their tax-exempt status this year. To protect themselves, clubs that are tax-exempt under Section 501(c) of the Internal Revenue Code must file the required IRS annual returns or reports before the deadline, which is May 15th for those organizations with corporate calendar years.

Many clubs have, at some time in the past, applied for tax-exempt status under Section 501(c)(3) as charitable organizations, Section 501(c)(4) as civic leagues or Section 501(c)(7) for recreational clubs. Years ago, any club with gross receipts averaging less than $25,000 per year was not required to file annual returns with the IRS. However, after 2006, such clubs have been required to file a Form 990-N. This is a simple postcard with minimal information. It is due by the fifteenth day of the fifth month after the close of each fiscal year.

Some clubs may not have been aware of this new requirement or didn't bother to comply. Even those that filed in a prior year may have neglected to keep up with the required filings as officers changed from year to year.

Well it turns out that Section 6033(j) of the Federal Tax Code provides that failure to file Form 990, 990-EZ or 990-N for three consecutive years results in revocation of an organizations tax-exempt status as of the filing due date for the third return. That filing date for calendar year 2009 is less than two weeks away.

If you are a club officer and are uncertain who is responsible for IRS filings or whether such filings are current, you should determine your fling status as soon as possible and take immediate steps to file the current and any missed prior-year IRS forms. Going forward, your club's board should assign the responsibility for compliance filings with a designated officer and document that responsibility in the written job description for the position so that subsequent holders of the office are made aware of the requirements. This is the only way to make certain that you tax exempt status remains in place.

For the Amateur Radio Newsline, I'm Bruce Tennant. K6PZW, in Los Angeles.

--

The bottom line: If you have questions about your club's status, you may wish to consult a Certified Public Accountant or other tax advisor versed in not-for-profit tax law. (ARRL)

**

RADIO LAW: NAB PRESIDENT SAYS NO TO FCC BROADBAND PLAN

A war, albeit right now only a war of words appears to be brewing between television broadcasters and the FCC. This over the latter's desire to reclaim spectrum from the former to be auctioned to wireless broadband providers. Amateur Radio Newsline's David Black, KB4KCH, is at the South-East bureau with more:

--

Terming the Federal Communications Commission's National Broadband Plan as the "great spectrum grab," National Association of Broadcasters president Gordon Smith told a broadcaster gathering at the now concluded NAB Conference in Las Vegas that that the spectrum reclamation portion of the plan was an example of unnecessary government intervention.

In what the trade press has described as a gloves-off keynote speech to the annual convention Smith told the audience that broadcasters were not a spectrum ATM, and that the government needed to do a thorough inventory of where the spectrum is, who has it, how it is being used. It also has to look carefully at compression technologies before squeezing broadcasters out.

Smith also said that the FCC plan does not recognize the lifesaving or lifeline values of broadcasting. He noted that the people who would be

most hurt by the new broadband plan are the disadvantaged and the elderly. He noted that fifteen percent of households rely exclusively on free, over the air television and that number appears to be growing in the post Digital Television transition.

The FCC wants another 120 MHz from television broadcasters within five years. Its proposing to get it via a voluntary program in which broadcasters would be compensated from some of the proceeds from the spectrum, which would be re-auctioned for wireless broadband. But the agency has also noted that it might unilaterally reallocate spectrum if broadcasters failed to cooperate.

But in interview a week earlier Smith signaled that he was going to be tough on the plan, which he has compared to an offer from the Mob that carries with it an implied threat.

--

The FCC believes that the current television broadcast spectrum is the best place for the expansion of broadband. If it cannot cut a deal with the broadcast community and acts unilaterally, the matter could wind up in the courts and bring broadband expansion to a halt for years. (Multichannel News)

**

ON THE NET: ALCATEL - LUCENT ANNOUNCE NEW HIGH SPEED DSL

Alcatel-Lucent Bell Labs say they can now send data at rates of up to 300 megabits per second down telephone lines. According to a press release the Lab achieved 300 megabits per second over at a distance of 400 meters and 100 megabits per second over 1 kilometer by making use of the so called "DSL Phantom Mode". This involves the creation of a virtual or "phantom
"
channel that supplements the two physical wires that are the standard configuration for copper transmission lines.

The increase in transmission capacity arises from the use of analog phantom mode technology in combination with other industry standard techniques. These are the vectoring that eliminates crosstalk between copper wires, and bonding that makes it possible to take individual lines and combine them.

This DSL services make use of the High Frequency radio spectrum to send data over telephone lines. There is no mention in the Alcatel-Lucent Bell Labs press release of how much radio interference this new development could possibly cause. To date DSL has had no impact on ham radio operations and there's little reason to believe this could change. (Southgate)

**

RESTRUCTURING: CAYMAN ISLANDS GET NEW HAM REGULATIONS

The Cayman Islands Governor in Cabinet has adopted a set of regulations to govern that nations amateur radio service, The effect of the new law will be to create a plan for the issuance of amateur radio licenses by the Cayman Islands Information and Communications Technology Authority to persons who have satisfied the certification process by way of examination of their knowledge and competence with respect to electricity and radio, including amateur radio apparatus.

The new rules also allow for the recognition of licenses issued by the United Kingdom and other countries which have agreed to grant, with respect to the Cayman Islands, reciprocal amateur radio operating privileges. Also they will ensure compliance with international standards, including the requirement that amateur radios be operated without any financial interest and at the same time minimize the likelihood of interference caused by, and suffered by, amateur radio operators.

These new regulations were developed in collaboration with the Cayman Amateur Radio Society. As an Information and Communications Technology Authority agent, the society will administer the examination for license applicants. The new regulations came into effect following their publication in the Cayman Islands Gazette on March 29th. (Via e-mail)

**

NEW PRODUCTS: CUBA UNVEILS FIRST DOMESTICALLY PRODUCED TRANSCEIVER

Cuba is going into the ham radio transceiver business. At least domestically. This as a prototype of new Caiguaran low cost 1.8 MHz transceiver was presented at the 8th Congress of the Cuban Ham Radio Federation.

The prototype transceiver was manufactured at one of the factories controlled by the Cuban Ministry of Informatics and Communications. It is designed to put out 20 watts on 160 meters but with additional hardware it can also operate on the 80 and 40 meter bands.

The Chair of the Cuban Ham Radio Federation is Pedro Rodriguez, CO2RP. He told the Cuban News Agency that the first 600 units are ready for delivery to Cuban amateur radio operators. The radios primary purpose is to help to support emergency communication in Cuba. (Southgate)

**

NEW PRODUCTS: WOUXON US TO INTRODUCE CHINESE BUILT HT AT HAMVENTION

If the information on the Hamvention Yahoogroups Reflector is correct, then there is a new player in town to rival Alinco, Icom, Kenwood and Yaesu in the dual band handheld radio competition for your dollar. The new company is called Wouxon dot US and their first radio for the United States market is their new model KG-UVD1P 2 meter and 70 centimeter Dual-Bander will be available at the Dayton Hamvention.

In a news release, Wouxon.US says that it will be at booth is #172, just inside the North Hall entrance and to the right. The company says that it will have 100 units plus accessories packed up and ready to go at a special

Hamvention price. The news release did not specify what that price will be, but from Hong Kong dealers advertising on eBay, these radios, complete with a rechargeable battery, desktop drop-in charger, auxiliary earphone and a belt clip seem to sell for an average of around $80 plus $40 shipping to the United States That said, few expect the price to be that low in a retail environment such as Hamvention or your favorite radio store.

The home company is Quanzhou Wouxun Electronics Co. Ltd. of Fujian, China. It says that the new ham radio dual bander has received FCC certification. It's approved as FCC ID: WVTWOUXUN04. More on the new radio is on-line at www.Wouxun.US (Hamvention Yahoogroups, Wouxon.US Web page)

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

THE CHANGING OF THE GUARD: FAMED DX'ER VINCE THOMPSON, K5VT - S.K

The changing of the guard in ham radio continues with word of the passing of famed DX'er Vince Thompson, K5VT who passed away on April 24th. Thompson was best known as a DX-peditioner known for activating many African countries, and a founder of the Voodoo Contest Group. A physician, K5VT trained doctors overseas on his trips, and practiced medicine in the Phoenix, Arizona area. Thompson also served as the ARRL Southwestern Division representative to the Leagues's DX Advisory Committee (ARRL)

**

THE CHANGING OF THE GUARD: FORMER ARRL SW DIVISION DIRECTOR GARY STILLWELL, KI6T -S.K.

And Gary Stillwell, KI6T, served as Southwestern Division Vice Director in the 1973 era when he was W6NJU has also become a Silent Key. Stillwell had relinquished the post when he moved to Sacramento in Northern California for his work with the California Transportation Agency also known as Caltrans. He was a well known DXer at the top of the DXCC honor roll. Stillwell was also the founder and original owner of The Radio Place, a Sacramento store serving the needs of that city's amateur radio community. (ARRL)

**

MOONBOUNCE: K1JT GIVES INITIAL KP4AO REPORT

One of the organizers of the recent EME operation using the 1000 foot dish in Arecibo, says the operation was a definite success. Amateur Radio

Newsline's Jim Davis has the details:

--

WSJT inventor Joe Taylor, K1JT, has provided a report on the recent KP4AO amateur radio moon bounce operation from the Arecibo Observatory in Puerto Rico.

According to K1JT, the wall of stations calling was simply incredible. A rough estimate suggests that the Arecibo group may have worked something like 20% of the callers potentially workable on SSB, 10% of those workable on CW, and only a few percent of those workable on JT65.

From Joe's memory he says that the log shows nearly 240 completed QSOs with some 57 DXCC entities, in a total of 8 operating hours. He notes that they made recordings of the whole 432 MHz EME sub-band for most of the time KP4AO was on the air. He says that in due course it will be possible to "tune the band again carefully picking out callsigns. If and when this is done he will be happy to post a list of received callsigns.

In the meantime Joe has some requests to all who took part in the operation. I f you worked KP4AO with a setup significantly smaller than is normally required for EME, please send him a short note describing your antenna, receiver, and transmit power. Or if you only heard KP4AO, please also send him a note describing your antenna and receiver. Joe's direct e-mail is k1jt(at) arrl (dot) net.

I'm Jim Davis, W2JKD.

--

Again, if you missed that e-mail address where to send your reports its k1jt(at) arrl (dot) net. (Southgate)

WORLDBEAT: UK PREPARES FOR DIGITAL RADIO SWITCHOVER

The United Kingdom's Digital Economy Bill which will force all analog radio off the air in coming years has become law. The move came barely a week after a British Parliament's House of Lords report questioned the wisdom of moving all national and regional radio broadcasting to Digital Audio Broadcasting. It echoed many criticisms voiced over the bill, which is likely to consign all FM and AM radios to landfill in five years, except for listening to ultra-local FM stations.

But digital radio switch-over arguments are unlikely to cease for long time. This is because the new law constructs a framework of conditions rather than fixing a date. It requires Digital Audio Broadcasting coverage and listening-share to reach a certain level before FM switch-off can be initiated. This in turn will be followed by a delay before the transmitters are actually turned off. (Electronics Weekly)

HAM RADIO IN SPACE: BEQUEST WILL HELP LAUNCH FUNCUBE

Great Britain's Radio Communications Foundation has announced that it is handling a legacy donation that will help fund the AMSAT-UK FUNcube project. This grant to the Foundation stipulates that the funding must be used for the development of a suitable amateur satellite project.

So the Radio Communications Foundation went looking for a suitable candidate. It found what it was looking for in a proposal from AMSAT-UK to use the inheritance to help with the FUNCube educational project that has the aim of educating young people about radio, space, physics and electronics.

By way of background, FUNcube is the first ever cubesat designed to benefit young spectators and is expected to be the first British cubesat to reach space. Its target audience consists of primary and secondary school children. The FUNcube satellite itself will feature a 145 MHz telemetry beacon that will provide a strong signal for the students to receive.

A tentative launch date is sometime this fall. This, after FUNcube completes its flight readiness review. (Southgate)

**

HAM RADIO IN SPACE: THE SMALL SATELLITES SYMPOSIUM

The Small Satellites Systems and Services Symposium takes place in Madeira, Spain, from May 31 to June 4, 2010 and this year features a CubeSat Workshop. This biennial event covers all aspects of small satellite programs such as flight experiences, mission definition, technologies, launches, ground segment and data exploitation. An abstract of the papers to be presented can be seen in PDF format at tinyurl.com/2423paz. (AMSAT-UK)

**

WORLDBEAT: NEW 10 METER FM REPEATER IN PORTUGAL

A new 10 meter FM amateur radio repeater has come on the air in Portugal. Sponsored by the Ham Radio Association of Beira Alta, CQ0HAR operates on European repeater channel RH4 with an input of 29.5 and an output of 29.6 MHz. A 67 hertz CTCSS tone is required for access CQ0HAR. More on the system is on-line at www.ct1arb.com (EC1AME)

**

DX

In DX, PA7JWC, will be active as 3B8/PA7JWC from Pereybere, Mauritius Island (AF-049) between May 5-22nd. Activity will be on the HF bands and 6 meters, using CW, SSB, RTTY and PSK31. QSL via the LoTW or to his home callsign direct or by the Dutch QSL Bureau.

DF5AU will be active portable H B Zero from Lichtenstein through May the 12th. His operation will be on the HF bands using CW and SSB with his focus on 80 meters. QSL via his home callsign.

IK8HCG will be active as IB0R from Ventotene Island during the RSGB Islands on the Air Contest July 24th and 25th. QSL via his home callsign, direct only.

Lastly, listen out for Bulgarian special event station LZ2010KM to be on the air through May 31st. This activity is to celebrate St. Kiril and Methodius' Day. Operations will be on all bands and modes. QSL to LZ1BJ, by the Bureau (preferred). Logs will be uploaded to LoTW.

(Above from various DX news sources)

THAT FINAL ITEM: WINDSTREAM COMMUNICATIONS DONATES $5000 TO LINCOLN ARC

And finally this week an old adage that says do good to others and it will be repaid in droves has come true for one radio club. A club that has long been known for its dedication to public service. Bill Pasternak, WA6ITF, is here with the details:

--

Windstream Communications has announced that it is donating $5,000 to Nebraska's Lincoln Amateur Radio Club. This, in appreciation of the group's communications support to residents and the Lincoln-Lancaster County 911 center during the telecommunications outage that took place back on April 1st.

As previously reported, the outage occurred after an upgrade to an internal timing system in a switch that hosts the 911 routing system. Roughly 36,000 customers lost landline phone service. The failure of the routing switch interrupted 911 service for cell phones and landlines in at least a dozen counties for nearly 15 hours, forcing authorities to take reports in person and by e-mail. It also caused a callout of local ARES and Lincoln Club members who were stationed on street corners and at strategic public service agencies as a replacement for the interrupted 911 service.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the newsroom in Los Angeles.

--

Windstream Communications announced the $5000 donation to the Lincoln Amateur Radio Club on Monday, May 3rd. At same time its spokesman said that the company had determined that timing cables were not in conformance with industry and company specifications. As a result, this had caused the phone system outage. (Lincoln Journal-Star, K0NEB)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is

newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

Before we go, a reminder that the nominating period for the 2010 Amateur Radio Newsline Young Ham of the Year Award closes on May 30th. That gives you only a few short weeks to nominate a deserving teen or pre-teen radio amateur for this yearly ham radio honor.

Each year, we here at the Amateur Radio Newsline in association with Vertex Standard Corporation -- the makers of Yaesu brand ham radio gear -- and CQ Magazine combine to honor a ham radio operator age 18 or younger for his or her contributions to ham radio or to society itself through ham radio.

All nominations and materials required by the official rules must be received by Amateur Radio Newsline no later than midnight on May 30th. Both "mail-in" and electronic submissions are being accepted this year. Full rules and a downloadable nominating form are now on our website at www.arnewsline.org. Just scroll down until you see "2010 Young Ham of the Year Awards Now Being Accepted" and click on the word "here" to download the directions and the form. You can also leave questions and comments on the official Young Ham of the Year Award page on Facebook dot com.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Don Carlson, KQ6FM, saying 73 from Reno, Nevada, and we thank you for listening.

GB2RS NEWS

Sunday 9th May 2010

The news headlines

European Parliament amateur exhibition on YouTube

New 80m news reading for GB2RS

Lands End to John O'Groats with amateur radio

Jan, ON7UX has placed on YouTube his video report on the ARISS School Contact in the European Parliament and the visit of three astronauts to the Exhibition Amateur Radio Benefiting Society. This Exhibition, centred on Emergency, Education and Space, was a joint venture of IARU Region 1 and European Space Agency.

Effective today, Sunday 9 May, the RSGB is pleased to announce that an 80 metres news reading is being re-introduced for listeners in Northern Ireland and the Isle of Man. David, GI4FUM, who has been a newsreader in the past, will make the first reading today at 1000 hours local time on 3640kHz LSB. The readings will continue each Sunday at this time and Bobby, MI0RYL has also agreed to be a reader. She is located in Craigavon, whilst David is in Muckamore. Club Secretaries and event organisers are asked to submit their news items regularly to RSGB HQ using the e-mail address gb2rs@rsgb.org.uk.

Chris, G8RBW is travelling between Lands End to John o'Groats three times this year with an ICOM 2820, ICOM 706MKIIG and ICOM 92D in his van. He's a tour leader for the Cyclist's Touring Club, escorting about 22 cyclists each time. About half of the cyclists are doing it for various charities. The first trip is 15 May to 2 June. Chris hopes to work through FM and D-Star repeaters along the way.

Anyone fancy a visit to Mozambique in October? David, GI4FUM is running a DXpedition to Bilene, which is a costal resort on the Indian Ocean 150km north of Maputu. They fly out from Heathrow on 13 October to Johannesburg and drive up to Mozambique and plan to run a station for Jamboree on the Air with local scouts on the weekend of 16 and 17 October. The DXpedition will enter a station for CQWW SSB over the weekend of 30 and 31 October. There will be plenty of opportunity for individuals to operate under their own C91 callsigns and if you fancy sun bathing on an Indian Ocean beach in late African spring there will be plenty of opportunity for that too. There are a few places on the team still available. If you want further details check out the CQ-DX

African Safaris website at http:/www.3da0ss.net.

And now for the details of rallies and events for the coming week

Today, 9 May, the Magnum Radio Rally takes place at Magnum Leisure Centre, Harbourside, Irvine, Ayrshire, KA12 8PP. Doors open at 10.30am and entry is ?4. There will be trade stands, a Bring & Buy, free car parking, special interest groups and catering. Details from Helen, MM0HLN, on 0787 332 7597.

The Dayton Hamvention takes place at the Hara Arena, Dayton, Ohio, in the USA between 14 and 16 May. Many UK companies and special interest groups will be represented at the 3-day event. More details at www.hamvention.org.

Slightly closer to home, the Neuhofen Rally in Lower Austria takes place on 15 and 16 May. It offers the usual attractions like trade stands and flea market. More details at www.oaft.com.

Now for the news of special events

To mark the 10th anniversary of the closure of the world's largest maritime radio station, Portishead Radio, GB10GKA is being activated until 27 May. Hours of operation will be dependent on individual operator's free time and operation will be primarily on CW. Tony, G3ZRJ will operate from 7 to 13 May from this QTH near Hereford. Special Anniversary QSL cards will be produced to mark this historic event, eQSL will also be used. Certificates for contacting GB10GKA on more than four HF bands will be available. Contact Tony Roskilly, G3ZRJ by e-mail at g3zrj.morsekey@btinternet.com.

GB6CW will be on the air from Cromer Windmill near Stevenage in Hertfordshire today, 9 May as part of the Mills on the Air weekend.

Today, 9 May, Cray Valley RS will be taking part in the National Mills weekend celebrations with Mills on the Air special event station GB6MW from Meopham windmill in Kent (JO01EI).

Today, 9 May, PD6MILL will be on air from the WindMill De Eendracht in The Netherlands. QSL via PD7BZ.

345. [RAC-Bulletin] Guides 100th Anniversary Rally (May 15 2010)

Newsgroup: rec.radio.amateur.misc
Date: 2010-05-07 20:59:56 UTC
From: rac-bulletins@eton.ca
Message-ID: <4BE47F1A.7020408@rac.ca>

On May 15th Guides Canada will celebrate their 100th Anniversary conducting Rallies across Canada, many of the venues will be operating GOTA (Guides on the Air) stations, in Toronto over 6000 guides and leaders will meet at Ontario Place. In cooperation with Guides Canada and Emergency Management Ontario the Toronto EmComm Group will be establishing an Amateur Radio Station at Ontario Place so Guides can talk to Guides at other venues across Canada, venues in Ontario include; Toronto, Thunder Bay, Sudbury and Ottawa.

The Ontario Place station will be operational on 20 meters (14.140 -/+) and on the Ontario Public Service Reflector (IRLP) Channel 9035 from 13:00 to 20:00 UTC. (9:00 am to 4 pm ET). We would like to connect with other venues across Canada on this special day for Guiding and would like to here from other groups running GOTA stations.

SARL NEWS - SUNDAY 09 MAY 2010

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a webstream, visit www.sarl.org.za, click on ARMI and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe there to receive future bulletins by email.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 10,130, 7,066 and 3,695 MHz SSB.

SILENT KEY

It is with regret that the South-Cape Amateur Radio Club must announce that the key of Joseph Rozploch, ZS2JSR, went silent on Saturday morning the 24 April due to a fatal heart attack whilst he took his dog for a walk. ZS1SKR and the SARL passes their condolences to all family and friends.

SARL COUNCIL PORTFOLIOS

SARL RTA TO OFFER THREE NEW CONSTRUCTION KITS

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

JOIN THE SARL NOW AND GET MAY AND JUNE FREE

Join the SARL now and get May and June on the house. The membership fee for the 2010/2011 year is R360 for full members and R225 for Senior members. The Annual General meeting held in Port Elizabeth in April approved a marginal increase in the membership fees. The new rates are now available on www.sarl.org.za . A significant change is the affiliation fee for clubs. It has been reduced to R120 per year. If your club is not yet affiliated to the SARL do it now. Contact Mariska at 011 675 2393 to join now or get the form online.

SARL COUNCIL AGREES ON PORTFOLIOS
